Wine from

Pineapple & Ginger

Pineapple & Ginger

Introduction

Fruit wines are fermented alcoholic beverages made from a variety of base ingredients (other than grapes) and may include flavours such as citrus, flowers, and herbs. Any fermented alcoholic liquor, except wine, is often included in this category. Fruit wines have long been common among winemakers and in areas with cool climates, such as North America and Scandinavia; pineapple wine is produced in East Africa, India, and the Philippines.

A light and refreshing cocktail, ginger wine. Winemakers use ginger root to make this spicy wine in just two weeks, with a few optional ingredients for added spice. The best thing about Ginger Wine is that it can be stored for a longer period of time. As a result, the taste of this flavoured wine is superior. The ginger wine will make it easier to digest the food. This wine is fermented ahead of time to ensure that it has the right flavour.

Ginger wine has been around since the dawn of time. Its enticing flavour set it apart from other beverages of the time. It's no surprise that people still enjoy it. Ginger wine has a spicy, soft, and sour flavour profile. Ginger is a warm spice, but this wine is better enjoyed in the winter. Pineapple wines are alcoholic drinks made from pineapples that have been fermented.

It has a distinct flavour that evokes the tropics, ensuring that development never ceases. The pineapple is one of the most common. Pineapple wine has a particularly powerful flavour because, while pineapples are naturally sweet, they become highly acidic and bitter after fermentation.

Benefits of Wine from Ginger & Pineapple

Fruit wine's antioxidant, anti-inflammatory, and lipid-regulating properties may be responsible for its health benefits. One of the most important health benefits of fruit wine is the enjoyment it provides to the drinker, which relaxes the body and mind while reducing tension and worries. That, in and of itself, aids not only in lengthening but also in improving the quality of life.

Doctors have long claimed that a drink a day will help thin one's blood, which can help prevent strokes. Fruit wines are best for:

- 1. Anti-aging of the skin**
- 2. For skin that is prone to acne**
- 3. For skin that is naturally beautiful**
- 4. Best wishes for good health**
- 5. Hair Benefits**

Pineapple wines are naturally high in fibre, which is an essential part of a balanced diet and can aid digestion. Pineapple wine also contains a variety of vitamins and minerals, including calcium, manganese, vitamins A and C, and folic acid, among others. Many cultures have used ginger wine for its medicinal properties for centuries. Ginger wine is used to treat nausea, lack of appetite, motion sickness, and discomfort in the digestive system.

It has been said to have aphrodisiac properties and can minimize inflammation. This is a cocktail made for those with a long-standing digestive disorder and a good love of alcohol.

Manufacturing process

Fruit wine is made from the juice of ripe fruits that has been naturally fermented with yeast. Fruit wine gets its alcohol from natural fermentation of the grapes, and its alcohol content usually ranges from 5% to 15%. Yeasts need sugar to produce alcohol in order to increase their alcohol content. Chaptalization is a method of enhancing the alcohol content of fruit wines by adding sugar. The yeast *Saccharomyces cerevisiae* is used to make wine.

Ginger juice is extracted and autoclaved, then sugar is added and the juice is autoclaved once more. The juice was stored in amber coloured bottles, and yeast was inoculated, sealed, and stored in these bottles for primary fermentation. After centrifuging the juice to extract the yeast cells, it is racked for secondary fermentation. A medicinal ginger wine was created to treat coughs, colds, and other upper respiratory illnesses. Ginger wine is particularly useful in the winter.

Market Outlook

Fruit wines are made from fruit juice and fermented naturally with yeast. They're becoming more famous as a result of their fun flavours and aromas. The natural fermentation of fruits causes the production of alcohol in fruit wines. The global wine market is expected to rise at a 4.28 percent compound annual growth rate (CAGR). Owners of vast pineapple plantations and fruit wineries are the most popular producers of pineapple wine.

The wine is mostly marketed to visitors seeking a taste of the tropics, but it is also exported via online channels and catalogues. The Global Fruit Wine Market has been rising at a faster rate with strong growth rates over the last few years, and it is expected to expand significantly in the future. Fruit wine production also needs less inventory, which helps to drive the global fruit wine market.

However, technical issues such as acid stability and sugar quantity changes for fruit wine producers can limit the global fruit wine market. Some of the most common challenges faced by winemakers include the processing of high-quality fruits, fermentation as a vital process, pH tests, and so on. The global fruit wine market is being driven by consumers who want to try new varieties.

Aside from that, the global fruit wine market is driven by perceptions such as refreshing taste, suits well with any form of cuisine, is a very royal and style brand, is good, and so on. Fruit wine production also needs less inventory, which helps to drive the global fruit wine market.

Reasons for Buying our Report:

- ❖ **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ❖ **This report provides vital information on the product like it's characteristics and segmentation**
- ❖ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ❖ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ❖ **The report provides a glimpse of government regulations applicable on the industry**
- ❖ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Wine from Ginger and Pineapple.” provides an insight into Wine from Ginger and Pineapple market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Wine from Ginger and Pineapple project. The report assesses the market sizing and growth of the Indian Wine from Ginger and Pineapple Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Wine from Ginger and Pineapple sector in India along with its business prospects. Through this report we have identified Wine from Ginger and Pineapple project as a lucrative investment avenue.
