

# Handbook on Coal, Lignin, Wood and Rosin Processing

**Author:** Dr. H. Panda

**Format:** paperback

**Code:** NI298

**Pages:** 512

**Price:** Rs 1875 | US\$ 150

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

**Shipping:** 5 days

## About the Book

Coal is one of the world's most plentiful energy resources. Coal is one of the fastest growing forms of energy after renewable sources and its share in the global primary energy consumption increasing rapidly. Lignin is the most abundant natural raw material available on Earth in terms of solar energy storage. Lignin is a complex chemical compound, cross linked polymer that forms a large molecular structure. Lignin can be used as a green alternative to many petroleum-derived substances, such as fuels, resins, rubber additives, thermoplastic blends and pharmaceuticals. Rosin is a complex mixture of mainly resin acids and small amount of non-acidic components.

Energy markets are evolving with technological advancements supporting rapid growth in renewable energy capacity. The coal market is set to witness great boost in near future because of the rising government initiatives.

Coal is one of the main power generation sources all over the world. The factors that are favoring the market growth include rising electricity demand and rapid industrialization. Presently the global coal industry market is valued at \$9.4 with CAGR of 11.21 % is poised to reach \$22 billion in coming years. Asia Pacific has the larger demand and emerging as a larger supplier of Coal. The present global lignin market demand is estimated at \$ 4,222.1 million and is expected to reach \$6,190.5 million in future.

The Major contents of the book are coal, analysis of coal and coke, cotton, lignin and hemicelluloses, degradation of wood, CCA-treated wood, wood-polymer composites, lignocellulosic-plastic composites from recycled materials, chemical modification of wood fiber, delignification of wood with pernitric acid, rosin and rosin derivatives, polymerizable half esters of rosin. It describes the manufacturing processes and photographs of plant & machinery with supplier's contact details.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of these industries.

## Contents

Chapter 1

Coal

Ethylene

Fischer –Tropsch Synthesis for Olefins

Direct Conversion of Synthesis Gas to Ethylene

Ethanol from Synthesis Gas

Olefins from Methanol

Methanol Homologation  
Methanol to Acetic Acid  
Ethylene Glycol  
Acetic Anhydride  
Vinyl Acetate  
Other Chemicals  
Coal Pyrolysis Processes  
Acetylene  
Production of Chemicals by  
Coal Liquefaction Processes  
Conclusion  
Chapter 2  
Analysis of Coal and Coke  
Methods of Analysis  
Sampling  
Determination of Constitution and Physical  
Properties  
Functional Group Analysis  
Spectroscopy  
Determination of Optical Constants  
Electron Microscopy  
Density  
X-Ray Diffraction  
Specification Tests  
Proximate Analysis  
Ultimate Analysis  
Calorific Value  
Fusibility of Coal Ash  
Behaviour on Heating  
Equilibrium Moisture of Coal at 96-97%  
Relative Humidity and 39°C  
Determination of Harcbgrobve Grindability  
Index of Coal  
Special Constituents  
Coal Classification  
Chapter 3  
Cotton  
Methods of Analysis  
Modified Cottons  
Finishing Agents  
Separation and Identification  
Spectroscopic Methods  
Inorganic Constituents  
Chemical Methods  
Spectroscopic Methods  
Chapter 4  
Lignin and Hemicellulose  
Hemicellulose  
Assay systems  
Classification  
Thermophilic Hemicellulases

Alkaline active xylanases  
 $\beta$  - Xylosidase  
Mannanases and galactanases  
Accessory enzymes for Hemicellulose utilization  
Lignin  
Lignin-degrading enzymes  
Lignin degradation in whole cell cultures  
Degradation by cell-free enzyme systems  
Role of glycosides in Lignin degradation  
Lignin-carbohydrate complexes  
Fractionation of Lignin and  
Carbohydrate in wood  
Isolation of LCCs  
Chemical characteristics of LC bonds  
Ferulic and p-coimaric ester side chains  
Frequency and stability of LC bonds  
Residual lignin in kraft pulp  
Biodegradation of LCCs  
Residual LC structures after exhaustive  
enzymatic digestion  
Solubitization of LCC by microbial activity  
Enzymatic treatments of pulps  
Conclusion  
Chapter 5  
Degradation of Wood  
Introduction  
Gross Chemical Composition  
Distribution of Wall Components  
Component Chemistries  
Microstructure and Porosity  
Degradation of whole wood  
Biodegradation of Lignin  
Biodegradation of Cellulose  
Biodegradation of Hemicellulose  
Applications  
Conclusion  
Chapter 6  
CCA-Treated Wood  
Introduction  
Materials and methods  
Results and Discussion  
Conclusion  
Chapter 7  
Wood-Polymer Composites  
Introduction  
Materials and Methods  
Monomers  
Wood specimens  
Treatment of specimens with monomers  
Volumetric swelling and moisture content  
Result

Swelling of wood soaked in monomers  
Polymer loading  
Volumetric swelling of WPC specimens  
Moisture content of WPC specimens  
Conclusions  
Chapter 8  
Lignocellulosic-Plastic Composites from Recycled  
Materials  
Municipal Solid Waste as a Source of  
Lignocellulosic Fibre and Plastics  
Thermoformable composites  
as Outlets for Waste Paper, Wood and Plastics  
Recent Research on Wood  
Fiber-Thermoplastic Composites  
Research and Development Needs  
Concluding Remarks  
Chapter 9  
Chemical Modification of Wood Fiber  
Introduction  
Experimental Procedure  
Esterification Procedure  
Analyses of Esterification Products  
Board Formation  
Board Testing  
Moisture sorption  
Rate and extent of swelling  
Results and Discussion  
Esterification of Wood Fiber  
Moisture Sorption of Esterified Fiberboards  
Rate and Extent of Swelling of Fiberboards  
in Liquid Water  
Plasticization of Esterified Fibers  
Conclusions  
Chapter 10  
Delignification of Wood with  
Pernitric Acid  
Generation of pernitric acid  
Decomposition of pernitric acid  
Delignification of aspen wood  
Conclusions  
Experimental  
Chapter 11  
Rosin and Rosin Derivatives  
Composition  
Reaction and derivatives  
Isomerization  
Maleation  
Oxidation  
Photosensitized oxidation  
Hydrogenation  
Hydrogenless Hydrogenation

Polymers of vinylesters of hydrogenated rosin  
Prehydrogenation  
Hydrocracking of Rosin  
Dehydrogenation  
Polymerisation  
Analysis  
Compatibility  
Solubility  
Instrumental analysis  
Gas chromatography analysis  
Infrared Spectroscope  
Nuclear magnetic resonance  
Ultraviolet spectroscopy  
X-Ray Analysis  
Mass Spectroscopy  
Phenolic modification  
Salt formation  
With metals  
With unsaturated cyclic and acyclic hydrocarbons  
Example-2  
Rosin-isoprene condensate (Example-3)  
Rosin-isobutene condensate (Example-4)  
Example –5  
Rosin-styrene condensate (Example-6)  
Rosin-cyclopentadiene condensate (Example-7)  
Rosin-coumarone-indene condensate (Example-8)  
Rosin-divinylbenzene condensate (Example-9)  
Example-10  
Esterification  
With Glycerol  
With pentaerythritol and other polyhydric alcohols  
With monohydric alcohols  
Hydrogenolysis  
Polyesterification  
Copolyesters  
Ammonolysis  
Preparations  
Dehydroabietylamine acetate  
Dehydroabietylamine  
Typical Uses  
Asphalt additives  
Chemical Intermediates  
Corrosion Inhibitors  
Flotation Reagents  
Preservatives  
Resolving agent  
Chemical and physical properties of  
Amine D acetate  
Stability to heat and storage  
Stability to heat and storage  
Surface Activity

Chemical Reactivity  
 Chemical and Physical Properties of  
 Amine D acetate  
 Solubility  
 Note  
 Stability to Heat and Storage  
 Stability to Air and Sunlight  
 Surface Activity  
 Styrenation  
 Decarboxylation  
 Hydroxymethylation and hydroxylation  
 Methods of preparations  
 Nitrogenous intermediates  
 Methyl levopimarate (i)  
 Methyl neoabietate (ii)  
 Methyl photolevopimarate (iii)  
 Reaction of SSI with Methyl levopimarate (i)  
 Reaction of Chlorosulphonyl isocyanate with  
 methyl neoabietate (ii)  
 Reaction of Chlorosulphonyl isocyanate with  
 methyl photolevopimarate (iii)  
 Fumaroniprile Adduct of  
 levopimaric acid  
 Tetracyanoethylene Adduct of  
 levopimaric acid  
 Acrylonitrile adducts of  
 levopimaric acid  
 Polyoxyalkylation

Chapter 12  
 The Polymerizable Half Esters of Rosin  
 Experimental  
 Preparation and properties of monomers  
 Maleic rosin esters with reactive groups  
 Polymerization & Copolymerization  
 Aqueous Polymerization  
 Suspension Polymerization  
 Secondary reactions and graft copolymers  
 Reaction Involving Crosslinking  
 Applications  
 Coatings  
 Inks  
 Textiles  
 Conclusions

Chapter 13  
 Photographs of Plant & Machinery with Supplier's  
 Contact Details

---

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial

experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
