

The Complete Book on Water Soluble Polymers

Author: NPCS Board of Consultants & Engineers

Format: Paperback

ISBN: 9788178331232

Code: NI219

Pages: 672

Price: Rs. 1,575.00 US\$ 150.00

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Water soluble polymers cover a wide range of highly varied families of products of natural or synthetic origin, and have numerous uses. A water soluble polymer is a polymer that can be diluted in water, with or without the assistance of co solvents and neutralizing agents, to form transparent solutions. They may be classified into two types, totally synthetic polymers and natural products together with their chemically modified derivatives and further can be grouped into three main headings; naturally occurring, semi synthetic and completely synthetic polymers. The water based polymers are quick drying non inflammable, having mild odour and more environmentally acceptability than any other polymers. Most conventional coating polymers at present can be produced in a form that will allow them to be solubilized in water. These include alkydes, polyesters, acrylics epoxies. There are various types of polymerization methods of water soluble polymers such as bulk polymerization, solution polymerization, copolymerization, emulsion polymerization and suspension polymerization. Water soluble polymers are used widely as stabilizers or protective colloids in emulsion polymerization. Its most common use are gum acacia, starch either etherified or in its degraded form, dextrin, polyvinyl alcohol and hydroxyethyl cellulose. Polymers find many applications in oil recovery and production, including areas such as; drilling fluids, cementation of well bore, reservoir fracturing, controlling fluid flow in the reservoir and multistage processes of oil production and refining. The water soluble polymers market encompasses several categories, including starch, cellulose ethers, polyvinylacetate, polyvinyl alcohol and other synthetic water soluble polymers. The starch market is the largest.

This book basically deals with flow characteristics of water soluble polymer solutions, emulsion polymerization, water reducible resins, silicone modified alkyds and polyesters, cross linking of water soluble coatings, formulation of water soluble coatings, trouble shooting with water soluble polymers, acrylic solution resins, polyvinylpyrrolidone, commercial uses: compounding and formulating adhesives, methods of polymerization, methods for polymerization of acrylamide, fabrication of water soluble polymers, excluded volume interactions of neutral polymers etc.

The book covers classification of water soluble polymers, processes, properties, uses and applications of water soluble polymers with lot of other information. This book will be very resourceful for new entrepreneurs, existing units, technocrats, researchers and technical libraries.

Contents

1. WATER-SOLUBLE POLYMERS

Classification
Synthetic Polymers
Natural Products and their Derivatives
Properties of Cellulose Ethers
Degree of Polymerization
Degree of Substitution
Molar Substitution
Application
Basic Concepts of Rheology
Flow Characteristics of Water Soluble Polymer Solutions
Thixotropy
Uses
Latex Paints
Emulsion Polymerization
Other Applications

2. WATER-REDUCIBLE RESINS

History
Water-soluble Polymers
Maleinized Drying Oils
Alkyd Resins
Acrylic-modified Water-soluble Alkyds
Polyesters
Silicone-modified Alkyds and Polyesters
Epoxy Resins
Acrylics
Amino Resins
Other Water-soluble Polymers
Viscosity Characteristics
Amines
Viscosity
Drying
Stability
Gloss
Foam Control
Colour Retention
Toxicity
Variation of Amine Levels
Cosolvents
Coupling Efficiency
Viscosity
Stability
Drying Properties
Foam Control
Driers for Air Dry and Force Dry Systems
Cross-linking of Water-soluble Coatings
Additives for Coatings
Driers and Drier Accelerators
Surfactants
Flow Modifiers

Thixotropes and Thickeners
Volatile Additives
Pigments
Formulation of Water-soluble Coatings
Solubilization of Polymers
Trouble Shooting with Water-soluble Polymers
Vehicle Separation
Low Opacity
Photographing of Surface Defects
Viscosity Variations
Foaming and Air Entrapment
Sags and Runs
Poor Flow, Levelling and Orange Peel
Low Gloss and Micro Wrinkles
Flooding and Floating
Cratering and Pinholing
Picture Framing and Fat Edges
Blistering and Solvent Popping

3. ACRYLIC SOLUTION RESINS

Terminology
Backbone Monomers
Synthesis
Addition Polymerization
Copolymerization
Thermoplastic Acrylics
Selection of Monomer
Solution Polymerization
Properties and End Uses
Thermosetting Acrylics
Selection of Monomer
Classification and Properties
Acrylamide Copolymers
Acid Copolymers
Hydroxy Copolymers
Curing Reactions
Aqueous Solution Acrylics
Non-Aqueous Dispersions (NAD)

4. POLYVINYLPIRROLIDONE

Introduction
Chemical Nature
Physical Properties
Manufacture
Toxicological Properties
PVP Films
Compatibilities
Future Developments
Application of PVP
Pharmacy
Medicine
Beverages
Cosmetics and Toiletries
Textiles
Paper

Adhesives
Detergents and Soaps
Polymers and Polymerization
Agricultural
Photography and Lithography
5. POLY (ETYLENE OXIDE)
Introduction
Chemical Nature
Physical Properties
Manufacture
Biological/Toxicological Properties
Rheological Properties
Additives/Extenders
Applications
Application Procedures
Commercial Uses: Compounding and formulating Adhesives
Industrial Supplies
Constructions Products
Paints and Paint Removers
Pharmaceuticals
Printing Products
Soap, Detergents, and Personal " Care Products
Water-Soluble Films
Commercial Uses: Processing Aids
Binder
Coatings and Sizes
Dispersant
Flocculation
Hydrodynamic Drag Reduction
Thermoplastics Manufactures
Thickening/Rheology Control
Water Retention
Industries Using Polyethylene Oxide
Formulations
Aluminum and Metal Cleaner
Calamine Lotion
Denture Flexative Powder
Detergent Bars
Detergent Liquid
Lithographic Press Dampening Fluid
Micro Encapsulation
Paint and Varnish Remover
Thickened Acetic Acid
Thickened Hydrochloric Acid (Muriatric Acid)
Thickened Sulfuric Acid
Rubber Lubricant (For Mounting of Tires)
Toothpastes
6. METHODS OF POLYMERIZATION
Acrylamide
Initiation Methods
Single Component Initiators
Redox Initiators
Mechanism of Initiation

Dependence of Polymerization on Temperature

Propagation and Termination

Effect of pH

Effect of Monomer Concentration

Effect of Polymerization Medium

Inorganic Salts

Effect of Surfactants

Nature of the Termination Process

Substituted Acrylamides

Heat of Polymerization

Methods for Polymerization of Acrylamide

Acrylic and Methacrylic Acids

Effect of pH

Effect of Polymerization Medium

N-vinyl Pyrrolidone (NVP)

Other Water Soluble Polymers

Vinyl Alkyl Ethers

Ethylene Oxide (Cyclic Ether)

Ethylene Imine

Conclusions

7. CHEMICAL MODIFICATIONS

Cross-Linking with Functional Groups

Cross-Linking by Hydrogen Bonding

Effects of Cross-Linking on the Physical Properties of Polymers

Principal Types of Water-soluble Polymers

Determination of Cross-linking Density

Chemical Reactions of Water Soluble Polymers

Reactions of Cellulose and Starch

Structure and Cross-Linking Reactions of Proteins

Cross-Linking Reactions Involving Metal Ions

8. FABRICATION OF WATER SOLUBLE POLYMERS

Extrusion

Molding

Calendering

Thermoforming

Bonding

Foams

Plastisol Processing

9. COMPOUNDING OF WATER SOLUBLE POLYMERS

Compound Ingredients

Plasticized Poly(vinyl Chloride)

Plastisols

Techniques

10. POLYMERIZATION OF WATER SOLUBLE POLYMERS

Bulk Polymerization

Effect of Oxygen

Solution Polymerization

Chain Transfer and Molecular-Weight Control

Copolymerization

Industrial Manufacture

Emulsion Polymerization

Suspension Polymerization

Solution and Bulk Polymerization

11. PROPERTIES OF WATER SOLUBLE POLYMERS

Structure

Property Values

Testing

Specifications

Degradation and Stabilization

12. SOLUTION THERMODYNAMICS OF NON-IONIC WATER SOLUBLE POLYMERS

Experimental Techniques

Theory

Comparison with Aqueous Solutions

Possible Reasons for the Deviations

The Hydrophobic Interaction

Evidence for Hydrophobic Interaction for Polyoxyethylene Solutions

Aggregation

Conformation

13. FRACTIONATION AND CHARACTERIZATION

Molar Mass and Its Distribution

Preparative Fractionation

Molar Mass Measurement

Reference Methods

Solution Viscosity

Analytical Size-exclusion Chromatography

Characterization of Polyacrylamide

14. WATER SOLUBILITY AND SENSIVITY

Scope and Classification

Thermodynamic Formalism

Experimental Data

Hydrophobic Effects

Concentrated Solutions

Non-Equilibrium Behaviour: Bound and Unfreezable Water

Time Dependent Properties

Conclusions

15. AQUEOUS SOLUTIONS OF POLYELECTROLYTES

The Phenomenological Approach

The Theoretical Approach

16. POLYMER SMALL MOLECULE INTERACTIONS

Interaction of Polymers with Water

(i) Hydrophobic Interactions

(ii) Hydrophilic Interactions

Interaction with Ions

Interaction with Surfactants

17. EXCLUDED VOLUME INTERACTIONS OF NEUTRAL POLYMERS

General Thermodynamic Relationships

Expression of Chemical Potentials in Terms of Composition

Binary (One-Solute) and Ternary (Two-Solute) Systems

Consequences of Non-Ideality

Excluded-Volume Interaction of Polymers

Approximate Expression of Available Volume

Effect of Concentration on the Configuration of Chain-Polymers

Some Experimental Examples

18. POLYMER ADSORPTION

Theoretical Predictions

Experimental Methods

- (a) Macroscopic Interfaces
- (b) Particulate Dispersions
- Experimental Results
- 19. POLYVINYL ALCOHOL
- General
- Film Solubility and Swelling in Water
- Solubility in Organic Solvents
- Properties of Polyvinyl Alcohol Films
- Gelling and Precipitation of Polyvinyl Alcohol
- Conclusion
- 20. ROLE OF POLYMERS IN THE STABILIZATION OF DISPERSE SYSTEMS
- The Attractive Interaction
- General Methods for Imparting Colloid Stability
- Steric Stabilization
- The Phenomenology of Flocculation
- Identification of the Critical Flocculation Point
- Notes on the Theta-point
- Classification of Sterically Stabilized Dispersions
- The Unimportance of Dispersion Forces in Incipient Flocculation
- Qualitative Discussion of the Origins of Steric Stabilization
- Non-Aqueous (and some aqueous) Dispersions
- Aqueous Dispersions
- Quantitative Calculation of Repulsive Potential Energy
- Enhanced Steric Stabilization
- Elastic Steric Stabilization in Polymer Melts
- Heterosteric Stabilization
- Depletion Stabilization
- Schematic Representation of the Effects of Idealized High Molecular Weight Polymer
- 21. WATER SOLUBLE POLYMERS AS STABILIZERS
- Adsorption Behaviour of Water-Soluble Polymers
- a. Adsorption on "Model" Polymer Dispersions
- b. Adsorption on Inorganic Dispersions
- c. Effect of Low Molecular Weight Surfactants on Adsorption
- Interactions of Water-Soluble Polymers with Surfactants
- Effects of Water-Soluble Polymers Added to Dispersions
- Water-Soluble Polymers as Stabilizers in Dispersion Polymerization
- a. Technological Aspects
- b. The Function of WSPs in Polymerizing Dispersions
- 22. POLYMERIC FLOCCULANTS
- Nature of Polymeric Flocculants
- Bridging Flocculation
- Adsorption Mechanisms
- Flocculation by Bridging
- Kinetic Aspects of Bridging Flocculation
- Charge Neutralization
- 23. THERMOREVERSIBLE GELATION
- Conclusion
- 24. WATER SENSITIVE GELS
- Structure of Synthetic Hydrogels
- Preparation
- Swelling of Gels
- Surface Properties
- 25. RHEOLOGICAL CHARACTERIZATION OF

SOLUTION AND GEL

Interpretation of Results

Concentrated Solutions

Polymer Networks

Surface and Interfacial Rheological Behaviour

26. THE INTERFACE BETWEEN AQUEOUS POLYMER SOLUTION AND ITS APPLICATION

Types of Water-Soluble Polymers

Technological Aspects

Scientific Aspects

Interaction Forces

27. POLYMERS IN OIL RECOVERY AND PRODUCTION

Operations Employing Polymers

Drilling Fluids

Cementing Fluids

Fracturing Fluids

Mobility Control for Water Flood Recovery

Polymers Employed in Reservoir Preparation and Oil Recovery

Cellulose Derivatives

Naturally Occurring Gums and their Derivatives

Starch and Its Derivatives

Acrylamide Polymers

Oil Production Polymers

Scale Formation

Corrosion Inhibitors

Demulsifiers

28. MEDICAL AND PHARMACEUTICAL APPLICATIONS

Polymers Used Therapeutically/Prophylactically

Biomedical/Prosthetic Uses

Pharmaceutical Applications

Processing and Formulation Aids; Disintegrants

Tablet Coating

Microencapsulation

Sustained Drug Delivery

Degradation

Disintegration and Dissolution of Polymers

Diffusion

Drug Complexing Agents

Stabilization of Dispersions/Controlled Flocculation

Conclusion

29. APPLICATIONS OF POLYMER EMULSIONS FOR

WATER-BASED PAINTS

Historical Changes in Demand

Selection of Raw Materials

Monomers

Range of Products

Resin Emulsions: Thermoplastic Type

Polyvinyl Acetate Emulsions

Vinyl Acetate - Acrylic Copolymers

Styrene Acrylic Copolymer Emulsions

Vinyl Acetate - Veova Copolymers

Acrylic Emulsions

Film Forming Mechanism

30. AQUEOUS POLYURETHANE DISPERSION TECHNOLOGY – AN UPDATE

Introduction

Concept of Aqueous PUD

- (1) Definition
- (2) Dispersion Behaviour
- (3) Film Formation

Chemical Classification

- (1) Anionic
- (2) Cationic
- (3) Nonionic

Preparation Procedures

- (1) Acetone Process
- (2) Prepolymer Mixing Process
- (3) Hot-Melt Process
- (4) Ketamine/Ketazine Process
- (5) Self-Dispersing of Solids

Chemical Crosslinking

- (1) Blocked Isocyanates
- (2) Radiation Induced Crosslinking
- (3) Crosslinking with Melamine/Formaldehyde Resin
- (4) Aziridines
- (5) Zirconium Compounds

Factors Influencing Performance

- (1) Type of Polyols
- (2) Type of Isocyanates
- (3) NCO/OH Ratio
- (4) Effect of Pendant Functionality
- (5) Effect of Catalysts
- (6) Particle Size
- (7) Glass Transition Temperature (T_g)
- (8) Molecular Weight
- (9) Intermolecular Forces
- (10) Crosslinking Density

Recent Advances

- (1) Improvement in Storage Stability
- (2) Improvement in Water and Chemical Resistance
- (3) Improvement in Mechanical Properties
- (4) Improvement in Other Important Properties

Combination of PUD with acrylics

Characterisation of Aqueous PUDs

- (1) Abrasion Resistance
- (2) Solvent Resistance
- (3) Thermal Analysis
- (4) Fourier Transform - Infra Red Spectroscopy (FT-IR)

Applications

The Future

Acknowledgment

31. MAINTENANCE COATINGS BASED ON WATERBORNE DISPERSIONS

Introduction

Formulating Principles

Pigments

Additives

Binders

Acrylics/Vinyls/Vinyl-Acrylic Emulsions

Polyurethane Dispersions
Cross Linking
Epoxy Dispersions
Miscellaneous Systems
Conclusion

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
