

# Manufacture of Thinners & Solvents (Properties, Uses, Production, Formulation with Machinery Details) 2nd Edition

**Author:** NPCS Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 9789381039960

**Code:** NI306

**Pages:** 296

**Price:** Rs. 1,875.00 US\$ 50.67

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

Solvents are defined as chemicals compound that are introduced during manufacture of the paint itself and before packaging, in order to maintain all components of the paint in a liquid / viscous state such as we know it. A solvent is usually a liquid but can also be a solid or a gas. Solvents find various applications in chemical, pharmaceutical, oil, and gas industries, including in chemical syntheses and purification processes.

Thinners are defined as chemical compounds that are introduced into the paint prior to application, in order to modify the viscosity and other properties related to the rate of curing that may affect the functionality and aesthetics of the final layer painting. Paint thinner, a solvent used in painting and decorating, for thinning oil-based paint and cleaning brushes. A Thinner may be a single solvent or a combination of solvent types. Often, specific thinners are required by the manufacturer of a coating to prevent damage to coating properties that may occur when an inappropriate thinner is used.

Solvents (for cleaning up or softening) and Thinners (for diluting or extending) are useful not only in painting but in other areas such as Wooden Furniture industry, Automobile industry, Ink industry, Rubber industry. As the paint industry is a major consumer of Thinners & Solvents, and is expanding at a tremendous speed, it is very obvious that the demand of thinners, too, will increase tremendously. The paints & coatings accounts for the largest share in the aliphatic hydrocarbon Thinners & Solvents market. It is also projected to be the fastest-growing application of the aliphatic hydrocarbon Thinners and Solvents market.

The book contains Properties, Uses, manufacturing of Thinners & Solvents and providing information regarding thinner formulation. It also covers raw material suppliers, photographs of plant & Machinery with supplier's contact details. Some of the fundamentals of the book are thinner in Paint Industry, Health and Safety Measures of Chemicals, Pollution Control, Waste Disposal of Hazardous Chemicals and Storage, Labelling and Packaging of Chemicals etc.

It will be a standard reference book for professionals and entrepreneurs. Those who are interested in this field can find the complete information from manufacture to final uses of Solvents and Thinners. It will be very helpful to consultants, new entrepreneurs, technocrats, research scholars, libraries and existing units.

## Contents

### Table of Contents

#### 1. SOLVENTS

##### Classification of Solvents

Boiling Points  
Rates of Evaporation  
Polarity  
Industrial Applications  
Use  
Chemical Composition  
I. Organic Solvents  
II. Inorganic Solvents  
Chemical Structure  
Behavior Toward Magdala Red

## 2. APPLICATION OF SOLVENTS

## 3. PROPERTIES OF SOLVENTS

Introduction  
Molecular Weight  
Boiling Point  
Freezing Point  
Density  
Liquid Expansion Coefficient  
Surface Tension and Absolute Viscosity  
Flash Point and Explosive Limits  
Autoignition Temperature  
Electrical Conductivity  
Immediate Danger to Life and Health

## 4. ENVIRONMENTAL, HEALTH AND SAFETY REGULATION

FireExplosive Peroxide Formation  
Health Effects  
Ways Solvents Can Enter Your Body  
Absorption  
Swallowing  
What Are the Warning Signs?  
Acute Poisoning  
What to Do  
Chronic Poisoning After Years of Repeated  
Exposures, the Typical Later Effects are  
What to Do  
How Solvents Affect the Skin  
What to Do  
How Much Exposure is Bad for You?  
Environmental Contamination  
Duties of Employers and Employees  
Material Safety Data  
Training

## 5. MANUFACTURING PROCESS OF SOLVENT

## 6. USES OF SOLVENT IN VARIOUS INDUSTRIES

Adhesives and Sealants  
Common Use of Adhesive in Various Industry  
Sealants  
Common Use of Sealants in Various Industry

Aerospace  
 Acetone  
 Alcohol  
 Benzene  
 Methyl Ethyl Ketone (MEK)  
 Methylene Chloride  
 Toluene  
 Turpentine  
 Mineral Spirits  
 Naphtha  
 Linseed OilAsphalt Compounding  
 Biotechnology  
 Biotransformation Using Solvent-Tolerant  
 Microorganisms  
 Solvent-Resistant Microorganisms  
 Process of Solvent Toxicity for Microorganisms  
 Choice of Solvent for Enzymatic Reaction in  
 Organic Solvent  
 Low Water Systems  
 Classification of Organic Solvents  
 (1) Water-Miscible Organic Solvents  
 (2) Water-Immiscible Organic Solvents  
 (3) Water-Insoluble Organic Solvents  
 Classification of Solvents Commonly Used for  
 Enzymatic Reactions in Organic Media  
  
 Properties of Enzymes Affected by Organic  
 Solvents  
 Thermal Stability (Half-Life),  $t_{1/2}$   
 Specificity and Selectivity,  $K_{cat}/K_m$   
 Coil Coating  
 Cosmetics and Personal Care Products  
 Electronic Industry  
 Cleaning in Electronics Manufacturing  
 Factors Affecting Cleaning  
 Dry Cleaning  
 Drycleaning Solvents  
 Petroleum Drycleaning Solvents  
 Dry Cleaning Processes  
 Solvent Storage Tanks  
 Detergents  
 Process of Cleaning  
 Textile Finishing  
 Waterproofing  
 Milling  
 Antistatic Finishing  
 Fabricated Metal Products  
 Machining OperationsMetal Parts Cleaning and Stripping  
 Solvent Cleaning  
 Aqueous (Alkaline and Acid) Cleaning and  
 Stripping  
 Abrasive Cleaning and Stripping  
 Water Cleaning

Waste Streams  
Food Industry  
Mechanical Extraction  
Solvent Extraction  
The Solvent Extraction Process  
Flow diagram of Oilseed Extraction Process  
Review of Solvents Studied for Extraction  
Efficiency  
Iron Steel Industry  
List of Solvents Releases from the Iron and Steel  
Industry  
Uses of Solvent in Ship Industry  
Cleaning Operations Using Organic Solvents  
Pulp and Paper

Printing Industry  
Pharmaceutical Industry

## 7. ACETONE

Uses  
Older Production Methods  
Uses of Acetone  
Uses of Acetone in Cosmetics  
Uses of Acetone in Laboratory  
Uses of Acetone in Electronics  
Uses of Acetone in Domestic Purpose  
Acetone Manufacturing Process  
Production  
Wacket-Hechst Direct Oxidation of Propene  
Co-production in Hock Phenol Process

## 8. CITRUS TERPENES

Properties of Terpenoids  
Citrus Terpenes for Cleaning  
d-Limonene  
Manufacturing Process

## 9. ETHYL ACETATE

Production  
Formula and Structure  
Applications  
Technical Overview  
Production of Ethyl Acetate

## 10. INDUSTRIAL ALCOHOL

Introduction  
Manufacture  
1. Bymalt Fermentation  
Manufacture Process

## 11. TETRACHLORETHYLENE

Manufacturing Process  
Chlorination of Ethylene Dichloride  
Physical and Chemical Properties

Structural and Molecular Formulae and Relative  
Molecular Mass

## 12. TOLUENE (METHYL BENZENE)

Structure and Formula

Various Manufacturing Process of Toluene

Alternate Catalytic Reforming Processes

Physical and Chemical Properties of Toluene

## 13. TURPENTINE

Extraction of Turpentine from the Wood Chips

Uses

1. Increases Efficacy of Paints and Varnish

2. Cleaning Agent

3. Stain Remover

4. Healthier Choice of a Solvent

5. Works Well as a Furniture Polish6. Eco-Friendly

The Turpentine Value Chain

## 14. SOLVENT RECYCLING, REMOVAL AND DEGRADATION

Introduction

Process Description and Emissions

General Processes in Solvent Recycling Operations

Solvent Recycling Operations

Solvent Storage

Solvent Handling

Initial Treatment

Typical Fixed-Bed Activated Carbon Solvent

Recycling System

Distillation and Purification

Distillation Process for Solvent Recycling

Spills

Equipment Leaks

Emission Estimation Techniques: Acceptable

Reliability and Uncertainty

Direct Measurement

Mass Balance

Engineering Calculations

Emission Factors

## 15. SOLVENTS MARKET

Industrial Solvent Market

Green Solvent and Bio-Solvents Market

## 16. THINNERS

Introduction

Uses of Thinners

Types of Thinner Used in industries

Types of Thinner Based on the Paint with which it is Mixed

## 17. MANUFACTURING PROCESS

## Thinner Formulation

### 18. FORMULATION OF THINNERS

#### Epoxy Thinner

##### Composition of Ingredients

##### Handling and Storage

##### Physical and Chemical Properties

#### Paint Thinner

##### Composition of Thinner

##### Handling and Storage

##### Precautions to Be Taken in Handling

##### Precautions to be Taken in Storing

##### Physical and Chemical Properties

#### Acrylic Thinner

##### Composition/Information on Ingredients

##### Handling and Storage

##### Physical and Chemical Properties

#### Varnish Thinner

##### Composition/Information on Ingredients

##### Handling and Storage

##### Handling Precautions

##### Incompatible Materials

##### Storage Conditions

##### Physical and Chemical Properties

### 19. THINNER IN PAINT INDUSTRY

#### Odorless Paint Thinner

##### Requirements of the Thinners

##### Functions of the Thinners

##### Properties of Paint Thinner

##### Solvents Used as Paint Thinners Include

##### Other Solvents Sometimes Used in the Production of Paint Thinners Include

### 20. HEALTH AND SAFETY MEASURES OF CHEMICALS

#### Health Hazards

#### Solvents – Thinners

##### How to Control Health Hazards Environmental Control

##### Use Appropriate Personal Protection

##### Respirators

##### Eye and Hearing Protection

##### Protective Clothing

##### Handling and Storage

##### Accidental Release Measures

##### Precautions

##### Spill or Leak

##### Do Not Get Water Inside Containers

##### Fire and Explosion Hazards

##### Things to Do and Not to do Before Mixing Thinner in Paint

##### Material Safety Data Sheet

##### What is a Material Safety Data Sheet (MSDS)?

##### What is the Purpose of an MSDS?

What information is on the MSDS?

Reactivity Data

Why is an MSDS Hard to Read?

When Would We Use an MSDS?

Hazard Communication Standard

Solvents

## 21. POLLUTION CONTROL

Environmental Concerns

Pollution Caused by Thinner

Major Emissions

Impacts on Human Health and Environment

What is Pollution Prevention?

Methods for Reducing the Pollution

## 22. WASTE DISPOSAL OF HAZARDOUS CHEMICALS AND STORAGE

General Requirements for Storage of Chemicals

Prohibited and Restricted Hazardous Chemicals

Exposure Standards

Identifying Hazards Hazardous Chemicals Generated or Manufactured in the Workplace

Segregate Incompatibles

Segregate Families

Flammable Liquid Storage

Classifications of Flammable and Combustible

Liquids

Flammable Liquids

Combustible Liquids

Corrosive Storage

Transporting Chemicals

Hazardous Waste Disposal

General Requirements for Waste Disposal

Standard of Containers

Containers to be Resistant to the Contents

Containers should be in Good Condition

Containers to be Securely Closed

No Mixing of Incompatible Wastes in a Container

Sufficient Air Space in Containers When Storing

Liquid Wastes

Disposal of Paint Related Materials

Hazardous Waste Minimization

Process Level Impacts

## 23. B.I.S. SPECIFICATIONS OF SOLVENTS AND THINNERS

Solvents

Thinner

## 24. LABELLING AND PACKAGING OF CHEMICALS

Introduction

General Requirements of Labelling and Packaging in Accordance with the Chemical Labelling &

Packaging (CLP) Regulation

General Labelling Rules

Elements of the CLP Hazard Label

CLP Labelling Requirements Versus Discretion of the Supplier Classification of Hazardous Substance/Mixtures  
Updating the Hazard Label  
Labelling of Workplace Chemicals  
Hazard Labels for Supply and Transport Outer and

Inner Packaging Classified for Supply but not for Transport  
Outer and Inner Packaging Classified for Both  
Transport and Supply  
Single Packaging Classified Under Both Supply and Transport  
CLP Rules on Packaging of Substances and Mixtures  
Child-Resistant Fastening and Tactile Warnings of Danger  
Child-Resistant Fastening (CRF)  
Tactile Warning of Danger (TWD)  
Hazard Pictograms  
Shape, Colour and Dimensions  
Precedence Rules  
Blank Pictograms  
Signal Words  
Hazard Statements  
Precautionary Statements  
Codes for Hazard and Precautionary Statements  
Code Ranges of Hazard and Precautionary Statements Under CLP  
Guidance on Particular Aspects of CLP Hazard Labelling  
Further Aspects to Consider for the CLP Hazard Label  
Size of the Label and of the Label Elements  
Minimum Dimensions of Labels and Pictograms Under CLP

25. PROCESS FLOW DIAGRAM

26. SAMPLE PLANT LAYOUT

27. PHOTOGRAPHS OF MACHINERY WITH SUPPLIER'S CONTACT DETAILS

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery,

Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
