

Petroleum & Petroleum Products Technology Handbook (Thermal Cracking of Pure Saturated Hydrocarbons, Petroleum Asphalts, Refinery Products, Blending and Compounding, Oil Refining and Residual Fuel Oils)

Author: NPCS Board of Consultants & Engineers

Format: paperback

Code: NI528

Pages: 440

Price: Rs 1875 | US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Petroleum asphalt is a sticky, black and highly viscous liquid or semi-solid that is present in most petroleum crude oils and in some natural deposits. Petroleum crude oil is a complex mixture of a great many different hydrocarbons. Refined petroleum products are derived from crude oils through processes such as catalytic cracking and fractional distillation. Refining is a necessary step before oil can be burned as fuel or used to create end products.

Residual fuel oil is a complex mixture of hydrocarbons prepared by blending a residuum component with a flux stock which is a distillate component diluent, to give the desired viscosity of the fuel oil produced. Petroleum refining is the process of separating the many compounds present in crude petroleum. An Oil refinery or petroleum refinery is an industrial process plant where crude oil is processed and refined into more useful products

The global Petroleum Asphalt market is valued at USD 48.8 Billion in 2017 and is expected to reach USD 77.67 Billion by the end of 2024, growing at a Growth Rate of 6.87% between 2017 and 2024. The global bunker fuel market was valued at \$137,215.5 million in 2017 and is expected to reach \$273,050.4 million by 2025, registering a CAGR of 9.4% from 2018 to 2025.

Some of the fundamentals of the book are composition of radiation effects on lubricants, thermal cracking of pure saturated hydrocarbons, petroleum asphalts, refinery products, refinery feedstocks, blending and compounding, oil refining, residual fuel oils, distillate heating oils, formulations of petroleum, photographs of machinery with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

Contents

1. RADIATION EFFECTS ON LUBRICANTS

Introduction

Interaction of Radiation with Organic Matter

General Physical Effects of Radiolysis

Base Oils

The Radiation Environment
 Hydrocarbons (Petroleum Oils)
 Alkylaromatics
 Ethers
 Esters
 Silicones
 Halogenated Compounds
 Additives
 Radiation Damage Inhibitors
 Antioxidants
 Viscosity Index Improvers
 Antiwear Additives
 Extreme Pressure (EP) Agents
 Foam Inhibitors
 Rust Inhibitors
 Environmental Factors
 Effects of Radiation Type and Intensity
 Role of Temperature
 Influence of Oxygen
 Oil Lubricants
 General: Commercial formulations
 Based on Alkylaromatic Fluids
 Fluids Based on Poly (phenyl ethers)
 Steam Turbine Oils
 Aircraft Turbine Oils
 Hydraulic Fluids
 Lubricating Greases
 Gelling Agents
CONTENTS
 Base Oils
 Commercial Greases
 Greases of Enhanced Radiation Resistance
 Dynamic Tests
 Principles

2. THERMAL CRACKING OF PURE SATURATED HYDROCARBONS 65-102

Introduction
 Experimental Methods
 Batch Reactors
 Flow Reactors
 Residence Time
 Volume Change on Reaction
 Kinetics of the Cracking Process
 Rates of Decomposition
 Straight Chain Paraffins
 Correlation of the Rate Constants for n-Paraffins
 Effect of Branching on the Rate of Decomposition
 Effect of Pressure on the Decomposition of Paraffinic Hydrocarbons
 Rates of Decomposition–Saturated Cyclic Hydrocarbons

Estimation of Rate Constant of Decomposition

APPENDIX

Calculation of Product Distribution from Paraffin Cracking by the Rice-Kossiakoff Method.

3. PETROLEUM ASPHALTS

Chemical and Physical Composition

Possible Structures of the Nuclei in Resins and Asphaltenes

Manufacture of Asphalt from Petroleum

uses of Asphalts

4. REFINERY PRODUCTS

Low-boiling Products

Gasoline

Gasoline Specifications

Distillate Fuels

Jet and Turbine Fuels

Automotive Diesel Fuels

Railroad Diesel Fuels

Heating Oils

Residual Fuel Oils

5. REFINERY FEEDSTOCKS

Crude Oil Properties

1. API Gravity

2. Sulfur Content, Wt%

3. Pour Point, °F (°C)

4. Carbon Residue, Wt%

5. Salt Content, 1lb/1000 bbl

6. Characterization Factors

7. Nitrogen Content, Wt%

8. Distillation Range

9. Metals Content, ppm

10. Total Acid Number

Composition of Petroleum

1. Paraffins

2. Olefins

3. Naphthenes (Cycloparaffins)

4. Aromatics

Crudes Suitable for Asphalt Manufacture

Crude Distillation Curves

Problems

6. BLENDING AND COMPOUNDING

7. OIL REFINING

Introduction

General Aspects of Oil Refining

Crude Oils and Products

Crude Oil Constituents

Classification of Crude Oils

Oil Products

1. Gas Fuels
 2. Liquid Fuels
 Nonfuel Applications
 Oil Refining Processes
 Crude Oil Distillation
 Atmospheric Distillation
 Vacuum Distillation
 Crude Oil Desalting
 Catalytic Cracking (Cat Cracking)
 Hydrotreating
 Distillate Hydrotreating
 Pyrolysis Gasoline Hydrotreating
 Desulfurizing by Adsorption
 Catalytic Reforming
 Introduction
 Semiregenerative Reformer
 Fully Regenerative Reformer
 Continuously Regenerative Reformer
 Hydrocracking
 Residue Conversion Process Introduction
 Fundamentals of Residue Conversion and Process Options
 Hydrogen Addition (“H-in”) Processes
 Residue Hydrotreating (Demetallization, Desulfurization, Denitrification)
 Residue Hydrocracking (Hydroconversion)
 Carbon Rejection (“C-out”) Processes
 Thermal Processes (Visbreaking, Coking)
 Catalytic Processes (Residue Cat Cracking)
 Other Processes
 Extraction of Asphaltenes
 Partial Oxidation
 Process Combinations
 Gasoline Upgrading Processes
 1. Alkylation
 2. Polymerization
 3. Isomerization
 4. Production of Ethers (MTBE, ETBE)
 Other Processes
 Gas Treating
 Sulfur Recovery
 Catalysts
 Environmental Protection in Oil Refining
 Introduction
 Manufacturing Emissions
 Hydrocarbons
 Hydrocarbons in Air
 Hydrocarbons in Wastewater
 Hydrocarbons in Soil and Groundwater
 Sulfur and Nitrogen Compounds
 Sulfur Compounds
 Nitrogen Compounds

Consumer Related Emissions

Transportation Fuels

Motor Gasoline

Diesel Fuel

Marine Fuels

Fuels for Heat Generation

Cost of Environmental Conservation

Integrated Refinery Models

Trends of Refinery Structures

Hydroskimming Refinery

Conversion Concepts

Cat Cracking – Visbreaking Refinery

Hydrocracking- Cat Cracking Refinery

Hydrocracking – Coking Refinery

Integration of Existing Refineries

Corrosion and Materials

Testing and Analysis

Crude Oil and Product Properties

Testing Methods and Standards

Storage and Transport

8. RESIDUAL FUEL OILS

History

Specifications For Residual Fuels

Fluidity

Thermal Stability

Explosiveness

Pacific Specifications for Fuel Oils

Detailed Inspections of Heavy Fuels

End uses of Residual Fuel Oils

Steam Boilers

Industrial Applications

Diesel Engines

Gas Turbines

Gas-enrichment Oils

Problems Associated with Utilization

Sulfur in Residual Fuel Oils

Ash Possible Source of Contaminants

Soot and Carbon Particles

Instability and Incompatibility

The Combustion of Residual Fuels

Heating Value

Chemistry of Combustion

Flue-gas Analysis

Humidity in Air and Flue Gases

Heat Content of Flue Gases

Specific Heat of Fuel Oils

Residual Fuel Oil Burners

9. DISTILLATE HEATING OILS

Status of the Heating-Oil Industry

Burners, Controls and Tanks
Central-Heating Systems
Burning Qualities in Oils
Stability in Heating Oils
Handling and Delivery
10. FORMULATIONS OF PETROLEUM

11. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
