

Petroleum & Petroleum Products Technology Handbook (Thermal Cracking of Pure Saturated Hydrocarbons, Petroleum Asphalts, Refinery Products, Blending and Compounding, Oil Refining and Residual Fuel Oils)

Author:- NPCS Board of Consultants & Engineers

Format: paperback

Code: NI528

Pages: 440

Price: Rs.1875US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

Petroleum asphalt is a sticky, black and highly viscous liquid or semi-solid that is present in most petroleum crude oils and in some natural deposits. Petroleum crude oil is a complex mixture of a great many different hydrocarbons. Refined petroleum products are derived from crude oils through processes such as catalytic cracking and fractional distillation. Refining is a necessary step before oil can be burned as fuel or used to create end products.

Residual fuel oil is a complex mixture of hydrocarbons prepared by blending a residuum component with a flux stock which is a distillate component diluent, to give the desired viscosity of the fuel oil produced. Petroleum refining is the process of separating the many compounds present in crude petroleum. An Oil refinery or petroleum refinery is an industrial process plant where crude oil is processed and refined into more useful products.

The global Petroleum Asphalt market is valued at USD 48.8 Billion in 2017 and is expected to reach USD 77.67 Billion by the end of 2024, growing at a Growth Rate of 6.87% between 2017 and 2024. The global bunker fuel market was valued at \$137,215.5 million in 2017 and is expected to reach \$273,050.4 million by 2025, registering a CAGR of 9.4% from 2018 to 2025.

Some of the fundamentals of the book are composition of radiation effects on lubricants, thermal cracking of pure saturated hydrocarbons, petroleum asphalts, refinery products, refinery feedstocks, blending and compounding, oil refining, residual fuel oils, distillate heating oils, formulations of petroleum, photographs of machinery with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

1. RADIATION EFFECTS ON LUBRICANTS

Introduction

Interaction of Radiation with Organic Matter

General Physical Effects of Radiolysis

Base Oils

The Radiation Environment
Hydrocarbons (Petroleum Oils)
Alkylaromatics
Ethers
Esters
Silicones
Halogenated Compounds
Additives
Radiation Damage Inhibitors
Antioxidants
Viscosity Index Improvers
Antiwear Additives
Extreme Pressure (EP) Agents
Foam Inhibitors
Rust Inhibitors
Environmental Factors
Effects of Radiation Type and Intensity
Role of Temperature
Influence of Oxygen
Oil Lubricants
General: Commercial formulations
Based on Alkylaromatic Fluids
Fluids Based on Poly (phenyl ethers)
Steam Turbine Oils
Aircraft Turbine Oils
Hydraulic Fluids
Lubricating Greases
Gelling Agents
CONTENTS
Base Oils
Commercial Greases
Greases of Enhanced Radiation Resistance
Dynamic Tests
Principles

2. THERMAL CRACKING OF PURE SATURATED HYDROCARBONS 65-102

Introduction
Experimental Methods
Batch Reactors
Flow Reactors
Residence Time
Volume Change on Reaction
Kinetics of the Cracking Process
Rates of Decomposition
Straight Chain Paraffins
Correlation of the Rate Constants for n-Paraffins
Effect of Branching on the Rate of Decomposition
Effect of Pressure on the Decomposition of Paraffinic
Hydrocarbons
Rates of Decomposition—Saturated Cyclic Hydrocarbons
Estimation of Rate Constant of Decomposition
APPENDIX

3. PETROLEUM ASPHALTS

Chemical and Physical Composition

Possible Structures of the Nuclei in Resins and Asphaltenes

Manufacture of Asphalt from Petroleum

uses of Asphalts

4. REFINERY PRODUCTS

Low-boiling Products

Gasoline

Gasoline Specifications

Distillate Fuels

Jet and Turbine Fuels

Automotive Diesel Fuels

Railroad Diesel Fuels

Heating Oils

Residual Fuel Oils

5. REFINERY FEEDSTOCKS

Crude Oil Properties

1. API Gravity

2. Sulfur Content, Wt%

3. Pour Point, °F (°C)

4. Carbon Residue, Wt%

5. Salt Content, 1lb/1000 bbl

6. Characterization Factors

7. Nitrogen Content, Wt%

8. Distillation Range

9. Metals Content, ppm

10. Total Acid Number

Composition of Petroleum

1. Paraffins

2. Olefins

3. Naphthenes (Cycloparaffins)

4. Aromatics

Crudes Suitable for Asphalt Manufacture

Crude Distillation Curves

Problems

6. BLENDING AND COMPOUNDING

7. OIL REFINING

Introduction

General Aspects of Oil Refining

Crude Oils and Products

Crude Oil Constituents

Classification of Crude Oils

Oil Products

1. Gas Fuels

2. Liquid Fuels

Nonfuel Applications

Oil Refining Processes

Crude Oil Distillation
Atmospheric Distillation
Vacuum Distillation
Crude Oil Desalting
Catalytic Cracking (Cat Cracking)
Hydrotreating
Distillate Hydrotreating
Pyrolysis Gasoline Hydrotreating
Desulfurizing by Adsorption
Catalytic Reforming
Introduction
Semiregenerative Reformer
Fully Regenerative Reformer
Continuously Regenerative Reformer
Hydrocracking
Residue Conversion Process Introduction
Fundamentals of Residue Conversion and Process Options
Hydrogen Addition (“H-in”) Processes
Residue Hydrotreating (Demetallization, Desulfurization, Denitrification)
Residue Hydrocracking (Hydroconversion)
Carbon Rejection (“C-out”) Processes
Thermal Processes (Visbreaking, Coking)
Catalytic Processes (Residue Cat Cracking)
Other Processes
Extraction of Asphaltenes
Partial Oxidation
Process Combinations
Gasoline Upgrading Processes
1. Alkylation
2. Polymerization
3. Isomerization
4. Production of Ethers (MTBE, ETBE)
Other Processes
Gas Treating
Sulfur Recovery
Catalysts
Environmental Protection in Oil Refining
Introduction
Manufacturing Emissions
Hydrocarbons
Hydrocarbons in Air
Hydrocarbons in Wastewater
Hydrocarbons in Soil and Groundwater
Sulfur and Nitrogen Compounds
Sulfur Compounds
Nitrogen Compounds
Consumer Related Emissions
Transportation Fuels
Motor Gasoline
Diesel Fuel
Marine Fuels
Fuels for Heat Generation

Cost of Environmental Conservation
Integrated Refinery Models
Trends of Refinery Structures
Hydroskimming Refinery
Conversion Concepts
Cat Cracking – Visbreaking Refinery
Hydrocracking- Cat Cracking Refinery
Hydrocracking – Coking Refinery
Integration of Existing Refineries
Corrosion and Materials
Testing and Analysis
Crude Oil and Product Properties
Testing Methods and Standards
Storage and Transport

8. RESIDUAL FUEL OILS

History
Specifications For Residual Fuels
Fluidity
Thermal Stability
Explosiveness
Pacific Specifications for Fuel Oils
Detailed Inspections of Heavy Fuels
End uses of Residual Fuel Oils
Steam Boilers
Industrial Applications
Diesel Engines
Gas Turbines
Gas-enrichment Oils
Problems Associated with Utilization
Sulfur in Residual Fuel Oils
Ash Possible Source of Contaminants
Soot and Carbon Particles
Instability and Incompatibility
The Combustion of Residual Fuels
Heating Value
Chemistry of Combustion
Flue-gas Analysis
Humidity in Air and Flue Gases
Heat Content of Flue Gases
Specific Heat of Fuel Oils
Residual Fuel Oil Burners

9. DISTILLATE HEATING OILS

Status of the Heating-Oil Industry
Burners, Controls and Tanks
Central-Heating Systems
Burning Qualities in Oils
Stability in Heating Oils
Handling and Delivery

10. FORMULATIONS OF PETROLEUM

11. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India.
