

Hand Book on Printing Technology (Offset, Gravure, Flexo, Screen)

Author: NIIR Board
Format: Paperback
ISBN: 8178330873
Code: NI73
Pages: 644
Price: Rs. 975.00 **US\$** 100.00
Publisher: National Institute of Industrial Research
Usually ships within **3** days

The developments in science and technology have revolutionized the printing industry in the progressive countries of the world. There has been a considerable compact of this progress in the Indian Printing Industries. Keeping this fact in view we have made a sincere effort to provide the latest printing techniques in this book and hope that it will be very helpful to new entrants as well as established one .

Contents

1. Principles of Contact (Impression)
 - Introduction
 - Printing Methods
 - The Printing System
 - Preparatory Sections
 - Halftone Photography
 - Platemaking
 - Printing
 - Binding and Finishing
 - Inks for Letterpress and Lithography
 - Speciality Printing

2. Principles of Noncontact Printing
 - Introduction
 - Impactless printing system for variable printing
 - Summary

3. Coated Grades and Commercial Printing
 - Coated and Commercial Papers
 - Coating Methods

Coating Materials
Adhesives
Coated Paper Properties and Use

4. Tests for Gravure Printing

Introduction
Print Smoothness
Gravure Print Testing

5. Tests for Letterpress Printing

Printing Smoothness
Uniformity for paper surface

6 Tests for Offset Printing

Introduction
Runnability
Surface Strength
Water Resistance
Mechanical Properties
Web Runnability

7 Line Photography

Making a Negative
The Process Lens and its Care
Care of Process Lenses
Illumination
Sensitive Materials
Photographic Sensitometry
Types of Contrast Emulsions
Further Classification
Scaling Copy
Placing the Lens, Arc-lights and Ground Glass
Obtainable Illumination of the Copy Board
Focusing the Image Same Size
Organization of the Dark Room
Preparing for the Development Operation
Making the Exposure
Making a Negative from Black and White Line Copy
Developing
Developing Chemicals
Developing Action and Chemicals
Effect of Time and Temperature
Reduction and Enlargement
Producing Negatives from Fine Line Copy
Making Negatives with Filter and
Orthochromatic Emulsion
Dry Plate Negatives and Paper Negatives
Clearing the Negative
Producing Negatives from Screened Copy

8. Halftone Photography

Making a Halftone with a Glass Crossline Screen

Making a Halftone with Magenta Contact Screen

9. The Camera Department-its Equipment,

Facilities and Tools

The Lightroom

Lightroom Equipment

The Darkroom

Darkroom Entrance

Darkroom Ventilation

Darkroom Equipment

The Arc Light

Types of Arc Lamps

Light from an Arc Lamp

Types of Carbon Used

Carbon Arc Characteristics

Illumination Requirements of Arc Lamps

Spectral Characteristics of Arc Light

Hints on the use of Arc Lamps

Exposure Matters and Light Integrators

The Exposure Matter

The Light Integrator

The Photographer's Tools

Safety in the Camera Department

10. Description of Handling Originals

for Halftone Reproduction

Originals for Halftone Photography

Problems Association with Various Kinds of Copy

Ink Sketches

Photographic Prints

Watercolour Drawings

Pastel Drawings, Crayon Drawings and Oil Paintings

Dye Transfer Prints

Carbro Prints

Grouping of Originals

Grouping of Originals by Size

Grouping of Originals by Tonal Range

11. Focusing the Camera

Ground Glass Focusing

Focusing with Calibrated Tapes

Focusing with Numerical Counters

12. Viewing the Halftone Image

Dot Fringe

Evaluating the Halftone Negative

The Highlight Area

The Middle Tone Area

The Shadow Area

Tonal Range on the Press

13. Shooting Halftones with the Glass Screen

Focusing the Screen
Screen Ruling and the Wavelength of Light
Screen Aperture to Screen Distance Ratios Setting the Screen 208
Setting the Screen with a Calibrated Wedge
Screen Setting by Visual Focusing
Screen Setting by Camera Test Exposure
Exposure
Single and Multiple Exposure System
Some Observations on Various Stop Systems
Miscellaneous Exposure Information
Exposure Changes for Different Magnification
Angular Variation of Light Intensity
The Use of the f64 Stop

14. Special Processing Procedures in Making Halftones

Etching and Chemical Reduction
The Physical Action of Reduction
Subtractive Reducers
Proportional Reducers
Intensification
Special Hardener-for after Treatment
of Films and Plates

15. Special Halftone Camera Techniques

Screen Tints
Light Sources for Screen Tints
Vignetting
Light Variation with Angular Distance
Development Factors Suggestions for Better Screen Tints
Dropout Negatives (Highlight Negatives)
Large Aperture Exposures
Supplementary Line Exposure
Sears Method
Overlay Mask Method
Others Methods
Re-Screening Halftones
Duotones
Preparing the Copy for a Duotone
Shooting the Primary Negative
Shooting the Secondary Negatives
Variations on a Theme
Opaquing Masks
The Indirect Process of Making Halftone Images
Procedure for Shooting the Continuous-Tone Negative
Hints for the Indirect Process
Image Reversal

16. Screen Printing

Select Correct Screen Printing Fabric
An Antistatic Stencil Mesh
Screen Printing Frames
Stretching Equipment
Correct Stretching

Adhesives

The Manufacture of Diapositives

Stencils

The Diapositive

17. Application of Screen Printing

Screen Printing Accessories

Stencils

Chemicals Used and Formulations

Common Faults in Screen Printing

Printing Unit

Automatic Screen Printing Machine

Screen Printing on Different Surfaces

Inks for Screen Printing

18. Offset Lithography

Printing Processes

Origin and History of Lithography

Job Planning

Evolution of Offset Printing

Offset Machine Construction

Pre-Make Ready and Make Ready

Setting the Machine for Operation

Small Offset

Running Problems

Colour

Rollers

19. Planography

Origin of Planography

Principle of Planographic Printing

Direct Printing Process

Offset Printing Process

Working Process

20. Materials, Tools and Equipments

Lithographic varnish

Acids

Turpentine

French Chalk

Resin

Asphaltum

Paraffin

Driers

Sponge

Dampening Cloth

Vaseline

Tools and Equipments

Scraper

Ink Knife

Wrench

Proofing Devices

Mechanical Features

Automatic Proof Presses402
Qualities of a Good Proof

21. Sheetfed Offset Machines

Names of the machines

Mechanical Features

Lubrication

Sheet feeding mechanism

Sheet board

Functions of blowers

Functions of the blower foot

Sheet lifting and forwarding

Sheet Controls

Sheet Register

Sheet Insertion and Transfer

Inking System

Distribution System

Multiroll System

Wash-up device

Adjustment of Rollers

Different Dampening Systems

Cleaning of Dampeners

Construction of the machine

Working on the cleaning machine

Plate Cylinder

Blanket Cylinder

Impression Cylinder

Adjustment of Cylinders

Advantages of Both Principles

Delivery Mechanism

Anti-setoff Spray

Miscellaneous Operations

22 Web Offset Machines

Driving Mechanism

Printing Units

Main Parts of Printing Unit

Inking System

Delivery Unit

Folding Unit

Ancillary Operations by Delivery Unit

23. Colour and its Reproduction

Terminology Related to Colour

Mixing and Matching of Colors

Sequence of Colours in Printing

24. Quality Control in Printing

Before Printing

During Printing

After Printing

25. Flexography

Flexography

Flexographic Platemaking

Photochemical Change

Rotary Principle

Rubber Plates

Substrates

Paper and Board

26. Rotogravure

27. Creative Frees Printer

Popular Product with Powerful Appeal

Topical Information Mix

Individual Brand of Success

Production-Driven Investment

As Horst Brostler Explains

Flexibility in Many Spheres

Super-Wide Rotogravure Presses in Big Demand

Brownie points of gravure

New Techniques for Handling Giant Reels

Bigger Core Diameters Needed to

Handle Higher Speeds

A Host of Optimised Details

Light Weight Guide Rollers

Process Computer Systems With Visualisation

28. Shaftless Spearheads Expansion

Economic Efficiency-the Clincher

Eightfold Increase in Sales

Confidence in KBA Technology

Commissioning to a Tight Schedule

29. Plant and Machineries for the Printing Technology

30. Manufacturers & Suppliers of Raw Material

31. Indian Printing Associations

About NIIR

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
