## Disposable Products Manufacturing Handbook

(Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial Tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles)

Everyday life products manufacturers worldwide produce a multitude of items that are intended for one use only. A disposable is a product designed for a single use after which it is recycled or is disposed as solid waste. The term often implies cheapness and short-term convenience rather than medium to long-term durability. The term is also sometimes used for products that may last several months distinguish from similar products that last indefinitely.

The fast moving life and modernization simultaneously lead to the necessity of disposables in one's life. One cannot wash utensils all the time, neither can afford to arrange fine and good cutlery of glass or steel in a party for the guest. At such times, people rush for the disposables available in the market with variety of colors and designs.

For a manufacturer, to produce disposables is a good deal keeping in view the present demand and growth in the market. This handbook is a complete well to do package for a layman to understand the basic steps to be followed for setting up a plant for a particular disposable product. The book contains raw material details, product manufacturing process, machinery details, images with raw material and machinery suppliers.

The Disposable Products Manufacturing Handbook is about producing Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles that are used by masses in their day to day life. This well-established text provides a comprehensive coverage of the manufacturing processes adopted to manufacture various disposable products. It gives a holistic view of products produced, which has inputs from diverse fields. The book discusses the importance and objectives of processes and material used for the production of disposable products. Many examples have been provided to illustrate the concepts discussed.

## 1. INTRODUCTION

Plastic

Polypropylene

Polystyrene (PS)

Different Types of Disposable Products in Market

Pet Bottles  
Thermocol & Its Products  
Paper Cup  
Plastic Cutlery  
Facial Tissue, Wet Wipes and Toilet Rolls  
Plastic Cups  
Disposable Banana Leaf Plates  
Baby Diaper and Sanitary Napkin  
Diaper  
Sanitary Napkin

## 2. PLASTICS

Introduction  
Composition  
Additives  
Classification  
Thermoplastics & Thermosetting Polymers  
Other Classifications  
Biodegradability  
Natural vs. Synthetic  
Crystalline vs. Amorphous  
Properties of Plastics  
Toxicity  
Plastics & Their Uses

## 3. THERMOPLASTIC

Stress Strain Graph of Thermoplastic Material  
Acrylic  
Nylon  
Polyethylene  
Polypropylene  
Polystyrene  
Polyvinyl Chloride  
Teflon  
Properties of Various Thermoplastic Products

## 4. THERMOSETTING PLASTIC

Process  
Properties and Their Uses  
Examples

## 5. POLYETHYLENE

Structure of Polyethylene  
Process  
Monomer  
Polymerization  
Production of Polyethylene  
From Naphtha  
As a Gas

Properties  
Physical Properties  
Chemical Properties  
Classification  
LDPE  
Properties  
Chemical Resistance  
LDPE Quick Facts  
Production of LDPE  
Applications  
LLDPE  
Production and Properties  
Processing  
Properties  
Physical Properties  
Application  
HDPE  
Properties  
Physical Properties  
Chemical Properties

HDPE Quick Facts  
Production of HDPE  
Applications  
Properties Comparison Chart for LDPE and HDPE  
Processing Polyethylene into Products  
The Making of Molded Products  
The Making of Foil  
The Making of Multi-Layer Foil  
The Making of Sheets  
The Making of Foam Applications for Insulation  
Additions  
Joining

## 6. POLYETHYLENE TEREPHTHALATE (PET OR PETE)

Production  
Dimethyl Terephthalate Process  
First Step  
Second Step  
Terephthalic Acid Process  
General Process Involved in the Manufacturing of PET  
Properties  
General Properties  
Application  
Sustainable  
Polyethylene Terephthalate Films  
Intrinsic Viscosity  
A PET soft drink bottle  
Fiber Grade  
Film Grade  
Bottle Grade  
Monofilament, Engineering Plastic

Property Chart for PET  
Drying of PET  
Copolymers  
Degradation  
Acetaldehyde  
Antimony  
Safety  
Bottle Processing Equipment

## 7. POLYPROPYLENE

Chemical and Physical Properties

Polypropylene Resistance

Polypropylene Quick Facts

Polypropylene Fabrication

Degradation

Synthesis

Industrial Processes

Manufacturing

Properties & Applications

A Common Application for Polypropylene is as Bi-Axially Oriented Polypropylene (BOPP)

Other Useful Properties

PP Structure

PP Parameters

Basic Types of PP

Crystallinity

Presence of Selected Additives during Polymerization

Antioxidants and Stabilizers

Nucleants and Clarifiers

Antistatic Agents

Chemical Resistance

Stress Cracking Resistance

Permeability

Organoleptics

Notch Effects

## 8. POLYSTYRENE

Structure

Polymerization

Atactic Polystyrene

Syndiotactic Polystyrene

Properties of Polystyrene

Properties of Polystyrene

Physical Properties

Mechanical Properties

Optical Properties

Thermal Properties

Electrical Properties

Chemical Properties

Uses

Strength, Durability, Comfort, Safety

Applications of PS

- Packaging
- Appliances
- Consumer Electronics
- Construction
- Medical
- Other
- Degradation
- Biodegradation
- Incineration
- Forms Produced
- Sheet or Molded Polystyrene
- Disposable Polystyrene Razor
- Foams
- Expanded Polystyrene
- Extruded Polystyrene Foam
- Fused Cell Expanded Polystyrene Foam
- Copolymers
- Oriented Polystyrene

## 9. INJECTION MOULDING

- Process Characteristics
- Advantages of Injection Molding
- Disadvantages of Injection Molding
- Applications
- Examples of Polymers Best Suited for the Process
- Equipment
- Mold
- Injection Molding Die with Side Pulls
- Mold Design
- Mold Storage
- Tool Materials
- Machining
- Cost
- Injection Process
- What is Injection Molding Cycle?
- Different Types of Injection Molding Processes
- Process Cycle

- Mold Base
- Mold Channels
- Mold Design
- Materials
- Tolerances and Surfaces
- Power Requirements
- Molding Defects
- Silver Streaks
- Short Shot
- Jetting

Flow Marks  
Color Streaks  
Weld Lines  
Flash  
Delamination  
Stringiness  
Sink Marks  
Warping or Twisting

## 10. EXTRUSION MOULDING

Types of Extrusion  
Plastic Extrusion  
Single Screw Extrusion Machinery  
Extrusion Dies  
Screw Design  
Cooling and Sizing Equipment  
Pros and Cons of Extrusion Molding  
Pros  
Cons  
Defects

## 11. COMPRESSION MOULDING

Process Definition  
Process Characteristics  
Process Schematic  
Pros & Cons of Compression Moulding  
Pros  
Cons

## 12. BLOW MOLDING

Typologies of Blow Molding  
Extrusion Blow Molding  
Continuous Extrusion Equipment  
Intermittent Extrusion Machinery  
Advantages of Blow Molding  
Disadvantages of Blow Molding  
Spin Trimming  
Injection Blow Molding  
Disadvantages  
Injection Stretch Blow Molding Process

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
