## About the Book

Advantage of vermicomposting is that it composts the wastes of rural areas. They clean our villages by using unnecessary organic and non-organic materials. Improves the texture of the soil and its ability to store water. Improves root growth and the multiplication of beneficial soil microorganisms by providing optimum aeration to the soil.

Vermicompost (vermi-compost) is a mixture of decomposing vegetable or food waste, bedding materials, and vermicast created by the decomposition process using various species of worms, usually red wigglers, white worms, and other earthworms. This is known as vermicomposting, and the practise of raising worms for this purpose is known as vermiculture. Sewage treatment can also be done with vermicomposting.

The Global Vermicompost Market is reach growing at a CAGR of 16.74%. The Growth of the global vermicompost market is caused by various factors, such as improved soil aeration, improved water holding capacity, better nutrient cycle, and enriched soil with micro-organism, helps in plant root growth and structure, enhanced germination. The vermicomposting method is used in organic farming. Increasing the use of sustainable agricultural practices, such as vermicomposting along with Government support for organic farming is significantly contributing to the global vermicompost market growth. Vermicompost offers plants with necessary nutrients and helps in plant diseases suppression. Worm castings often comprise 7 times more phosphorus, 11 times more potassium, and 5 times more nitrogen than ordinary soil, which are crucial minerals required for plant growth.

Vermiculture and Vermicompost (Earthworm), as well as their manufacturing methods, are all covered in depth in this book. It also offers photos of equipment as well as contact information for industrial providers.

This book is a one-stop shop for everything you need to know about the Vermiculture and Vermicompost (Earthworm) industry, which is ripe for manufacturers, merchants, and entrepreneurs. This is the only book that goes into great detail about Vermiculture and Vermicompost. It's a genuine feast of how-to material, from concept to equipment buying.

## Contents

### 1. INTRODUCTION

Advantages of Vermicomposting

Vermicomposting in Daily Life

Vermiculture v/s Vermicomposting

Vermitechnology (VT)

Progress of Worm Industry

Turning Garbage into Money

Chemical Composition of the Vermicompost  
Vermicomposting at Home  
Vermicomposting on the Farm  
The Business of Worms  
Interaction of Vermicompost-Earthworm-Mulch-Plantroot (Vemp)  
Earthworm Farming is not Hard

## 2. EARTHWORMS : ECOLOGICAL TYPES

Trophic Classification of Earthworms  
Drilosphere  
Physical Effects of Earthworms on Soils  
Chemical Effects of Earthworms on Soils  
The Effect of absence of Earthworms in Soils

## 3. PHYLUM ANNELIDA : EARTHWORM

Earthworms  
Economic Importance  
Pheretima Poshuma  
The Body Wall  
Locomotion  
The Coelom  
The Digestive System  
Food and Digestion  
Respiration  
Excretory Organs  
Physiology of Excretion  
Chloragogen Cells  
Vascular System  
The Nervous System  
Working of the Nervous System  
Receptor Organs  
Generative Organs  
Copulation  
Fertilization and Cocoon Formation  
Classification

## 4. EARTHWORMS : LIFE CYCLE

Life Cycle Studies  
Life Cycle Patterns  
Life cycle—Lampito mauritii  
Cocoons  
Juveniles  
Non-Clitellates  
Clitellates  
Life Cycle—Perionyx excavatus  
Cocoons  
Juveniles  
Non-clitellates  
Clitellates  
Doubling Time  
Biochemical Changes During Growth

## 5. EARTHWORMS: FOR CULTURE

- Worms for Vermiculture
- Earthworm Breeding
- Vermicompost
- Collecting local Earthworms

## 6. WHY VERMICOMPOSTING

- Fertilizers use and Deterioration of Soil Environment
- Testing the Impact of Vermicomposting
- Nitrogen and Humification in Vermicomposting
- Vermicompost - a Quality Manure
- Recycling of Wastes through Vermi-Composting
- Minimizing Pollution Hazard
- Providing Growth Promoters
- Vermicomposting : Advantages
- Black Gold (Worm Castings) from Worms
- Adverse Effects on Crops
- Economic Viability

## 7. VERMICOMPOST HIGH-GRADE FERTILIZER

- Crucial to Organic Agriculture
- Wide-spread use in the Tropics and Sub-Tropics
- Flexible Method
- Rapid Conversion
- What Exactly is Vermicompost?
- Characteristics
- Conversion Processes
- Plant Nutritionists - Encouragement of Soil Fertility
- Soil Conditioning and Plant Strengthening Effect
- Minimisation of Solid Waste with Low Toxicity and Containing Heavy Metals
- Which Species of Earthworms?
- Eisenia Fetida - Hard Workers
- Transformation of the Organic Material:
  - Reproduction
  - Under Perfect Conditions
  - Further Uses
    - Feed
    - Source Material for the Fodder
    - Nutritional Balance in Feed
    - Feeding Process
- Various Worm Composting Methods
- Size of the Worm Compost Heap
- Climate
- Construction of a Worm Farm
- Harvesting the Vermicompost
- Storage of Vermicompost
- Spreading the Vermicompost
- The Liquid Variety: Vermiwash
- A Method to Prepare Vermiwash
- Application of Vermiwash

## Management

Great Potential for Large and Small Organic Farms alike

## 8. VERMICULTURE AND VERMITECH

How to Start Vermiculture

Preparation of Vermibeds

Setting Up of a Vermiwash Unit

An Enterprise

Economics of Vermitech (In Indian Rupees)

Construction and Maintenance of a Twin Unit System Marketing

## 9. VERMICOMPOSTING MATERIALS

Animal Dung

Agricultural Waste

Forestry Wastes

City leaf Litter

Waste Paper and Cotton Cloth etc.

City Refuge

Biogas Slurry

Industrial Wastes

Feeding Vermicomposting Materials

What should not be Fed to Earthworms?

Harvesting the Compost and Worms  
General Problems in Production of Vermicomposting Remember

#### 10. EXPERIMENTS FROM THE FIELD 151

Earthworms: Their Effect on Plant Growth  
Growing Vegetables  
Are Earthworms Alone?  
Effect on Soil Quality  
Soil Loss  
Adverse Effects on Crops  
Impact of Chemicals on Earthworms  
Impact of Heavy Metals  
Earthworms in Food Chains  
Earthworm Parasites

#### 11. EARTHWORMS : THEIR APPLICATION IN ORGANIC AGRICULTURE 166

Organic Method Under Rainfed Conditions  
I. Cultivation of Groundnut (per acre) (All costs in Indian ruppees)  
Cost of Field Preparation  
Net Profit From Both Types of Cultivation (Per Acre)  
II. Cultivation of Brinjal (Per Acre)  
Net Profits from both Types of Cultivation (Per Acre)  
III. Cultivation of Okra (Per Acre)  
Net Profit from Cultivation  
IV. Cultivation of Paddy  
V. Cultivation of Sugarcane

#### 12. WAYS TO MAKE COMPOST

Selection of Suitable Species  
Epiges (Eisenia Foetida)  
Endoges (Eudrilus Eugeniae)

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
