

The Complete book on Natural Dyes & Pigments

AN ISO 9001 : 2015 CERTIFIED COMPANY

Author: NIIR Board of Consultants & Engineers
Format: paperback
Code: NI160
Pages: 448
Price: Rs 1100 | US\$ 125
Publisher: NIIR PROJECT CONSULTANCY SERVICES
Shipping: 5 days

About the Book

Natural dyes are dyes or colorants derived from plants, invertebrates, or minerals. The majority of natural dyes are vegetable dyes from plant sources. Dyeing is the process of imparting colors to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibers through yarn and cloth to completed garments. There are technologies that manufacture the pigments for plastics, rubber and cosmetics. Therefore; dyes and pigments have a vast area of applications and have a huge demand in industry. Contrary to popular opinion, natural dyes are often neither safer nor more ecologically sound than synthetic dyes. They are less permanent, more difficult to apply, wash out more easily, and often involve the use of highly toxic mordant. Of course, the colour possibilities are far more limited; the color of any natural dye may be easily copied by mixing synthetic dyes, but many other colors are not easily obtained with natural dyes. However, some mordant are not very toxic, and the idea of natural dyestuffs is aesthetically pleasing. Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control. There are various kind of natural dyes; quinonoid dyes, cyanine dyes, azo dyes, biflavonyl dyes, omochromes, anthraquinone, coprosma gesus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.

This book basically deals with the use of carotenoids as food colours , bianthraquinones and related compounds, intermediate degradation products of biflavonyls, dyestuffs containing nuclear sulphonic and carboxylic acid groups, quinonoid dyes, cyanine dyes, optical whitening agents, natural dyes for food, stability of natural colourants in foods effect of additives, pyrimidine pigments, the total synthesis of the polyene pigments, red pigment from geniposidic acid and amino compound, effect of acid and amine on the formation of red pigment from geniposidic acid, effect of the substituted position of amino group and chain length of amino compound etc.

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different natural dyes and pigments, which has huge demand in domestic as well as in foreign market. It is hoped that entrepreneurs, technocrats, existing units, institutional libraries will find this book very useful.

Contents

1. Ommochromes

Distribution

A. Ommatins

B. Ommins

Isolation and Purification

A. Ommatins

B. Ommins

Structure of the Ommochromes*

Xanthommatin

Ommatin D

Rhodommatin

Ommin A X

Biogenesis

2. Bisdehydrocanthaxanthin

3. Carotenoids Field

Carotenoid Biogenesis

Carotenoid Total Syntheses

The use of Carotenoids as Food Colours

4. Black pigments

Animal Pigments

Melanins

Sclerotization

Plant Pigments

Humic acids

1,8-Dihydroxynaphthalene polymers

5. Anthraquinone

Plant Pigments

Insect Pigments

6. Coprosma genus

7. Bianthraquinones and related compounds

Skyrin

Oxyskyrin

Skyrinol

Iridoskyrin

Rugulosin

Luteoskyrin and Rubroskyrin

Lumiluteoskyrin

Flavoskyrin

Biogenesis

8. The Biflavonyl Pigments

The First Investigations

The Work of Nakazawa on Ginkgetin

The Work of the Bristol Group

On Ginkgetin and Isoginkgetin

The Work of Kariyone and Kawano on

Sciadopitysin, 1956

Further Work of Brispol Group on

Ginkgetin and Sciadopitysin

The Work of Kawano on Sciadopitysin and GINKGETIN, 1959

The Synthesis of Ginkgetin Tetramethyl ether, Nakazawa, 1959

The Structure of Ginkgetin

The Structure of Isoginkgetin

The Structure of Kayafyavone

The Structure of Sotetsuflavone

Summary of Biflavonyl Structures

Intermediate Degradation Products of Biflavonyls

Optical Inactivity of the Biflavonyls

The Structure of Hinokiflavone

Natural Occurrence of Biflavonyls

9. Azo dyes

10. Dyestuffs

Introduction

Primary Products for VS-Dyestuffs

1. Methods of preparation

2. Reactions

Processes for the Manufacture of VS-Dyestuffs

Fastness and Dyeing Properties of VS-Dyestuffs

1. VS-Dyestuffs free from nuclear sulphonic and carboxylic acid groups

2. Dyestuffs containing nuclear sulphonic and carboxylic acid groups

Summary

11. Disperse dyes

Light Fastness

Gas Fastness

Sublimation Fastness

Wash Fastness

Structural Modifications Leading to All-Round Fastness

12. Quinonoid dyes

13. Cyanine dyes

Chemistry of 2, 3-Dichloro-1,4-Naphthoquinone (I)

Chemistry of Chloranil (II)

Vat Dyes from Chloranil

Benzodipyrrocolinequinones Pyrrocolinequinones,

Unsymmetrical Dipyrrocolinequinones and Naphth of Uranopyrrocolinequinones

2-alkylamino-(arylamino)-3-chloro-1,

4-naphthoquinones And Di-3-(2-chloro-1,

4-naphthoquinonyl)-alkylamines And Arylamines

Cellulose Acetate Dyes From (i) And (ii)

Synthesis Of Non-coplanar Quinonoid Dyes

14. Fluorescent brightening agents

15. Optical whitening agents

Introduction

Physical Considerations of Fluorescence and Optical Whitening

Chemical constitution of Optical Whitening Agents

1. Stilbene derivatives

2. Benzidine derivatives

3. Benzthiazole, benzoxazole and benziminazole derivatives

4. Coumarins

- 5. Pyrazolines
- 6. Other types
- Some Specific Applications of Optical
Whitening Agents
 - 1. Soaps and detergents
 - 2. Textile applications
- 16. Natural dyes for Food
- Natural Colourants
 - Natural Colours Presently Used in Food
 - Methods of Improving Natural Colourants
- Novel Sources of Natural Colourants
 - Microbial Sources
 - Animal Sources
 - Plant Source
 - General Reviews
 - Colourants from By-products
 - Gardenia Extracts
 - Other Sources
 - Feasibility of Novel Sources
- Stability of Natural Colourants in Foods Effect of Additives
 - Ascorbic Acid and Derivatives
 - Effect of Metal Ions
 - Effect of Neutral Salts
 - Effect of Organic Acids
 - Photoprotection
 - Miscellaneous Additives
 - Conclusion
- Stable Forms of Natural Colourants Found in Vivo
- Stabilised Forms Of Natural Colourants Flavonoids
 - Chemical Features Affecting Stability
 - Self association
 - Complex formation
 - Copigmentation
 - Condensation
 - Chemical modifications
- Porphyrins
- Others
- 17. Pyran Pigments : I. Flavones and Flavonols
- Flavones
 - Chrysin (IV)
- General Methods of Synthesis of Flavones
 - A. From Aromatic Diketones
 - B. From o-Hydroxyacetophenones
 - C. From o-Hydroxychalcones
 - D. From Phenols
- Flavonols
 - The Wessely-moser and Related
 - Rearrangements of Flavones
 - The Formation of Salts by Flavones and Flavonols
 - The Reduction of Flavones
- Isoflavones

The Synthesis of Isoflavones
18. Pyran Pigments : II. Anthocyanins and Anthocyanidins
Cyanidin (III)
The Synthesis of Anthocyanidins
The Synthesis of Anthocyanins
Color Reactions of The Anthocyanidins and Anthocyanins
Anhydrobases
Carajurin (XCIX)
Dracorubin (CXXV)
19. Pyran Pigments : III. Xanthoness
Ravenelin (II)
Mangostin (XI)
Pyran Pigments : IV. Rottlerin
Pyran Pigments : V. Brazilin and Hematoxylin
Brazilin (XXXII)
Hematoxylin (XL)
Trimethylbrazilone (XLI)
Brazilein (LXXIX, R - H)
The Synthesis Of Brazilin
Pyrrole Pigments : I. The Porphyrins
Hemin (cxxxvii)
The Synthesis of Dipyrromethenes
The Synthesis of Porphyrins
The Structure of Hemin
Pyrrole Pigments : II. Chlorophylls
Pheoporphyrin, Chloroporphyrin, and Phylloerythrin
The Vinyl Group in Chlorophyll
The Structure of Chlorophyll
Position of the Phytol Group in Chlorophyll
The Phase Test
Allomerization
Approaches to the Synthesis of Chlorophyll
Chlorophyll-b
Bacteriochlorophyll
20. Pyrrole Pigments : III. The Bile Pigments
Bilirubin (XXXII)
Verdins
Violins
Bilenes
Bilanes
Stereochemistry and Tautomerism
Complex Salts of the Bile Pigments
Pyrrole Pigments : IV. Prodigiosin
21. Pyrimidine Pigments : The pterins
The Gmelin Reaction
Pterorhodin
22. Quinonoid Pigments
Benzoquinonoid Pigments
Perezone (XII)
Polyporic Acid (XIV)
Astromentin (XXVIII)

Phoenicin (LXI)
Naphthaquinonoid Pigments
Lapachol (LXXI)
Eleutherin (CXXI)
Alkannin and Shikonin (CXLIX)
Anthraquinonoid Pigments
Helminthosporin (CLVIII)
Kermesic Acid (CLXI)
Skyrin (CLXXVIII)
Extended Quinone Pigments
The Aphin Pigments
Erythroaphin-fb (CCXVI) or (CCXVII)
Hypericin (CCXXV)
23. Polyene Pigments
Bixin (X) and Croceting (XI) the Carotenes
b-Carotene (LV)
Lycopene (LXXIII)
The Total Synthesis of the Polyene Pigments
Combination of Units in the Order C19 + C2 + C19
Combination of Units in the Order C16 + C8 + C16
Combination of units in the Order C14 + C12 + C14
Combination of Units in the Order C10 + C20 + C10
The Dehydro - Retrodehydrocarotenoids Epoxides
and Furanoid Oxides
24. Anthocyanins from Indian varieties of Grapes
Material and Methods
Extraction
Purification
Total anthocyanins
Separation
Partial hydrolysis of anthocyanin
Aglycone and sugar
Acyl moieties
Spectral measurements
Thin layer chromatography
Results and Discussion
Recovery of anthocyanin
Separation of pignnents by paper chromatography
Absorption spectra of pigments
Partial hydrolysis of anthocyanins
Aglycones
Sugar identification
Acyl moieties
25. Red pigment from Geniposidic Acid and Amino Compound
Materials and Methods
Preparation of geniposide (GS) and GSA solution
Preparation of other iridoid compounds
Enzyme and reagents
General method of preparation of pigment
Evaluation of pigment
Identification and quantification of carbon dioxide

HPLC and NMR measurement
Structural relationship of iridoids to red pigment production
Acidity and evolution of carbon dioxide
Time course of enzymic reaction
Acidity and atmosphere on the reaction
HPLC monitoring of the pigment formation from GAA
and α -alanine
NMR monitoring of the pigment formation from GAA
and methylamine
Results and Discussion
The relationship between the evolution of carbon dioxide
and reaction pH
The process of formation of red pigment
Molecular mass and colour evaluation of red pigment derived
from GAA and α -alanine
NMR spectroscopy of red pigment formed from GAA and
methylamine
Monitoring of the reaction by NMR
The formation mechanism of red pigment
26. Effect of Acid and Amine on the formation of Red Pigment from
Geniposidic Acid
Materials and Methods
Preparation of geniposide (GS)
Preparation of geniposidic acid (GSA) solution
Enzyme and reagents
General procedure for the red pigment formation
Evaluation of pigment
Kind of acid
The concentration of organic acid
The substituted position of amino group and chain length
of amino compound
Kind of amino compound
Results and Discussion
Effect of acidz
Effect of the substituted position of amino group and chain
length of amino compound
Kind of amino compound

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.

NIIR PROJECT CONSULTANCY SERVICES
106-E, Kamla Nagar, New Delhi-110007, India
