

Modern Technology on Food Preservation (2nd Edition)

Author: NPCS Board

Format: Paperback

ISBN: 9788178330716

Code: NI88

Pages: 528

Price: Rs. 1,275.00 US\$ 33.95

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Food Preservation has become an integral part of the food processing industry. There are various methods of food preservation; drying, canning, freezing, food processing etc. Food processing is one the method of food preservation which is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption by humans or animals either in the home or by the food processing industry. Canning is one of the various methods of food preservation in which the food is processed and then sealed in an airtight container. This process prevents microorganisms from entering and proliferating inside. Dehydration is the process of removing water or moisture from a food product. Food dehydration is safe because water is removed from the food. Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state. Benefits of food processing include toxin removal, preservation, easing marketing and distribution tasks, and increasing food consistency. In addition, it increases seasonal availability of many foods, enables transportation of delicate perishable foods across long distances and makes many kinds of foods safe to eat by deactivating spoilage and pathogenic micro organisms. Nanotechnology exhibits great potential for the food industry. New methods for processing nanostructures are being developed having novel properties that were not previously possible. As such, due to the recent up gradation of preservation techniques, the preservation industry is also growing almost at the same rate as the food industry which is about 10 to 12% per year. The purpose of this book is to present the elements of the technology of food preservation. It deals with the products prepared from various fruits and vegetables commercially. Relevant information on enzymes, colours, additives, flavours, adulteration, etc., has been given. This book also contains photographs of equipments and machineries used in food preservation. This book will be very useful for new entrepreneurs, food technologists, industrialists, libraries etc.

Contents

1. Introduction of Food Technology

Source of Man's Food

Impact of Science and Technology

2. Acceptable Food to Eat

Nature's Seal of Quality

Food Flavors

Food Colors

Our Senses Can Fail Us

Excessive Heating Impairs Foods,
Moderate Heating May Improve Foods
Food Spoilage
Must Deter Natural Processes
Safe Food for Man
Food Poisoning
Food Intoxications
Food Infections
Sanitation and Health

3. The Refrigerated Storage of Perishable Commodities

Temperature of Objects
Temperature Measurements
Metabolism a Function of Temperature
Energy Deficit of Ice
Creating Energy Deficits Mechanically
Keeping Fresh Foods Edible
Animals Foods
Plant Food
Temperature of Cold Storage Rooms
Humidity of Storage Chamber
Heat Evolved by Living Tissues
Specific Heat of Foods
Calculation of Refrigeration Load
Cold Injury of Fruits and Vegetables
Ammonia Injury to Refrigerated Fruits and Vegetables
Waxing Foods to Prevent Shrinkage
Effect of Cold Storage on Quality
Preserving Foods in a Micro-Environment
Packaging Materials Tests Which May Be Performed
Formed Container Tests
Disorders of Stored Foods

4. Principles of Food freezing

Development of a Frozen Food Industry
The Freezing Point of Foods
Per Cent Water Frozen vs. Temperature of Food
and Its Quality
Size of Ice Crystals Formed
Volume Changes During Freezing
Refrigeration Requirements in Freezing Foods
Establishing the Refrigeration Requirements to
Freeze Food
Freezing in Air
Freezing by Indirect Contact with Refrigerants
Direct Immersion Freezing
Freezerburn
Packaging requirements for Frozen Foods
Influence of Freezing on Micro-organisms
Influence of Freezing on Proteins
Influence of Freezing on Enzymes
Influence of Freezing on Fats

Influence of Freezing on Vitamins
Influence of Freezing on Parasites
Thawing Damage to Frozen Foods

5. Principles of Food Preservation by drying

Drying a Natural Process
Dehydration-Artificial Drying
Dehydration vs. Sun Drying
Why Dried Foods
Dehydration Permits Food Preservation
Humidity-Water Vapor Content of Air
Air-The Drying Medium
Adiabatic Driers
Heat Transfer Through a Solid Surface
Criteria of Success in Dehydrated Foods
Freeze-Dehydration (Freeze Drying)
Triple Point of Water
Temperature Changes in Meat Freeze-Dehydration
Influence of Dehydration on Nutritive Value of Food
Influence of Drying on Micro-organisms
Influence of Drying on Enzyme Activity
Influence of Drying on Pigments in Foods
Dehydration of Fruits
Dehydration of Vegetables
Dehydration of Meat
Dehydration of Fish
Dehydration of Milk
Dehydration of Eggs
Packing of Dehydrated Foods
Influence of Drying on Food Acceptance

6. Principles of Food Preservation by Canning

The Art of "Appertizing"
Temperature vs. Pressure of Boiling Water
Spoilage of Food Caused by Micro-organisms
Evolution of Containers for Canning
Important Food Groups
Micro-organisms Associated with the Food Groups
Sources of Spoilage Organisms
Heat Resistance of Micro-organisms
Important in Canning
Factors Influencing the Heat Resistance of Spores
Influence of Food Ingredients on Heat Resistance of Spores
Heat Resistance of Enzymes in Food
Heat Penetration into Food Containers and Contents
General Method for Calculating the Process Time for Canned Foods
Inoculated Pack Studies
Adequacy of Heat Processes
Spoilage of Canned Foods
Microbial Spoilage
Failure of Glass Containers

Surface Markings on Broken Glass
Vacuum-pressure Relations in Canning Process
Storage of Canned Foods
External Corrosion of Cans
Coding the Pack
Influence of Canning on the Quality of Food
Colour
Flavor and Texture
Protein
Fat and Oil
Carbohydrates
Vitamins
Misconceptions Relating to Canned Foods
Improvements in Canning Technology

7. Principles of Food Preservation by Fermentation and Pickling

Life with Micro-organisms
Fermentation of Carbohydrates
Industrially Important Organisms in Food
Preservation
Order of Fermentation
Types of Fermentations of Sugar
Fermentation Controls
Sources of Salt
Wine and Beer
Salted-Fermented Foods
Deterioration of Fermented and Pickled Products
Nutritional Value of Pickled Products
Future Trends

8. Preservation of Food as Sugar Concentrates

Concentrated but moist
High solids high acid foods
Jelly
Jam
Fruit Butter
Marmalade
Pectin and gel formation
Invert Sugar
Jelly Making
Other Fruit Preserves
Candied and Glac  d Fruits
Maraschino Cherries
Sweetened Condensed Milk
Future Trends

9. Preservation of Foods with Chemical additives

Introduction
Definition of Chemical Additive
Importance of Chemical Additives
Legitimate Uses in Food Processing

- Undesirable Uses of Additives
- Safety of a Food Additive
- Functional Chemical Additive Applications
- Historical Significance
- Specific Uses of Chemical Additives
- Additives Permitted and Prohibited in the United States
- Chemical and Use
- Food Regulation and Compliance
- Miller Pesticide Amendment of 1954
- 1958 Food Additives Amendment
- 1960 Color Additives Amendment
- Chemical Preservatives
- Preservatives (Antimicrobials)
- Specified Uses and Amounts
- Preservatives (general)
- Specified Use
- Microbial Antagonists
- Antibiotics
- Quality Improving Agents
- Other Chemical Additives
- Artificial Flavoring
- Artificial Coloring
- Other Agents
- Chemical Additives and the Future

10. Preservation of Food with Ionizing Radiations

- A Place for Radiation Stabilized Foods
- Discovery of Radioactivity
- Alpha, Beta and Gamma Radiations
- Dosimetry
- Dose Distribution
- Induced Radio-Activity in Treated Food
- Mode of Action of Ionizing Radiations
- Radiation Effects on Micro-organisms
- Radiation Effects on Proteins
- Radiation Effects on Enzyme Systems
- Effects of Radiation on Amino Acids
- Effects of Radiation on Vitamins
- Radiation Effects on Carbohydrates
- Radiation Effects on Lipids
- Radiation Effect on Pigments
- Radiation Effect on Parasites and Insects
- Packaging of Radiation Stabilized Foods
- General Methods for establishing Radiation Stabilization Process for Foods
- The Food Product-Micro-organism Destruction
- Dose Requirements for the Radiation Sterilization of Foods
- Technological aspects of the Radiation Pasteurization of Foods
- Radiation Resistant Organisms
- Factors Influencing the Survival of Micro-organisms

from a Radiation Process
 The Influence of the Type of Radiation on the
 Inactivation of Micro-organisms
 The Influence of Dose Rate on the Inactivation of
 Micro-organisms
 The Influence of Environmental Conditions on the
 Survival of Micro-organisms from a
 Radiation Process
 Combination Processes
 Conditions after Irradiation Affecting Survival and
 Recovery of Micro-Organisms
 The Food Product-Enzyme Destruction
 Process for Radiation Sprout Inhibited White Potatoes
 Process for Insect De-infestation of White Flour by
 Irradiation
 The Process for Food Stabilization
 Process-Heat Inactivation of Enzymes plus
 Radiation Destruction of Micro-organisms
 Process and Product Specifications
 Process for Radiation-Pasteurized Plant Tissues
 (Fruits)
 Process for Radiation-Pasteurized Animal Flesh
 (Sliced Bacon)
 Process for Radiation-Sterilized Meat (Chicken),
 Fish and Vegetables
 Non-Heat Method for Controlling Enzymes in Meat
 Design of Radiation Processing Food Plants
 Wholesomeness of Radiation Stabilized Foods
 Some Public Health aspects of the Microbiology of
 Irradiated Foods
 Acceptability of Radiation Stabilized Foods
 Quality Control with Radiation Stabilized Foods
 Ionizing Radiations as a Unit Operation in the
 Food Industry

11. Preservation of Semi-moist Foods

Introduction
 Canned white bread
 Storage stability
 Sponge and Dough
 Filling and Proofing
 Processing
 Finished Product
 Fungistatic and fungicidal agents
 Sorbic acid
 Polyethylene
 Semi-moist Pet Foods
 Process for Semi-moist Pet Foods
 Marbled, Textured Product
 Water Activity
 Production of Semi-moist Products Growing
 Semi-moist Human Foods
 Coarse Ground Beef and Beef Cubes

Other Products being developed

12. Principles and Preservation of Bakery

Products

Introduction

Principles of Baking

Dough

Influence of Flour Proteins

Flour Improvers

Other Components of Flour

Yeast Raised Dough Products

Heat Generated During Mixing Doughs

Heat of Hydration

Cooling Requirements

Continuous Bread Making Process

Typical Formulations for Yeast Raised

Bakery Products

Baking Schedules

Baking Reactions

Chemically Leavened Bakery Products

Leavening Acids

Baking Powders

Elements of Cookie Technology

Cookie Flour

Sugar

Shortening

Eggs

Ammonia

Water

Baking Acids

Soda

Miscellaneous Ingredients

Mixing and Baking

Quality Cookie Chart

Elements of Cake Technology

General Rules for Formulating Cakes

Cake Formulations

Principles of Processing Cakes

Baking

Refrigerated Doughs

Preservation of Bakery Products

Fresh Bakery Products

Freezing of Bakery Products

Packaging

Storage Life of Frozen Bread

Cookies and Cakes

Nutrient Losses in Bakery Products

Packaged Fresh Bread

Packaged Fresh Cookies, Crackers, Bakery Goods,

Cake Mixes

The Future

13. Storage Stability of Preserved Foods

Introduction
Relationships of Product Qualities and Storage
conditions
Objective Tests of Quality of Stored Foods
Objective Odor Measurements
Mechanical Texturemeter
Long-term Storage of Preserved Foods
Temperature of Storage
Nutrients
Containers for Long-Term Storage
Storage Costs
Storage Stability of Selected Frozen Foods
Result
The Future
14. Food Preservation Using Ozone

Introduction
Physicochemical Properties of Ozone
Use of Ozone in Storage and Packing Facilities
Extension of Storage Life with Ozone
Ozonation to Sanitize packing Line Process Water
The Commercial Production of Ozone
Importance of Ozone in Fishing Industry
Future Perspectives

15. Food Preservation by Smoking Process

Introduction
Types of Smoking
The Difference between Curing and Smoking
Meat Curing and Smoking
Types of Smokers

16. Thermal Food Preservation

Introduction
Effect of Preservation Temperatures
Effect of Processing on Nutrients in Foods
Thermal Preservation Methods

17. Machinery & Equipments (Photographs)

Directory Section

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable

Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
