

# Modern Technology Of Plastic & Polymer Processing Industries

**Author:** NIIR Board

**Format:** Paperback

**ISBN:** 8178330776

**Code:** NI83

**Pages:** 429

**Price:** Rs. 750.00 **US\$** 100.00

**Publisher:** National Institute of Industrial Research

Usually ships within **3** days

This book offers, in a standardized and readily accessible information on the synthesis, structure, properties and applications of the most important polymeric materials. It has been designed as a text giving a balanced coverage of the science and technology of polymers finding major applications a plastics. This book is very useful for industrialists, consultants, research scholars and institutes.

## Contents

### 1. PROPERTIES AND APPLICATIONS OF ENGINEERING

#### THERMOPLASTICS

Polyethylene Terephthalate (PET)

Applications

Polybutylene Terephthalate (PBT)

Charactristics

Applications

Polyamides (PA)

Characteristics

Applications

Polyoxymethylenes (POM)

Characteristics

Applications

Polycarbonate (PC)

Characteristics

Applications

### 2. THE STRENGTH OF THERMOPLASTIC COMPOSITES

Compression strength

The Tensile Strengths of Uniaxial Laminates

The Tensile Strengths of Cross-plyed Laminates

Shear Strengths

Technological Tests

### 3. TEMPERATURE SENSITIVITY

The Effect of Temperature on Stiffness

The Influence of Temperature on Strength

Toughness and Temperature

Fire Resistance

### 4. THE APPLICATIONS OF THERMOPLASTIC STRUCTURAL COMPOSITES

Medical uses

Satellites and Launch Vehicles

Aircraft Structures

Marine applications

Automotive Engineering

Industrial Machinery

### 5. THERMAL ANALYSIS OF POLYMERIC MATERIALS

Dielectric Analyzer

Thermogravimetric Analysis (TGA)

Thermograms

High Resolution Thermogravimetric Analysis

Applications

Relative Thermal Stability

Differential Scanning Calorimetry (DSC)

### 6. APPLICATIONS OF DIFFERENTIAL SCANNING

### CALORIMETRY AND POLYMER CHARACTERIZATION

Specific Heat Capacity Measurement

Calculations

DSC Curing Kinetics

Principle of Operation

Applications

DSC Thermal Stability Kinetics

Applications

Degree of Crystallinity and Melting Point ( $T_m$ )

Statement of the Problem

### 7. KINETIC STUDIES WITH DIFFERENTIAL SCANNING

### CALORIMETER

Borchardt and Daniels Method

The Technique Assumes

ASTM E698 Method

Isothermal Method

Dynamic Versus Isothermal Method

Autocatalyzed versus Nth Order Kinetics

Theory and Calculations

Isothermal Method

### 8. THERMOGRAVIMETRY

Quality control and materials characterisation in the ceramics industry

Use of TGA to distinguish flame-retarded polymers from standard polymers

Measurement of Smoke Density by TGA/Photometric Analysis

TGA decomposition Kinetics

Applications

### 9. MOLECULAR WEIGHT AND DIMENSION OF POLYMERS

Concept of Average Molecular Weight

Molecular Weight Distribution

Measurement of Molecular Weight Average

Summary

## 10. POLYMER DEGRADATION AND STABILISATION

Types of Degradation

Other Types of Degradation

Recent Progress in the Degradation of Polyisobutylene

Introduction

Photodegradation

Oxidative Degradation

Stabilization

Sensitization

Advances in Photodegradation and Stabilization of

Polyurethanes

Introduction

Mechanism of Photodegradation

Effect of Physical State on Photodegradation

Photostabilization of Polyurethanes

Conclusion

New Developments in the Degradation, Stabilization, and

Sensitization of Poly (Methyl Methacrylate)

Introduction

Weathering

Plasma Degradation

Mechanical Degradation

Ultrasonic Degradation

Electrochemical Degradation

Radiative Degradation

Thermal Degradation

Photodegradation

Oxidative Degradation

Stabilization

Sensitization

## 11. CONDENSATION POLYMERIZATION OR STEP-GROWTH POLYMERIZATION

Functionality Principal

Types of Polymerization

Basic Characteristics of Condensation or Step-Growth

Polymerization

Formation of a Polyester

Relationship between Average functionality, Extent of

Reaction and Degree of Polymerization

Molecular Weight Control: Quantitative Effect of Stoichiometric Imbalance on Maximum Attainable Molecular Weight

Kinetics of Step-growth Polymerization

Principle of Equal Reactivity of Functional Groups

Rate of Step-growth Polymerization

Distribution of Molecular Weight in (Linear Bifunctional

Polycondensation

Derivation of Distribution Functions

Weight Average Degree of Polymerization

Multichain Step-Growth Polymers (Polyfunctional Systems)

Branching

Cross-linking

Prediction of Gel-Point

Some Additional Considerations of Non-Stoichiometric

Reactant Systems  
Practical Consideration of Gel Points  
Molecular Weight Distribution in Multifunctional  
Reactant Systems  
Interfacial Polymerization  
12. COPOLYMERIZATION AND TECHNIQUES OF  
POLYMERIZATION  
Concept of Copolymerization  
Binary Copolymerization of Vinyl Monomers by Free Radical Mechanism  
Analysis of the System and the Reactions Involved  
Kinetics of Chain Propagation in Binary Copolymerization and Copolymer Composition  
Significance of Monomer Reactivity Ratios  
Types of Copolymerization  
Ideal Copolymerization  
Alternating Copolymerization  
Azeotropic Copolymerization  
Average Copolymer Composition  
Determination of Monomer Reactivity Ratios  
Rate of Copolymerization  
Structure and Reactivity of Monomers and Radicals  
Structure and Reactivity of Monomers  
Resonance Stabilization  
Radical Reactivity and Steric Effects  
Polar Effects and Alternation  
Technical Significance of Copolymerization  
Block and Graft Copolymers  
Techniques of Polymerizations  
Bulk Polymerization  
Solution Polymerization  
Suspension Polymerization  
Emulsion Polymerization  
13. POLYMER CHARACTERISTICS AND POLYMER  
CHARACTERIZATION  
The Structure of Vinyl and Related Polymers  
Prevalence of Head-to-Tail Structure in Vinyl Polymers  
Branching in Vinyl Polymers  
Polymer Degradation  
Thermal Degradation  
Depolymerization  
Substituent Roles  
Mechanochemical Degradation  
Aging or Oxidative Degradation  
Photodegradation  
The Concept of Average Molecular Weight  
Viscosity Average Molecular Weight  
General Expression for Viscosity Average Molecular Weight  
Number Average Molecular Weight  
Membrane Osmometry  
Weight Average Molecular Weight : Light Scattering by  
Polymer Solutions  
Dissymmetry  
End-Group Analysis  
Dye Partition Technique

Dye Interaction Technique  
The Z Average Molecular Weight  
General Requirement of Extrapolation to infinite Dilution  
Polymer Fractionation and Molecular Weight Distribution  
Gel Permeation Chromatography  
The Molecular Size Parameter  
Molecular Weight Distribution in Vinyl Polymers  
Thermal Analysis  
Other Methods and Techniques of Polymer Characterization  
14. PLASTICS: MATERIALS AND PROCESSING  
TECHNOLOGY  
Plastics Materials - Introduction  
Polyethylene  
Low Density Polyethylene (LDPE)  
High Density Polyethylene (HDPE)  
Structure and Properties of Polyethylenes  
Uses and Applications of Polyethylenes  
Chlorosulphonated Polyethylene  
Linear Low Density Polyethylene (LLDPE)  
Polypropylene  
Synthesis of Polypropylene  
Structure and Properties of Polypropylene  
Copolymers of Ethylene  
Polystyrene  
Monomer Synthesis  
Polymerization of Styrene  
Structure and Properties of Polystyrene  
Modification to High Impact Grades  
Styrene-Acrylonitrile (SAN) Copolymers and ABS Resins  
Processing, Uses and Applications of Polystyrene  
Acrylic Plastics: Poly (Methyl Methacrylate)  
Acrylic Fibres  
Poly (Vinyl Acetate)  
Polymers Derived from Poly(Vinyl Acetate)  
Poly(Vinyl Chloride)  
Preparation of Vinyl Chloride  
Polymerization of Vinyl Chloride  
Structure and Properties of PVC  
Compounding and Processing of PVC  
Applications of PVC  
Copolymers of Vinyl Chloride  
Polytetrafluoroethylene (PTFE)  
Coumarone-Indene Resins  
Polyacetals and Polyethers (Acetal Resins)  
Polyamides  
Preparation of Poly (Hexamethylene Adipamide): Nylon 66  
Preparation of Nylon 6  
Preparation of Nylon 11 and Nylon 12  
Properties, Uses and Applications of the Nylon Polyamides  
Liquid Crystalline Polymers<sup>3</sup>  
Aromatic Polyamides  
Polyimides  
Polyesters

Alkyds for Oleoresinous Varnishes  
Polyester Resins for Making Laminates and Composites  
Film- and Fibre-Forming Polyester:  
Poly (Ethylene Terephthalate)  
Polyurethanes  
Polycarbonates  
Epoxy resins  
Cellulose plastics  
Cellulose Nitrate  
Cellulose Acetate  
Cellulose Ethers  
Regenerated Cellulose  
Phenolic Resins  
Chemistry of Resin Formation  
Commercial Production  
Phenolic Moulding Powders  
Phenolic Laminates  
Cast Phenolics  
Miscellaneous Applications of Phenolic Resins  
Amino Resins  
Urea-Formaldehyde Resins  
Melamine-Formaldehyde Resins  
Silicones  
Additives for Plastics  
Fillers  
Plasticizers  
Stabilizers  
Colouring Matters  
Lubricants and Flow Promoters  
Cross-linking Agents  
Other Additives  
Plastics Processing Technology  
Moulding Techniques  
Forming Techniques  
Other Techniques  
Chart of Properties  
15. DIRECTORY  
Raw Material Suppliers for Plastic and Plastic Products  
Manufacturers of Plastic Processing Machinery  
Plastics Processing Machinery and Equipment (Foreign)  
Machinery and Equipment for Plastic Converting  
Extruders and Extrusion Lines  
Injection Moulding Machines  
Presses and Accessories  
Blow-Moulding and Thermoforming Machines  
Machinery for converting Reaction Resins  
(Unsaturated Polyesters, Epoxies)  
Coating Lines  
Other Plastics Converting Machines  
Miscellaneous Plastic Machineries

# About NIIR

**NIIR Project Consultancy Services (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.

NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
