

Business Ideas for Manufacturing of

Adhesive (Fevicol Type)

*“Profit-Making Business for
Entrepreneurs and Startups.”*

INTRODUCTION

Adhesives are a broad term that refers to any substance that can be used to keep, fasten, or bind two or more materials or objects (i.e. substrates) together when placed between their surfaces. The adhesion (i.e., bond strength) created between substrates by the adhesive is largely determined by the adhesive's properties- specifically, its adhesion and cohesion.

Due to the fact that these properties are the primary mechanisms underlying adhesives, measuring the failure point of both properties for each adhesive available aids in determining the best adhesive for use in a given application based on the technical requirements and specifications.

Adhesives are commonly used in a number of residential, commercial, and industrial applications for permanent, semi-permanent, and temporary attachment purposes. Load carrying ability, chemical composition, reactivity or inertness, and shape are some of the characteristics that can be used to classify and categorise the wide variety of adhesives available.

Each of these adhesives has unique properties and benefits, however, as with adhesive and cohesive strengths, the suitability of each property or feature (and the corresponding adhesive) is determined by the application.

Anaerobic Adhesives: Acrylic-based adhesives that cure in the absence of air are known as anaerobic adhesives. The curing process is accelerated when metal is present. This type of adhesive usually has a low viscosity, comes in liquid and paste forms, and is used to secure, seal, and preserve close-fitting and structural parts.

Cyanoacrylates Adhesives: Adhesives that cure in the presence of moisture and ultraviolet (UV) light are known as cyanoacrylate adhesives (e.g., Krazy Glue[®], a brand of Toagosei Co., Ltd). This form of adhesive comes in a range of viscosity levels, from low to high, and can be used on porous and non-porous surfaces. Because of its low shear strength, it is not appropriate for structural applications.

Epoxy Adhesives: Epoxies are often found in single-part and multi-part structures. These adhesives have good shear and peel strength (even in extreme temperatures and environments) and can be used to fill gaps and bind dissimilar substrates.

Hot Glue: The term "hot glue" refers to a form of hot melt adhesive made from thermoplastic compounds. This adhesive has a high tackiness and can be used on both porous and non-porous substrates. In most cases, hot glue solidifies as it cools, but certain varieties may be cured by moisture or UV light

White Glue: White glue (e.g., Elmer's® Glue, a trademark of Elmer's Products, Inc.) is a popular polyvinyl acetate (PVA) glue traditionally used for arts and crafts. This adhesive involves contact and pressure during solidification and is ideal for porous substrates such as fabric, cardboard, paper, and wood.

The creation of new products for a wide range of applications adds to the processing technology's challenges. This is especially true when different materials must be joined to form composite components that maintain their individual beneficial properties. This begs the question: which joining technique is capable of joining these various materials while preserving their unique properties?

Traditional joining methods have a number of well-known drawbacks. Within the heat-affected environment, thermal techniques such as welding change the material's specific properties. Mechanical techniques such as riveting or the use of screws only allow for force transfer at specific points; additionally,

drilling holes in the work parts to be joined “damages” and thereby weakens the materials. Bonding technology, on the other hand, is expected to play an increasingly important role in industry and the handicraft sector in the future.

This is Due to Four Major Factors:

Material: Bonding technology can be used to bind almost any desired combination of materials with each other, resulting in long-lasting bonds, with expert application.

Processing: Line of Production The use of bonding technology in manufacturing processes enables the substrates' material properties to be preserved. The bonding process requires relatively little heat input as compared to welding and soldering/brazing. Unlike when rivets or screws are used, there is no harm.

Joining: The two aforementioned considerations allow the unique material properties of substrates to be optimally exploited in components during product manufacture. This enables the use of modern building techniques.

Design: Panels bonding technology may also be used to incorporate customized additional properties into the part during the actual joining process. Furthermore, the use of bonding technology in industrial production can save time, speed up the manufacturing process, and thus provide real economic benefits. Internal decks can now be bonded into the primary structure in shipbuilding, removing the time-consuming straightening work that would be needed if the inside decks were connected by welding.

By 2026, the Indian adhesives and sealants market is expected to have grown at an annual rate of 8.07 percent, reaching USD 1,703.68 million (2021-2026). The increasing demand from the packaging industry and the country's rising construction industry are two major factors driving the market studied. On the other hand, the slowing of the automotive industry and the negative effect of COVID-19 are impeding the market's growth.

A silhouette of a businessman in a suit, carrying a briefcase and holding a flashlight, is positioned on the right side of the page. The flashlight beam illuminates a yellow path that leads upwards, symbolizing progress and growth. The background features a light blue sky with white clouds and a bar chart with several purple bars of varying heights at the bottom.

Residential development is being driven by population growth and urbanization in developing countries such as China, India, Indonesia, Vietnam, Brazil, and Mexico. In these countries, there is a growing demand for permanent housing, which is driving demand for adhesives and sealants. Adhesives and sealants are used in a variety of building applications, including carpet, tiling, wallpapers, and exterior insulation systems. Curtain wall panels and insulating glass units are also kept in place with adhesives and sealants. As a result, the construction industry's growing demand for adhesives and sealants is a major market driver.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Adhesive (Fevicol Type).” provides an insight into Adhesive (Fevicol Type) market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Adhesive (Fevicol Type) project. The report assesses the market sizing and growth of the Indian Adhesive (Fevicol Type) Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Adhesive (Fevicol Type) sector in India along with its business prospects. Through this report we have identified Adhesive (Fevicol Type) project as a lucrative investment avenue.

Select and Choose the Right Business Startup for You

(Instant Online Project Identification and Selection)

Finding the right startup business is one of the most popular subject today. Starting a business is no easy endeavor, but the time, effort, and challenges can be worth it if you succeed. To give yourself the best chance to be successful, take your time to carefully find the right business for you. We, at NPCCS, endeavor to make business selection a simple and convenient step for any entrepreneur/startup. Our expert team, by capitalizing on its dexterity and decade's long experience in the field, has created a list of profitable ventures for entrepreneurs who wish to diversify or venture. The list so mentioned is updated regularly to give you a regular dose of new emerging opportunities.

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

NIIR PROJECT CONSULTANCY SERVICES

AN ISO 9001: 2015 CERTIFIED COMPANY

ABOUT US

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Market Research Reports*
- *Business Plan*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

- **Public-sector Companies**

- **Wire & Cable**

MARKET RESEARCH REPORT

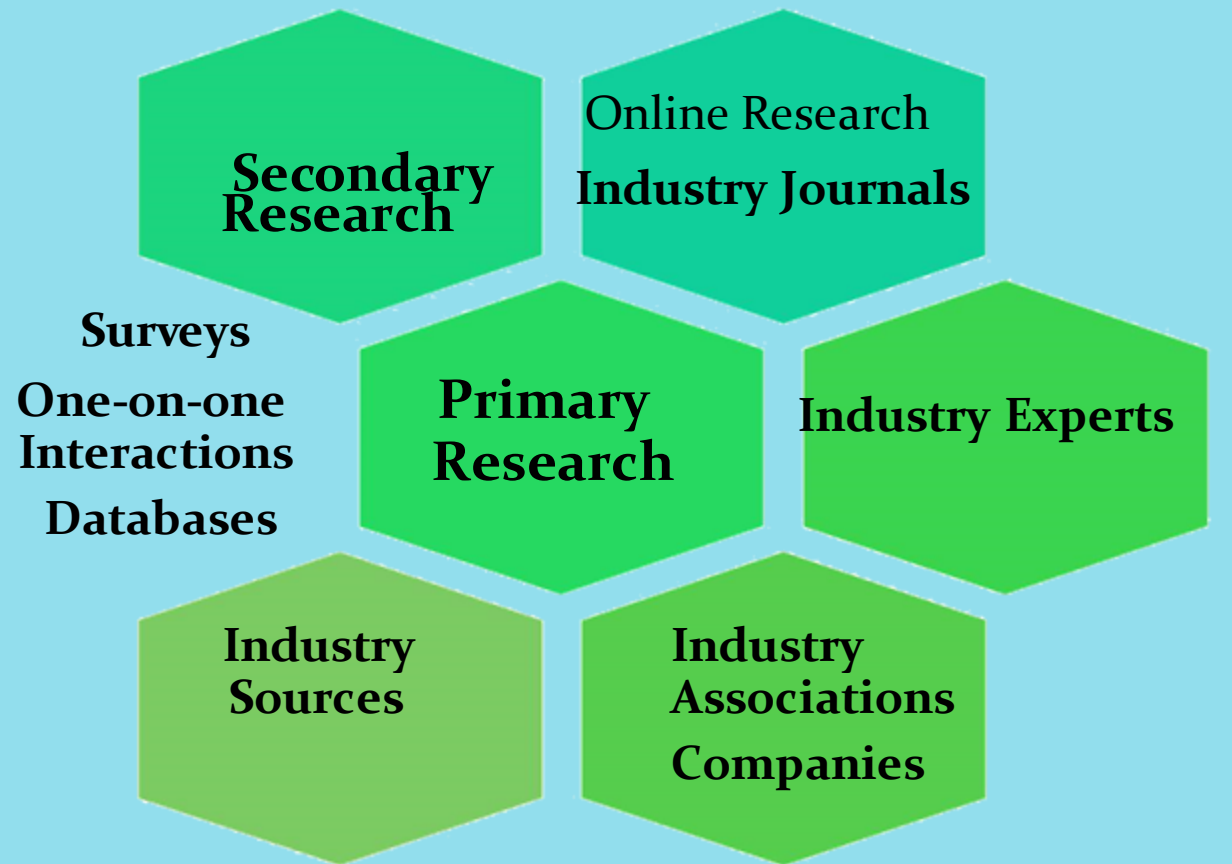

Objective

- **To get a detailed scenario of the industry along with its structure and classification**
- **To provide a comprehensive analysis of the industry by covering aspects like:**
 - **Growth drivers of the industry**
 - **Latest market trends**
 - **Insights on regulatory framework**
 - **SWOT Analysis**
 - **Demand-Supply Situation**
 - **Foreign Trade**
 - **Porters 5 Forces Analysis**

- **To provide forecasts of key parameters which helps to anticipate the industry performance**
- **To help chart growth trajectory of a business by detailing the factors that affect the industry growth**
- **To help an entrepreneur/manager in keeping abreast with the changes in the industry**
- **To evaluate the competitive landscape of the industry by detailing:**
 - **Key players with their market shares**
 - **Financial comparison of present players**

- **Venturist / Capitalists**
- **Entrepreneur / Companies**
- **Industry Researchers**
- **Investment Funds**
- **Foreign Investors, NRI's**
- **Project Consultants / Chartered Accountants**
- **Banks**
- **Corporates**

Data Sources

Scope & Coverage

Our Team

- Our research team comprises of experts from various financial fields:
- MBA's
- Industry Researchers
- Financial Planners
- Research veterans with decades of experience

Structure of the Report

- 1. Overview**
- 2. Market Analysis**
 - 2.1 Growth Drivers**
 - 2.2 Emerging Trends in the Industry**
 - 2.3 Regulatory Framework**
 - 2.4 SWOT Analysis**
 - 2.5 Herfindahl–Hirschman Index (HHI)**
- 3. Market Forecasts**
- 4. Key Players**
- 5. Key Financials and Analysis**
 - 5.1 Contact Information**
 - 5.2 Key Financials**
 - 5.3 Financial comparison**
 - 5.4 Industry Size & Outlook**

**THANK
YOU**

The words 'THANK YOU' are written in a large, bold, black-outlined font. The text is centered on the page and surrounded by several short, black, diagonal lines that radiate outwards, creating a starburst or spotlight effect.
