

The Complete Technology Book on Chemical Industries

Author: NIIR Board
Format: Paperback
ISBN: 8178330687
Code: NI89
Pages: 443
Price: Rs. 975.00 US\$ 100.00
Publisher: Asia Pacific Business Press Inc.
Usually ships within 5 days

In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical Industry in India is one of the fastest growing industries under the Indian economy. The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials into more than 70,000 different products. Chemicals have contributed in various sectors like food industry, fertilizers, perfumery, fragrance and flavour etc. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to agriculture, manufacturing, construction, and service industries. There are numerous chemicals produced in chemical industry for example chloroform, caffeine, fertilizers, dyes, drug intermediates, herbicide, inorganic salts, copper sulphate, acetaldehyde etc. The chemical industry itself consumes 26 percent of its own output. The Chemical Industry in India is based on the idea of diversification. For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis, fertilizers, etc. Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals, fertilizers, fine chemicals like dyes and paints etc. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%.

This book majorly deals with the molecular formula, raw materials, properties, laboratory testing, manufacturing process explained with flow diagrams and uses of the chemicals. The major contents of the book are inorganic salts, inorganic chemicals, industrial gas, fertilizers, alum, caffeine, ceramic chemicals etc. This book covers the production of more than 100 chemicals for example acetanilide, methylamine, butylamine, linalol, phosphorous, salicylic acid etc.

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems.

Contents

1. 2-Chloro-6(Trichloromethyl)-Pyridine

Introduction

Classification

Uses and Applications

Industrial Prospect

Formulations

Process of Manufacture

Laboratory Testing

Determination of Pyridine Content

Apparatus

Test Substances

Procedure

Chart Speed

Calculation

2. Alkylamines

Methylamine

Ethylamine

Propylamine

Isopropylamine

Butylamine

Isobutylamine

Amylamine

Monoethanolamine

Diethanolamines

Triethanolamine

Manufacturing Process

Reaction

Uses

Grades

Toxicity

Polypropylene

Manufacturing Process

Hercules Polypropylene Process

Uses

Grades

Polyethylene

Manufacturing Process

From Ethylene by Low-Pressure Polymerization
(Phillips Process)

Uses

Grades

Toxicity

Vinyl Acetate

Manufacturing Process

3. Alum

Introduction

Raw Material Requirements

Reactions

Process of Manufacture

Uses

Plant & Machinery

Market Potential

Plant Economics

Analytical Testing of Ammonium Alum

EDTA Method

Reagents

Procedure

Calculation

Gravimetric Method

Laboratory Testing of Aluminium Sulphate

Introduction

Procedure

4. Bleaching Powder

Introduction

Properties

Properties

Uses

Process of Manufacture

Laboratory Testing

Glacial Acetic Acid

Calculation

5. Caffeine (C₈H₁₀N₄O₂.H₂O)

From Tea Waste

Raw Material Requirements

Process

Properties

Purity

Reagents and Apparatus

Standardization

Procedure A : (Potentiometric)

6. Ceramic Chemicals

Boric Acid

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

Grades

Toxicity

7. Chemical and Additive for Food Industry

Citric Acid

Properties

Lactic Acid

Molecular Formula

Manufacturing Process

Sodium Bicarbonate

Manufacturing Process

8. Chloroform (Trichloromethane) CHCl_3

Chloroform

Molecular Formula

Properties

From Methane by Chlorination

Material Requirements (Theoretical)

Process

From Acetone and Bleaching Powder

Reaction

Material Requirements

Process

Grades

Purity

Determination of Relative Density

Apparatus

Procedure

Calculation

Determination of Distillation Yield

Apparatus

Assembly of the Apparatus

Procedure

9. Chloram Phenicol (p)(-)-Threo-1-(Para-nitrophenyl)-

2-dichloroacetamide-1, 3-propanediol

Reaction

Raw Material Requirements

Manufacturing Process

Properties

Grades

Purity

10. Coumarin ($\text{C}_9\text{H}_6\text{O}_2$)

From Salicylaldehyde

Reaction

Properties

Grades

Use & Application

Process of Manufacture

Laboratory Testing

Apparatus

Coumarin

Procedure

Reaction with Iodine Solution

11. Construction Material

Lime (Calcium Oxide)

Properties

Manufacturing Process

Hydrated Lime

Chemical Lime

Reaction

Flow Diagram

Uses
Grades
Toxicity

12. Corrosion Inhibitor
Sodium Dichromate
Manufacturing Process
From Chromite Ore
Reaction
Flow Diagram
Uses
Grades
Toxicity

13. Drug Intermediates & Pharmaceuticals
Acetanilide
Molecular Formula
Properties
Manufacturing Process
Reaction
Uses
Specification of Commercial Grades
Toxicity

14. Dry Cleaning Solvent
Perchloroethylene
Molecular Formula
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity

15. Dyes and Intermediates
Aceto-Acetanilide
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity
Anthraquinone
Properties
Manufacturing Process
From Phthalic Anhydride and Benzene
Raw Material requirements
b-Naphthol
Properties
Manufacturing Process
From Naphthalene

Raw material requirements
Bon Acid (3-Hydroxy-2 Naphthoic Acid)
Properties
Manufacturing Process
Raw material requirements
Reaction
Flow Diagram
Uses
Grade
G-Acid (2-Naphthol-6, 8 Disulphonic Acid)
Properties (Sodium Salt)
Manufacturing Process
Reaction
Uses
H-Acid
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Naphthalene
Manufacturing Process
Process
Naphthol Asg
Manufacturing Process
Raw material requirements
Reaction
Flow Diagram
Uses
Grades
Rhodamine B (Basic Dye)
Properties
Manufacturing Process
From Phthalic Anhydride
Raw material requirements
Reaction
Flow Diagram
Uses
Grades
Toxicity

16. Ester Gum
Field of Applications
Classification
Manufacture
Laboratory Testing
Reagents
Driers
Procedure
Determination of Gel Time
General
Reagents
Procedure

17. Fatty Acids

Properties

Manufacturing Process

Raw Material Requirement

Reaction

Flow Diagram

Uses

Grades

Toxicity

18. Fertilizers

Introduction

Nutrition requirements of crops

Overview of the fertilizer industry

Nitrogen Fertilizers

Miscellaneous low-volume nitrogen fertilizers

Nitrogen fertilizers from synthetic ammonia

Phosphate Fertilizers

Natural Organic Phosphate Fertilizers

Fertilizers from Mineral Phosphates

Potassium Salts

Potassium Minerals

Potassium-Magnesium Minerals

Potassium Sulfate

Potassium Nitrate

Potassium Phosphates

Mixed Fertilizers

Nongranular Mixtures

Compound Granulars

Bulk Blends

Fluid Mixtures

19. Gaur Gum (Galactomannan Gum)

From Guar Seeds (Dry Process)

Raw Material Requirements

Process

Other Processes

Properties

Grades

Containers

Purity

Procedure

Calculation

Determination of Ash

Procedure

Calculation

Determination of Protein

Apparatus

Reagents

Calculation

Determination of Residue Insoluble in Acid

Reagents

Procedure
Calculation
Determination of Gum Content
Procedure
Economic Aspects

20. Herbicide

2, 4-Dichloro Phenoxy Acetic Acid (2, 4-D Acid)

Manufacturing Process
Raw Material requirements
Reaction
Flow Diagram
Uses
Grades
Toxicity

21. Industrial Gases

Overview
Nitrogen
Oxygen
Argon
Hydrogen
Helium
Carbon Dioxide - CO₂
Liquefied Natural Gas
Acetylene
Nitrous Oxide

22. Industrial Halogens

Bromine
Manufacturing Process
Bromine from Sea Water
Reaction
Raw material requirements
Reaction
Uses
Grades
Toxicity
Chlorine
Properties
Manufacturing Process
From Salt by Electrolysis
Raw material requirements (Diaphragm cell)
Reaction
Uses
Grades
Toxicity
Iodine
Manufacturing Process
From Oil-well Brines (Silver iodide process)
Raw material requirements
Reaction
Uses

Grades
Toxicity

23. Inorganic Chemicals - With Multipurpose end use

Activated Alumina
Manufacturing Process
From Alum and Caustic Soda
Raw material requirement
Reaction
Uses

Grades
Toxicity

Activated Carbon
Properties
Manufacturing Process
From Charcoal
Raw Material Requirements
Uses

Grades
Toxicity

Phosphorus Oxychloride
Properties
Manufacturing Process
From Phosphorus Trichloride and Phosphorus
Pentoxide
Raw material requirements
Reaction
Uses

Grades
Toxicity

Sodium Acetate
Properties
Manufacturing Process
From Acetic Acid and Soda Ash
Raw material requirements
Reaction
Uses

Grades
Toxicity

Sodium Chloride
Properties
Manufacturing Process
By Solar Evaporation
Raw material requirements
Major Engineering Problems
Uses

Grades
Toxicity

24. Inorganic Salts Aluminium Chloride Properties

Manufacturing Process
From Aluminium Metal and Chlorine
Raw material requirements
Reaction
Uses
Grades
Toxicity
Ammonium Chloride
Properties
Manufacturing Process
From ammonium sulphate and sodium chloride
Raw material requirements
Reaction
Uses
Grades
Toxicity
Ammonium Nitrate
Properties
Manufacturing Process
From Ammonia and Nitric Acid
Raw Material Requirements
Barium Carbonate
Properties
Manufacturing Process
From Barium Sulphide and Carbon Dioxide
Raw material requirements
Reaction
From Barium Sulphide and soda Ash
Raw material requirements
Reaction
Uses
Grades
Toxicity
Copper Sulphate
Properties
Manufacturing Process
From Cupric Oxide and Sulphuric Acid
Raw material requirements
Reaction
Uses
Grades
Toxicity
Uses
Grades
Toxicity
Ferrous Sulphate Heptahydrate
Properties
Manufacturing Process
From Steel Pickling Liquor
Raw material requirements
Reaction
Uses
Grades

Toxicity
Potassium Silicate
Properties
Manufacturing Process
From Sodium Silicate
Raw material requirements
Uses
Grades

25. Linalol
Introduction
Raw Materials Required
Process
Miscellaneous
Properties
Containers
Grades
Uses
Plant & Machinery
Plant Economics
Market Potential

26. Litharge (Lead Monoxide, Yellow Lead Oxide) pbo
By Air Oxidation of Lead Metal (4 Alternate Processes)
Reaction
Material Requirements
Process
Properties
Grades
Containers
Purity
Determination of Litharge Content
General
Volumetric Method
Reagents
Procedure
EDTA Method
Reagents
Procedure
Economic Aspects

27. Metallic Stearates
Aluminium Stearate
Calcium Stearate
Magnesium Stearate
Lead Stearate
Zinc Stearate
Metallic Stearates
Manufacturing Process
Raw material requirements
Aluminium Stearate

Test
Reaction
Uses
Aluminium Stearate
Calcium Stearate
Lead Stearate
Magnesium Stearate
Zinc Stearate
Grades
Toxicity

28. Metal Treatment and Degreasing chemicals

Chromic Acid
Properties
Manufacturing Process
From Sodium Dichromate
Raw material requirements
Reaction
Uses
Grades
Trichloroethylene
Properties
Manufacturing Process
From Acetylene and Chlorine
Raw material requirements
Reaction
Uses
Grades
Toxicity

29. Natural Gas

Characteristics
Occurrence of Natural Gas
Preparing Natural Gas for Transmission and Sale
Processing for Liquids Recovery

30. Acetaldehyde

Properties
Aceto Acetic Ester
Properties
Manufacturing Process
Raw Material Requirement
Reaction
Uses
Grades
Toxicity
Fire Fighting
Aniline
Properties
Manufacturing Process
From Nitrobenzene by reduction
Raw Material requirements
Benzaldehyde

Properties
Manufacturing Process
Oxidation of Toluene
Raw material requirements
Reaction
Uses
Grades
Specifications for Benzaldehyde
Toxicity
Carboxy methyl cellulose (sodium Salt)
Properties
Manufacturing Process
From Waste Cotton (or cellulose)
Raw material requirements
Reaction
Uses
Grades
Ethylene Dichloride
Properties
Manufacturing Process
From Ethylene and Chlorine
Raw material requirements
Glycerine
Properties
Manufacturing Process
Raw material requirements
8-Hydroxy Quinoline
Properties
Manufacturing Process
Raw material requirements
Uses
Grades
Toxicity

31. Perfumery, FragNance and Flavour

Chemicals
Benzyl Acetate
Properties
Manufacturing Process
Raw material requirements
Reaction
Coumarin
Properties
Manufacturing Process
Raw material requirements
Reaction
Uses
Grades
Toxicity
Phenylacetic Acid
Properties
Manufacturing Process
From Benzyl Chloride

Raw material requirement
Reaction
Uses
Grades
Toxicity
Vanillin
Properties
Manufacturing Process
From Waste Sulphite Pulp Liquor
Raw material requirements
Reaction
Uses
Grades
Toxicity

32. Phosphorus and Phosphates

Introduction
Phosphate Rock
Resources
Phosphate Ores
Mining
Beneficiation
Elemental Phosphorus and Phosphoric Acid
Furnace Phosphoric Acid
Industrial Phosphates
Wet Process Phosphoric Acid
Dihydrate Process
Major Dihydrate Processes
Hemihydrate Processes for Phosphoric Acid
Unit Operations
Superphosphoric Acid
Wet Process Acid by-Products
Phosphogypsum
Fluorine Recovery
Uranium Recovery
Purified Phosphoric Acid
Environmental Aspects

33. Plasticiser

Chlorinated Paraffin Wax
Molecular Formula
Properties
Dialkyl Phthalates
Dimethyl Phthalates
Properties
Diethyl Phthalate
Properties
Dibutyl Phthalates
Properties
Dioctyl Phthalates
Properties
Diamyl Phthalates
Properties

Manufacturing Process
From Phthalic Anhydride and Alcohol by
Esterification
Raw material requirements
Dibutyl phthalate
Reaction

Uses
Grades
Toxicity
Tricresyl Phosphate
Properties

Manufacturing Process
From Cresol and Phosphorus Oxychloride
Reaction
Uses
Grades
Toxicity

34. Potassium Permanganate (KMnO₄)

Properties
From Manganese Ore
Reaction
Material Requirements
Process
From Potassium Manganate by Electrochemical
Oxidation
Reaction
Material Requirements
Process
Grades
Containers
Purity
Determination of Potassium Permanganate Content
Reagents
Procedure
Calculation
Economic Aspects

35. Red Iron Oxide

Introduction
Raw Material Requirements
Process
Plant and Machinery
Uses
Market Potential
Plant Economics
Properties
Grades
Containers
Determination of Ferric Oxide (Red)
Reagents
Procedure
Calculation

36. Red Lead (Pb_3O_4)

Introduction

Raw Material Requirements

Process of Manufacture

Plant and Machinery

Plant Economics

Economic Aspects/Market Potential

Miscellaneous

Properties

Grades

Containers

Hazard

Uses

Analytical Testing

Determination of Lead

Procedure

Calculation

37. Resorcinol (3-Hydroxy Phenol)

From Benzene

Reaction

Raw Material Requirements

Process

Properties

Grades

Containers

Purity

Economic Aspects

38. Rubber & Rubber Chemicals

Butadiene

Properties

Manufacturing Process

From Butane by Dehydrogenation (Hydro
Catadiene process)

Raw material requirements

Reaction

Uses

Grades

Toxicity

Chlorinated Rubber

Properties

Manufacturing Process

Raw material requirements

From Rubber Solution

Test

Uses

42. Salt, Chlor-Alkali, and Related Heavy

Chemicals

Sodium Chloride

Soda Ash

Sodium Bicarbonate

Sodium Sulfate

Sodium Sulfides

Sodium Thiosulfate

Sodium Sulfite

Sodium Bisulfite

Sodium Hyposulfite

Sodium Phosphates

Sodium Silicate

Chlor-Alkali (Chlorine and Caustic Soda)

Hydrochloric Acid

Bromine and Brine Chemicals

Bleaches

Sodium Chlorate

43. Silicone Resin

Manufacturing Process

Laboratory Testing

Silicone Resin

Rapid Method for Determination of Silicone

Laboratory Testing

Silica Resin

Determination of Silica by the Gravimetric Method

Reagents

Procedure

Properties

Calculation

44. Solvents

Acetone

Properties

Carbon Tetrachloride

Properties

Manufacturing Process

From Carbon Disulphide and Chlorine

Raw material requirements

Chlorobenzene And Dichlorobenzene

Chlorobenzene

p-Dichlorobenzene

Properties

Ethyl Acetate

Properties

Manufacturing Process

From Ethyl Alcohol and Acetic Acid by

Esterification
Raw material requirements
Isopropyl Alcohol
Properties
Manufacturing Process
From Propylene
Raw material requirements
Methyl Alcohol (Methanol)
Properties
Manufacturing Process
From Carbon Monoxide and Hydrogen
Raw material requirements
Methyl Ethyl Ketone
Properties
Manufacturing Process
From Secondary Butyl Alcohol by Dehydrogenation
Raw material requirements
Reaction
Uses
Grades
Toxicity
Nitrobenzene
Properties
Manufacturing Process
From Benzene and Nitric Acid
Raw material requirements
Nitroparaffins
Nitromethane
Properties

45. Sulfur and Sulfuric Acid

Sulfur
Development of the Sulfur Industry
Sulfur Production Processes
Recovered Sulfur
Sulfuric Acid
Uses of Sulfuric Acid
Manufacture of Sulfuric Acid by the Contact
Process
Sulfur Dioxide production
Conversion of SO_2 to H_2SO_4
Absorption of SO_3
Other Sources of Sulfuric Acid

46. Ultramarine Blue

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
