

# **The Complete Book on Waste Treatment Technologies (Industrial, Biomedical, Water, Electronic, Municipal, Household/ Kitchen, Farm Animal, Dairy, Poultry, Meat, Fish & Sea Food Industry Waste)**

**Author:-** Prof. Dr. Mahendra Pal

**Format:** paperback

**Code:** NI293

**Pages:** 592

**Price:** Rs.0US\$ 0

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

## **About the Book**

Waste management is a global problem that continues to increase with rapid industrialization, population growth, and economic development. As the world hurtles towards the urban future, the amount of Municipal Solid Waste (MSW) is growing very fast. Waste includes any solid material or material that is suspended dissolved or transported in water or deposited on land. Wastes are generally classified into solid, liquid, & gaseous and are broadly classified as household waste; municipal waste; commercial and non-hazardous industrial wastes; e- waste, hazardous (toxic) industrial wastes; construction and demolition waste; health care wastes – waste generated in health care facilities (e.g. hospitals, medical research facilities); human and animal wastes; and incinerator wastes.

In the recent years, modern society has become more responsible when it comes to waste management. The fast industrialization, urbanization, modern technology, and rapidly growing population in India have posed a serious challenge to the waste management. In India, per capita generation rate of municipal solid waste ranges from 0.2 to 0.5 kg/day. At present, the daily generation rate in South Asia, East Asia and the Pacific combined is approximately 1.0 million tons per day.

The current scenario reveals that there is a tremendous scope for the development of waste treatment technologies and is expected to offer significant opportunities in the near future. Sustainability of waste management is the key for providing an effective service that can satisfy the need of end users. Solid Waste Management sector in India has become a very lucrative sector for investors. With a growing urgency for efficient waste management in many cities, there will be more and more employment opportunities in the sector. The participation of different sectors, roll of Government and private organization is important for better management of waste.

This book describes the various waste treatment technologies like; Physical treatment techniques, biological treatment techniques, anaerobic lagoon techniques etc.

It will be a standard reference book for professionals, entrepreneurs, students, teachers, researchers, administrators, and planners of various disciplines who are directly or indirectly involved in the waste management.

## About the Author

Dr. Mahendra Pal born on April 10, 1946 in Delhi, and obtained B. V. Sc. and A. H., M.V. P. H., Ph. D. and D. Sc. in 1969, 1975, 1981 and 1998, respectively. Prof. Pal worked at Massey University, Palmerstone, New Zealand (1984), Institute of Tropical Medicine, Antwerp, Belgium (1985-1986), and Tokyo University, Japan (1989-1990). Prof. Pal has acted as Advisor of over 68 students for D.V.M., M.Sc., and Ph.D. degree both in India, and Ethiopia. He has served in Veterinary and Medical institutes, and published over 475 papers in national and international journals. Prof. Pal has published many papers in collaboration with the scientists of Japan, New Zealand, South Korea, USA, Nepal and Ethiopia. He has authored seven books including "Zoonoses" and "Veterinary and Medical Mycology" which are highly appreciated by veterinary and medical scientists. Prof. Pal has developed sunflower seed medium (Pal's medium) in 1980, "PHOL" (Pal, Hasegawa, Ono, Lee) stain, in 1990, "Narayan" stain in 1998 and "APRM" medium in 2015, which are proved very useful for the study of fungi. Prof. Pal is credited to elucidate the etiologic significance of *Cryptococcus neoformans* for the first time with mastitis of goat (1975) and buffalo (1980), *Nocardia asteroides* in corneal ulcer of cattle (1982), *Aspergillus fumigatus* in keratitis of buffalo calf (1983), *Candida tropicalis* in human lung empyema (1987), *Fusarium solani* in corneal ulcer of buffalo (1992) and *Trichophyton verrucosum* in dermatitis of barking deer (1993). Prof. Pal established for the first time the prevalence of *Cryptococcus neoformans* in the environment of New Zealand, Nepal, and Djibouti. He described for the first time the etiologic role of *Candida albicans*, and *Trichophyton verrucosum* in mastitis and dermatitis of camel, respectively in Ethiopia. Prof. Pal is serving as Honorary Member/Associate Editor of nine online journals. His papers are frequently cited as reference by many academicians in their papers, reviews, books, and monographs. Prof. Pal has started M.V.Sc. and Ph.D. in Veterinary Public Health at Veterinary College, Anand, India. He is also an instrumental to start Ph.D. in Veterinary Public Health at Addis Ababa University for the first time in Ethiopia. Prof. Pal is a recipient of several awards, including "Jawaharlal Nehru Award", "Distinguished Teacher Award", and "Life Time Achievement Award." Presently, he is working as Professor of Veterinary Public Health, Addis Ababa University, Ethiopia.

## CONTENTS

Dedication

Acknowledgements

Preface

Abbreviations

1. INTRODUCTION

2. TYPES OF WASTES

A. Livestock Farm Wastes

Current Methods for Disposal of Livestock Mortalities

Burial

Burning

Incineration

Rendering

Composting

Future of Livestock Mortality Disposal

Novel Disposal Methods

Carcass Storage and Bioreduction Methods

Reasons for Concern

Pollution Potential of Farm Animal Wastes

Magnitude of the Problem

Properties of Animal Wastes

Physical Properties

Chemical and Biological Properties

Fertilizer Value

Handling of Farm Animal Wastes

Storage of Farm Animal Wastes

Treatment of Farm Animal Wastes

Physical Treatment

Chemical Treatment

Biological Treatment

Composting

Anaerobic Digestion

Lagoon Treatment

Aerobic Treatment

Economics of Farm Animal Waste Treatment

B. Biomedical Wastes

Classification of Biomedical Waste

Handling, Storage, and Transportation of Healthcare Waste

On-site Collection, Transport, and Storage of Waste

Collection

Storage

On-site Transport

Off-site Transportation of Waste

Special Packaging Requirements for Off-site Transport

Handling, Storage, and Transportation of Healthcare Waste

Routing

Biomedical Waste Treatment

Incineration Technology

Non-Incineration Technology

Autoclaving

Microwave Irradiation

Chemical Methods

Selection of Suitable Treatment Technology

Common Treatment Facility

Mobile Treatment/Disposal System

C. Industrial Wastes

Description of Important Industrial Solid Waste

Coal Ash

Integrated Iron and Steel Plant Slag

Phosphogypsum

Red Mud

Lime Mud

Waste Sludge and Residues

Potential Reuse of Solid Wastes

Prevention-A Waste Minimization Approach

Inventory Management and Improved Operations

Modification of Equipment

Production Process Changes

Recycling and Reuse

Waste Management at Source

Collection and Transport of Industrial Wastes

Storage and Transportation

Disposal of Industrial Solid Waste

Health Consequences of Poor Industrial Waste Disposal

Waste Segregation  
Combined Treatment Facilities  
Landfill  
Waste Reduction Techniques  
Benefits of Cleaner Production  
Industrial Hazardous Wastes  
Industrial Nonhazardous Wastes  
Radioactive Wastes  
D. Abattoir Wastes  
Sources of Waste in Red Meat Abattoirs  
Best Management Practices  
Existing Methods for Disposal of Meat Production Waste  
Burial  
Composting  
Incineration  
Rendering  
Rendering Industry  
Recent Events Affecting the Rendering Industry  
Dead Stock Collection, Transportation and Receiving  
Dead Stock Collectors and Receivers  
Anaerobic Digestion of Protein Rich Substrate  
Co-digestion Plant Design and Operation  
E. Household/Kitchen Wastes  
Disposal of Household Hazardous Waste  
Disposal Problems  
Disposal Problems in the Trash  
Disposal Problems on the Ground  
Disposal Problems in Storm Sewers  
Worm Composting  
F. Municipal Wastes  
Anaerobic Digestion Process  
Various AD Systems  
Important Operating Parameters in AD Process  
Waste Composition/Volatile Solids (VS)  
pH Level  
Temperature  
Carbon to Nitrogen Ratio (C/N)  
Total Solids Content (TS) / Organic Loading Rate (OLR)  
Retention (or Residence) Time  
Mixing  
Compost  
Biogas Composition  
Development and Present Status of AD Technology  
Historical Background  
Types of AD Systems  
Single Stage Process  
Single Stage Low Solids (SSLS) Process  
Single Stage High Solids (SSHs) Process  
Multi-stage Process  
Multi-stage Low Solids Process  
Multi-stage High Solids Process  
Batch Reactors  
G. Dairy Industries Wastes:

Sources of Wastes  
Waste Characteristics  
Treatment of Dairy Wastes  
Checking of Dairy Effluent  
Preventive Attitudes  
Waste Management Issues for Dairy Processors  
Cheese Making  
Whey Condensing  
Shell and Tube Condensers  
Mechanical Vapor Recompression (MVR)  
Ultra Filtration  
Reverse Osmosis  
Waste Water Treatment Options  
Aerated Lagoons  
Activated Sludge  
Sequencing Batch Reactors  
Biological Tower  
Spray Irrigation  
Ridge and Furrow Systems  
Absorption Ponds  
Hauling and Land Application  
WPDES Permit Issuance  
Surface Water Effluent Limits  
Land Application of Waste Water  
Phosphorus Limitations  
Chloride Limitations  
Aerated Lagoon Treatment Systems  
Winter Spreading of Waste  
H. Fish and Seafood Processing Unit's Wastes  
Liquid Effluent  
Solid Waste  
Other Waste Components  
Waste Management  
Typical Waste Treatment Scenario  
Data on Receiving Environment  
Biologically Activated Rock Phosphate Fertilizer  
Fish Processing Waste Disposal Practices and Options  
Waste Water Characteristics  
I. Poultry Farm Waste  
Options and Considerations for Poultry Waste Management  
Animal Refeeding  
Bioenergy Production  
Dead Birds Disposal:  
Composting  
Incineration  
J. Electronic Wastes  
E-waste in India  
Impacts of E-wastes  
Impacts of Informal Recycling  
Status of E-waste Management in India  
E-waste Management Strategies  
Electronic Waste Items List  
Electronic Wastes: A Rising Global Phenomenon

# Electronic Wastes: The Environmental and Human Rights Dimensions

## Regulatory Responses to the Electronic Waste Phenomenon

### K. Other Wastes

#### Construction Waste Management

##### Eliminating Waste

##### Minimizing Waste

##### Reusing Materials

##### Federal Regulations

##### Management

##### Project Level-enhancing Project Value and Performance

##### Organization Level-stewardship of Corporate Values and Priorities

##### Disposition Level-management of Diversion and Disposal

##### Construction and Demolition Wastes

##### Best Management Practices

##### Process

##### Collection and Hauling

##### Containerization and Transport

##### Prevalence of Common Materials

##### 1. Waste Management Planning

##### 2. Facility Design

##### 3. Construction Contract Requirements

##### 4. Jobsite Waste Reduction

##### Emerging Issues

##### Plastic Waste and Its Disposal

##### Radioactive Waste and Their Environmentally Sound Management

##### Manual Loading of Waste

##### Loading of Waste Through Front End Loader and Trucks

##### Garbage Loaded in Open Trucks Causing Nuisance

##### Measures to be Taken to Improve the System

##### Steps to be Taken to Meet the Above Objectives

##### Transportation of Construction Waste and Debris

##### Waste Disposal Management

##### Waste Types that Should not to be Incinerated

##### Pharmaceutical Disposal

##### Management of Municipal Solid Waste in India

##### Waste Management: Global Perspective

##### Waste Generation

##### Development Trends for Waste and Wastewater

##### Global Overview of Waste Management

##### Landfill CH4: Regional Trends

##### Wastewater and Human Sewage CH4 and N2O: Regional Trends

##### CO2 From Waste Incineration

##### Waste Management and GHG-Mitigation Technologies

##### CH4 Management at Landfills

##### Incineration and Other Thermal Processes for Waste-to-energy

##### Biological Treatment Including Composting, Anaerobic Digestion, and Mechanical

##### Waste Reduction, Re-use and Recycling

##### Wastewater and Sludge Treatment

##### Waste Management and Mitigation Costs and Potentials

##### Fluorinated Gases: End-of-life Issues, Data and Trends in the Waste Sector

##### Air Quality Issues: NMVOCs and Combustion Emissions

##### Reducing Landfill CH4 Emissions

##### Incineration and Other Thermal Processes for Waste-to-energy

Waste Minimization, Re-use and Recycling  
Policies and Measures on Fluorinated Gases

Municipal Solid Waste Management

Wastewater Management

Disposal of Fallen Animals in the Field/Forest

Rendering Industry

Recent Events Affecting the Rendering Industry

Deadstock Collection, Transportation and Receiving

### 3. HUMAN PATHOGENS IN ANIMAL AGRICULTURE PRODUCTION SYSTEMS

Viruses

Chlamydia

Coxiella Burnetii

Bacteria

Aeromonas Hydrophila

Arcobacter

Bacillus Anthracis

Brucella

Campylobacter

Clostridium Perfringens

Escherichia Coli

Erysipelothrix Rhusiopathiae

Francisella Tularensis

Leptospira Species

Listeria Monocytogenes

Salmonella

Yersinia

Mycotic Agents

Parasites (Protozoans and Helminths)

Ascaris

Balantidium Coli

Cryptosporidium Parvum

Giardia

Toxoplasma

Other Organism

Microsporidia

Faecal Indicator Organisms

### 4. PATHOGEN REDUCTIONS DURING WASTE

TREATMENT

Manure Solids Waste

Dry Techniques: Composting

Manure Slurry Treatment Techniques

Physical Treatment Techniques

Biological Treatment Techniques

Anaerobic Lagoon Treatment

Multiple Lagoon Systems

Aerated Lagoons and Oxidation Ponds

Anaerobic Digestion

Mesophilic Anaerobic Digestion

Thermophilic Anaerobic Digestion

Aerobic Digestion

Mesophilic Aerobic Digestion

Thermophilic Aerobic Digestion

Activated Sludge

Biofiltration  
Constructed Wetlands  
Overland Flow  
Disinfection and Chemical Treatments  
Chlorine  
Ozone  
Chlorine Dioxide  
Ultraviolet Light (UV) Irradiation  
Lime Stabilization  
Pasteurization  
Animal Waste Disposal or Recycling Options  
Land Application  
Spray Fields

## 5. AEROSOLIZATION OF PATHOGENS

Microbial Detection Analysis Techniques  
On-farm Verification of Microbial Reduction by Corrective Measures  
Real-time Measurement Techniques  
Public Health Hazards due to Wastes  
Hazardous Substances Associated with Waste Management  
Impact of Waste Management Practices on Health  
Individual Pollutants  
Health Effects in Communities  
Control of Hazards  
Safe Work Practices  
PPE Hazard Assessment and Training  
Systems to Track Hazard Correction  
Emergency Preparation  
Emergency Preparedness

Current Scenario and Future Challenges of Municipal Solid Waste Management in India

Conclusions

Recommendations

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
