About the Book

Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the country, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

Some fundamentals of this book are botanical description of the plant, genetic improvement, harvesting, intercropping, transplantation, irrigation and weeding, vanilla cultivation in India, commercial cultivation of vanilla, distillation of herbage for essential oil, effect of growth hormones, jasmine crop improvement & agrotechniques, efforts for new variety of *Jasminum auriculatum*, essential oils of agarwood, *Cinnamomum tamala* leaves, *Eucalyptus citriodora* and *Caultheria fragrantissima*, past and future of sandal wood oil industry, by product development from turmeric and ginger rhizomes, isolation of essential oils and its flavour profile etc.

This book contains most of the important aspects related to aromatic plants. It is being published for those who are interested in growing, processing and trading of aromatic plants.

Contents

1. Cultivation of Tagetes Minuta

Botanical description of the plant

Genetic improvement

Agrotechnology

Soil and climate

Propagation

Weed control

Fertilizers and manures

Irrigation

Harvesting

Intercropping

Crop rotations

Diseases

Distillation

Chemistry

Distillation unit design availability

2. Cultivation of Eucalyptus Citriodora

Description of the plant

Cultivation

Soil and Climate

Preparation of Land

Propagation

Nursery

Transplanting

Weeding

Manures and Fertilizers

Harvesting

Pests and Diseases

Distillation

Yield

Chemical Constituents

Uses

3. Cultivation of Rosmarinus Officinalis

Introduction

Description of the plant

Cultivation

Soil and Climate

Propagation

Transplanting, interculture and fertilizer application

Irrigation

Harvesting

Pests and diseases and their control

Distillation

Oil content and yield

Chemical constituents

4. Cultivation of Coriander Sativum

Description of the Plant

Cultivation

Soil and Climate

Propagation

Irrigation

Harvesting

Pests and Diseases

Distillation

Yield

Chemical Constituents

Uses

Economics of Cultivation

5. Cultivation of Lavender Species

Botany

Soil and Climate

Cultivation

Propagation

Propagation By Seeds

Transplantation

Fertilizer Application

Weeding

Regeneration

Harvesting

Distillation

Oil Content and Oil Yield

Chemical Constituents

Uses

Economics of Cultivation

6. Cultivation of Matricaria Chamomilla

Description of the Plant

Genetics

Cultivation

Soil and climate

Propagation/nursery

Transplantation, irrigation and weeding

Cropping sequence

Pests and diseases

Manures and fertilizers

Harvesting

Collection of seeds

Yield

Drying and storage

Distillation

Yield and characteristics of the oil

Uses

Specification of the drug

Economics of cultivation

7. Vanilla World s second most expensive spice

Vanilla Flower
Vanilla Beans
Vanilla cultivation in India
Commercial Cultivation of Vanilla
Vanilla Extract and Flavourings
Commercial uses of Vanilla
Market for Vanilla
Exports grades and standards

8. Cultivation of Artemisia Annua

Description of the plant
Soil and climate
Propagation
Weed control
Fertilizers and manures
Irrigation
Harvesting
Chemistry and uses
Distillation
Economics of cultivation

9. Cultivation of Mentha Arvensis

Plant descriptors
Available cultivars of menthol mint
Choice of place for cultivation
Land preparation
Preparation of planting material
Production of suckers
Production of seedlings
Planting of suckers in the field
Fertilizer application
Irrigation and drainage
Interculture and weed control
Crop rotation
Intercropping
Harvesting
Yield
Storage of herbage
Pests and diseases
Insect pests
Diseases
Distillation of herbage for essential oil
Directly fired distillation tank
Design availability
Use of mint oil and its derivatives
Economics of cultivation

10. Cultivation of French Basil (Ocimum Basilicum L.)

1. European Type
2. Reunion Type

3. Methyl Cinnamate Type

4. Eugenol Type

Botany

Soil and Climate

Field preparation

Propagation

(a) Raising of Nursery

(b) Planting

Irrigation

Fertiliser Application

Interculture

Harvesting and Yield

Agronomical Studies

Physiological Studies

Heavy metal tolerance

Effect of growth hormones

Mineral contents

Seed mucilage studies

Effect of photoperiodism

Biosynthesis of Eugenol

Tissue Culture Studies

Genetical Studies

Chemical Composition

Uses

Cosmetic

Food

Folk medicine

Ayurvedic Properties

11. Jasmine Crop improvement & agrotechniques

New varieties of jasmine

Arka Surabhi

Arka Arpan

Efforts for new variety of *Jasminum auriculatum*

for extraction of essential oil

Constituent of Jasmine essential oil

Agronomy

Plant protection

Water saving, labour saving low cost device for

propagation of plant cuttings

Details of the device

Required materials for the device

Detailed method

Economic viability of growing jasmine for essential oil

12. *Semecarpus Anacardium* L.f.

Introduction

Chemistry of Nuts

13. Himalayan Cedarwood Oil

Essential oil of Deodar (*Cedrus Deodara*)

Essential oil of *Juniperus Recurva* var. *Squamata* and
other oils of *Juniperus* spp.
Agarwood and Oil Agarwood
Uses

14. Essential oils of Agarwood, *Cinnamomum Tamala* Leaves,
Eucalyptus Citriodora and *Caultheria Pragrantissima*
Distillation
Gaultheria
Eucalyptus

15. Past and Future of Sandal wood Oil Industry
Plantation and Harvesting
Disease Control
Distillation of Oil
Packing
Problems and their Solutions
Adulteration
Future Prospects
Kewda Industry in Orissa

16. Production Technology and Package of Practices in Chilli
Cultivated Species of *Capsicum*
Constraints in Chilli Production
Technologies Developed
Disease and Disease Management
Marketing in Chilli
Value Addition in Chilli

17. By Product Development from Turmeric and Ginger Rhizomes
Introduction
By Product Development in Turmeric
Curcumin
Turmeric Essential Oils
Isolation of Essential Oils and its Flavour Profile
By product Development in Ginger
Survey of Raw Material
Essential oils
Oleo-resin
Gingerol in Ginger Oleo-resin
Starch
Protein
Crude Fibre
Commercial Extraction of Ginger Oleo-resin
Process Description for Oleo-resins
Oleo-resin Quality
Flavour Quality of Ginger Oleo-resins
Essential Oils of Ginger
Profile of Flavour in Ginger Cultivars

18. Synthesis of 4 Acy 3, 7,7 Trimethylbicyclo [4, 1, 0]

Hept 3 ene and Related Compounds by Friedel Crafts

Reaction on (+) ~ Car 3 ene

Results and Discussions

1. Synthesis of 4 acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (II).
2. Synthesis of 4 propionyl 3, 7, 7 trimethylbicyclo [4, 1, 7] hept 3 ene and its position isomers (III).
3. Synthesis of 4 Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (IV).

Experimental

Plants in Upper Pulney Hills

integrated technical consultancy services. NPCCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.
