Emulsifier is an organic compound that encompasses in the same molecule two dissimilar structural groups e.g. water soluble and a water insoluble moiety. It is the ingredient which binds the water and oil in a cream or lotion together permanently. The composition, solubility properties, location and relative sizes of these dissimilar groups in relation to the overall molecular configuration determine the surface activity of a compound. Emulsifiers are classified on the basis of their hydrophilic or solubilizing groups into four categories anionic, non ionic, cationics and amphoterics. Emulsifier is utilized in various industries; agriculture, building and construction, elastomers & plastics, food & beverages, industrial cleaning, leather, metals, paper, textiles paints & protective coatings etc. An emulsion is an ideal formulation for the administration. The emulsion form allows uniform application of a small amount of active ingredient on the surface of the skin. Some of the important emulsions in different field are pharmaceutical emulsions, rosin & rubber emulsion, textile emulsions, pesticide emulsions, food emulsions, emulsion in paint industry, emulsion in polish industry, leather & paper treatment emulsions etc. Various cosmetics creams, such as moisturizers, contain emulsifiers. Lighter, less greasy feeling creams are oil in water emulsions; heavier creams used to treat rough skin are water in oil emulsions, with oil as the main ingredient. Liquid soaps, toothpastes and other body care products also contain emulsifiers. Emulsifiers have the ability to optimize the concentration of certain nutrients in an emulsion. For example, in hair conditioners, some conditioning agents can damage hair if not properly diluted in the solution. Emulsifiers are among the most frequently used types of food additives. Emulsifiers can help to make a food appealing. Emulsifiers have a big effect on the structure and texture of many foods. Increasing demand for low fat food among health conscious consumers is gradually driving the market for emulsifiers. Besides stabilizing emulsions, emulsifiers derived from non hydrogenated fats help in maintaining sensory characteristics of food such as texture, flavor, and taste that are often lost due to fat reduction. This characteristic of making healthier products similar in taste to fat containing versions has enabled emulsifiers in gaining widespread acceptance in the market. The global food industry is also witnessing increase in demand for multipurpose emulsifiers that perform functions of both stabilization and emulsification. Some of the fundamentals of the book are characteristics and application of emulsifiers, wetting and detergent structures in emulsifier, effect of surfactant on the properties of solutions, wetting characteristics of emulsifiers, formulated emulsifiers, non surfactant functional additives, inert fillers,
functional surfactant additives, uses of emulsifiers, household and personal products, industrial uses of
emulsifier, anionic surfactants, non ionic surfactants, cationic, amphoteric and enzyme, alkylolamides,
vinyloarene polymers, alkyl sulfates, ethoxylation processes, application of emulsifiers, etc. The present book
contains manufacturing processes of various types of emulsifiers which have applications in different
industries, along with photographs of machinery and equipments. This is a resourceful book for scientists,
technologists, entrepreneurs and ingredients suppliers.

Contents

1. Characteristics and Application of Emulsifiers
Introduction, Classification of Emulsifiers,
Solubility & Surface Activity of Emulsifiers, Wetting and Detergent Structures in
Emulsifier, Effect of Surfactant on the Properties of Solutions, Wetting Characteristics of Emulsifiers, Micellar
Solubilization of Emulsifiers, Formulated Emulsifiers, Non- Surfactant Functional Additives, Inert Fillers,
Functional Surfactant Additives, Uses of Emulsifiers, Household and Personal Products, Industrial Uses.

2. Industrial Uses of Emulsifier
Agriculture, Building and Construction, Elastomers and Plastics, Food and Beverages, Industrial Cleaning,
Leather, Metals, Paper, Paints and Protective Coatings, Petroleum Production and Products, Textiles,
Biodegradable Emulsifiers and Water Pollution, Biodegradation, Water Pollution, Re- cent Trends.

3. Anionic Surfactants
Introduction, Carboxylates, Soap, N-Acyls- arcosinates, Acylated Protein Hydrolysates, Sulphonates, Alkyl
benzene Sulphonates, Petroleum Sulphonates, Dialkyl Sulfosuccinates, Naphthalene Sulphonates, N-acyl-N-alkyl-
taurates, 2-Sulfoethyl Esters of Fatty Acids, Olefin Sulphonates, Sulfa tes & Sulfated fates (Sulfated Alcohols),
Sulfated Natural Fats and Oils, Sulfated Alkanolamides, Sulfated Esters, Ethoxylated and Sulfated Alkyl
phenols, Ethoxylated and Sulfated Alcohols, Phosphate Esters.

4. Non-Ionic Surfactants
Introduction, Polyoxyethylene Surfactants,
Ethoxylated Alkyl Phenols, Ethoxylated
Aliphatic Alcohols, Carboxylic Esters, Glycerol Esters, Polyethylene Glycol Esters,
Anhydrosorbitol Esters, Ethoxylated Anhydrosorbitol Esters, Glycol Esters of Fatty
Acids, Ethoxylated Natural Fats, Oils and Waxes, Carboxylic Amides, Diethanolamine Condensates,
Monoalkanolamine Condensates, Poly- oxyethylene Fatty Acids Amides, Polyalkylene Oxide Block
Copolymers, Polyoxypropylene-Polyoxyethylene Derivatives, Organo Silicones Derivatives.

5. Cationic, Amphoteric and Enzyme Detergents
Cationic Detergents, Amines not containing Oxygen, Oxygen- Containing Amines,
Except Amides, Amine Oxides, Polyoxy ethylene Alkyl and Alcyclic Amines, 2-Alkyl- 1-(hydroxy-
ethyl)-2-imidazolines, N, N, N’N’-Tetrakis-substituted Ethylen ediamines, Other
Miscellaneous Cationic Surfactants, Amines Having Amide Linkages, Quaternary
Ammonium Salts, Amphoteric Surfactants, Enzyme Detergents.

6. Sulfonated Oils
Historical Background, Chemistry of Sulfation
and Sulfonation, Applications of Sulfonated Oils,
Manufacture of Sulfonated Oils, Sulfation, Sulfonation, Sulfation of individual Oils, Characteristics and
Analysis of Sulfonated Sulfated Oils.

7. Alkylolamides
Introduction, Alkylolamides in Shampoo Formulations, Chemistery of the Alkylola- mides,

8. Vinylarene Polymers

9. N-Acyl-N-Alkyltaurates

10. Vinylamine Polymers
Preparation, Polymerization Followed by Hydrolysis, Polymerization Followed by Reduction, Hofmann Degradation of Poly(acrylamide), Polymerization Kinetics, Copolymers of Vinyl-, Amine Properties, Chemical Reactions of Poly (vinylamine), Uses.

11. Alkyl Sulfates

12. N-Vinyl Amide Polymers
Monomers, Manufacture, Polymerization, Properties of Poly (vinyl Amides), Other Poly (vinyl Amides), Uses, Cosmetics and Toiletries, Textiles and Dyes, Pharmaceuticals, Adhesives, Beverage Clarification, Miscellaneous Uses, Specifications and Standards, Analytical and Test Methods, Health and Safety Factors.

13. Olefin Sulfate and Sulfonates

14. Ethoxylation Processes
Introduction, Ethoxylated Alkyl Phenols, Laboratory Method of Preparation, Batch Ethoxylation Unit, Properties of Ethoxylated Alkyl Phenols.

15. Ethoxylated Fatty Alcohols

16. Alkyl Phenol Ether Sulfates
Introduction, Sulfation and Sulfonation, Manufacture of Alkyl Phenol Ether Sulfates, Sulfamation,
Nonylphenol 4-ethoxy Sulfate, Di- (isohexyl / isoheptyl)phenol Ether Sulfate, Docylphenol Ether Sulfate, Sulfation with Sulfur Trioxide, Comparison of Sulfation with Sulfur Trioxide and Sulfamic Acid, Properties and Performance Characteristics of Alkyl Phenol Ether Sulfates.

17. Alkyl Ether Sulfates

18. Fatty Amine Oxides

19. Bisquaternery and Other Cationic Softeners

20. Other Miscellaneous Emulsifiers
(i) Alkyl Naphthalene Sulfonates

(ii) Sulfated Alkylolamides

(iii) Sodium B-Sulfoethyl Esters of Fatty Acids
Introduction, Manufacture of Igepon A.

(iv) Polyethylene Glycol Fatty Acid Esters
Introduction, Manufacturing Process, Fatty Acid Esters of Sucrose.

(v) N-Acylsarcosinates
Introduction, Manufacture of Sodium N-Oleoylsarcosinate.

(vi) Sulfated Monoglyceride
Introduction, Manufacture.

21. Application of Emulsifiers
(i) Pharmaceutical Emulsions
Introduction, Cod Liver Oil Emulsions, Ointments, Beeler’s Base, Washable Ointment Base, Greaseless Base, Ointment Washable Type, Steroidal Emulsion, Aeriflavine Ointment, Aluminium Acetate Lotion, Typical Antibiotic, Anesthetic and Anti-Inflammatory Ointment, O/W Type Benzyl Ointment, O/W Boric Acid Ointment, W/O Calamine Cream, W/O Emollient Ointment, Solubilized Hexachlorophene, O/W Oxyquinoline Sulphate Ointment, Penicillin Ointment.
(ii) Rosin and Rubber Emulsion

(iii) Textile Emulsions

(iv) Pesticides Emulsions
Malathion Wettable Powder, Dieldrin Formulation, Lindane Formulation, Ronnel Formulation, Butyl Ester of 2, 4-D Formulation, Fruit Coating Wax Emulsion, Cattle Dips, DDT Formulation, Chlordane Formulation, Heptachlor Formulation, Aldrin Formulation, Endrin Emulsion Concentrate.

(v) Food Emulsion
Chocolate Milk, Stabilized, Artificial Cream, Lemon Oil Emulsion, Transparent Lemon Oil Emulsion, Orange Emulsion, Bitter Almond Emulsion, Butter Substitute, Mayonnaise, Salad Dressings, Coffee Whitener Liquid, Coffee Whitener (Spray Dried), Ice Cream Mix, Pickle Flavour Emulsion, Starch Paste.

(vi) Emulsions in Paint Industry

(vii) Emulsions in Polish Industry
Automobile Polish, ‘Dry Bright’ Floor Polish, Paste Polishes, Mineral Oil Emulsion Polishes, Silicone Polishing Cloth, Paste Type, Automobile Cleaner Polish.

(viii) Leather and Paper Treatment Emulsions

(ix) Cutting Oils, Soluble Oils, Miscible Oils
Napthenic Miscible Oils, Cutting Oils, Mold Release Compound.

(x) Cleaners

22. Determination of Physical Surface
   Active Characteristics of Emulsifiers
Evaluation, Split Item Tests, Bundle Test, Foam Tests, Dynamic Foam Test, Pour Foam Test, Wetting Test, Canvas Disc Test, Skein Test.

23. Analysis of Emulsifiers

24. Photographs of Machinery and Equipments

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
