Paracetamol (Acetaminophen) API

Rising Demand of Paracetamol

Tablets in Covid-19 Pandemic.

Introduction

Paracetamol, often known as acetaminophen, is a pain reliever that is used to treat mild to moderate pain and fever. Paracetamol only marginally lowers body temperature at a typical dose; it is inferior to ibuprofen in this regard, and the benefits of its use for fever are uncertain.

In acute migraine, paracetamol greatly reduces pain, but only marginally in episodic tension headache. The combination of aspirin, paracetamol, and caffeine, on the other hand, is effective for both diseases and is suggested as a first-line treatment. Although paracetamol is beneficial in the treatment of post-surgical pain, it is not as effective as ibuprofen. The combination of paracetamol and ibuprofen increases potency even more and is preferable to any medicine alone.

In osteoarthritis, the pain reduction provided by paracetamol is minor and clinically inconsequential. There is inadequate evidence to support its use in the treatment of low back pain, cancer pain, and neuropathic pain. Paracetamol is a common pain reliever that can be purchased as pills, capsules, or liquid medicine from a variety of retail stores. Many combination medicines, as well as many cold and flu medicines, contain paracetamol.

Uses of Paracetamol

This medication is intended to treat mild to moderate pain (such as headaches, menstrual cramps, toothaches, backaches, osteoarthritis, or cold/flu aches and pains) as well as to lower temperature.

Use During Cold: When it comes to treating fever, paracetamol is the medicine of choice. However, there hasn't been much research done on its antipyretic qualities, especially in adults. Furthermore, paracetamol may cure a clogged or runny nose but no other cold symptoms such as sore throat, malaise, sneezing, or cough when used for a common cold; however, these data are of poor quality.

Use During Pregnancy: The safety of paracetamol during pregnancy has been questioned. There appears to be no relation between taking paracetamol during the first trimester of pregnancy and having a bad pregnancy or having a baby with birth abnormalities. However, there are signs that chronic use of paracetamol during pregnancy may lead to an increase in asthma and developmental and reproductive abnormalities in the offspring of the mothers.

Market Outlook

Over the projection period, the paracetamol market was expected to increase at a CAGR of roughly 4.3 percent. The increased use of paracetamol is a major factor contributing to the market's rise. Paracetamol is a fever reducer and pain reliever.

It's used to treat headaches, muscle aches, arthritis, backaches, toothaches, colds, and fevers, among other things. It helps pain in those with mild arthritis, but it has little effect on the joint's underlying inflammation and swelling. According to the World Health Organization, the incidence of contemporary headache disorder among adults is believed to be around 50% worldwide. The tablet category accounts for the majority of the market because it is the most widely utilized form of paracetamol.

Pain is treated with large doses of paracetamol. The amount of paracetamol sold in the United Kingdom is estimated to be just under 6,300 tonnes per year, according to the University of Oxford. Every year, 35 tonnes per millions of people consume 35 grammes or 70 paracetamol tablets. India's pharmaceutical sector is ranked third in terms of volume and 14th in terms of value in the world.

It is the world's largest provider of generic medications, accounting for 20% of global exports in generics. In 2019, India's domestic pharmaceutical market sales increased by 9.8% year on year to Rs 1.4 lakh crore (US\$ 20.03 billion), up from Rs 129,015 crore (US\$ 18.12 billion) in 2018. The Indian pharmaceutical sector is the world's third largest in terms of output volume and thirteenth in terms of domestic demand.

India has the world's third largest active pharmaceutical ingredients (API) market, worth little under USD 2 billion. About 6.5 percent of APIs are produced by the top five companies. Antibiotics, gastrointestinal, cardiovascular, and respiratory medicines are the most common APIs. Overall, there is a lot of room for new entrepreneurs to get involved in this industry.

The background of the slide is a close-up photograph of a person's hand holding a blue blister pack of paracetamol tablets. The hand is positioned in the center, with fingers slightly curled around the pack. The lighting is soft, highlighting the texture of the skin and the color of the blister pack. The text is overlaid on this image.

**Rising Demand of
Paracetamol Tablets
Because of COVID-
19 Pandemic:**

As a result of the COVID-19 pandemic, demand for paracetamol-based medications for the symptomatic treatment of fever in patients has increased. Due to the lack of direct medications for the treatment of COVID-19, doctors have had to rely on symptomatic therapies. Because of its widespread availability, paracetamol has been recommended for managing fever in adults and children with COVID-19 by various healthcare authorities around the world, including the....

..... National Institute for Health and Care Excellence (NICE), the National Health Service (NHS), the CDC, and the Ministry of Health and Family Welfare (MOHFW) of the Government of India. The official Covid-19 treatment regimen in India continues to promote the use of treatments that have been dismissed by numerous scientists around the world. In the case of coronavirus infections, doctors advise that little is more.

That means most patients will only require paracetamol for symptom relief, anti-allergy medicines in some circumstances, and inhaled steroids under doctor supervision for lung-related issues. During the COVID-19 pandemic, it was widely regarded as the major and most effective analgesic medicine for treating COVID-19 symptoms by the scientific community.

Reasons for Buying Our Report

- ❖ **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ❖ **This report provides vital information on the product like it's characteristics and segmentation**
- ❖ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ❖ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ❖ **The report provides a glimpse of government regulations applicable on the industry**
- ❖ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

Our

Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Paracetamol.” provides an insight into Paracetamol market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Paracetamol project. The report assesses the market sizing and growth of the Indian Paracetamol Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Paracetamol sector in India along with its business prospects. Through this report we have identified Paracetamol project as a lucrative investment avenue.

The main title 'Market Research Report' is centered on the page in a large, bold, dark blue font. The text is arranged in three lines: 'Market' on the top line, 'Research' on the middle line, and 'Report' on the bottom line. Each word has a subtle reflection effect below it. The background is a low-angle photograph of a modern city skyline with tall buildings and a clear blue sky. A person in a business suit is visible in the lower right, looking towards the camera.
