

Manufacturing of Petroleum Products (Petroleum Waxes, Greases and Solid Lubricants, Solid Fuels, Gaseous Fuels, Gasoline, Diesel Fuel Oils, Automotive, Diesel and Aviation Fuels, Lubricating Oils and Lubricating Greases)

Author:- NPCS Board of Consultants & Engineers

Format: paperback

Code: NI527

Pages: 376

Price: Rs.1675US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

The petroleum waxes are semi refined or fully refined products obtained during the processing of crude oil. According to their structure they are divided into macrocrystalline waxes (paraffin waxes) and microcrystalline waxes (ceresine, petrolatum, others). Grease, thick, oily lubricant consisting of inedible lard, the rendered fat of waste animal parts, or a petroleum-derived or synthetic oil containing a thickening agent. Greases of mineral or synthetic origin consist of a thickening agent dispersed in a liquid lubricant such as petroleum oil or a synthetic fluid. Diesel fuel, also called diesel oil, combustible liquid used as fuel for diesel engines, ordinarily obtained from fractions of crude oil that are less volatile than the fractions used in gasoline. Lubricating oil, sometimes simply called lubricant/lube, is a class of oils used to reduce the friction, heat, and wear between mechanical components that are in contact with each other. Lubricating oil is used in motorized vehicles, where it is known specifically as motor oil and transmission fluid.

The global wax market was valued at around USD 9 billion in 2017 and is expected to reach approximately USD 12 billion in 2024, growing at a CAGR of slightly above 3.5% between 2018 and 2024. The India lubricant market is expected to register a CAGR of 4.64%, during the forecast period, 2018-2023. The major factors driving the growth of the market are the increasing vehicular production along with the growing industrial sector. The global market for lubricants is expected to reach USD 70.32 billion by 2020. The global grease market is expected to grow at a CAGR of 2.13% during the forecast period, 2018 - 2023. Aviation fuel market size will grow by over USD 34 billion during 2018-2022

Some of the fundamentals of the book are composition of the petroleum waxes, solvent extraction, greases and solid lubricants, solid fuels, other significant tests or properties, gaseous fuels, properties of waxes, gasoline, diesel fuel oils, automotive, diesel and aviation fuels, special processes for motor-fuel blending components, crude distillation, lubricating oils, lubricating greases, nature of lubricating oils, photographs of machinery with suppliers contact details

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

1. THE PETROLEUM WAXES

Wax-Production Methods

Paraffin Waxes, Natural And Synthetic

Functional Tests for Paraffin Waxes

Synthetic Paraffin Waxes

Microcrystalline Waxes

Oxidized Microcrystalline Waxes

Petrolatums

Field of Use of Petrolatum

Industrial uses of Petroleum-Wax

Paper Manufacturing

Paper Milk Cartons

Candlemaking

Drugs, Cosmetics, Chemicals, and Matches

Electrical Goods and Metal Casting

Textile Industry

Rubber Compounding

2. SOLVENT EXTRACTION

3. GREASES AND SOLID LUBRICANTS

Definition

Applications for Grease Lubrication

Structure and Properties of Greases

Materials Used in Making Greases

Characteristics of Greases from Various Metallic Soaps

Greases from Nonsoap Thickeners

Pure Petroleum Greases

Grease Additives and Fillers

Laboratory Testing of Greases

Consistency

Apparent Viscosity

Dropping Point

Oxidation Stability

Water Resistance

Extreme Pressure Qualities

Grease Specifications

Solid Lubricants

Introduction

Laminar Solids

Organic Compounds

Radiation Damage to Greases

4. SOLID FUELS

Introduction

Wood

Coal

Heating Value

Proximate Analysis

5. OTHER SIGNIFICANT TESTS OR PROPERTIES

Analyses, Occurrence, and Uses of Coals

Coal Sizes

Calculation of Proximate Analysis and Heating

Value on Various Bases

Coal Coke

Petroleum Coke

Fuel Briquettes

Tests on Coke

6. GASEOUS FUELS

Composition of Gaseous Fuels

Natural Gas

Liquefied Petroleum Gases

Refinery Oil Gas

Producer Gas

Blast Furnace Gas

Water Gas

Carburetted Water Gas

Oil Gas

Coal Gas or Coke Oven Gas

Sewage Gas

Gas Testing

Specific Gravity or Density of Fuel Gases

Direct Weighing

Pressure Balance

Displacement Balance

Bunsen Apparatus

Conversion from Dry to Saturated Basis

Analysis of Fuel Gas

Spectrometry

Gas Chromatography

Distillation

Chemical Absorption

7. PROPERTIES OF WAXES

8. GASOLINE

Introduction

Classification of Fuel Properties

Volatility

General Requirements

Distillation Test of Gasoline

Reid Vapor Pressure Test

Starting Characteristics

Vapor Locking

Acceleration and Warm-up

Fuel Distribution

Volumetric Efficiency

Carburetor Icing

Specifications

Combustion Quality

Knocking

- Surface Ignition
- Mechanical Octane Number
- Fuel Octane Number
- Knock Rating
- Knock Rating Methods
- Knock Intensity Measurement
- Significance of Knock Test Results
- Fuel Sensitivity
- Road-Knock Rating Procedures
- Anti-knock Compounds
- Tetraethyllead
- Effect of Molecular Structure of Fuels upon
- Lead Susceptibility
- Effect of Sulfur on Lead Susceptibility
- TEL Addition to Commercial Blends
- Heating Value of Gasoline
- Gasoline Dye
- Chemical Stability
- Gum in Gasoline
- Gum Tests
- Corrosiveness
- Corrosive Impurities
- Sulfur Determination
- Copper Strip Test
- Doctor Test

9. DIESEL FUEL OILS

- Diesel Fuel Economics
- Composition of Fuel an Important factor
- Properties Determining Fuel Performance
- Cetane Value an Expression of Ignition Quality
- Increased Importance of Ignition Delay
- Test Methods for Diesel Fuel Oils
- Calculated Cetane Index
- Significance of tests on Diesel Fuels
- Stationary Diesel-engine Field Highly Competitive
- Need of Automotive Diesels for Wide Range of Fuels
- Marine Diesel Engines
- Many Fields of Use for Diesel Tractors

10. AUTOMOTIVE, DIESEL AND AVIATION FUELS

- Gasoline
- Aviation Gasoline
- Jet Propulsion fuels
- Tractor fuel

11. SPECIAL PROCESSES FOR MOTOR-FUEL BLENDING COMPONENTS

- Alkylation
- Isomerization
- Polymerization
- Naphtha Reforming

12. CRUDE DISTILLATION

Desalting Crude Oils
Vacuum Distillation
Auxiliary Equipment
Crude distillation unit products
Problems

13. LUBRICATING OILS

Introduction
Hydrodynamic Lubrication
Boundary Lubrication
ZN/P Curves
Viscosity
Dimensions and Units of Viscosity
Theory of Viscosity
Measurement of Viscosity
Viscosity-Temperature-Pressure Relations
Viscosity of Blends
Viscosity Index
Viscosity Temperature Coefficient
Significance of Viscosity and Viscosity Index
Cloud and Pour Point
Significance of Cloud and Pour Point
Additives
Viscosity Index Improvers
Pour Point Depressants
Oil Classification Systems
Oiliness
Oiliness Carriers
Extreme Pressure Lubricants
Sludge and Lacquer Formation
Anti-Oxidants
Corrosion Inhibitors
Detergents
Commercial Additives
Bench Tests for Oxidation Stability
Acidity
Carbon-Forming Tendencies
Work Factor Test
Oil Volatility
Sulfur
Cleanliness
Gravity
Color
Synthetic Lubricating Oils
Dibasic Acid Esters
Organo-Phosphate Esters
Silicate Esters
Silicons
Polyglycol Ether Compounds
Fluorinated and Chlorinated Hydrocarbons
Effect of Radiation

14. LUBRICATING GREASES

Introduction
The main grease components
Manufacture
Laboratory tests
Grease Structure
Grease rheology
Conclusions

15. NATURE OF LUBRICATING OILS

The nature of crude oil
Production of basic grades of lubricating oils
Laboratory and rig tests and their significance
Lubricating oil additives
SAE classification of lubricating oils
Selection of oils for various duties
Physical properties of lubricating oils
other than viscosity

16. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
