

Integrated Organic Farming Handbook

Author: Dr. H. Panda

Format: paperback

Code: NI248

Pages: 472

Price: Rs 1275 | US\$ 33.95

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Organic agriculture has grown out of the conscious efforts by inspired people to create the best possible relationship between the earth and men. After almost a century of neglect, organic agriculture is now finding place in the mainstream of development and shows great promise commercially, socially and environmentally. Integrated organic farming is a commonly and broadly used word to explain a more integrated approach to farming as compared to existing monoculture approaches. It refers to agricultural systems that integrate livestock and crop production and may sometimes be known as Integrated Bio systems. It denotes a holistic system of farming which optimizes productivity in a sustainable manner through creation of interdependent agri-eco systems where annual crop plants (e.g. wheat), perennial trees (e.g. horticulture) and animals (including fishes where relevant) are integrated on a given field or property. This concept of organic farming is based on following principles: 1. Nature is the best role model for farming, since it does not use any inputs nor demand unreasonable quantities of water. 2. The entire system is based on intimate understanding of nature's ways of replenishment. The system does not believe in mining of the soil of its nutrients and do not degrade it in any way. 3. The soil in this system is considered as a living entity 4. The soil's living population of microbes and other organisms are significant contributors to its fertility on a sustained basis and must be protected and nurtured, at all cost. 5. The total environment of the soil, from soil structure to soil cover is more important and must be preserved.

Integrated Organic farming is a method of farming system, which primarily aims at cultivating the land and raising crops in such a way, so as to keep the soil alive and in good health. It is the use of organic wastes (crop, animal and farm wastes, aquatic wastes) and other biological materials, mostly produced insitu- along with beneficial microbes (bio fertilizers) to release nutrients to crops, which connotes the 'organic' nature of organic farming. It is also termed as organic agriculture. In the Indian context it is also termed as 'Javik Krishi'. We have compiled all the relevant information regarding integrated organic farming in this book. This is first book of its kind which contains reliable details related to organic farming, green manuring, biological nitrogen fixation, uses of vermiculture bio-tech, organic fertilizers for flooded rice ecosystem, biological pest management, press mud as plant growth promoters, bio fertilizer for multipurpose tree species, rice- fish integration, response of crops to organic fertilizer and many more.

The book is very useful for farmers, agriculture, universities, consultants and research scholars.

Contents

1. NECESSITY OF ORGANIC FARMING

Management of Autonomous Ecosystem

Mixed Farming

Plants

Animals

Soils

Biosphere
Crop Rotation
Benefits of Crop Diversification
Organic Cycle Optimization
In Partnership with Nature
Basic Standards and General Principles for Organic Agriculture
Crop and Soil Management
Choice of Crops and Varieties
Crop Rotations
Fertilization Policy
Management of Pests, Diseases and Weeds
Wild Products
Pollution Control
Soil and Water Conservation
Landscape
Principle Requirements and Pre-conditions
Conversion from Conventional to Organic Farming
Farms with Plant Production and Livestock
Limitations
Initiating Organic Farming
Medicinal Plants-the First Crops for Organic Farming
Management of Permaculture Farm
Permaculture Farm
Use of Draft Animal
Making Permanent Farm
Conservation of Soil
Protection of the Soil against Fires
Protection from Water Erosion
Protection from Wind Erosion
Improvement of the Soil
How to Bury Organic Matter
Mixed Cropping
Permaculture for Wastelands
Soil and Water Conservation
Pioneers
Pioneer Trees and Plants
Secondary Species
Conclusion
2. GREEN MANURING—A BASIC COMPONENT OF ORGANIC FARMING
Definition
Objectives of Green Manuring
Subsidiary Objective of Green Manures
Catch Crops
Shade Crops
Cover Crops
Forage Crops
Advantages of Green Manuring
Soil Structure and Tilth Improvement
Fertility Improvement of Soils
Amelioration of Soil Problems

Improvement in Crop Yield and Quality
Pest Control
Classification of Green Manures
Legumes
Non-Legumes
Characteristics Desirable in Legume Green Manure Crops
Leguminous Green Manures
Non-Conventional Green Manures
Other Green Manures
Choice of Green Manure Species
Forms of Green Manuring
Agronomy of Green Manure Crops
Sesbania Speciosa
Sesbania Aculeata {Dhaincha}
Sesbania Rostrata
Crotalaria Juncea (Sunnhemp)
Tephrosia Purpurea (Wild Indigo)
Indigofera Tinctoria
Calapogonium Mucunoides
Phaseolus Trilobus (Phillipesara)
Centrosema Pubescens
Macroptilium Atropurpureum (Siratoo)
Stylosanthes Hamata
Pueraria Phaseoloides (Kudzu)
Dolichos Lab Lab var. Lignosus
Agronomy of Green Leaf Manure Shrubs and Trees
Glyricidia (Glyricidia Maculata Syn. G. sepium)
Ipomoea Cornea
Cassia Auriculata
Derris Indica (Syn. Pongamia Glabra)
Azadirachta Indica (Neem)
Thespesia Populnea
Rhizobial Inoculation
Conditions for Fixation of Nitrogen
Bacterial Inoculation of Legumes
Stage of Incorporation
Time of Incorporation
Method of Application of Green Manure
Decomposition of Green Manure
Aerobic Decomposition
Changes in the Carbon Compounds
Changes in Nitrogen Compounds
Changes in the Mineral Constituents
Anaerobic Decomposition
Carbon Nitrogen Ratio on Decomposition Process
Farmer Acceptance of Green Manuring
Limitations in Raising Green Manure Crops
Conclusions
Future Needs
3. BIOLOGICAL NITROGEN FIXATION
Definition

Symbiotic and Non-Leguminous Symbiotic System

Azotobacter

Beijerinckia

Azospirillum

Application

Other Bacteria

Blue Green Algae

Multiplication

Trough Method

Pit Method

Field Method for Large Scale Production

Limitations

Azolla

Nursery

Azolla Application Methods

Green Manuring

As Dual Crop

Efficiency of Azolla

Limitations

Frankia

Legume-Rhizobium Symbiosis

Methods of Application

Seed Inoculation

Pelleting

Other Symbiotic Nitrogen Fixing Systems

Other Bioinoculants

Phosphate Solubilising Microorganisms (PSM)

Vesicular Arbuscular Mycorrhiza (VAM)

Inoculation Methods

Transplanted Crops

Direct Sown Crops

Seed Coating

Pelleting

Fluid Drilling

Furrow Inoculation

Precropping

Plant Growth Promoting Rhizobia (PGPR)

Conclusion

Future Needs

4. APPLICATION OF VERMICULTURE

BIOTECHNOLOGY

Vermiculture Biotechnology

Earthworm for Nutrient Management

Effect on Soil Fertility

Nitrogen

Phosphorus

Potassium

Earthworms for Water Management

Earthworm Castings

Earthworms Act as Biopump

Earthworms for Effective Waste Management

Composting of Municipal and Industrial Wastes
Earthworms for Disease and Pest Management
Earthworms for Nutritional Crops
Earthworms for Sustainable Agriculture and Wasteland Development
Earthworms as Vectors of Beneficial Microorganisms
Successful Applications
Harnessing Vermiculture Biotechnology
Selection of Proper Species
Use of Vermicastings for Inoculation
Earthworms and Land Use Practices
Effect of Organic Manure and NPK Fertilizers on Earthworm Activity
Cultivation
Mulching
Irrigation
Biocides
Procedure to Prepare Vermicompost
Culturing Technique
Culture Bed
Feed Composition
Feed Application
Wormcast Production and Collection
Application of Vermicompost
Conclusion
Future Research Needs

5. ORGANIC FERTILIZERS FOR FLOODED RICE ECOSYSTEM

Azolla
Growth and N-Fixation
Factors Affecting Growth and N-Fixation
Management Practices
Impact on Rice Yield and Soil Fertility
Economic Aspects
Suitable Agroclimatic Conditions
Adoption Constraints and Future Research Needs

Blue-Green Algae (BGA)
Nitrogen Fixing Potential and N-input
Factors Affecting Growth and N-fixation
Management Practices
Impact on Rice Yield and Soil Fertility
Economic Aspects
Suitable Agroclimatic Conditions
Adoption Constraints and Future Research Needs
Conclusions

6. PHOSPHATE SOLUBILIZING MICROORGANISMS : FUNGI AND BACTERIA

Problems in Phosphorus Uptake
Phosphate Fixation in Different Soils
Historical Developments
Phosphate Solubilization
Factors Affecting Phosphate Solubilization
Isolation

Mechanisms of Action

Role of Acids

Other Mechanisms

Effect on Crop Yield

7. PHOSPHATE SOLUBILIZING MICROORGANISMS :

MYCORRHIZAE

Mycorrhizal Types and Their Structural and Nutritional Features

Ectomycorrhizae

Mechanism of ECM Formation

Morphology and Structure

Synthesis of Mycorrhiza

Cutural Study

Vesicular Arbuscular Mycorrhiza

Introduction

Evolution

Taxonomy

Classification

Distribution

Lifecycle

Reproduction

Sexual Reproduction

Asexual Reproduction

Method of Inoculum Production of VAM

Some Important Steps in Production of VAM

Host Plant/Growth Medium

Fertilizations/Micronutrients

Chemical Application

Control of Fungal Pathogens

Plant-Vesicular Arbuscular Mycorrhizal Fungal Interactions

Vam and Soil Biota

Control of Root Diseases

Endomycorrhiza and Plant Disease

Ectomycorrhizal Fungi and Tree Diseases

Mechanism of Disease Control

Outlook

8. APPLICATION AND EVALUATION

Different Methods for Biofertilizer Inoculation

Seed Inoculation

Top Dressing of Biofertilizers

Granular Biofertilizers

Solarisation of FYM/Compost

Granular Biofertilizer Mixed with Seed

Broadcasting of Granular Biofertilizers

Frequency of Inoculation

Liquid Inoculation of Biofertilizers

Methods of Application of Liquid Inoculation

Drenching By Sprayers

Application in Root Zone

Culture Pellet

Methods of Application of Other Biofertilizers

Blue Green Algae

Azolla
As Green Manuring
Azolla Dual Cropping
Azotobacter
Preparation and Use of Azotobacter Inoculant
Application
Azospirillum
Mycorrhizae
Endomycorrhizae
Ectomycorrhizae
Techniques for Isolation of Vesicular Arbuscular Mycorrhizal Fungi (VAMF) from Soil in Laboratory
Gerdemann and Nicolson Technique
Sutton and Barron Flotation Technique
Method for Examination of Mycorrhizal Infection in Root Samples
Foliar Biofertilizer
Humar
Humic Acid
Introduction
Application
Soil
Foliar
Seed Treatment
Soil Benefit
Root
Seeds
Plants
Precautions
Different Media Used to Study Biofertilizer
I. Growth Media for Rhizobium
Media for Testing Nodulating Ability of Rhizobium
Jenson's Plant Nutrient
II. Isolation Of Frankia
III. Selective Media For Blue Green Algae
IV. Selective MEDIA For Azotobacter
V. Selective Media for Azospirillum
VI. Selective Media for Phosphate solubilizing organisms
VII. Selective Medium for isolation of Pseudomonas fluorescens, a biocontrol agent (Subba Rao, 1986).
VIII. Selective medium for isolation of Trichoderma - an antagonistic fungus.
9. BIOLOGICAL PEST MANAGEMENT
Cultural Control
Sanitation
Tillage
Application of Manures and Soil Amendments
Habitat Diversification
Crop Rotation
Trap Cropping
Intercropping
Strip Farming
Time of Planting
Water Management
Crop Competition

Physical and Mechanical Control
Manual Control
Burning
Solarization
Flooding
Biological Control
Conservation of Biodiversity
Conservation of Natural Enemies
Biopesticides
Botanicals
Host Resistance
Increasing the Effectiveness of Bio-control
Autocidal Control
Behavioural Control
Pheromones
Fairomones
Success Rate of Ecological Management
Other Related Approach
Integrated Pest Management
Biologically Intensive Pest Control (BIPM)
Success with Biological Control
Rice
Sugarcane
Tomato
Tobacco
Cotton
Horticultural and Plantation Crops
Future Thrust
Conclusions
10. PRESSMUD AS PLANT GROWTH PROMOTER
Material and Methods
Results and Discussion
11. BIOFERTILIZER FOR MULTIPURPOSE TREE SPECIES
Material and Methods
Species
Inoculum Preparation
Treatment
Preparation of Soil-Vermiculite Mixture
Inoculation of Acacia Nilotica
Inoculation of Eucalyptus Hybrid
Results
Discussion
Summary
12. TREE LEGUMES TO BIOINOCULATION OF ENDOMYCORRHIZAE
Material and Methods
Results and Discussion
Summary
13. GROWTH RESPONSE OF CAJANUS CAJAN
Material and Methods

Growth Response of *Cajanus Cajan* to *Glomus*
Aggregatum with Cement Dust Amendments
Assessment of Percent Mycorrhizal Association
Estimation of Dry Weight

Results

Infectivity

Efficacy

Discussion

Summary

14. SALINE SOIL TOLERANCE OF *SAPINDUS* *EMARGINATUS*

Material and Methods

Results and Discussion

15. SELF SUSTAINABILITY OF ORGANIC FARMING

Self Sustainable System

Design of Self-Sustainable Agro-Ecosystems

Ecological Processes to Optimize in Agro-Ecosystems

Mechanisms to Improve Agro-Ecosystem Immunity

Peripherals for Self-Sustainability

Bio-Diversified Agro-Ecosystems

Crop Rotations

Polycultures

Agroforestry Systems

Cover Crops

Animal Integration

Integration of Livestock

Integration of Aquaculture

Indigenous Organic Farming Practices

Soil and Water Conservation

Arable Land Management

Agronomical Measures

Wind Erosion Control

Water Erosion Control Measures

Engineering Measures

Non-Arable and Denuded Land Management

Rain Water Conservation

Mulches

Essentiality of Mulching

Mulch and Microlife Activities

Activity of Earthworm

Weed Suppression

Birds and Mulch Disturbance

Mulch and Retention of Moisture

Increase in Crop Yield

Control of Temperature

Protection Soil Against Erosion

Control of Pest and Disease

Appearance

Drawbacks of Mulching

Types of Mulch

Loose Organic and Non Organic Mulches

Vertical Mulch
Live Vegetative Barriers
Agroforestry/Alternate Land Use Systems
Basic Principles
Types of Agroforestry Systems
Alley farming
Ley farming
Silvipasture
Agri-Horticulture
Windbreaks and Shelterbelts
Interactions Between Trees and Crops
Useful for Organic Farming
Effects of Trees on Soils
Beneficial Effect
Soil Conservation
Soil Fertility
Management of Adverse Effects of Trees
Management of Agroforestry for Organic Farming
Conclusion

16. RICE ECOSYSTEM
Rice Ecosystems of Kerala
Midland and Malayoram Rice Ecosystem
Chittoor Black Soil
Irrigated Rice Ecosystem
Onattukara
Kuttanad
Karilands
Karappadam Soils
Kayal Lands
Kole Lands
The Coastal Saline Rice Eco Systems
High Range Rice Eco System
Koottumundakan System

17. "POKKALI"—WORLD ACCLAIMED FARMING SYSTEM MODEL
Climate
Crops and Crop Season
Reclamation of Saline Soils
Varieties
Seeds and Sowing
Seedling Establishment and Aftercare
Rice-fish/prawn integration in Pokkali fields
Selective Culture of Prawn
Rice Cum Fish Culture
Sustainable Farming System

18. NEEM : THE BEST EXAMPLE FOR ORGANIC FARMING
Uses of Neem
Neem for Pest Control
Limonoids
Azadirachtin

Meliantriol
Salannin
Nimbin and Nimbidin
Others
Mode of Action
Effectiveness
Good Control
Moderate Control
Poor Control
Nontarget Species
Earthworms
Beneficial Insects
Preparations for Pest Control
Methods of Application
Water Extraction
Hexane Extraction
Pentane Extraction
Alcohol Extraction
Formulations
Additives
Practical Methods for Preparations
Control of Stored Grain Pest
Uses of Neem Extract
Preparing Crushed Neem Seed
Neem to Control Stem Borers on Young Plants
Extracting Neem Oil
Controlling Bruchid Beetles in Stored Beans
Control of Soil-Borne Pests
Neem Water Extract for Plant Protection
Water based Neem Spray to Control Cutworms
Success Stories
Desert Locust
Cockroach
Brown Planthopper
Stored-Product Insects
Armyworm
Mosquitoes
Aphids
Fruit Flies
Nematodes
Snails
Crustaceans
Fungi
Aflatoxin
Plant Viruses
Propagation and Planting of Neem
Climatic Requirements
Rainfall
Temperature
Raising Seedlings
Transplanting

Conclusions

19. RICE-FISH INTEGRATION : A WIN-WIN FARMING MODEL

Externalities of Green Revolution

Lowland Rice Ecologies

Diversification—IFS Approaches

Vanishing Rice Lands—Economic Sustainability Issues

Pokkali System—the Classic Example

Rice-Fish, Harnessing Complementarities

Group Fish Farming (GFF)

Environmental Superiority

Economic Sustainability

Win-Win Land Use Model

20. RICE SOILS IN COASTAL—AREA SUSTAINABLE SOIL NUTRIENT IN ORGANIC RICE FARMING

Organic Farming—the Truths vs. Myths

Organics as a Source of Plant Nutrients

Organic Farming and Food Security

Organic Farming—A Lesson from China

Biodynamic Farming

System of Rice Intensification (SRI)

Conclusions

21. UTILIZATION OF BENEFICIAL MICROORGANISMS FOR SUSTAINABLE ORGANIC RICE PRODUCTION

Biological Nitrogen Fixers

Legume - Rhizobium symbiosis

Azospirillum

Different Methods of Application of Azospirillum in the Field

Cyanobacteria (Blue Green Algae - BGA)

Mass Production of BGA in the Field

Anabaena - Azolla Symbiosis

Utilization of Azolla for Rice

Mass Production of Azolla in the Field

Phosphorus Solubilising Microorganisms

Arbuscular Mucorrhizal Fungi (AMF)

Silicate Solubilising Bacteria

Zinc Solubilising Bacteria

Plant Growth Promoting Rhizobacteria (PGPR)

Efficacy of PGPR in Rice

Methods of Application of Pseudomonas Fluorescens in Rice

Microbial Consortium for Rice

22. BIOGAS POTENTIAL FROM WASTES AND ITS VALUE

Manurial Value of Digested Slurry

Manurial Value of Digested Slurry

23. RECYCLING OF ORGANIC MATERIALS AS ORGANIC FERTILIZERS

Direct Incorporation of Organic Materials in Soil and Their Effects

Maintenance of Organic Matter in Indian Soils

Effect of Organic Matter on Soil Microorganisms

Organic Mulch

Effect of Crop Residues on Yield of Legume Crops

Effect of Straw, Neem Cake and Farmyard Manure on Yield of Maize Crop

Effect of Incorporation of Organic Matter on Paddy Crop

Influence of Humic Substances on Crop Yields

24. RESPONSE OF CROPS TO ORGANIC FERTILIZERS

Farmyard Manure and Compost

Oil-Cakes

Long-Term Effect of Organic Manures

Effect of Organic Manures in Rotation

Manurial Requirements of a Fixed Crop Rotation

Rice-Wheat Rotation

Rice-Rice Rotation

Maize-Wheat Rotation

Jowar-Wheat Rotation

Bajra-Wheat Rotation

Rotation-Jowar in Kharif-Bajra in Rabi

Response of Crops to Bone-Meal

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
