

# The Complete Book on Biotechnology Based Bulk Drugs

**Author:** NPCS Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 9788190439879

**Code:** NI194

**Pages:** 488

**Price:** Rs. 1,050.00 **US\$** 125.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

The development of biotechnology is taking pace in almost all fields of human life. The recent advances in the field of basic genetics have opened up new vistas, potentials and possibilities. The present book contains process of biotechnology based bulk drugs like penicillin, B-Lactam Antibiotics, Aminoglycoside Antibiotics, Peptide Antibiotics, Anti Cancer Agents, Lincomycin etc. This is very useful book for entrepreneurs, technocrats, research scholars, libraries etc.

## Contents

### CHAPTER 1

#### INTRODUCTION

The Pharmaceutical Industries

Marketing Strategy

Common Features in the Evolution of Products and Processes

Process Technology

Fermentation

Product Recovery

New Trends in Biotechnology

### CHAPTER 2

#### PENICILLINS

Historical Perspective History

Biosynthetic Penicillins

Process Overview

Fermentation Technology

The Culture: Strain Development

Mutation

Selection

Genetics  
Fermentation Process : Flow Sheet  
Facilities  
Inoculum Development  
Fermentation Stage: Medium  
Process Control  
Physiological Variables and Their Effect on Product Formation  
Duration of the Fermentation  
Recovery of Penicillin  
Carbon Process ( Obsolete)  
Solvent Extraction Process (Industry Standard)  
Process Overview  
Filtration  
Solvent Extraction  
Carbon Treatment  
Further Extraction  
Crystallization  
Drying  
Further Processing  
Penicillin Acid Process (State of the Art)  
Semisynthetic Penicillins  
6-Aminopenicillanic Acid  
Enzymic Cleavage of Penicillins to Yield 6-Aminopenicillanic Acid  
Chemical Preparation of 6-Aminopenicillanic Acid  
Synthesis of Clinically Useful Penicillins and Closely Related Congeners  
Automation  
Process Economics  
Costs

### CHAPTER 3

#### NOVEL $\beta$ -LACTAM ANTIBIOTICS

Thienamycin  
Discovery  
Chemistry  
Pharmacological Activity  
Chemical Synthesis  
Biosynthesis and Regulation of Thienamycin  
Biosynthesis  
Regulation  
Classical Fermentation Process  
Introduction  
Seed Stages  
Production Stage  
Fermentation Process Development  
Strain Improvement  
Fed-Batch Techniques  
Synthetic Media  
Novel Fermentation Processes  
Ultrafiltration Coupled Fermenter  
Immobilized Cells  
Thienamycin Purification  
Future Prospects  
Market Projections

Clavulanic Acid  
Introduction  
Production  
Market  
Olivanic Acids and Epithienamycins  
Nocardicins  
Introduction  
Production of Nocardicin A  
Market Projections  
Monobactams

## CHAPTER 4

### AMINOGLYCOSIDE ANTIBIOTICS

Streptidine and Deoxystreptamine  
Streptomycin  
Neomycin, Paromomycin, Ribostamycin and Butirosin  
Gentamicin, Micronomicin and Sisomicin  
Fortamine and Fortimicins  
Mutasyntesis  
A-Factor  
Metabolic Grid  
Manufacture  
Fermentation  
Microorganisms  
Equipment  
Inoculum Development  
Media  
Procedures  
Isolation  
Strain Improvement

## CHAPTER 5

### TYLOSIN

Production Technology  
Structure of Tylosin and Related Compounds  
Biosynthetic Pathway  
Growth of Producer Microorganisms  
Product Recovery and Purification  
Product Development  
Development in the Genetic Improvement of Producing Strains  
Developments in Fermentation Technology

## CHAPTER 6

### PEPTIDE ANTIBIOTICS

Current Applications of Peptides  
Blasticidin S : an Agricultural Antibiotic  
Bleomycin and Bestatin: Peptides used in Anticancer Therapy  
Cyclosporin: an Immunosuppressor  
Structural Types of Peptides  
Biosynthesis of Peptide Antibiotics  
Ribosomal and Nonribosomal Mechanisms  
Reactions Involved in Enzymatic Peptide Formation  
Carboxyl Activation

Peptide Bond Formation  
Modification Reactions  
Production of Peptides  
Screening Methods  
Biotechnological Production Methods  
Improvements and Modification Procedures  
Compilation of Peptides  
Abbreviations Used in the Table  
Alternative Names and Synonyms Compounds Listed in the Table  
Appendix

## CHAPTER 7

### STREPTOMYCIN AND COMMERCIALY IMPORTANT AMINOGLYCOSIDE ANTIBIOTICS

Generalities on Aminoglycoside Antibiotics  
Historical Background  
Structure of Different Classes of Aminoglycoside Antibiotics  
Microbiological Activity and Clinical use  
Mode of Action  
Problems with Toxicity and Bacterial Resistance  
Toxicity  
Bacterial Resistance  
Streptomycin  
Generalities  
Physicochemical Properties  
Assay and Identification Methods  
Assay Methods  
Identification Methods  
Biosynthesis  
Production Technology  
Fermentation  
Product Recovery  
Other Major Aminoglycoside Antibiotics  
Screening and Genetic Engineering of Strains for New Aminoglycosides  
Screening of new strains  
Use of Idiopathic Mutants  
Structural Modification of Known Aminoglycosides  
Hemisynthesis  
Bioconversion  
Chemical Synthesis of New Aminoglycosides  
Streptothricins, Aminoglycoside-like Antibiotics  
Structure  
Physicochemical and Biological Properties  
Production by Fermentation and Isolation  
Uses  
Marketing Prospects

## CHAPTER 8

### CEPHALOSPORINS

Mode of Action of Cephalosporins  
Structure and Biosynthesis of Bacterial Cell Wall  
Sensitivity and Resistance  
Structure/Activity Relationships  
Cephalosporin Market

Biosynthesis of Cephalosporins  
Biosynthesis Pathway  
Regulation of Cephalosporin Biosynthesis  
L-Valine  
Valine  
Cysteine  
Effect of Oxygen Tension  
Catabolite Repression  
Specific Growth Rate  
Fermentation Process  
The Fermenter-Its Design and Instrumentation  
Fermentation Microbiology  
Production Kinetics  
Strain Development  
Fermentation Development  
Alternative Process-DAC Process  
Recovery Process  
Purification of Cephalosporin C  
Cleavage of Cephalosporin C to 7-ACA

## CHAPTER 9

### COMMERCIAL PRODUCTION OF CEPHAMYCIN ANTIBIOTICS

Cephamicin Product Description  
Discovery  
Mode of Action  
Cefoxitin  
Physicochemical Characteristics  
Cephamicin C Assay Techniques  
Fermentation Microbiology  
Introduction  
Metabolic Origins  
Carbon Metabolism  
Nitrogen Metabolism  
Sulfur Metabolism  
Phosphate Metabolism  
Cephamicin Production Technology  
Inoculum Development Stage  
Antibiotic Production Stage  
Isolation and Purification Stage  
Conclusions and Implications

## CHAPTER - 10

### LINCOMYCIN

Discovery  
Chemistry  
Spectrum  
Mode of Action  
Lincomycin Assays for Fermentation Development and Production  
Production Technology  
Lincomycin Biosynthesis  
Fermentation  
Lincomycin Production by Other Actinomyces Species  
Fermentation Power Requirements

Isolation  
Chemical Derivatives of Lincomycin  
Commercial Markets  
Current Manufacturers  
Product Outlook

## CHAPTER 11

### PHARMACOLOGICALLY ACTIVE AND RELATED MARINE MICROBIAL PRODUCTS

Pharmacologically Active Compounds From Marine Microorganisms  
Products From the Culture of Microalgae in Coastal Ponds  
Agricultural Applications  
Conclusions

## CHAPTER - 12

### ANTICANCER-AGENTS

The Drug Development Process  
Market Information  
Containment Technology for Cytotoxic Agents  
Containment of Process Equipment  
Personnel Protection  
Decontamination of Waste Streams  
Microbial Process Examples  
Fermentation Processes for Production of Anthracyclines  
Strain Improvement  
Batch Fermentation Processes  
Isolation and Purification  
Fermentation Processes for Production of Nucleosides  
Strain Improvement  
Batch Production Process  
Therapeutic Enzymes  
Batch and Continuous Fermentation Processes  
Isolation and Purification  
Examples of Products of Mammalian Cells in Culture  
Interferon Production  
Fibroblast Processes (HuIFN- $\alpha$ )  
Leukocyte Processes (HuIFN-a )  
Lymphoblastoid Processes (Hu Ly, IFN)  
Immune Interferon Processes (HuIFN-Y)  
Future Technologies: Lymphokines and Monoclonal Antibodies  
Summary  
Appendix

## CHAPTER 13

### SIDEROPHORES

The Need for Iron-Solubilizing Agents  
The Role of Siderophores  
Uptake and Release of Iron from the Siderophore Complex  
Production of Siderophores  
Conditions for Siderophore Production  
Extraction  
Adsorption  
Ion-exchange Chromatography

Restricted Growth  
Protein Binding of Contaminant Iron  
Range of Molecular Structures  
Hydroxamates  
Catecholates (sometimes referred to as phenolates)  
Siderophores with Antibiotic Activity  
Sideromycins  
Interference with Iron Uptake  
Siderophore Analogues  
Sideromycins  
Extraction and Purification of Siderophores  
Mycobactin  
Enterochelin  
Ferrichrome  
Commercial Production of Desferrioxamine B (Desferal)  
Uses of Siderophores  
Iron Metabolism in the Body  
Iron Poisoning and Chelation Therapy  
Haemochromatosis and Chelation Therapy  
Chelation Therapy  
Other Medical Application for Siderophores  
Applications for Siderophores Outside Medicine  
Future Trends

## CHAPTER 14

### STEROID FERMENTATIONS

Bioconversions of Practical Importance  
Bioconversions of Limited or Potential Practical Importance  
Progesterone Side Chain Cleavage  
Ring A Aromatization  
17 and 21-Hydroxylations  
Alternative Bioconversion Methods  
Sterol Degradation  
Steroid Solubility  
Methods of Steroid Addition  
Steroid Conversion in Organic Solvents  
Future Trends in Steroid Bioconversions  
Recovery of Steroids  
Split Process  
Whole-beer Process  
Cake-extraction Process  
Products of Commercial Importance  
Summary

## CHAPTER 15

### PRODUCTS FROM RECOMBINANT DNA

Production Technology  
Methods for Cloning and Expression  
Range and Relative Advantages of Host Microorganisms  
Stability of Strains and Plasmids  
Product Recovery and Purification  
Commercial Markets  
Markets for Recombinant Products

# About NIIR

**NIIR Project Consultancy Services (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
