

Screen Printing Technology Hand Book

Author: NIIR Board

Format: paperback

Code: NI112

Pages: 672

Price: Rs 1000 | US\$ 100

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Screen printing is a printing technique that uses a woven mesh to support an ink blocking stencil. The attached stencil forms open areas of mesh that transfer ink or other printable materials which can be pressed through the mesh as a sharp edged image onto a substrate. A roller or squeegee is moved across the screen stencil, forcing or pumping ink past the threads of the woven mesh in the open areas. Screen printing proves to be a good printing process for multi colour printing. Half tone printing is related to screen printing of photographs. Printings of photographs was at one time considered to be very difficult in screen printing, but now screen printed halftone photographs are also effective and economical in certain types of reproduction. Over the time stickers (transfer) have become an important medium of advertising. Now millions of stickers are printed every year through this method. Transfer stickers are of three types; instant transfer, heat transfer and water lade transfer. Gumming is an integral part of sticker production. Screen printing technique make use of and is compatible with a variety of materials, including textiles, ceramics, metal, wood, paper, glass, and plastic. It is this quality that allows this printing technique to be used in different industries, from clothing to product labels, fabric labels to circuit board printing etc. Screen printing industry experiences growth in the 10 to 15% per year rate.

Some fundamentals of this book are basic concept and classification of stencils, basic screen printing process, basic registration techniques, screen printing frames, pre treatment of screen printing fabrics, screen printing press, principal of screen process printing, printing on paper and card, printing on vertical surfaces, printing on shaped objects, cylindrical object printing, printing on uneven surfaces, ceramic and glass printing, printing on plastics etc.

This method of Printing has achieved wide spread popularity since the Second World War, although the basic ideas in this process were used by the Chinese centuries ago. The present book contains latest technologies of screen printing along with machinery photographs, addresses of suppliers of machinery and raw materials. This book will be very helpful to new entrepreneurs, existing units and for those who want to diversify in to this field.

Contents

1. Introduction

What is Screen Printing?

Seeking a challenging and creative career?

Screen printing is ancient, yet a highly revolutionary industry

Print on virtually anything

Screen printing is universal - you see it everywhere

Screen printing is simple

Screen Print Materials
Frames
Screen Mesh
Screen Prep Tape
Stencil Systems
Capillex Film (Pre-Sensitized Photo Stencils)
G&S Pigment System
Essential Components
Base
Pigment
Resfix
Anti-bleedScreen
Softener
Ink Retarder
Creating Artwork
Other basic Tools and Supplies
Creating a Positive by Hand
Rubbing Dry Transfer Lettering onto
Clear Acetate (Transtay)
For Straight Type
For Arched Type
Tracing an Image onto Matte Acetate
Assembling Base Art
Putting together all parts of your artwork -
images and message
Cutting the Image out of Masking Film
Instant Positives with Velum (Drafting Paper)
For All Multi-Colour Artwork
Labeling Artwork
Mesh Preparation
Roughening the Mesh
Procedure
Degreasing the Mesh
Procedure
Preparing the Stencil
Using Capillary Film
Using Direct Emulsions
Mixing the Emulsion
Coating the Emulsion onto A Screen
Storage and Handling of Stencil Materials
Capillary Films
Direct Emulsions
Exposing the Stencil
Positioning the Artwork: Size and Placement
of Image on Substrate
Positioning the Artwork on the Screen
Exposing Units
Table Top Exposing Unit
Features
Building An Exposing Unit
The Fluorescent Tube Unit

To Expose
The Plate Light
To Expose
Exposure Time of Different Stencil Materials
Direct Emulsions
Preparing the Screen For Printing
Washing Out the Stencil
Blocking Out Pinholes
Taping the Screen
Printers
Table Top 4 Colour Printer
Printing on A Table Surface
Off-Contact Printing
Printing
Flood Stroke
Print Stroke
Stencil Removal/Screen Reclaiming
Reclaiming A Screen
Removing Tape And Ink
Removing Stencil Material
Procedure
Removing Stains Or Ghost Images with
Autohaze
Procedure
Roughening the Mesh with Autoprep
Degreasing the Mesh with Universal
Mesh Prep
Review - Screen Reclaiming
Fault Finding Guide
Capillex Films
Stencil film washes off mesh
Ragged edges
Fine detail filling
Pinholes
Poor adhesion
Patchy stencil
Difficult washout
Direct Emulsions
Sawtoothing
Exposed emulsion washes off mesh
Fine detail filling in
Premature stencil breakdown
Pinholes
Scumming
Image does not wash out at all

2. Screen Printing
Historical Background
Introduction
Section 1
Basic Concept and Classification of Stencils

The Stencil
Types of Stencils
Fabric and Frame Preparation
Screen Fabrics
Screen Frames
Fabric Stretching Techniques
Mechanical Stretching
Hand Stretching
Fabric Treatment
Photographic Stencil Methods
Direct Process
Direct/Indirect Process
Determining Photographic Stencil Exposures
Indirect Photographic Stencil Process
Exposure
Development and Washing
Application of the Stencil
Drying
Removal of the Base Material
Direct photographic Stencil Process
Preparation
Application
Drying
Exposure
Development
Masking the Stencil
Preparing a Paper Mask
Preparing a Liquid Block-out Mask
Squeegee and Ink Considerations
Selecting the Proper Squeegee
Shape
Chemical Makeup
Flexibility
Length
Squeegee Preparation
Selecting the Proper Ink
Product Characteristics
Production Limitations
Ink Preparation
Basic Screen Printing Process
Basic Registration Techniques
On-Contact and Off-contact Printing
Printing the Stencil
Multicolor Printing
Drying the Image
Cleaning the Screen
Removing the Stencil
Troubleshooting Clogged Screens
Halftone Reproduction in Screen Printing
Methods of Halftone preparation for Screen
Printing

Fabric Selection
Moire Patterns
Printing Considerations
High-Speed Production Presses
Semiautomatic Presses
Fully Automatic Presses
Special Machine Configurations
Screening Cylindrical surfaces
Carousel Units

3 Screen printing frames
Pre-treatment of Frames
Stretching equipment
Pneumatic stretching clamps
Advantages
Mounting
Components of the SST system
Correct stretching
Optimum tensioning force for different fabrics
Stability
Control of tension in measuring fabric stretch
Stretching at a fabric angle
Stretching methods
Angled stretching with a prop profile
Adhesive
Adhering screen printing fabrics onto the frame
Screen Storage
The manufacture of diapositives
Manual diapositives
Photographically prepared diapositives
Important
Stencils
Pre-treatment of Screen Printing Fabrics
Stencil making
Manual stencils
Photo-mechanical stencils
Manual stencil making
The hand-cut stencil
Water soluble hand-cut film
Cellulose hand-cut film
Causes of errors
Bad adherence
Turned-up film edges
The direct stencil with emulsion
General procedure
Sources of errors with direct stencils
Imade only with emulsion
Formation of fish-eyes after coating
Air inclusions during coating
Poor adherence of the photo emulsion after

exposure
Light scatter when copying (loss of detail)
Saw-tooth effect
Half-tone printing
Difficulties in decoating
Stencils for water-based inks
Emulsions (photo emulsions)
Sensitizers
CHROMATE photo emulsion
DIAZO photo emulsions
Printing requirements
Lines
Half-tones
UV-inks
Fineness of fabrics
Examples for coating
The direct stencil with film and emulsion
General procedure
Sources of errors with direct stencils
made with film and emulsion
Bad adherence of the film on the fabric
Use of too fine a fabric
Too hard or too sharp a squeegee
Dust inclusions
Too short an exposure time
Error in exposure
General procedure
Source of errors with direct stencil
made with film and water
Bad adherence of the film on the fabric
Insufficient treatment of the fabric
Error in exposure
Indirect stencil
General procedure
Sources of errors with indirect stencils
Bad adherence of the film on the fabric
Insufficient treatment of the fabric
Insufficient degreasing of the fabric
Too long an exposure time
Inactive developer
Drying the stencil with warm air
Exposure
Hardening of stencils for printing of water
based colours in textile printing
General procedure
The hardening procedure
Attention
Suggestion
The diapositive
The stencil
Steel and light-alloy frames

The linear co-efficient of thermal expansion
Frame distortion by fabric pull
Warping of the frames under various
mechanical stresses
Steel versus Aluminium
Recommendations for frame size and
profile
Screen printing fabrics
Optimum tightness of the fabric stretch
Degree of Stretch
Gluing the fabrics to the printing frames
The printing substrate
Stencils for half-tone printing
Types of screen rullings
Printing
Setting a flat bed printing table
SST-measuring wedge
The squeegee
Squeegee System
Flood coat squeegee (Doctor blade)
Printing speed
Printing shaped objects
Single operation multiple colour printing

4. The difference between multi-filament
& mono-filament screen printing
fabrics
UV-Goldorange

5. Screen Printing Press
The Screen-Printing Press
Types of Fabrics
Construction of Fabrics
Mesh Count, Mesh Strength, and Mesh
Opening
Stretching The Screen Fabric
How to Build A Screen-Process Press?
Step 1 :Assemble Needed Materials
Bill of Materials
Step 2 : Construct the Frame
Step 3: Attach the Screen Fabric
Step 4: Tape and Seal the Screen
Step 5: Prepare the Base
Step 6: Hinge the Frame to the Base
Step 7: Add a Frame Support
Print drying equipment
Constructing Specialty Equipment
Screen Printing On: Papers, Textiles and
Other Printing Substrates
Type of Paper
Principal of Screen Process Printing

Common Types of Paper
 Color of Stock
 Textiles
 Type of Fabric
 Common Types of Fabrics
 Printing on T-shirts
 Plastics
 Types of Plastics
 Metals
 Woods
 Ceramics
 Screen-Process Stencils
 Hand-cut Paper Stencil
 To Prepare a Paper Stencil
 Step1: Image the Paper
 Step 2: Cut the Stencil
 Step 3: Adhere the Stencil
 Hand-cut film stencil
 To prepare a Film Stencil
 Step 1: Prepare for Cutting
 Step : Cut the Stencil
 Step : Adhere the Stencil
 Step 4: Remove the Backing Sheet
 Photographic stencils
 To Prepare an Indirect Photographic Stencil
 Step 1: Prepare for Exposure
 Step 2: Load the Frame
 Step 3: Expose the Stencil
 Step 4: Develop the stencil
 Step 5: Wash Out the Stencil
 Step 6: Adhere the Stencil
 To Prepare a Direct Photographic Stencil
 Step 1: Mix the Emulsion
 Step 2: Coat the Screen
 Step 3: Expose the Screen
 Step 4: Process the Stencil
 To prepare a Direct/Indirect Photographic Stencil
 Step 1: Sensitize the Coating Solution
 Step 2: Adhere the Film to the Fabric
 Step 3: Expose the Stencil
 Step 4: Wash out the Stencil
 Screen Printing

6. Printing On Various Surfaces

Printing on Paper and Card
 Articles With Thick Surfaces
 Printing on Metal & Metal Foils
 Textile Printing
 Textile Inks
 Make Ready
 Very long Banners
 Printing On Vertical Surfaces
 Printing On Shaped Objects
 Cylindrical Object Printing
 Printing on Uneven Surfaces
 Ceramic and Glass Printing
 Printing On Plastics
 Summary

7. The Printing Process

Actual Printing
 Elementary Work
 Selection of Ink
 Use of Squeegee
 Coating of ink layer
 Racking or Drying
 Multi - Colour Screen Printing
 Colour Scheme
 Colour Separation
 Temporary Blockout
 Permanent Blockout
 Single Operation Multiple Colour Printing
 Printing of coloured background (Patch)
 Halftone Printing
 Preparation of stencil for half tone printing
 Stickers (Transfers)
 Transfer stickers

Gumming
Cleaning Operations
Summary

8. Tabulation
Polyester Monofilament
Nylon Monofilament
Metallized Polyester Monofilament
UV-Goldorange
Polyester Monofilament
Fabric number
Carbon

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
