

# The Complete Book on Rubber Chemicals

**Author:-** NPCS Board of Consultants & Engineers

**Format:** paperback

**Code:** NI220

**Pages:** 672

**Price: Rs.1575US\$ 150**

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

Rubber Chemicals are essential additives for the manufacture and quality improvement of rubber products such as automobile tires, rubber hoses, and quake absorbing rubbers. For rubber processing and compounding certain chemicals are required which are known as rubber chemicals. The primary requirement of adding different compounding ingredients to develop the different grades of rubber compounds to meet various service needs at an economic price and to provide certain desired physical properties to a considerable extent. Some of the examples of rubber chemicals are waxes, amines, thiazoles, silicone resins, alcohol, sulphuric acids, dithiocarbamates, phosphoric acid etc. They are mostly applicable for white and coloured rubber. They are generally used in rubber tubing, conveyor belt cover balloons, hot water bottles injection bottle caps, footwear related items etc. Indian rubber chemical industry has high growth potential triggered by increased consumption and steady growth in tyre and rubber industries. The speciality chemicals industry in India is projected to grow at 15-17 % per year to reach \$ 80-100 billion by 2020. The demand for rubber chemicals is on the rise. All major manufacturers have raised the prices of their products substantially. Massive investment is expected to flow into the rubber chemicals manufacturing sector in India in the coming years from both domestic and global players.

The book covers different types, physical and chemical properties, applications of different rubber chemicals like waxes, synthetic organic chemicals, amines, silicones resins, releasing agents, stabilizers, solvents and many more. Some of the fundamentals of the book are synthetic hydrocarbon waxes, uses of amines in polymers, synthetic organic chemicals, analysis of specific anti-degradants, stabilization of halogenated polymers, anaerobic fermentations, the manufacture of sulfuric acid, analysis of dithiocarbamate esters, sodium hyposulfite (hydrosulfite), citric acid, gluconic acid, acetic acid, itaconic acid, kojic acid etc.

Rubber chemicals have a huge potential growth in future and considering the importance of the chemical we have brought out this book which will be an invaluable resource to rubber chemical manufacturers, technocrats, researchers, consultants and new entrepreneurs.

## 1. Waxes

Petroleum Waxes

Paraffin Waxes

Microcrystalline Waxes

Uses

Test Methods

Safety

Natural Waxes  
Vegetable Waxes  
Animal Waxes  
Mineral Waxes  
Synthetic Waxes  
Synthetic Hydrocarbon Waxes  
Miscellaneous Synthetic Waxes

2. Amines  
Physical Properties  
Chemical Properties  
Manufacture  
Uses of Amines in Polymers  
Catalysts  
Solvents  
Emulsifiers  
Compounding and Finishing

3. Thiazoles  
Antifungal Activity

4. Synthetic Organic Chemicals  
Chemicals Derived from Methane  
Synthesis Gas  
Chlorinated Methanes  
Acetylene  
Carbon Disulfide  
Chemicals Derived from Ethylene  
Polyethylene  
Ethylene Oxide  
Chlorinated Hydrocarbons  
Ethanol  
Ethylbenzene  
Acetaldehyde, Acetic Acid, Vinyl Acetate  
Ethylene Oligomers  
Chemicals Derived from Propylene  
Isopropyl Alcohol  
Polypropylene  
Acrylonitrile  
Propylene Oxide  
Dodecene, Nonene, Cumene  
Oxochemicals  
Glycerine  
Butanes, Butylene, LPG and Higher Aliphatic Hydrocarbons  
LPG and n-Butane  
Isobutane  
n-Butylenes  
Isobutylene  
n-Pentane and Cyclopentane  
Isopentane  
n-Paraffins, Monoolefins, Primary and Secondary Higher Alcohols  
Aromatic Chemicals  
Benzene Products  
Toluene Products  
Chemicals from Xylene  
Naphthalene Chemicals

Other Polymethylbenzenes

5. Silicone Resins

Manufacture

Surfactants and Specialties

Emulsions

Greases and Compounds

Surfactants

Primers and Adhesion Promoters

6. Silicone Fluids

Silicone Elastomers

Azine and Related Dyes

Methods of Manufacture

Commercial Grade and Specifications

Methods of Analysis

Identification

Assay Methods

Application Methods

Determination of Impurities

7. Antioxidants and Antiozonants

Testing and Evaluation Methods

Antioxidants

Antiozonants

General Methods of Analysis

Separation and Identification

Gas Chromatography

Paper Chromatography

Adsorption Chromatography

Thin-Layer Chromatography

Color Tests for Antidegradants

Spectrophotometric Identification of Antidegradants

Quantitative Determination

Analysis of Specific Antidegradants

N-Phenyl-2-Naphthylamine

Separation and Identification

Assay Methods

Determination in Mixtures

Acetone-diphenylamine Reaction Products

Separation and Identification

Assay Methods

Determination in Mixtures

1,2-Dihydro-2,2,4-trimethyl-6-ethoxyquinoline

N-1,3-Dimethylbutyl-N<sup>ε</sup>-phenyl-p-phenylenediamine

Separation and Identification

Assay Methods

Determination in Mixtures

N,N<sup>ε</sup>-Di-3-(5-methylheptyl)-p-phenylenediamine

Separation and Identification

Assay Methods

Determination in Mixtures

2,6-Di-tert-butyl-p-cresol

Separation and Identification

Assay Methods

Determination in Mixtures

Polygard  
Separation and Identification  
Assay Methods  
Determination in Mixtures  
Release Agents  
Properties Required  
Methods of Application  
Industrial Fields using Abherents  
Classes of Release Agents  
8. Stabilizers  
Methods  
Stabilization of Polyolefin Resins  
Stabilization of Halogenated Polymers  
Commercial Stabilizer Materials and Mixtures  
Epoxides  
Miscellaneous Special-Purpose Stabilizers  
9. Alcohol  
Fermentation  
Anaerobic Fermentations  
10. Nitrogen Compounds  
Ammonia Synthesis  
Uses of Ammonia  
Storage and Transport  
Nitric Acid  
Production  
Uses of Nitric Acid  
Ammonium Nitrate  
Hexamethylenetetramine  
Hydrazine  
Manufacture  
Stabilization  
Urea  
Uses of Urea  
Hydrogen Cyanide  
Acrylonitrile  
Melamine  
Amines  
Aniline  
Isocyanates  
Other Nitrogen Compounds  
11. Sulfuric Acid  
Uses of Sulfuric Acid  
Kinds of Acid  
The Manufacture of Sulfuric Acid  
Development of the Sulfuric Acid Industry in the United States  
The Chamber Process for Making Sulfuric Acid  
The Contact Process  
Sulfur  
Uses  
Sources  
12. Dithiocarbamates  
Dithiocarbamic Acid Salts  
Analysis of Dithiocarbamate Salts

Dithiocarbamate Esters  
Analysis of Dithiocarbamate Esters  
Thiuram Disulfides  
Analysis of Thiuram Disulfides  
13. Other Chemicals  
Sodium Chloride  
Soda Ash, The Commercial Sodium Carbonate  
Solvay Process  
Soda Ash from Other Sources  
Soda Ash-related Products  
Sodium Sulfate  
Salt Cake  
Glauber Salt  
Hydrochloric Acid  
Sodium Silicate  
Bromine and Bromides  
Sodium Sulfides  
Sodium Thiosulfate  
Sodium Bisulfate, Anhydrous  
Sodium Hyposulfite (Hydrosulfite)  
Caustic Soda and Chlorine  
Electrolysis of Brine  
Concentration of the Caustic Liquor  
The Mercury Cell  
Hydrogen Disposal  
Other Processes for the Production of Chlorine  
Liquid Chlorine  
Bleaches  
14. Organic Acids  
Citric Acid  
Gluconic Acid  
Acetic Acid  
Itaconic Acid  
Kojic Acid  
Other Ketogenic Fermentations  
Sorbose  
2-Ketogluconic Acid  
Nonionic Surfactants  
Ampholytic Surfactants  
15. Phosphoric Acid  
Production of Elemental Phosphorus and Phosphoric Acid  
Industrial Phosphates  
Sodium Pyrophosphate  
Wet-Process Phosphoric Acid  
Potassium Salts  
Soluble Potassium Salts  
Potassium Nitrate  
Types of Volatile Solvents

**About NIIR**

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
