In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the county, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition.

Contents

1. Cultivation of Tagetes Minuta
 - Botanical description of the plant
 - Genetic improvement
 - Agrotechnology
 - Soil and climate
 - Propagation
 - Weed control
 - Fertilizers and manures
 - Irrigation
 - Harvesting
 - Intercropping
 - Crop rotations
 - Diseases
 - Distillation
 - Chemistry
 - Distillation unit design availability
2. Cultivation of Eucalyptus Citriodora
 - Description of the plant

Cultivation
Soil and Climate
Preparation of Land
Propagation
Nursery
Transplanting
Weeding
Manures and Fertilizers
Harvesting
Pests and Diseases
Distillation
Yield
Chemical Constituents
Uses

3. Cultivation of *Rosmarinus Officinalis*

Introduction
Description of the plant
Cultivation
Soil and Climate
Propagation
Transplanting, interculture and fertilizer application
Irrigation
Harvesting
Pests and diseases and their control
Distillation
Oil content and yield
Chemical constituents

4. Cultivation of *Coriander Sativum*

Description of the Plant
Cultivation
Soil and Climate
Propagation
Irrigation
Harvesting
Pests and Diseases
Distillation
Yield
Chemical Constituents
Uses
Economics of Cultivation

5. Cultivation of Lavender Species

Botany
Soil and Climate
Cultivation
Propagation
Propagation By Seeds
Transplantation
Fertilizer Application
Weeding
Regeneration

Harvesting
Distillation
Oil Content and Oil Yield
Chemical Constituents
Uses
Economics of Cultivation

6. Cultivation of Matricaria Chamomilla

Description of the Plant
Genetics
Cultivation
Soil and climate
Propagation/nursery
Transplantation, irrigation and weeding
Cropping sequence
Pests and diseases
Manures and fertilizers
Harvesting
Collection of seeds
Yield
Drying and storage
Distillation
Yield and characteristics of the oil
Uses
Specification of the drug
Economics of cultivation

7. Vanilla World's second most expensive spice

Vanilla Flower
Vanilla Beans
Vanilla cultivation in India
Commercial Cultivation of Vanilla
Vanilla Extract and Flavourings
Commercial uses of Vanilla
Market for Vanilla
Exports grades and standards

8. Cultivation of Artemisia Annua

Description of the plant
Soil and climate
Propagation
Weed control
Fertilizers and manures
Irrigation
Harvesting
Chemistry and uses
Distillation
Economics of cultivation

9. Cultivation of Mentha Arvensis

Plant descriptors
Available cultivars of menthol mint

- Choice of place for cultivation
- Land preparation
- Preparation of planting material
- Production of suckers
- Production of seedlings
- Planting of suckers in the field
- Fertilizer application
- Irrigation and drainage
- Interculture and weed control
- Crop rotation
- Intercropping
- Harvesting
- Yield
- Storage of herbage
- Pests and diseases
- Insect pests
- Diseases
- Distillation of herbage for essential oil
- Directly fired distillation tank
- Design availability
- Use of mint oil and its derivatives
- Economics of cultivation

10. Cultivation of French Basil (*Ocimum Bacilicum* L.)

1. European Type
2. Reunion Type
3. Methyl Cinnamate Type
4. Eugenol Type

- Botany
- Soil and Climate
- Field preparation
- Propagation
 - (a) Raising of Nursery
 - (b) Planting
- Irrigation
- Fertiliser Application
- Interculture
- Harvesting and Yield
- Agronomical Studies
- Physiological Studies
- Heavy metal tolerance
- Effect of growth hormones
- Mineral contents
- Seed mucilage studies
- Effect of photoperiodism
- Biosynthesis of Eugenol
- Tissue Culture Studies
- Genetical Studies
- Chemical Composition
- Uses
 - Cosmetic
 - Food
 - Folk medicine

About NIIR

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
