## About the Book

Coconut is one of the oldest crops grown in India and presently covers 1.5 million hectares in this country. Found across much of the tropic and subtropical area, the coconut is known for its great versatility as seen in the many domestic, commercial, and industrial uses of its different parts. Coconuts are part of the daily diet of many people. Its endosperm is initially in its nuclear phase suspended within the coconut water. As development continues, cellular layers of endosperm deposit along the walls of the coconut, becoming the edible coconut flesh. When dried, the coconut flesh is called copra. The oil and milk derived from it are commonly used in cooking and frying; coconut oil is also widely used in soaps and cosmetics. The clear liquid coconut water within is a refreshing drink and can be processed to create alcohol. The husks and leaves can be used as material to make a variety of products for furnishing and decorating. It also has cultural and religious significance in many societies that use it. India stands third in the production of coconut in the world. There are only two distinguishable varieties of coconut; the tall and the dwarf. As a result of cross pollination in the tails, a wide range of variations occur within the same variety. Coconut based cropping/farming systems promote on farm diversity and strengthens ecological base of coconut farming. Coconut husk is the raw material for the coir industry. It is also used as a domestic fuel and as a fuel in copra kilns. Coconut oil comes under edible/industrial group, is used as cooking oil, hair oil, massage oil and industrial oil. It is dominated by saturated fats and high percentage of lauric acid. India accounts for the 18% of total coconut production in the world and it is the third largest coconut producing country in the world. Coconut processing adds value, and a number of products like coconut oil, desiccated coconut, coir fibre, pith, mattresses, desiccated coconut (DC), coconut cream, coconut milk, spray dried coconut milk powder, coconut shell products, shell charcoal, shell powder, virgin coconut oil are obtained. The demand for coconut oil increases 15 to 20 % during the festival season. Coconut oil for edible purposes is now being claimed to be the second best edible oil in the world, after Olive oil. Coconut shell charcoal is most widely used as domestic and industrial fuel.

Some of the fundamentals of the book are product diversification in coconut, future of coconut oil, scope for product diversification, varieties of coconut, farming systems in coconut, organic farming of coconut, spices and herbs, establishment and maintenance of organic coconut plantations, production of organic spices, medicinal and aromatic plants along with coconut, crop improvement, green manuring in coconut garden organic recycling in coconut, soil moisture conservation in coconut garden, harvest and post harvest technology, integrated farming in coconut holdings for productivity improvement, machinery and processing of desiccated coconut, coconut processing sector in India, etc.

Coconut plays an important role in the economic, social and cultural activities of millions of people in our country. India is a major producer of coconut in the world. Coconut provides food, edible oil, industrial oil and health drink to humanity. All parts of coconut tree is useful in one way or other and the crop profoundly influences the socio economic security of millions of farm families. The present book contains the methods of cultivation and processing of coconut. This book is very beneficial for agriculturist, researchers, professionals, entrepreneurs, agriculture universities etc.

## Contents

### 1. PRODUCT DIVERSIFICATION IN COCONUT

Future of Coconut Oil  
Scope for Product Diversification  
Philippines  
Sri Lanka  
India  
Other Uses  
Conclusion

### 2. VARIETIES OF COCONUT

Tall Variety  
West Coast Tall  
East Coast Tall  
Lakshadweep Ordinary  
Lakshadweep Micro  
Andaman Ordinary  
Andaman Giant  
Kappadam  
Laguna  
San Ramon  
Macapuno  
Spicata  
Performance of exotic cultivars under Indian conditions  
Dwarf Variety  
Ghowghat Green Dwarf  
Chowghat Orange Dwarf  
Malyan Dwarf  
Gangabondam  
Ayiramkachi  
Thembili (King Coconut)  
Coonino  
Mangipod  
Niuleka

### 3. FARMING SYSTEMS IN COCONUT

Rooting Pattern  
Crown Structure And Light Transmission  
Water Use Efficiency  
Nutrients  
Choice of Inter / Mixed Crops  
Criteria For Selection Of Inter/  
Mixed Crops

### 4. ORGANIC FARMING OF COCONUT, SPICES AND HERBS

Organic Coconut Scenario

Scope For Organic Production of Coconut In India  
Characteristics of A Typical Organic  
Coconut Farm  
Establishment And Maintenance of Organic Coconut Plantations  
Conversion Period  
Buffer Zone  
Choice of Varieties  
Raising Nursery  
Land Preparation  
Preparations for Planting  
Aftercare of the Young Plantation  
Nutrient Management  
Green Manuring and Cover Cropping  
Utilization of Waste from Coconut Palm  
Improving Soil Conditions  
Plant Protection  
Biopesticides  
Contamination Control  
Soil and Water Conservation  
Bee Keeping  
Animal Husbandry  
Conversion of Established Plantations  
Conversion Period  
Choice of Cultivars/Varieties  
Composting of On-farm Crop Residues/  
Farm Wastes  
Nutrition Management  
Weed Management  
Processing of Organic Coconut  
Production of Organic Spices, Medicinal And Aromatic

Plants Along With  
Coconut  
Certification of Organic Products

## 5. PLANTING MATERIAL

Collection of Seednuts  
Raising Nursery  
Nursery Care  
Seedling Selection  
Polybag Nursery  
Care of Polybag Nursery

## 6. GARDEN ESTABLISHMENT

Site Selection  
Time of Planting  
Planting System  
Land Preparation And Preparation of Pits For Planting  
Replacement of Unproductive Palms

Replanting  
Under Planting  
After Care

## 7. CROP IMPROVEMENT

Varieties  
Tall Group  
West Coast Tall  
East Coast Tall  
Lakshadweep Ordinary  
Lakshadweep Micro  
Andaman Ordinary

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.
