

The Complete Technology Book on Alcoholic and Non-Alcoholic Beverages(Fruit Juices, Whisky, Beer, Rum and Wine)

Author: NPCS Board of Consultants & Engineers

Format: Hardcover

ISBN: 9788178331126

Code: NI209

Pages: 824

Price: Rs. 2,575.00 **US\$** 200.00

Publisher: Asia Pacific Business Press Inc.

Usually ships within 5 days

The alcoholic and non alcoholic beverages are being used by human being since centuries back. Accompanying the increase in the variety of consumption there has been a parallel increase in the variety of alcoholic and non alcoholic beverages offered for sale. The alcoholic drinks market is broadly classified into five classes, starting from beers, wines, hard liquors, liqueurs and others. Similarly non alcoholic drinks market is broadly classified into carbonated drinks, non carbonated drinks and hot beverages. These include juices, energy drinks, carbonated drinks, tea, coffee and bottled water. The commercial success of a soft drink formulation depends upon a number of factors. A strong, well placed advertising campaign will bring the consumer to purchase the new product but, thereafter, the level of repeat sales will reflect the degree of enthusiasm with which the new drink has been received. The dramatic growth of fruit juice and non carbonated fruit beverage markets worldwide has been made possible by the development of new packs and packing systems and improvements in traditional packaging. Tropical fruits are the newest arrivals on the juice and fruit beverage market. Whisky is the portable spirit obtained by distillation of aqueous extract of an infusion of malted barley and other cereals that has been fermented. It can be considered as the product of distillation of an unhopped beer. Beer is the world most widely consumed alcoholic beverage; it is the third most popular drink overall, after water and tea. Rum is a distilled alcoholic beverage made from sugarcane by products such as molasses, or directly from sugarcane juice, by a process of fermentation and distillation. The Indian alcoholic market has been growing rapidly for the last ten years, due to the positive impact of demographic trends and expected changes like rising income levels, changing age profile, changing lifestyles and reduction in beverages prices.

Some of the fundamentals of the book are flavourings and emulsions, syrup room operation, fruit juices and comminuted bases, acids, colours, preservatives and other additives, high intensity sweeteners, packaging systems for fruit juices and non carbonated beverages, grape juice processing, processing of citrus juices, juice processing for pasteurized single strength, equipment for extraction and processing of soft and pome fruit juices, chemistry and technology of citrus juices and by products, legislation controlling production, labelling and marketing, biochemical events during brewing fermentations, outline of the whisky producing process, types of beer brewed, aroma compounds of rum and their formation, cider and perry etc.

The alcoholic and non alcoholic beverages described in this book are beer, wine, rum, whisky, cider and different types of fruit juices with packaging systems and other relevant parameters related to their manufacturing. The book will be very helpful to technocrats, new entrepreneurs, research scholars and for those who are already in to this field.

Contents

1. CARBONATION AND FILLING

- Introduction
- Carbonation
 - The nature and effects of carbonation
 - Properties of carbondioxide
 - Equilibrium pressure
 - Measurement of carbonation
 - Carbonation determination
- Carbonators
 - Designs of carbonators
 - Air exclusion
- Proportioners
- Fillers and Filling Valves
 - Basic filling valve operation
 - Filling valve development and the influence of ambient filling

2. EFFECTIVE APPLICATION OF QUALITY CONTROL

- Introduction
- Evolution of QC in the Soft Drinks Industry
- Concept of quality
- Evolution of soft drinks QC
- The Small-to-Medium-Sized Business
- Contract packing
- Setting up a cost-effective system for QC
- Product and packaging innovation
- National Operations with Multiple Plants
 - Impact of industry concentration
 - Organisation of QC at plant level
 - Centralised organisation for quality
- Bottling versus canning QC requirements
- Equipment selection for quality
- Development of in-line quality-monitoring equipment
- Potential quality problem areas
- Product recall
- Water quality and treatment
- Statistical QC
- Microbiology
- Dispensed soft drinks
- International QC and QA of Soft Drink Operations
 - The franchise system
 - Technical services
 - The international quality assurance laboratory
- Ingredient quality
- Packaging quality

Trouble-shooting the theory in practice
The Future
Influence of packaging
New ingredients formulation and sanitation requirements
Role of the soft drinks associations
The final word
3. FLAVOURINGS AND EMULSIONS
Flavourings
Legislation
Creation
Production
Emulsions
Manufacture
Application of Flavourings and Emulsions
Selection
Methods of use
Evaluations
4 SYRUP ROOM OPERATION
Introduction
Syrup Room Design
Wall finishes
Floors and drainage
Ceilings and lighting
Heating, ventilating and air conditioning
Syrup Room Equipment
Storage, mixing tanks and systems
Pipework, fittings and connections
Ingredient flow
Pumps
Measurement of liquid
Filtration of ingredients
Ultraviolet sterilisation
Pasteurisation
Homogenisation
Syrup Room Materials Storage and Handling
Sugar
High-fructose glucose (Corn) syrup
Acids
Sweeteners
Preservatives
Flavourings
Colours
Fruit juices and comminuted bases
Syrup Room CIP Systems and Detergents
Design of a CIP unit
Rate of flow in pipelines for CIP
Calculation of reynolds number
Choice of detergents
Automaton and computerisation in syrup rooms
Typical system description
Typical operating sequence for syrup manufacture
Multiple Component Mixing Plant
Construction

Control and operation
Future Developments
5 ACIDS, COLOURS, PRESERVATIVES
AND OTHER ADDITIVES
Introduction
Acids
Carbonic acid
Citric acid
Tartaric acid
Phosphoric acid
Lactic acid
Acetic acid
Malic acid
Fumaric acid
Ascorbic acid
Colours
Preservatives
Micro-organisms and soft drinks
Sulphur dioxide
Benzoic acid and benzoates
Esters of para-hydroxy-benzoic acid
Sorbic acid and sorbates,
Other Additives
Emulsifiers
Stabilisers
Saponins
Anti-oxidants
The Safety of Food Additives
6. HIGH-INTENSITY SWEETENERS
Introduction
Use of Intense Sweeteners
Current Sweeteners
Acesulfame K
Aspartame
Cyclamate
Saccharin
Stevioside/Stevia
Thaumatococcus
Dihydrochalcones
Potential New Sweeteners
Alitame
Sweetener Approval and Regulation
Future Use of Intense Sweeteners
7. CARBOHYDRATE SUGARS
Introduction
History
Carbohydrate Sugars
Granulated sugar
Liquid sugar
Glucose syrup: high-fructose syrup
Quality
Trade requirement
Quality assurance management

Sugar analysis
Transportation and Delivery
Bulk delivery of granulated sugar
Bulk delivery of Liquid carbohydrate Sugars
Security of delivery
Storage
Granulated sugar in bags
Granulated sugar in bulk
Liquid carbohydrate sugars
On-site Dissolving of Granulated Sugar
Batch dissolving
Continuous dissolving
High-capacity dissolving

8. PACKAGING SYSTEMS FOR FRUIT JUICES AND NON-CARBONATED BEVERAGES

Introduction
The Fresh Cold Fill System
The Hot Fill System
Filling Equipment for Gable Top Cartons
Packing Materials for Gable Top Cartons
Product Protection and Product/Pack Interaction
General considerations
Cold filled juices
Hot filled juices
Flavour
Packaging of Frozen Concentrated Juices (FCJ)
Filling in Glass Containers
Plastic Containers and Pouches

9. GRAPE JUICE PROCESSING

History of Grape Juice Processing in North America
Grape Cultivars
The Chemistry of Grape Juice
Carbohydrates
Acids
Mineral content
Phenolic
Volatiles
Modern Grape Juice Processing
Harvesting/ripening
Stemmer/crusher operation
Hot-break process
De-juicing/pressing operation
Coarse filtration
Bulk storage and tartrate precipitation
Enzyme clarification
Polish (fine) filtration
Hot fill
Process Alternatives
Cold-pressing
Aseptic process
Concentration
Sulfur dioxide preservative

10. PROCESSING OF CITRUS JUICES

Introduction
Fruit Harvesting and Transport
Unloading and Storage of Fruit
Fruit Transfer from Storage Bins to Extractors
Juice Extraction and Finishing
Extractors
Finishing
Juice Processing for Pasteurized Single Strength
Juice Processing for Concentrate
Characteristics of 1950s evaporators
Modern evaporators for citrus fruit
Essence Recovery
Chilled Juice from Concentrate
Pulp Wash
Frozen Pulp Processing
Manufacture of Citrus Cold Pressed Oil
Manufacture of Livestock Feed from Citrus Peel
Peel dryer
Waste heat evaporator

11. APPLE JUICE

General Background
Juice extraction
Pomace disposal
Blending and packaging
Natural Style Juices
Clarified Juice and Concentrate
Enzyming
Pulp enzyming
Fining
Concentrates
Hazes and deposits
Authentication and Adulteration
Composition of Apple Juice
Sugars and sorbitol
Starch & pectin
Organic acids
Protein and amino acids
Polyphenols and colour
Minerals
Volatile components
Other flavour aspects
Microbiology
Food Tests
Test for the presence of pectin in clarified Juice
Test for the presence of starch
Test fining with gelatin
Test fining with gelatin/kieselsohl
Test for overfining

12. EQUIPMENT FOR EXTRACTION AND PROCESSING OF SOFT AND POME FRUIT JUICES

Introduction
Modern juice processing methods
Juice Extraction Systems

Fruit storage and handling
Milling
Pressing
Comparison of pressing systems
European grape pressing
Pre-treatment with Pectolytic Enzymes
Post-press Clarification
Decantation
Centrifugation
Earth filtration
Rotary vacuum filters
Sheet filtration
Cartridge filters
Membrane filtration
Concentration/Aroma Recovery
Rising film evaporators
Falling film evaporators
Centrifugal evaporators
Heat recovery from evaporated water
Aroma recovery
Pasteurisation
Flash pasteurisation
Batch pasteurisation
In-pack pasteurisation/hot filling
Fruit Juice Plant Layout
Materials of construction
Fruit reception
Handling and washing fruit
Seasonal problems
Effluent treatment
Juice storage
Summary

13. CHEMISTRY AND TECHNOLOGY OF CITRUS JUICES AND BY-PRODUCTS

Principal Citrus Cultivars
Origin of citrus
Commercial citrus regions
Citrus growing areas
Effect of frost
Effect of soil
Composition and Structure of Citrus Fruits and Juices of Various Cultivars
General relationship
Organic acids
Carbohydrates
Color pigments
Vitamins and inorganic constituents
Flavonoids
Lipids
Operational Procedures and Effects on Quality and Shelf Life of Citrus Juices
Outline of good manufacturing and processing procedures
Concentrate handling for reprocessing and/or reconstruction
Sanitation or stabilization
Water for reconstitution use

Processing of chilled high and low pulp reconstituted orange juice
Finished product handling and storage
Citrus Juice Flavor Enhancement with Natural Citrus Volatiles
Components of citrus juice flavor
Citrus flavor enhancement technology
Citrus oils and aroma and their recovery
Pectic Substances and Relationship of Citrus Enzymes to Juice Quality
Effect of Time, Temperature and other Factors on Citrus Products
14. LEGISLATION CONTROLLING PRODUCTION, LABELLING AND MARKETING
Fruit Juices, Concentrated Fruit Juices and Fruit Nectars, Introduction
Fruit juice regulations in EEC countries
Fruit juice regulations in the United States and Canada
Fruit juice regulations in other major countries
Fruit juice standards produced by codex alimentarius
Non-Carbonated Fruit Beverages
Introduction
Fruit drink regulations in EEC countries
Fruit drink regulations in other European countries
Fruit drink regulations in the United states and Canada
Fruit drink regulations in other major countries
15. TROPICAL FRUIT JUICES
Introduction
Guava
Mango
Passion fruit
Pineapple
Other Tropical Fruits
Acerola
Banana
Kiwifruit
Lulo
Papaya
Soursop
Umbu
Tropical Fruit Juices in Europe Today
The Future
16. WHISKY 418
Introduction
History of Whisky Production
Outline of the Whisky-producing Process
Individual Operations
Raw materials
Mashing and cooking
Fermentation
Distillation
Maturation and ageing
Blending and colouring
Effluent disposal and spent grains recovery
Organoleptically Important Components of Whisky
Concentrations of organoleptically important compounds
Chemical nature of organoleptically important compounds
Contribution of compounds to organoleptic properties
Origin of organoleptically important compounds

17. BEER

Introduction

Historical Aspects of Brewing

Prehistoric and early historic

Brewing in Europe

Outline of the Brewing Process

Malting

Suitability of barley for brewing

the malting process

Kilning

Mashing

Brewing liquor

Mash-tun ingredients other than malt

Mashing systems

Enzymolysis in the mash tun

Sparging

Direct Conversion of Barley to wort

Wort Boiling and Cooling

General

Hops and hopping

Wort clarification and cooling

Fermentation

Brewing yeasts

Biochemical events during brewing fermentations

Physical behaviour of yeast

Fermentation systems

Beer Treatments

Maturation and conditioning

Haze prevention

Yeast removal

Pasteurization

Post-fermentation bittering

Beer Properties

Colour and clarity

Foam

Flavour and aroma

General composition and dietary value of beer

Beer Defects

Gushing

Microbiological spoilage

Oxidation flavour, stale flavour and other off-flavours

The State of the Industry

Types of beer brewed

18. RUM

Introduction

Production of Rum

Types of rum and the raw materials used

Pretreatment of the raw materials

Fermentation

Distillation

Maturing

Aroma Compounds of Rum and their Formation

Higher alcohols

Fatty acids
Esters
Phenolic compounds
Nitrogenous compounds
Sulphur-containing compounds
Lactones
Carbonyl compounds
19. TABLE WINES
Introduction
Some Economic Aspects of the History of Wine Making
Grapes
Must Treatment
Alcoholic Fermentation
Post Fermentation Operations
Microbiological Stabilization
Malo-lactic fermentation
Microbiological spoilage,
Sulphur dioxide addition
20. CIDER AND PERRY
Introduction
Definition of cider and perry
Outline of the process of cidermaking
Historical aspects
Composition
Juice
Fermentation and storage
Disorders
Technology
Fruit supply
Juice production
Juice treatment
Fermentation and storage
The final cider
Ancillary products

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help,

Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
