

# 9 Evergreen Business Models to Start New Industry and Become a Multi-Millionaire.

1. Liquid Hand Soap, Foam & Bath Soap
2. Stone Plastic Composite (SPC) Flooring Tiles
3. Men's Undergarment (EOU)
4. Lithium Ion Battery (Battery Assembly)
5. Waste Lubricating Oil Recycling Plant
6. Medical Disposables (Gowns/Drapes)
7. Calcium Carbide (CaC<sub>2</sub>)
8. Automated Vehicle Scrapping and Recycling Unit
9. Animal Feed (Cattle, Poultry Broiler, Pig & Fish Feed)

**Do you want to start your own business? You may begin right now. Do not be deceived in your business or market field selection. Each company has its own set of benefits and disadvantages, as well as its own set of profitable business plans. It's about which firm you're passionate about and eager to dissect. Your capacity to set a goal is still very important. You must be sufficiently hopeful to put your skills to use and overcome the challenges that lie ahead. Let's also have a look at a few simple but successful business ideas that will undoubtedly pay off!**

**Your entrepreneurial journey does not begin and end with a wonderful business idea. The best startup business concepts are crucial to your company's success. People nowadays are more interested in their hobbies than in their jobs. They are always on the lookout for the best new business ideas to feed their entrepreneurial spirit. They have no desire to retire at the age of 60. They want happiness index rather than a high wage and a life in a big city.**

**Thousands of people nowadays wish to create their own business rather than work a traditional 9 to 5 job. The bulk of people would chase two or three carriers over their working lifetimes. Working for yourself is one of the most rewarding experiences you can have. While owning a business might be difficult, it can also be satisfying because the effort you put in rewards you personally rather than anybody else.**

# Manufacturing of

## Liquid Hand Soap, **Foam & Bath Soap**

**Soap is a fatty acid salt that is used in a wide range of washing and lubricating goods. Soaps are surfactants that are commonly used in the home for washing, bathing, and other sorts of housekeeping. Soaps are utilised as thickeners, components of certain lubricants, and catalyst precursors in industrial settings. When soap is used for cleaning, it dissolves particulates and filth, allowing them to be separated from the item being cleaned. Soap kills germs in hand washing by disorganizing their membrane lipid bilayer and denaturing their proteins as a surfactant when lathered with a little water. It also emulsifies**

**oils, making them easier to wash away with running water. In the year 2020, the worldwide bath soap market will be worth around USD 20.5 billion. Between 2021 and 2026, the bath soap market is predicted to rise at a CAGR of 5%, reaching a value of almost USD 27.5 billion. Because of the huge increase in pollution levels, bath soaps are being used more frequently around the world to protect skin from infectious contaminants. This is one of the most important aspects influencing the market in a good way.**

**Aside from that, the widespread availability of eco-friendly bath soaps formulated with organic and vegan components is bolstering the market's growth. Furthermore, to increase their product portfolio, top firms are focused on the launch of innovative products with beautiful and biodegradable packaging. On account of better living conditions and growing public awareness about personal hygiene, these players are also introducing premium product versions that are manufactured with an exotic component selection. If you have an interest in starting a new business, one of the best options is to invest in Liquid Hand Soap, Foam & Bath Soap Manufacturing**

**Business Industry of**

**Stone Plastic  
Composite (SPC)  
Flooring Tiles**

**Stone plastic composite flooring, often known as stone polymer composite flooring, is constructed from the same vinyl as luxury vinyl tile. SPC flooring, on the other hand, has limestone added to the vinyl, giving it a hard core. It's thicker and more durable than luxury vinyl tile, so it's perfect for high-traffic areas. Because of the limestone component, the SPC is resistant to temperature and environment changes, making it perfect for new building projects. It may be laid on the flooring before any HVAC systems are installed. Stone plastic composite flooring, like luxury vinyl tile, comes in a variety of colours and styles.**

**It might have a high-tech appearance or be designed to look like natural wood or stone. The global stone plastic composite flooring market was valued at USD 24.00 billion in 2020, is predicted to reach USD 27.35 billion in 2021, and is likely to rise at a CAGR of 14.26% to USD 53.44 billion by 2026. The growing demand for the product due to zero formaldehyde emissions, zero volatile organic compounds, stain-resistance, anti-slippage, superior stability, fire-resistance, and others, as well as the increasing number of construction activities and the global construction industry's growth, and the easy availability of an affordable and rigid product are some of the major and impactful factors.**

# Manufacturing Industry of

# Men's Undergarment (EOU)

**Undergarments, often known as undergarments, are garments worn beneath outerwear and are normally in direct touch with the skin, however they can be made up of more than one layer. They are used to keep clothing from becoming soiled or damaged as a result of biological excretions, to reduce friction between outerwear and the skin, to shape the body, and to conceal or support sections of it. Long underwear is sometimes worn in cold conditions to give extra warmth. Religious significance is attached to some styles of underwear.**

**There are two categories of undergarments: those used to cover the torso and those worn to cover the waist and legs, though there are also garments that cover both. The global men's underwear market was estimated at USD 29.41 billion in 2018, with a CAGR of 5.3 percent predicted from 2019 to 2025. The rise is likely to be fueled by rising awareness of health, optimum fit, and personal hygiene, as well as a growing millennial demographic.**

**Product demand is expected to be fueled further by the increasing availability of a wide range of products and designs ideal for diverse uses such as sports, every day wear, and functional wear, among others. The industry is predicted to develop as fashion trends improve, disposable money rises, and consumer lifestyles and preferences shift. Concerns about the cloth used in production are growing. This presents an excellent opportunity for anyone looking to start a Men's Undergarment (EOU) business.**

**Start Assembling of**

**Lithium Ion Battery  
(Battery Assembly)**

**A lithium-ion battery, often known as a Li-ion battery, is a rechargeable battery in which lithium ions travel from the negative electrode to the positive electrode via an electrolyte during discharge and then back again during charging. The positive electrode of a lithium-ion battery is made of an intercalated lithium compound, while the negative electrode is usually made of graphite. Lithium-ion batteries have a high energy density, little memory effect (with the exception of LFP cells), and a low self-discharge rate. Cells can be made to emphasise either energy or power density.**

**They can, however, be a safety problem because they contain flammable electrolytes, which can cause explosions and flames if damaged or incorrectly charged. The global lithium-ion battery market was worth \$36.7 billion in 2019 and is expected to reach \$129.3 billion by 2027, with a CAGR of 18.0% between 2020 and 2027. A lithium-ion (Li-ion) battery is a rechargeable battery that uses lithium ions as one of its electrochemical components. Laptops, PDAs, cell phones, and iPods are all examples of lithium-ion batteries in use.**

**The explosion in demand for smartphones and other electronics devices, as well as the rise in electric cars, are some of the primary reasons driving the global lithium-ion battery market. The implementation of strict government measures to reduce rising pollution levels is projected to boost market growth even further. The high cost of lithium-ion batteries, on the other hand, is expected to limit industry expansion. One of the fastest growing business sectors of Lithium Ion Battery (Battery Assembly) manufacturing.**

# **Investment Opportunities in**

# **Waste Lubricating Oil Recycling Plant**

**Waste oil is any petroleum or synthetic oil that has completed its lubrication function in the engine it was used to lubricate. Used Lube Oil is defined as petroleum-derived or synthetic oil that remains after Lube Oil has been used for lubrication, cutting, and other uses. Lube Oil is quite beneficial to our machinery, including not just automobiles but also lawnmowers and a variety of other machines. After oil has been used, it becomes Waste or Used Oil, at which point materials (impurities) such as water, metal scrapings, dirt, and so on must have been mixed with it.**

**The lubricating oil degrades as temperature rises, resulting in a decline in qualities such as viscosity, specific gravity, and so on. As a result, waste/used lubricant oil does not perform as well as virgin lubricant oil. As a result, such Trash Oil is replaced with New Lube Oil or re-refined oil, which, in most situations, ends the work of the now waste used oil. From 2021 to 2028, the Waste Oil Market is expected to increase at a CAGR of 3.6 percent, from USD 3.3 billion in 2020 to USD 4.37 billion in 2028.**

**In the near future, macroeconomic variables such as an increase in Europe's GDP, a gradual recovery of the region's industrial sector, and an increase in the energy consumption of the world's growing population are predicted to drive the worldwide waste oil industry. Because high technology equipment penetration is lower in developing economies, these countries provide considerable potential opportunities for the industry. If you're looking for a business opportunity then Waste Lubricating Oil Recycling Plant may be your answer.**

**Start Manufacturing of**

**Medical Disposables  
(Gowns/Drapes)**

**Medical disposables are devices that are meant to be used only once or for a limited period of time. They're easy to use and don't require any maintenance or sanitation. Doctors always use a new device and discard it after each use. During each medical operation, doctors always use this consumable. It protects patients from contracting numerous ailments, as well as preventing increased sensitivity during surgical and diagnostic treatments. The global medical disposable market is predicted to increase at a CAGR of 7% to USD 160 billion by 2023, up from USD 114 million in 2018.**

**Some of the primary factors driving the growth of the global disposable medical market include an increase in hospital visits, an increase in incidences of hospital acquired illnesses, and an increase in patient awareness. To meet rising worldwide demand, the WHO has urged industry and governments to expand production of personal protective equipment, such as hospital gowns, gloves, medical masks, face shields, aprons, respirators, and goggles, by 40.00 percent. Surgical masks, for example, have climbed sixfold in price, while hospital gowns have increased twofold. You can set up your own Medical Disposables manufacturing unit and earn handsome profits within few years.**

Production Industry of

Calcium Carbide  
(CaC<sub>2</sub>)

**The chemical compound calcium carbide, commonly known as calcium acetylide, has the chemical formula  $\text{CaC}_2$ . It is primarily used in the manufacturing of acetylene and calcium cyanamide in industry. Calcium carbide is in high demand due to its mechanical qualities, which are employed in the thermal, mechanical, and electrical industries. The use of acetylene gas in the manufacture of organic compounds is driving the market. Chemicals, metallurgy applications, environmental engineering, and solvent synthesis are among the primary application segments.**

**After rising at a CAGR of 5.1 percent from 2020 to 2025, the global calcium carbide market is expected to reach over \$18 billion by 2025. Calcium Carbide is becoming more popular as a result of its exceptional mechanical qualities, which fulfil today's most stringent thermal, mechanical, and electrical performance requirements in a variety of applications. Furthermore, the usage of calcium carbide simplifies and lowers the cost of synthesis while also avoiding transportation and sorting issues, making it a beneficial product in the pharmaceutical, cosmetics, plastics, and steel industries. This presents an excellent opportunity for anyone looking to start a Calcium Carbide business.**

# Automated Vehicle Scrapping and Recycling Unit

**Vehicle recycling is the deconstruction of cars for spare parts. When vehicles reach the end of their useful lives, they have value as a source of replacement components, which has given rise to the car dismantling industry. Wrecking yards, auto dismantling yards, automotive spare parts suppliers, and, more recently, auto or vehicle recycling are all phrases that have been used to characterise the industry's business outlets. Vehicle recycling has long been a component of the process, but manufacturers have become increasingly active in recent years.**

**A car crusher is commonly used to reduce the size of a junk car so that it can be transferred to a steel mill. The "Voluntary Car-Fleet Modernization Program," also known as India's vehicle scrapping programme, intends to usher in a new era of what it means to own and use a car in India. Nitin Gadkari, the Minister of Road Transport and Highways, introduced it in Parliament in March. The programme demands that all automobiles above a certain age be taken off the road in order to achieve higher pollution control and safety, which new vehicles provide.**

**A commercial vehicle over 15 years old or a personal vehicle over 20 years old that fails an automatic fitness test, regardless of whether it runs on diesel or gasoline, is earmarked for scrapping. If you wish to start Automated Vehicle Scrapping and Recycling Unit then there are plenty of opportunities available here.**

**Growing Business of**

**Animal Feed**

**(Cattle, Poultry Broiler,  
Pig & Fish Feed)**

**Animal feed is the food that is fed to domestic animals, particularly livestock, in the course of their care. Fodder and forage are the two most common types. When the word feed is used alone, it usually refers to fodder. Animal feed is a crucial component of animal agriculture, and it is typically the most expensive part of the process. Farms generally strive to cut costs by growing their own food, grazing animals, or supplementing expensive feeds with cheaper alternatives, such as food waste from beer manufacturing. Animal health is highly reliant on feed that provides a well-balanced diet.**

**Some modern agricultural techniques, such as grain-feeding cows or keeping them in feedlots, have negative consequences. From US\$345.434 billion in 2020 to US\$460.322 billion in 2026, the animal feed industry is expected to increase at a CAGR of 4.90 percent. Animal feeds are the goods that are responsible for boosting the health of animals. Depending on the animal, different doses of the feed are provided.**

**During the projected period, rapid urbanization and rising consumption of meat and other end products such as milk and eggs in various areas will drive the animal feed market growth potential. By delivering enriched nutrients with the feedstuff, the feed aids in the enhancement of the animal's capacities, accelerating growth and weight gain, and improving immunity. One of the fastest growing business of Animal Feed.**

# Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

**10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?**

**11. What is the Manufacturing Process of the plant?**

**12. What is the total size of land required for setting up the plant?**

**13. What will be the income and expenditures for the plant?**

**14. What are the Projected Balance Sheets of the plant?**

**15. What are the requirement of utilities and overheads for setting up the plant?**

**16. What is the Built up Area Requirement and cost for setting up the plant?**

**17. What are the Personnel (Manpower) Requirements for setting up the plant?**

**18. What are Statistics of Import & Export for the Industry?**

**19. What is the time required to break-even?**

**20. What is the Break-Even Analysis of the plant?**

**21. What are the Project financials of the plant?**

**22. What are the Profitability Ratios of the plant?**

**23. What is the Sensitivity Analysis-Price/Volume of the plant?**

**24. What are the Projected Pay-Back Period and IRR of the plant?**

**25. What is the Process Flow Sheet Diagram of the plant?**

**26. What are the Market Opportunities for setting up the plant?**

**27. What is the Market Study and Assessment for setting up the plant?**

**28. What is the Plant Layout for setting up the plant?**

The background of the slide is a blurred photograph of a business meeting. Two people are shaking hands over a table. One person is wearing a blue suit jacket, and the other is wearing a white shirt. The background is light and out of focus, with some geometric patterns visible in the lower left corner.

# Reasons for Buying Our Project Report

- ✓ **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ✓ **This report provides vital information on the product like it's characteristics and segmentation**
- ✓ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ✓ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ✓ **The report provides a glimpse of government regulations applicable on the industry**
- ✓ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

The background of the slide is a photograph of two men in business suits shaking hands. The man on the left is wearing a dark suit, and the man on the right is wearing a white shirt and a patterned tie. They are standing in front of a city skyline with several tall buildings under a clear sky. The text 'Our Approach' is overlaid on the image in a large, bold, red font with a black outline and a reflection effect below it.

# Our Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

## **Free Instant Online Project Identification and Selection Service**

**Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)**

- [Detailed Project Reports](#)

**Visit:-** <https://www.entrepreneurindia.co/complete-project-list>

**NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.**

**Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.**

**And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,**

**Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)**

# Entrepreneur India

## **Who are we?**

**A trusted and leading name in the industry, we have been putting forth exceptionally integrated and comprehensive technical consultancy services. We believe that project consultancy serves as a critical element for the success of your projects. Moreover, we keep in mind that no client is the same and nor are the requirements. Therefore, we ensure uniqueness in every service you avail from us.**

## What do we offer?

- **Project Identification**
- **Detailed Project Reports/Pre-feasibility Reports**
- **Market Research Reports**
- **Business Plan**
- **Technology Books and Directory**
- **Industry Trend**
- **Databases on CD-ROM**
- **Laboratory Testing Services**
- **Turnkey Project Consultancy/Solutions**
- **Entrepreneur India (An Industrial Monthly Journal)**

## How are we different ?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision

# Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

## **Who do we Serve?**

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

## Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

## **Sectors We Cover** *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

## **Sectors We Cover** *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

## **Sectors We Cover** *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

## **Sectors We Cover** *Cont...*

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

## **Sectors We Cover** *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

## **Sectors We Cover** *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

## **Sectors We Cover** *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

# Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
  - Growth drivers of the industry
  - Latest market trends
  - Insights on regulatory framework
  - SWOT Analysis
  - Demand-Supply Situation
  - Foreign Trade
  - Porters 5 Forces Analysis

# Objective

- To provide forecasts of key parameters which helps to anticipate the industry performance
- To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- To help an entrepreneur/manager in keeping abreast with the changes in the industry
- To evaluate the competitive landscape of the industry by detailing:
  - Key players with their market shares
  - Financial comparison of present players

# Clientele

- Venturist/Capitalists
- Entrepreneur/Companies
- Industry Researchers
- Investment Funds
- Foreign Investors, NRI's
- Project Consultants/Chartered Accountants
- Banks
- Corporates
