

Cultivation of Tropical, Subtropical, Vegetables, Spices, Medicinal and Aromatic Plants

Author: NIIR Board

Format: Paperback

ISBN: 8186623876

Code: NI119

Pages: 652

Price: Rs. 1,075.00 US\$ 125.00

Publisher: National Institute of Industrial Research

Usually ships within **3** days

Plant spices grown in tropical countries on small scale family farms of commercial farms, to provide foods for human or live stock, in dry or humid regions are highly abundant and taxonomically diversified. Vegetables comprise of a large number of plants, mostly annual, of which different parts like leaf, stem, flowers, fruit, root etc. are eaten. They are rich in nutrients and are essential items of a balanced diet. Vegetables are called protective food as their consumption can prevent several diseases. Many vegetables are important items of commerce and thus can play a major role in the economic development. Generally classification of horticulture plants are based on nature of growth climatic requirement continuation of growth types of fruit parts used botanical relationship, salinity tolerance, ripening behaviour, botanical relationship, hardness or temperature tolerance, cool season vegetables, warm season vegetables, parts used as food, methods of raising, etc. Medicinal and aromatic plants are important for human health. These plants have been used from the prehistoric times to present day. These plants based medicines are consumed in all civilizations. It is believed that the herbal medicine can give good effect to body without causing side effects to human life. Besides, the usage of medical plants has been increasing as an important role that can support the economic system. The medical and aromatic plants for health are used as herbal treatments and therapies that can be new habits for culture. Medicinal and aromatic plants constitute a large segment of the flora, which provide raw materials for use by various industries. They have been used in the country for a long time for their medicinal properties. The decision to cultivate medicinal herbs should only be made in response to demand for particular herbs. The market is very competitive and could easily be oversupplied.

This book majorly deals with classification of horticultural plants, classification of flowers, classification of spices, soil and climatic requirements of horticultural plants, beet root, bottle gourd, harvesting and post harvest management, poly house vegetable production in temperate regions, vegetables growing in containers, tea, performance of plants from cutting, vegetative propagation, rubber, biofertilizers in vegetable cultivation, postharvest management of tropical tuber crops, etc.

This is an informative resource of the cultivation, irrigation, manuring, fertilization, harvesting and post harvest management of tropical, subtropical, vegetables, spices, medicinal and aromatic plants. This book is useful for entrepreneurs, ayurvedic institutes, libraries and consultants.

Contents

VEGETABLE CROPS

1. CLASSIFICATION OF HORTICULTURAL PLANTS

Plant Kingdom

Classification of Fruits

Based on Nature of Growth

Based on Climatic Requirement

Based on Continuation of Growth

Based on Types of Fruit

Based on Parts Used

Based on Botanical Relationship

Based on Salinity Tolerance

Based on Ripening Behaviour

Based on Ethylene Evolution

Based on Bearing Behaviour

Classification of Vegetables

Based on Botanical Relationship

Based on Hardness or Temperature Tolerance

Cool Season Vegetables

Warm Season Vegetables

Based on Tolerance to Soil Acidity

Based on Tolerance to Salt

Based on Parts Used as Food

Based on Methods of Raising

Based on Forcing

Based on Rate of Respiration

Classification of Flowers

Based on Season of Growing

Based on Colour of Flower

Based on Purpose of Growing

Based on Nature of Growth

Based on Mode of Propagation

Based on Growth Behaviour

Classification of Spices

Based on Completion of Life Cycle

Based on Growth Behaviour

Based on Importance

Based on Part Used

Based on Utility

Based on Cultural Management

Based on Botanical Relationship

Classification of Plantain Crops

Based on Botanical Relationship

Based on Growth Behaviour

Based on Utility

Based on Extent of Growing

Based on Intensity of Cultivation

2. SOIL AND CLIMATIC REQUIREMENTS OF HORTICULTURAL PLANTS

Soil

Alluvial Soils

Tarai Soils
Arid Soils
Black Soils
Red Soils
Laterite Soils
Marshy Soils
Climate
Temperate Climate
Tropical Climate
Sub-Tropical Climate
Different Types of Horticulturally Potential Zones
of the Country
Temperate Zone
North-Western Sub-Tropical Zone
North-Eastern Sub-Tropical Zone
Central Tropical Zone
Southern Tropical Zone
Coastal/Tropical Zone
Influence of Climatic Factors
On the Growth of Plants
Temperature
Humidity
Wind
Rainfall
Solar Radiation

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
