

# Drugs & Pharmaceutical Technology Handbook

**Author:-** NIIR Board

**Format:** paperback

**Code:** NI130

**Pages:** 636

**Price: Rs.1075US\$ 125**

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Drugs and pharmaceutical industry plays a vital role in the economic development of a nation. It is one of the largest and most advanced sectors in the world, acting as a source for various drugs, medicines and their intermediates as well as other pharmaceutical formulations. India has come a long way in this field, from a country importing more than 95% of its requirement of drugs and pharmaceuticals; India now is exporting it even to developed countries. Being the intense knowledge driven industry, it offers innumerable business opportunities for the investors/ corporate the world over. The existence of well defined and strong pharmaceutical industry is important for promoting and sustaining research and developmental efforts and initiatives in an economy as well as making available the quality medicines to all at affordable prices. That is, it is essential to improve the health status of the individuals as well as the society as a whole, so that positive contributions could be made to the economic growth and regional development of a country. On the global platform, India holds fourth position in terms of volume and thirteenth position in terms of value of production in pharmaceuticals. The pharmaceutical industry has been producing bulk drugs belonging to all major therapeutic groups requiring complicated manufacturing processes as well as a wide range of pharmaceutical machinery and equipments. The modern Indian Pharmaceutical Industry is recent and its foundation was laid in the beginning of the current century. The pharmaceutical industry can be broadly categorised as bulk drugs, formulations, IV fluids and pharmaceutical aids (such as medical equipment, hospital disposables, capsules, etc.). Special feature of the pharmaceutical industry is a large number of manufacturers in the small scale sector. The government is also encouraging the SSI sector providing some incentives. The recent developments in the technology and R & D work in this field have led to the increased growth rate of industries and have established Indian Pharmaceutical industries in the international market.

The content of the book includes information about properties, general methods of analysis, methods of manufacture, of different types of drugs and pharmaceuticals. Some of the fundamentals of the book are polymeric materials used in drug delivery systems , theoretical aspects of friction and lubrication , a convenient method for conversion of quinine to quinidine, formulation and evaluation of bio-available enteric-coated erythromycin and metronidazole tablets, extraction of virginiamycin, antipyretics and analgesics, column chromatographic assay of aspirin tablets, differentiating titration of phenacetin and caffeine, infrared spectra of some compounds of pharmaceutical interest etc.

This book covers an intensive study on manufacturing, production, formulation and quality control of drugs and pharmaceuticals with technology involved in it. This book is an invaluable resource for technologists, professionals and those who want to venture in this field.

## 1. INTRODUCTION

Manufacturing  
Production  
Formulation  
Quality Control

## 2. POLYMERIC MATERIALS USED IN DRUG DELIVERY SYSTEMS

Preparation of polymers  
Addition (chain reaction) polymerization  
Condensation (step-growth) polymerization  
Crosslinked polymers  
Copolymerization  
More complex co-polymer systems

## 3. PROPERTIES OF FATTY ALCOHOL MIXED EMULSIFIERS AND EMULSIFYING WAXES

Mixed emulsifier components  
Fatty alcohols  
Surfactants  
Mixed emulsifiers and emulsifying waxes

## 4. TABLET LUBRICANTS

Theoretical aspects of friction and lubrication  
Mechanisms of friction  
Boundary lubrication  
Applications to tableting  
Chemical composition of lubricants  
Metallic salts of fatty acids (soaps)  
Fatty acids, hydrocarbons and fatty alcohols  
Fatty acid esters  
Alkyl sulphates  
Polymers  
Inorganic materials  
Miscellaneous materials  
Effects of lubricants on the manufacture and properties of tablets  
Batch variation of lubricants  
Processing  
Tablet properties  
Magnesium stearate  
Commercial materials and batch variation  
Pure grade materials  
Selection of Lubricants

## 5. PARACETAMOL-AN ANALYSIS OF TECHNOLOGIES FOR CLEANER PRODUCTION

## 6. A MODIFIED PROCESS FOR CONVERSION OF - PICOLINE TO NICOTINIC ACID

Experimental Procedure  
Experimental Data

## 7. A CONVENIENT METHOD FOR CONVERSION OF QUININE TO QUINIDINE

Experimental Procedure  
Reduction of quinidinone with alane

## 8. SUSTAINED RELEASE SALBUTAMOL TABLETS - THEORETICAL CONSIDERATIONS

Theoretical considerations

Calculation of Sustained Release Parameters for Salbutamol Sulphate

## 9. SUSTAINED RELEASE SALBUTAMOL TABLETS - FORMULATION ENGINEERING AND EVALUATION USE OF FAT AND WAX MATRIX

Materials and methods

Discussion

## 10. SUSTAINED RELEASE SALBUTAMOL TABLETS - FORMULATION ENGINEERING AND EVALUATION COMPOSITE WAX MATRIX AND INFLUENCE OF ADDITIVES

Materials and methods

Results and Discussion

## 11. FEASIBILITY OF PRODUCTION OF CHOLERA VACCINE IN FERMENTOR

Materials and methods

Media

Results and Discussion

## 12. MODIFICATION OF BEESWAX FOR ITS APPLICATION IN TABLET COATING

Materials and methods

Results and discussion

## 13. FORMULATION AND EVALUATION OF BIO-AVAILABLE ENTERIC-COATED ERYTHROMYCIN AND METRONIDAZOLE TABLETS

Materials and Methods

Coating formulations

Coating process

Dissolution rate studies

Methods of analysis

Results and discussion

Conclusion

## 14. REDUCING - SUBSTANCES-FREE ACETIC ANHYDRIDE FOR PHARMACEUTICAL INDUSTRIES

Experimental procedure

Materials

Procedure

Results and discussion

## 15. ANTHRACYCLINE ANTIBIOTICS (DAUNORUBICIN AND ADRIAMYCIN)

Biosynthesis

A. Origin of the Carbon Skeleton

B. Biosynthetic Interrelationships

Fermentation and Recovery

A. Inoculum Preparation and Production of Daunorubicin

B. Isolation and Purification of Daunorubicin

C. Inoculum Preparation and Production of Adriamycin

D. Isolation and Purification of Adriamycin

## 16. 6-APA

Production of 6-Apa using Penicillin Acylase

A. Enzymation of Penicillin G

B. Extraction of 6-APA

## 17. EXTRACTION OF VIRGINIAMYCIN

Extraction

## 18. SAGAMICIN

Fermentation Process

## 19. CHEMOTHERAPEUTICS, ANTIVIRAL

Antiviral Agents Effective in Humans

Thiosemicarbazones

Amantadine Hydrochloride

5-Iodo-2'-deoxyuridine

Trifluorothymidine

Arabinosylcytosine

Arabinosyladenine

Ribavirin

Interferon

Immunopotentiating Agents

Future of Antiviral Chemotherapy

## 20. CHEMOTHERAPEUTICS, ANTIPROTOZOAL

Coccidiosis

Thiamine Competitors

Antifolates

Antibiotics

Nitrobenzamides and Nitrofurans

Toxoplasmosis

Anaplasmosis

Babesiasis

Theileriasis

Trypanosomiasis

African Trypanosomiasis

Chagas' Disease

Leishmaniasis

Pneumocystosis

Trichomoniasis

Hexamitosis

Balantidial Dysentery

Giardiasis

Amebiases

Intestinal Amebiasis

Primary Amebic Meningo-Encephalitis

The Malarias

Drugs Acting on Asexual Blood Forms

Drugs Affecting Tissue Forms

Drugs Acting on Gametocytes

Action Spectra of Antiprotozoal Drugs

Economic considerations

## 21. CHEMOTHERAPEUTICS, ANTIMYCOTIC AND ANTIRICKETTSIAL

Mycotic Infections

Superficial Mycoses

Systemic and Generalized Mycoses

- Antifungal Agents
- The Polyene Antibiotics
- Candicidin
- Pimaricin
- Nonpolyene Antifungal Antibiotics
- Griseofulvin
- Cycloheximide
- Other antifungal agents
- Synthetic Antifungal Agents
- Nonspecific Systemic Medications
- 5-Fluorocytosine
- Imidazole Compounds
- Tolnaftate
- Haloprogin
- Agricultural Use of Antifungal Agents
- Rickettsial Infections
- Treatment of Rickettsial Infections

## 22. CHEMOTHERAPEUTICIS, ANTIMITOTIC

- Drug Classification
- Alkylating Agents
- Antimetabolites
- Antibiotics
- Plant alkaloids
- Miscellaneous Agents
- Hormones
- Combination therapy
- Multidrug Treatment
- Immunology
- Drug Toxicity
- Radiation Therapy

## 23. CHEMOTHERAPEUTICS, ANTHELMINTIC

- Treatment of Blood Fluke Disease (Schistosomiasis)
- Treatment of Fluke (Trematode) Infections in the Lungs, Intestines, and Liver
- Treatment of Tapeworm (Cestode) Infections
- Treatment of Intestinal Roundworm (Nematode) Infections
- Treatment of Tissue Roundworm (Nematode) Infections

## 24. ANTIPYRETICS AND ANALGESICS

- Salicylic Acid and its Derivatives
- Methods of Manufacture
- Sodium Salicylate
- Aspirin
- Salicylamide
- Salicylic Acid
- Sodium salicylate
- Aspirin
- Salicylamide
- Methods of Analysis
- Separation and Identification
- Extraction into Sodium Bicarbonate Solution
- Procedure

Separation by Column Chromatography  
Procedures  
Preparation of Chromatographic Column  
Preparation of Samples  
Separation of Components  
Separation by Gas Chromatography  
Procedures  
Preparation of Column  
Preparation of Samples  
Separation of Components  
Identification  
Procedures  
Test with Ferric Chloride  
Precipitation of Salicylic Acid  
Assay Methods  
Titrimetric Assay of Aspirin Capsules  
Procedure  
Column Chromatographic Assay of Aspirin Tablets  
Procedures  
Preparation of Column  
Preparation of Samples and Standard  
Analysis of Samples  
Assay by Gas Chromatography  
Procedures  
Preparation of Column  
Calibration  
Assay of sample for aspirin content  
Determination of Impurities  
Determination of free salicylic acid in aspirin  
Chromatographic Method  
Procedures  
Preparation of Reagent  
Preparation of Salicylic Acid Standard  
Preparation of Column  
Analysis of Aspirin and Aspirin Tablets  
APC Tablets and Flavoured Tablets  
Spectrophotometric Method  
Procedure  
Readily Carbonizable Substances in Aspirin  
Procedures  
Preparation of Reagents  
Cobaltous Chloride  
Cupric Sulphate  
Ferric Chloride  
Sulfuric Acid  
Testing of Sample  
Impurities in Salicylic Acid  
Ion Exchange Ultraviolet Method  
Procedures  
Preparation of Apparatus  
Preparation of Column  
Analysis of Samples  
Procedure

Procedures  
Preparation of Plates  
Preparation of Reagents & Standards  
Preparation of Sample  
Qualitative Detection  
Quantitative Determination  
Determination in mixtures  
Determination After Separation by Extraction  
Ultraviolet absorption method  
Procedures  
Calibration  
Calculations  
Heuermann And Levine Method  
Procedures  
Preparation of Sample  
Preparation of Column  
Separation of APC Organic base Combination  
APC Barbiturate Combinations  
TURI Method  
Procedures  
Preparation of Column  
Preparation of Samples  
Separation of Fractions  
Spectrophotometric Measurement  
Koshy Method  
Procedures  
Preparation of Column  
Preparation of Samples  
Separation of Components  
Determination of Components  
Determination by Gas Chromatography  
Hoffman and Mitchell Method  
Procedures  
Calibration  
Analysis of Samples  
Crippen & Freinuth Method  
Procedure  
Preparation of Column  
Operating Conditions  
Preparation of Methylating Reagent  
Preparation of Samples & Standards  
Analysis of Samples  
Calculations  
Direct Spectrophotometric Procedure  
Procedure  
Preparation of Mixed Solvents  
Preparation of Reference Solutions  
Analysis of Samples  
Development of Equations  
Infrared and Ultraviolet Spectrometry  
Procedures  
Mixtures of Aspirin, Phenacetin and Caffeine  
Mixtures of Aspirin, Phenacetin and Caffeine and Cadeine Phosphate

Mixtures of Aspirin, Phenacetin and Caffeine and Thenylpyramine Hydrochloride

Nonaqueous Titrations

Wollish Methods

Procedures

Determination of Aspirin in the Presence of Stearic Acid

Determination of Aspirin in the Absence of Stearic Acid

Determination of Phenacetin

Determination of Caffeine

APC Tablets in Combination with Phenindamine Tartrate

Determination of Phenacetin

Determination of phenindamine Tartrate

Lin and Blake Methods

Procedures

Determination of Aspirin in APC Mixtures

Differentiating Titration of Phenacetin and Caffeine

Differentiating Titration of Aspirin and Phenobarbital

Nuclear Magnetic Resonance Spectrometry

Procedures

Determination of Spectra

Calculations

Derivatives of Aniline and p-Aminophenol

Methods of Manufacture

Commercial Grades and Specifications

Methods of Analysis

Separation and Identification

Separation by Ion Exchange Paper Chromatography

Procedures

Preparation of Iodoplatinate Reagents

Extraction

Chromatography

Separation by Gas-Chromatography

Procedures

Preparation of Column

Operating Conditions

Calibration

Preparation of Samples

Separation of Components

Assay Methods

Gravimetric Methods

Procedure

Titrimetric Methods

Titration with Sodium Nitrite

Procedure

Iodometric Titration

Procedure

Assay Through Ethoxy Content

Procedure

Preparation of Reagent

Analysis of Sample

Calculations

Colorimetric Methods

Hydroxamic Acid Method

Procedure

Diazotation Procedures  
Procedure  
Procedures  
Preparation of Buffer Solution  
Calibration of the Method  
Hydrolysis of Phenacetin  
Mouton and Masson Method  
Procedure  
Chromic Acid Method  
Procedure  
Ultraviolet Spectrophotometry  
Procedure  
Determination of Impurities  
Impurities in Phenacetin  
Procedures  
Determination of Acetanilide  
Determination of P-Chloroacetanilide  
Determination of P-Phenetidine  
Free P-Amino Phenol in Acetaminophen  
Procedures  
Determination in Mixtures  
Derivatives of Quinoline  
Methods of Manufacture  
Commercial Grades and Specifications  
Methods of Analysis  
Separation and Identification  
Cinchophen  
Neocinchophen  
Assay Methods  
Gravimetric Methods  
Procedure  
Titrimetric Methods  
Procedures  
Assay of Cinchophen Powder  
Assay of Cinchophen Tablets  
Procedure  
Procedure  
Spectrophotometric Methods  
Procedure  
Determination of Impurities  
Procedures  
Aniline Derivatives in Cinchophen  
Readily Carbonizable Substances  
Cinchophen in Neocinchophen  
Determination in Mixtures  
Derivatives of Pyrazolone  
Methods of Manufacture  
Commercial Grades and Specifications  
Methods of Analysis  
Separation and Identification  
Antipyrine  
Separation by Gas Chromatography  
Aminopyrine

Assay Methods  
Antipyrine  
Spectrophotometric Methods  
Procedure  
Preparation of Reagent  
Analysis of Sample  
Gravimetric Method  
Titrimetric Method  
Polarographic Method  
Procedure  
Aminopyrine  
Gravimetric Methods  
Procedure  
Assay of Elixir  
Assay of Tablets  
Acid-base Titration  
Complexometric Titration  
Procedures  
Preparation of Reagents  
Analysis of Samples  
Bromate Titration  
Procedure  
Oxidative-Cleavage Method  
Procedure  
Colorimetric Methods  
Procedure  
Preparation of Diazotized P-Nitroaniline  
Preparation of Sample Solution  
Determination by Ferric Chloride  
Determination of Diazotized P-Nitroaniline  
Determination of Impurities  
Antipyrine in Aminopyrine  
Procedure  
Determination in Mixtures  
Antipyrine  
Aminopyrine

## 25. ANTI-ASTHMATIC AGENTS

Adrenergic Stimulants  
Anticholinergics  
Inhibitors of the release of Allergic Mediators  
Xanthine Derivatives  
Prostaglandins  
Other Drugs

## 26. PENICILLINS AND RELATED COMPOUNDS

Properties  
General Method of Analysis  
Separation and Identification  
Chromatography  
Spectroscopy  
Other Methods  
Assay Methods

Microbiological Methods  
Chemical Methods  
Iodometric Titration  
Procedure  
Acid-Base Titration  
Hydroxylamine Colorimetric Method  
Procedure  
Ultraviolet Spectrophotometric Method  
Procedure  
Determination of Impurities  
Benzylpenicillin  
Analysis of Benzylpenicillin  
Microbiological Assay Methods  
Procedure  
Procedure  
Chemical Assay methods  
Procedure  
Procedure  
Allylmercaptomethylpenicillin  
Analysis of Pencillin O  
Microbiological Assay Methods  
Chemical Assay Methods  
Phenoxymethylpenicillin  
Analysis of Phenoxymethylpenicillin  
Microbiological Assay Methods  
Chemical Assay Methods  
Phenethicillin  
Analysis of Phenethicillin  
Microbiological Assay Methods  
Chemical Assay Methods  
Methicillin  
Analysis of Methicillin  
Microbiological Assay Methods  
Chemical Assay Methods  
Carbenicillin  
Analysis of Carbenicillin  
Microbiological Assay Methods  
Procedure  
Chemical Methods  
Ampicillin  
Analysis of Ampicillin  
Microbiological Assay Methods  
Procedure  
Chemical Assay Methods  
Isoxazolympenicillins  
Analysis of Isoxazolympenicillins  
Microbiological Assay Methods  
Chemical Assay Methods  
Nafcillin  
Microbiological Assay Methods  
Chemical Assay Methods  
Cephalsoporins  
Analysis of Cephalosporins

Microbiological Assay Methods  
Chemical Assay Methods

## 27. SULFONAMIDES

Therapeutic Aspects

Systemic infections

Urinary Tract Infections

Physical and Chemical Properties

Theoretical Aspects

Biological Mechanism of Action

Structure-Activity Relationship

Preparation and Manufacture

N1-Heterocyclic Sulfanilamides

N1-Acylsulfanilamides

N1-Heterocyclic-N4-Acylsulfanilamides

N1-Heterocyclic-N1-Acetylsulfanilamides

Miscellaneous Compounds

General Anesthetics, Volatile and Gaseous

Nitrous Oxide

Cyclopropane

Diethyl Ether

Fluroxene

Methoxyflurane

Halothan

Enflurane

Isoflurane

General Anesthetics, Fixed

Ultrashort-Acting Barbiturates

Propanidid

Ketamine

Innovar

Althesin

Etomidate

Spinal Anesthetics

Metabolism and Toxicity of Volatile Anesthetics

Adjuncts to General Anesthesia

Local Anesthetics

Benzocaine

Bupivacaine Hydrochloride

Cocaine Hydrochloride

Dibucaine Hydrochloride

Dimethisoquin Hydrochloride

Dyclonine Hydrochloride

Lidocaine Hydrochloride

Pramoxine Hydrochloride

Procaine Hydrochloride

Tetracaine Hydrochloride

## 28. INFRARED SPECTRA OF SOME COMPOUNDS OF PHARMACEUTICAL INTEREST

DIRECTORY SECTION

PHARMACEUTICAL / BIOTECHNOLOGY COMPANIES

WORLD WIDE PHARMACY RESOURCES

PHARMACEUTICAL, BULK DRUGS, MEDICINES & RAW MATERIALS

PHARMACEUTICAL MACHINERY & EQUIPMENT

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
