

"Top 10 Most Successful Business Ideas for Entrepreneur"

Woven PP Cement Sacks, IV Cannulas Manufacturing Unit, Glucose Saline, Vitamin 'C' From Sorbitol, Lithium Ion (LiFePO₄) Cell Manufacturing, Weaving of Fiberglass Fabric. For Composites of Domestic as well as Export Markets (Using e Class Imported Yarns), Single Wall Steel Water Bottle, Magnesium Powder from Dolomite Stone, Trichloroisocyanuric Acid, Linear Alkyl Benzene Sulphonic Acid

Introduction

Coming up with a brilliant business idea is just the start of your entrepreneurial journey. The best startup business ideas are critical to the success of your business. People nowadays pursue their passions rather than their careers. They are constantly on the lookout for the best startup business ideas to fuel their passion. They don't want to retire when they're 60 years old. Instead of earning a high salary and living in big cities, they seek happiness index.

Millions of people today aspire to start their own company instead of working a conventional 9-to-5 job. During their working lives, the majority of people would chase two or three carriers. Working for yourself is one of the most satisfying things in the world. While running your own company can be challenging, it is rewarding because the effort you put in benefits you individually rather than anyone else.

Woven PP Cement Sacks

Woven polypropylene bags are ideal for transporting and packing bulk goods. Weaved polypropylene bags are the most common industrial package due to their strength, versatility, durability, and low cost. They are widely used in packaging grain, feeds, fertilizer, seeds, powders, sugar, salt, powder, and chemical in granulated form.

Polypropylene bags are also known as 'PP bags' or 'Polypropylene bags.' Woven, or spinning, is a way of creating a cloth for the plastic industry by weaving several threads or tapes in two directions (warp and weft). Food is increasingly being packed in PP woven bags. Rice PP woven bags, flour PP woven bags, maize PP woven bags, and other food woven bags are popular.

PP woven fabrics are widely used in the construction of irrigation works, bridges, railways, ports, mines, and houses, among other things. PP woven fabrics are one of the most common geo synthetics, with functions such as filtering, drainage, isolation, and anti-seepage. The exclusive woven bags are often used for a variety of purposes.

In 2017, the global demand for polypropylene woven bags and sacks was worth \$3,421.5 million. Over the forecast period of 2018-2028, the market is projected to develop at a CAGR of 4.2 percent. As a result, it is better to invest in this project due to demand.

IV Cannulas Manufacturing Unit

Intravenous (IV) cannulation is a venous access procedure that involves inserting a cannula into a vein. Blood screening, as well as the administration of fluids, medications, parenteral care, chemotherapy, and blood products, are all possible with venous access. A flexible tube inserted into the body to administer or remove fluids or to hold another tube patent is known as a cannula.

Intravenous cannulation is a venous access procedure that involves inserting a cannula into a vein. Blood screening, as well as the administration of fluids, medications, parental nutrition, chemotherapy, and blood products, are all possible with venous access. The IV Cannula can be used for veterinary purposes, as well as for nasal or oral use. Piercing can also be done with a cannula.

Rapid blood transfusion and IV drug transfusion are two popular applications. IV Cannula is used on children and adults with limited veins that are receiving long-term treatment or blood transfusions. It's also used on Chemotherapy patients in oncology. Intravenous cannulas allow fluids to be introduced or removed from the human circulatory system.

In 2015, the market was worth \$3,702.2 million, and it is projected to expand at a CAGR of 6.0 percent from 2016 to 2022. Because of the growing geriatric population and the rising prevalence of chronic disease, the global demand is growing.

Glucose Saline

Glucose, also known as dextrose, is a natural sugar that is chemically similar to glucose. If given in adequate doses, dextrose can reduce body protein and nitrogen losses, promote glycogen deposition, and reduce or prevent ketosis. Since dextrose is normally metabolised to carbon dioxide and water, giving a dextrose and water solution is the same as giving the same amount of free water.

Since dextrose is normally metabolised to carbon dioxide and water, giving a dextrose and water solution is the same as giving the same amount of free water. Dextrose, a monosaccharide, is rapidly absorbed from the small intestine following oral administration, owing to an active mechanism. Treatment for acid-base imbalances. In the surgery of an accident victim who has lost blood, volume substitution and replacement are used.

Parenteral nutrition is provided to patients who are terminally ill or recovering from surgery. Nasal washes of saline are also often used to alleviate some of the effects of the common cold. Both babies and adults benefit from the solution because it softens and loosens mucus, making it easier to wash out and clear the nasal passages.

In 2019, the global intravenous solutions market was worth US\$ 8.5 billion. Fluid resuscitation, routine cleaning, replacement, and redistribution are all common uses for IV solutions and electrolytes. From 2018 to 2025, the market size is projected to grow at a CAGR of 7.1 percent, from USD 86.2 million in 2020 to USD 121.7 million in 2025.

Vitamin 'C' From Sorbitol

Vitamin C is the simplest of the vitamins chemically, and as a result, it was one of the first to be extracted, described, purified, and its structure determined. Industrially, more vitamin C is produced than any other vitamin, or indeed all other vitamins combined. Vitamin C is said to have almost magical properties, so understanding the chemistry and biochemistry of this mysterious compound is important.

It is one of the few pure chemical compounds that humans take in gramme amounts on a regular basis (a possible challenger is sugar). Even in these large doses, it appears to have no negative effects, and it is a pleasant medication to consume, particularly in the form of fruit or vegetables. High-profile industrial bakers like Hovis and Kings Mill both use ascorbic acid in the majority of their loaves to extend shelf life.

In an industrial bakery, using ascorbic acid will result in higher benefit yields, shorter processing times, and higher customer satisfaction, as well as a longer shelf life and a lower number of damaged loaves during transportation. Because of the demand from the pharmaceutical industry,

The global ascorbic acid market is expected to develop moderately over the forecast period. The bulk of processed ascorbic acid is used as an antioxidant. In terms of volume, analysts expect that this regional market will develop at a CAGR of 5.40 percent from 2017 to 2025.

Lithium Ion (LiFePO₄) Cell Manufacturing

The Lithium Iron Phosphate Battery (LiFePO₄ battery) or LFP Battery (lithium Ferro phosphate) is a lithium-ion battery that uses LiFePO₄ as the cathode material (the positive side of a battery) and a graphitic carbon electrode with a metallic backing as the anode. For high specific energy density and mechanical stability, cylindrical lithium cells are used.

As compared to other rechargeable batteries, Li-ion batteries have a higher energy capacity. Cathode, anode, electrolyte, and separator are the four primary components of Li-ion batteries. Telecommunications devices, instruments, portable radios and televisions, and pagers all use them. They're used in desktop computers, cell phones, and aerospace applications.

Electric cars, mobile phones, camcorders, laptop and palmtop computers, portable electronic devices, and so on all use it. Cameras and calculators use lithium-ion batteries, as do cardiac pacemakers and other implantable devices. During the forecast period of 2019–2024, India's lithium-ion battery market is projected to rise at a CAGR of 34.8%.

Furthermore, the lithium-ion battery is convenient to recharge, lightweight, and long-lasting, and thus perfectly contributes to the growth of the electric vehicle industry over the forecast period.

Weaving of Fiberglass Fabric. For Composites of Domestic as well as Export Markets (Using e Class Imported Yarns)

Fiberglass is a common and versatile material that is used in many aspects of our daily lives. You'll be more educated about the building as well as the incredible achievements of fiberglass the next time you board a plane, ride a waterslide, or turn on the television. It is a highly versatile material that is used in a variety of household and industrial goods.

Aircraft, windows, roofing, vessels, and bathtubs are all popular places to find fiberglass. Because of the cost effectiveness of fiberglass products, the boat industry benefited greatly from its introduction. This multi-purpose product can also be used as a screening to demarcate potentially hazardous areas. When it comes to aviation equipment and ducts, fiberglass is a fantastic material.

Fiberglass is used in the design of engine cowlings, bulkheads, storage containers, and ground handling equipment. Doors, swimming pools, surfboards, sports equipment, and car bumpers, to name a few, are all made of fiberglass. Fiberglass is commonly used as a composite in jet engines and aircraft interiors, as well as a weight-saving solution.

Fiberglass light weight and durability make it suitable for more delicate applications including circuit boards. Furthermore, these textiles' excellent cost-performance ratio makes them an obvious alternative for a wide range of applications. The global fibreglass market is expected to expand at a CAGR of 4.5 percent from 2020 to 2025, from USD 11.5 billion in 2020 to USD 14.3 billion in 2025.

Single Wall Steel Water Bottle

A cord is attached to the stainless steel container to make it easier to hold. The stainless steel fridge bottle is made of high-quality steel that is both food-grade and BPA-free, making it safe to use on a daily basis. The flavour and nutritional value of the beverages are preserved, making the bottle an excellent option for storing beverages.

Disposable or reusable water bottles are available. Single-walled metal bottles easily pass the temperature of their contents to external surfaces, making them unsuitable for liquids that are unusually hot or cold. Cold liquids stay cold and hot liquids stay hot in double-walled metal bottles with an exterior surface that is neither too hot nor too cold.

The bottles are made of a single layer of steel that keeps drinks hot or cold for long periods of time. You can still have a refreshing sip of drink from these bottles, whether it's a chilly winter morning or a hot day at work. Steel bottles are environmentally friendly, as they can be reused for several years and are 100% recyclable, so they do not end up in landfills.

Water bottles made of stainless steel can be reused hundreds of times. Its current value of INR 160 billion has grown at a compound annual growth rate (CAGR) of 20.75 percent since its inception in 2018. According to volume, the demand is expected to hit 35.53 billion litres by 2023, with a CAGR of 18.25% from 2018 to 2023.

Magnesium Powder from Dolomite Stone

Magnesium (Mg) is a silvery white metal that resembles aluminium in colour but is one-third the weight. Magnesium reacts strongly with oxygen at high temperatures, producing a bright white light and extreme heat when heated to 645°C ($1,190^{\circ}\text{F}$) in dry air. Magnesium powders are used in pyrotechnics because of this.

In most atmospheres, a stable layer of water-insoluble magnesium hydroxide forms on the metal's surface at room temperature, shielding it from corrosion. Magnesium powder is commonly used in research fields such as the military and aircraft industries. Magnesium has a high chemical activity and is mostly used in the metallurgical industry.

Magnesium powder can be used as a desulfurizer or cleaning agent in the steel industry, as well as a reducer in the manufacture of rare metals. Magnesium powder can be used as a dehydrator for organic compounds or to make magnesium organic compounds directly in the chemical industry. Magnesium powder is an essential nutrient for plant growth and improves the quality of food.

Magnesium (Mg) is important for the formation of chlorophyll and photosynthesis. The Asia-Pacific market dominated the global market in 2018, with a share of over 40%, and is expected to grow at a CAGR of over 6.5 percent over the forecast period. By the end of 2024, the global magnesium powder market is expected to grow at a healthy 5.50 percent CAGR, reaching USD 1,334.6 million.

Trichloroisocyanuric Acid

The organic compound trichloroisocyanuric acid has the formula ($C_3Cl_3N_3O_3$). It is used in organic synthesis as a disinfectant, bleaching agent, and reagent. For chlorination and oxidation reactions, trichloroisocyanuric acid (TCCA) is a versatile and effective reagent. It may release either an electrophile chlorine atom (Cl^+) or a radical chlorine atom ($Cl\cdot$) depending on the reaction conditions, encouraging selectively different reaction pathways.

It's commonly used in pool and spa sanitation, disease prevention and treatment in animal husbandry and fisheries, fruit and vegetable protection, wastewater treatment, as an algaecide for recycled water in industry and air conditioning, anti-shrink treatment for woolens, seed treatment, and organic chemical synthesis.

It is used in chemical synthesis as a chlorine gas source that is simple to store and transport, is not subject to hazardous gas shipping limits, and produces relatively pure chlorine when reacting with hydrochloric acid. Intensifying demand for clean, treated water throughout the Asia Pacific region in order to reduce diseases caused by contaminated water.

During the forecast period, this factor is expected to significantly drive the trichloroisocyanuric acid market growth. Furthermore, the positive effect of various regulations and standards pertaining to safe water infrastructure and systems in North America and Europe is expected to provide a solid foundation for trichloroisocyanuric acid demand growth in the coming years.

Linear Alkyl Benzene Sulphonic Acid

Linear Alkyl Benzene Sulphonic Acid is an anionic surfactant with hydrophobic and hydrophilic groups in its molecules. They're sulfonated compounds that aren't volatile. It's typically neutralised with different bases to make sulfonate, which is used in a variety of industries, including liquid and powder detergents, household and I&I cleaners, laundry detergents, dishwashing liquids, car wash products, hard surface cleaners, and so on.

Other surfactants are also compatible with it. LAS is the best option for detergent production because of its biodegradability and compatibility with other surfactants. To increase the cleaning efficiency of detergents, it can be combined with other non-ionic and cationic surfactants.

- **HI&I cleaning**
- **Emulsion polymerization**
- **Metal working**
- **Paints & coatings**
- **Laundry detergents**
- **Industrial auxiliaries**
- **Oil fields**
- **Agriculture**

In the forecast period of 2020 to 2025, the global Linear Alky 1 Benzene Sulphonic Acid market is projected to rise at a CAGR of 3.3 percent, reaching USD 4234.1 million by 2025, up from USD 3711.3 million in 2019.

[BOOKS & DATABASES](#)

[Market Research Report](#)

Major Queries/Questions Answered in Our Report?

1. How has the industry performed so far and how will it perform in the coming years?
2. What is the Project Feasibility of the Plant?
3. What are the requirements of Working Capital for setting up the plant?
4. What is the structure of the industry and who are the key/major players?

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?

11. What is the Manufacturing Process of the plant?

12. What is the total size of land required for setting up the plant?

13. What will be the income and expenditures for the plant?

14. What are the Projected Balance Sheets of the plant?

15. What are the requirement of utilities and overheads for setting up the plant?

16. What is the Built up Area Requirement and cost for setting up the plant?

17. What are the Personnel (Manpower) Requirements for setting up the plant?

18. What are Statistics of Import & Export for the Industry?

19. What is the time required to break-even?

- 20. What is the Break-Even Analysis of the plant?**
- 21. What are the Project financials of the plant?**
- 22. What are the Profitability Ratios of the plant?**
- 23. What is the Sensitivity Analysis-Price/Volume of the plant?**
- 24. What are the Projected Pay-Back Period and IRR of the plant?**
- 25. What is the Process Flow Sheet Diagram of the plant?**
- 26. What are the Market Opportunities for setting up the plant?**
- 27. What is the Market Study and Assessment for setting up the plant?**
- 28. What is the Plant Layout for setting up the plant?**

Reasons for Buying Our Report:

- The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product
- The report provides vital information on the product like it's characteristics and segmentation
- The report helps you market and place the product correctly by identifying the target customer group of the product

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

NIIR PROJECT CONSULTANCY SERVICES

AN ISO 9001: 2015 CERTIFIED COMPANY

Who are We?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do We Offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Market Research Reports*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are We Different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

Sectors We Cover *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

Sectors We Cover *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

Sectors We Cover *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitability Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

Sectors We Cover

Cont...

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

Sectors We Cover *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

Sectors We Cover *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

MARKET RESEARCH REPORT

Objective

- ✧ To get a detailed scenario of the industry along with its structure and classification
- ✧ To provide a comprehensive analysis of the industry by covering aspects like:
 - ✧ Growth drivers of the industry
 - ✧ Latest market trends
 - ✧ Insights on regulatory framework
 - ✧ SWOT Analysis
 - ✧ Demand-Supply Situation
 - ✧ Foreign Trade
 - ✧ Porters 5 Forces Analysis

Objective

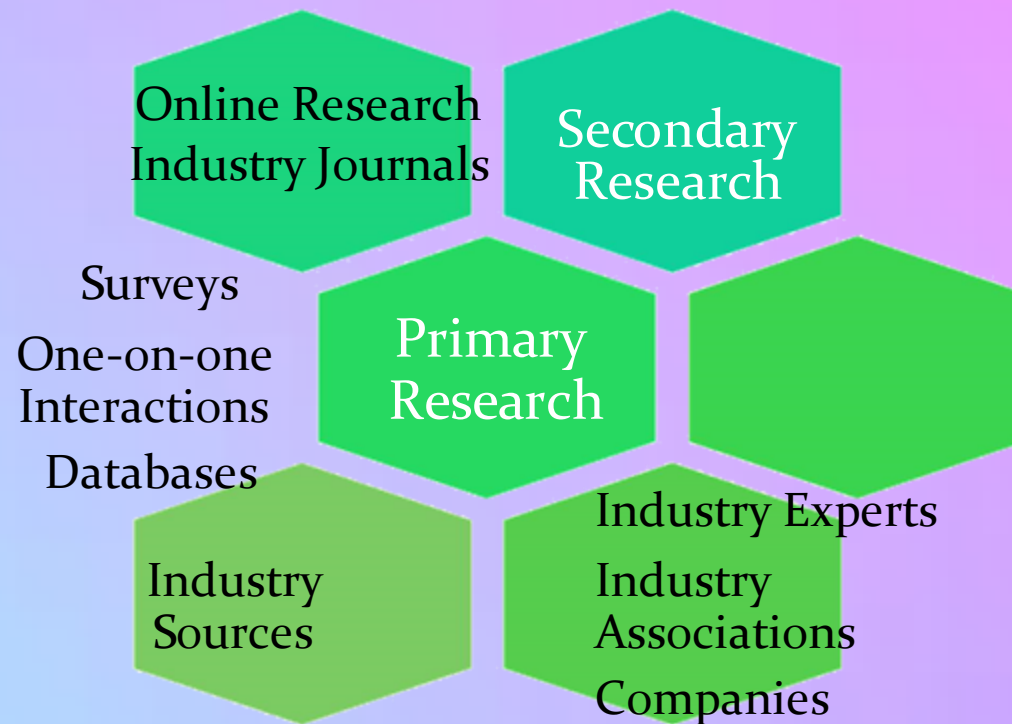

- ⌘ To provide forecasts of key parameters which helps to anticipate the industry performance
- ⌘ To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- ⌘ To help an entrepreneur/manager in keeping abreast with the changes in the industry
- ⌘ To evaluate the competitive landscape of the industry by detailing:
 - ⌘ Key players with their market shares
 - ⌘ Financial comparison of present players

Clientele

- ⌘Venturist/Capitalists
- ⌘Entrepreneur/Companies
- ⌘Industry Researchers
- ⌘Investment Funds
- ⌘Foreign Investors, NRI's
- ⌘Project Consultants/Chartered Accountants
- ⌘Banks
- ⌘Corporates
