

Disposable Products Manufacturing Handbook

Author: NPCS Board of Consultants & Engineers

Format: paperback

Code: NI261

Pages: 528

Price: Rs 1575 | US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Disposable Products Manufacturing Handbook

(Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial Tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles)

Everyday life products manufacturers worldwide produce a multitude of items that are intended for one use only. A disposable is a product designed for a single use after which it is recycled or is disposed as solid waste. The term often implies cheapness and short-term convenience rather than medium to long-term durability. The term is also sometimes used for products that may last several months distinguish from similar products that last indefinitely.

The fast moving life and modernization simultaneously lead to the necessity of disposables in one's life. One cannot wash utensils all the time, neither can afford to arrange fine and good cutlery of glass or steel in a party for the guest. At such times, people rush for the disposables available in the market with variety of colors and designs.

For a manufacturer, to produce disposables is a good deal keeping in view the present demand and growth in the market. This handbook is a complete well to do package for a layman to understand the basic steps to be followed for setting up a plant for a particular disposable product. The book contains raw material details, product manufacturing process, machinery details, images with raw material and machinery suppliers.

The Disposable Products Manufacturing Handbook is about producing Plastic Cups, Cutlery, Paper Cups, Banana Leaf Plates, Facial tissues, Wet Wipes, Toilet Paper Roll, Sanitary Napkins, Baby Diapers, Thermocol Products, PET Bottles that are used by masses in their day to day life. This well-established text provides a comprehensive coverage of the manufacturing processes adopted to manufacture various disposable products. It gives a holistic view of products produced, which has inputs from diverse fields. The book discusses the importance and objectives of processes and material used for the production of disposable products. Many examples have been provided to illustrate the concepts discussed.

Contents

1. INTRODUCTION

Plastic

Polypropylene

Polystyrene (PS)

Different Types of Disposable Products in Market

Pet Bottles

Thermocol & Its Products

Paper Cup
Plastic Cutlery
Facial Tissue, Wet Wipes and Toilet Rolls
Plastic Cups
Disposable Banana Leaf Plates
Baby Diaper and Sanitary Napkin
Diaper
Sanitary Napkin

2. PLASTICS

Introduction
Composition
Additives
Classification
Thermoplastics & Thermosetting Polymers
Other Classifications
Biodegradability
Natural vs. Synthetic
Crystalline vs. Amorphous
Properties of Plastics
Toxicity
Plastics & Their Uses

3. THERMOPLASTIC

Stress Strain Graph of Thermoplastic Material
Acrylic
Nylon
Polyethylene
Polypropylene
Polystyrene
Polyvinyl Chloride
Teflon
Properties of Various Thermoplastic Products

4. THERMOSETTING PLASTIC

Process
Properties and Their Uses
Examples

5. POLYETHYLENE

Structure of Polyethylene
Process
Monomer
Polymerization
Production of Polyethylene
From Naphtha
As a Gas

Properties
Physical Properties
Chemical Properties
Classification
LDPE
Properties
Chemical Resistance
LDPE Quick Facts
Production of LDPE
Applications
LLDPE
Production and Properties
Processing
Properties
Physical Properties
Application
HDPE

HDPE Resistance
HDPE Quick Facts
Production of HDPE
Applications
Properties Comparison Chart for LDPE and HDPE
Processing Polyethylene into Products
The Making of Molded Products
The Making of Foil
The Making of Multi-Layer Foil
The Making of Sheets
The Making of Foam Applications for Insulation
Additions
Joining

6. POLYETHYLENE TEREPHTHALATE (PET OR PETE)

Production
Dimethyl Terephthalate Process
First Step
Second Step
Terephthalic Acid Process
General Process Involved in the Manufacturing of PET
Properties
General Properties
Application
Sustainable
Polyethylene Terephthalate Films
Intrinsic Viscosity
A PET soft drink bottle
Fiber Grade
Film Grade

Bottle Grade
Monofilament, Engineering Plastic
Property Chart for PET
Drying of PET
Copolymers
Degradation
Acetaldehyde
Antimony
Safety
Bottle Processing Equipment

7. POLYPROPYLENE

Chemical and Physical Properties
Polypropylene Resistance
Polypropylene Quick Facts
Polypropylene Fabrication
Degradation
Synthesis
Industrial Processes
Manufacturing
Properties & Applications
A Common Application for Polypropylene is as Bi-Axially Oriented Polypropylene (BOPP)
Other Useful Properties
PP Structure
PP Parameters
Basic Types of PP
Crystallinity
Presence of Selected Additives during Polymerization
Antioxidants and Stabilizers
Nucleants and Clarifiers
Antistatic Agents
Chemical Resistance
Stress Cracking Resistance
Permeability
Organoleptics
Notch Effects

8. POLYSTYRENE

Structure
Polymerization
Atactic Polystyrene
Syndiotactic Polystyrene
Properties of Polystyrene
Properties of Polystyrene
Physical Properties
Mechanical Properties
Optical Properties
Thermal Properties
Electrical Properties

Chemical Properties
Uses
Strength, Durability, Comfort, Safety
Applications of PS
Packaging
Appliances
Consumer Electronics
Construction
Medical
Other
Degradation
Biodegradation
Incineration
Forms Produced
Sheet or Molded Polystyrene
Disposable Polystyrene Razor
Foams
Expanded Polystyrene
Extruded Polystyrene Foam
Fused Cell Expanded Polystyrene Foam
Copolymers
Oriented Polystyrene

9. INJECTION MOULDING

Process Characteristics
Advantages of Injection Molding
Disadvantages of Injection Molding
Applications
Examples of Polymers Best Suited for the Process
Equipment
Mold
Injection Molding Die with Side Pulls
Mold Design
Mold Storage
Tool Materials
Machining
Cost
Injection Process
What is Injection Molding Cycle?
Different Types of Injection Molding Processes
Process Cycle
Equipment

Flow Marks
Color Streaks
Weld Lines
Flash
Delamination
Stringiness
Sink Marks
Warping or Twisting

10. EXTRUSION MOULDING

Types of Extrusion
Plastic Extrusion
Single Screw Extrusion Machinery
Extrusion Dies
Screw Design
Cooling and Sizing Equipment
Pros and Cons of Extrusion Molding
Pros
Cons
Defects

11. COMPRESSION MOULDING

Process Definition
Process Characteristics
Process Schematic
Pros & Cons of Compression Moulding
Pros
Cons

12. BLOW MOLDING

Typologies of Blow Molding
Extrusion Blow Molding
Continuous Extrusion Equipment
Intermittent Extrusion Machinery
Advantages of Blow Molding
Disadvantages of Blow Molding
Spin Trimming
Injection Blow Molding
Disadvantages
Injection Stretch Blow Molding Process
Advantages
Disadvantages

Process Explanation
Advantages
Disadvantages
What is PET Blow Moulding?
PET Blow Moulding Process
Advantages of Blow Molding
Defects & Troubleshooting
Blow Moulding Glossary

13. THERMOFORMING

Vacuum Thermoforming
Process
Applications
Pressure Thermoforming
Advantages of Pressure Forming
Applications for Pressure Forming
Mechanical Thermoforming
Thin Gauge and Heavy (Thick) Gauge Thermoforming
Types of Thermoforming Molds
Applications
Benefits
When and Where does Thermoforming Fit?
Plastics Used
Thermoforming Materials

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas,

Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
