Handbook on Pulp and Paper Processing

Author:- NPCS Board of Consultants & Engineers Format: hardcover Code: NI212 Pages: 704 Price: Rs.1875US\$ 150 Publisher: NIIR PROJECT CONSULTANCY SERVICES Usually ships within 5 days

The pulp and paper industry comprises companies that use wood as raw material and produce pulp, paper, board and other cellulose based products. The pulp and paper sector presents one of the energy intensive and highly polluting sectors within the Indian economy and is therefore of particular interest in the context of both local and global environmental discussions. Increases in productivity through the adoption of more efficient and cleaner technologies in the manufacturing sector will be most effective in merging economic, environmental, and social development objectives. Papers are mostly used product starting from writing to packaging. It plays an important role in commercial field as well as in academic field also. Without paper nothing is expressible and reliable, so paper is part and parcel of our life. Adequate amount of raw materials for processing paper and pulp is available. Bamboo is the main raw material for Indian paper industry. New bamboo areas even at high cost are being trapped. Some of the examples of high yield pulping process are mechanical process, semi chemical process, alkaline chemical process, sulfite process, etc. Physical strength properties of paper depend on the quality of raw material, its pulping, bleaching and subsequent paper making processes. Technology has made it easy to process these raw materials in an economic and lucrative way to meet the global demand. Raw materials like, straw, bagasse, wood, bamboo is almost available in most of the places. So it is great opportunity for the entrepreneurs to start up such kind of industry. Paper Industry has tremendously increased in India in the last 20 to 30 yrs. The Paper industry is a priority sector for foreign collaboration and foreign equity participation up to 100% receives automatic approval by Reserve Bank of India. Several fiscal incentives have also been provided to the paper industry, particularly to those mills which are based on non conventional raw material.

Some of the fundamentals of the book are bleaching of bamboo cold, high yield semi chemical pulping of mixture of bamboo and mixed hardwoods, sulphate semi chemical process, kraft green liquor semi chemical process, neutral sulphite semi chemical process, thermo mechanical pulps for newsprint, zeta potential concept in paper sizing, sodium carbonate in alkali extraction during bleaching bamboo, maintenance engineering in pulp and paper industry, design and application of refiners in stock preparation, paper machine effluent etc.

This book explains about the various raw material, their processing and utilizations and also the possible waste treatment of such paper and pulp making industry. To draw attention for manufacturing quality product with all possible latest technologies is the main purpose of this book. The book is very resourceful for new entrepreneurs, technocrats, existing units and research scholars.

1. BLEACHING OF BAMBOO COLD SODA PULPS **Results and Discussions Constant Conditions** Pretreatment with Acid Pretreatment with Alkali **Bleaching Conditions in Different Stages** Effect of Peroxide in Alkali Pretreatment Pretreatment with Dye **Bleaching Conditions in Different Stages** Conclusions Experimental **Raw Materials** Bleaching 2. HIGH YIELD SEMI-CHEMICAL PULPING OF MIXTURE OF BAMBOO AND MIXED HARDWOODS Raw Material **Experimental and Results** Sulphate Semi-Chemical Process Kraft Green Liquor-Semi-Chemical Process Neutral Sulphite Semi-Chemical Process Discussion Sulphate Semi-Chemical Process **Green Liquor Semi-Chemical Process Neutral Sulphite Semi-Chemical Process** Conclusion 3. DEVELOPMENT IN HIGH YIELD PULPING PROCESS Mechanical Process Semichemical Process **Chemical Process Alkaline Chemical Process** Sulfite process Organic Catalyst to High Yield Pulping AQ Pulping Technology Polysulfide-AQ Process Alkaline Sulfite-AQ Pulping Experimental 4. THERMO-MECHANICAL PULPS FOR NEWSPRINT MANUFACTURE FROM TROPICAL PINES **Raw Materials** Experimental **Preparation of Thermo-Mechanical Pulps Results and Discussions** 5. A STUDY ON REPLACEMENT OF SODIUM SULPHATE BY AQ-LARGE SCALE TRIAL Anthraguinone an Aid to Pulping Laboratory Scale Investigations at Central Research Laboratory, Dalmianagar Plant Trial with AQ Evaluation of Mill Pulp **Discussion and Results** Conclusions 6. ZETA POTENTIAL CONCEPT IN PAPER SIZING

Electro Kinetic (Zeta) Potential-A Concept The Theory of Electrical Double Layer Stern's Modified Double Layer The Meaning and Limitations in the Application of Electro Kinetic Theory to the Paper Sizing Behaviour of Alum in Water Electro Kinetic Properties of Alum-rosin Size Precipitate and the Sized Fibre Conclusion Nomenclature Greeks 7. ECONOMICS OF BAMBOO AND HARDWOOD PULPING BY ANTHRAQUINONE CATALYSED-KRAFT-PROCESS **Experimental Design & Observations Results & Discussions** Conclusion 8. EFFECT OF BLEACHED PULP VISCOSITY ON STRENGTH PROPERTIES OF BAMBOO SULFATE PULP Experimental Pulping Bleaching **Physical Strength Properties Chemical Analysis Observations and Discussions** Conclusion 9. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP Experimental Discussions Conclusions 10. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP, BAMBOO + MIXED HARD WOOD PULP (70: 30) AND MIXED HARDWOOD PULP Experimental and Results Discussions Conclusion 11. SODIUM CARBONATE IN ALKALI EXTRACTION DURING **BLEACHING BAMBOO (D. STRICTUS) PULP** Experimental Study on Sequentially Chlorinated (H/C) Pulp Study on Chlorinated Pulp **Results and Discussion** Conclusions **12. EFFECT OF HEMICELLULOSES ON** UNBLEACHED SOFTWOOD KRAFT PULP Materials and Methods **Enzyme Treatments Bleaching Experiments** Chemical Composition and Kappa Number Analyses Microscopic Analysis Numerical Measurement of Colour **Results and Discussion**

Chemical Changes After Enzyme Treatment **Bleaching Experiments** Graff â€~C' Stain Numerical Measurement of Colour Accessibility Changes and Simonsâ€[™] Stain **Deuterium Oxide Exchange** Simons' Stain Conclusions **13. THERMODYNAMIC FUNCTIONS OF THE** REACTION BETWEEN LIGNIN AND HYDROGEN PEROXIDE DURING BLEACHING Experimental Isolation of Thiolignin Preparation of Hydrogen Peroxide Solution Reaction of Thiolignin with Hydrogen Peroxide **Results and Discussion** Analysis of Kinetic Data Order of the Reaction and Variation of Rate Constant with Reaction Parameters Validity of Arrhenius Equation (Reaction Rates and **Temperature Changes**) Estimation of various Thermodynamic Functions Conclusions **14. SEQUENTIAL BLEACHING Experimental Procedure Discussions of the Results Bleach Consumption Physical and Chemical Properties** Pollution Load of the Filtrate Conclusion **15. MANUFACTURE OF CORRUGATING MEDIUM PAPER** UTILIZING 100% BAGASSE FURNISH Process Suggested for Making Corrugating Medium from 100% Bagasse Fibre Preparation **Depithing at Paper Mills Digestion Cycle** Stock Preparation 16. EFFECTIVE UTILIZATION OF CHEMICALS IN PULP AND PAPER MILLS **Digester House Chemical Recovery Section Bleach Plant Chemical and Stock Preparation** Effluents **17. EFFECTIVE USE AND RECOVERY OF** CHEMICALS IN COLD SODA PULPING Experimental Chemical Treatment of E. Tereticornis Eta Reed Sulphate Pulping Evaporation and Burning Properties of Kraft and Cold Soda Spent liquors **Results and Discussions**

Chemical Consumption Pulp Properties Composition of Liquors Pollution Loads Properties of Spent Liquors Material Balances Conclusions **18. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN** COLD SODA PULPING WITH PARTIALLY CLOSED SYSTEM Chemical Treatment of E. Tereticornis **Results and Discussions** Conclusions **19. MAINTENANCE ENGINEERING IN PULP** AND PAPER INDUSTRY Inspection Lubrication Servicing Maintenance Problems 20. LIMITATION TO SATISFACTORY OPERATION OF WET END OF PAPER MACHINE **Basis Weight Profile** Head Box Pulsation **Drainage Formation and Sheet Structure** The Head Box **Rectifier Roll Head Boxes** Micro Turbulence Head Boxes Web Formers **Twin Wire Forming** Schmidt Classification Norman Classification **High Consistency Forming** Ancillary Equipments Wet Web Strength Limitations of Water Removal on Pressing Conclusion 21. DESIGN AND APPLICATION OF REFINERS IN STOCK PREPARATION **Conical Refiners** Shallow Angle Refiner **Steep Angle Refiners Double Disc Refiners** Safety Devices Influence of Machine Variables on Refining **Batch Refining** Machine Refiners 22. WET FELT DESIGNING TECHNIQUES Pressing Case Study Recommendations 23. MODERNIZATION AND OPTIMUM UTILIZATION OF EVAPORATORS FOR HARDWOOD BLACK LIQUORS-MILL **EXPERIENCE** Hardwood Black Liquors

Recovery Boilers and Required Liquor Solids **Original Evaporator Units** Installation of a Pump in Between First Pass and Second Pass of Concentration Effects of **Both Units** Conversion of Concentration Effect of First (OLD) Unit to a Finisher Introduction of a New Finisher Effect Utilization of Vent Vapour from Finisher Changing the Liquor Entry from Tangential to Radial and Modification of Flash Chamber Utilization of Vapour from Improvised Finisher of Old Street Conclusions 24. PAPER MACHINE EFFLUENT Experimental Discussions Mode of Treatment for Paper Machine Effluent Results Conclusion 25. CONICAL REFINERS AND WIDE-ANGLE REFINERS IN CONTINUOUS AND BATCH REFINING SYSTEMS FOR BAMBOO AND HARDWOOD FURNISH Introduction Types of Refining Systems in the Mill Conical and Wide Angle Refiners Strength, Development and Power Consumption 26. USE OF †NO PICK' ROLL IN PAPER MACHINE PRESS SECTION BASED ON SHORT-FIBRED TROPICAL HARDWOODS AND AGRICULTURAL RESIDUES Theoretical Considerations The Problem Press Section Before Modification Press Section After Modification Discussion Conclusions 27. CONSUMPTION OF FURNACE OIL IN **RECOVERY BOILERS** Storage Viscosity Velocity **Turbidity & Causticity** Silica **Inverse Solubility Organic Content and Calorific Value** 28. NECESSITY TO RENOVATE AND MODERNIZE PAPER MACHINE Fourdrinier Part Press Part **Dryer Section Calender Stacks** Pope Reel Conclusion

29. WET END OPERATION OF A PAPER MACHINE Approach Flow Head Box The Slice Approach System, Head Box and Slice at W.C.P.M. Sheet Formation and Drainage on the Fourdrinier Shake Suction Boxes Dandy Roll The Couch Conclusion **30. CLEANING SYSTEM-SHOWER FOR PAPER MACHINE** Mechanical Cleaning **Classification of Water Shower** Wire Cleaning Shower Knock off Shower Trim Knock-off Shower **Couch Roll Cleaning Shower Return Roll Cleaning Shower Dandy Cleaning Shower** Felt Shower **Special Features of Water Showers** Material of Construction Insert Type Nozzle **Protective Shell** Programming Filters **31. SUITABILITY OF KENAF CTMP FOR LINERBOARD** Experimental Raw Material Particle Size Reduction and Washing **Injection Process** Fiberizing and Refining Kraft Pulping Pulp Testing and Handsheet Formation and Testing **Results and Discussion** Andritz Sprout-Bauer Pulping Trials **FPL** Pulping Trials Kenaf and Loblolly Pine Pulp Blends Conclusions 32. NEWSPRINT FROM BLENDS OF KENAF CTMP AND DEINKED RECYCLED NEWSPRINT Experimental **Results and Discussion** Conclusion 33. FEASIBILITY OF USING KENAF CHEMITHERMOMECHANICAL PULP IN PRINTING AND WRITING PAPER **Results and Discussion** Andritz Sprout-Bauer and FPL Pulping Trials Postbrightened Kenaf Thermomechanical Pulp Conclusions

Experimental Raw Material, Particle Size Reduction, and Material Wash **Injection Process** Fiberizing and Refining Process Testing of Pulp and Forming and Testing of Handsheets Postbrightening of Kenaf TMP **Brightness Reversion** 34. MESTA/KENAF AS RAW MATERIAL FOR KRAFT PULPING **Raw Material** Experimental **Chemical Constituents of Mesta** Pulping and Sheet Making Discussion **Physical Characteristics Chemical Constituents** Pulping Bleaching and Black Liquor Characteristics **Morphological Studies Properties of Pulp Sheets** Fibre Classification Results Conclusions 35. RESPONSE OF KENAF VARIETY, HC-583 TO DIFFERENT LEVELS OF NITROGEN Materials and Methods **Results and Discussion** Plant Height **Basal Diameter of Stalk** Drv Yield of Stalk Increase in Dry Yield of Stalk per Kg. N Applied Conclusion 36. PREHYDROLYSED KRAFT COOKING OF JUTE STICK (EFFECT OF PREHYDROLYSIS CONDITION) Experiments **Raw Materials** Digestion Bleaching Chlorine Water Bleaching Analysis of the Pulp **Results & Discussion** A. Effect of Prehydrolysis Treatment on the Chemical Composition of Jute Stick B. Loss of ï•i-Cellulose and Lignin after Prehydrolysis and Kraft Cooking of Jute Stick **Results of Bleached Pulps** Conclusions **37. HIGH YIELD PULP FROM JUTE STICKS** 38. GREASE PROOF PAPERS FROM SULPHITE JUTE STICK PULP Raw Material Pulping Conclusion **39. CHEMICAL RECOVERY BOILERS FOR PULP MILLS** USING AGRICULTURAL RESIDUES AS RAW MATERIALS Present and Future Prospects of Agricultural Residue Usage in India Advantages of Use of Agricultural Residues Special Shelter Type Design for Smaller Units 40. PROBLEMS IN BL EVAPORATION IN INDIAN RAW MATERIALS

Black Liquor Screening Black Liquor Soap Problem **Carbonaceous Deposits** Scale Formation and its Removal **Results Achieved** Technical Vapour Side Scale Method of Feeding Black Liquor Mixed Feed **Quintuple Effect & Forced Circulation Evaporator** Forced Circulation Evaporator 41. UTILIZATION OF UNCONVENTIONAL RAW MATERIALS Advantages at a Glanceâ€"for New Process Cooking Liquor and Position of pH (Cold) during Pulping Pulping Conditions and Delignification Yield and General Properties of Pulp Chemical Composition of Unbleached Pulp **Bleaching of Pulp** Paper Making Properties Black Liquor and Recovery **Environmental Protection** Air Protection Water Protection **Future Looks** Sulfite Shuttles into Space 42. UTILIZATION OF AGRICULTURAL RESIDUES USING MECHANO-CHEMICAL PULPING PROCESS Pilot Plant Trials at Cellulose and Paper Branch, Forest Research institute and colleges, Dehradun Production of Rice Straw Pulp Production of Wheat Straw Pulp Production of Bagasse Pulp **Production of Paper** Mechano Chemical Pulping on Industrial Scale **Chemical Preparation** Cookina Search for Alternative Raw Material Variables in the Process Modification of Bagasse Pulping by Partial Replacement of Sodium Hydroxide by Sodium Carbonate Addition of Sodium Sulphide in Cooking Liquor in **Bagasse** Pulping Conclusion 43. FEASIBILITY OF RECYCLED NEWSPAPERS HARDBOARDS Experimental Design and Analysis **Materials** Processing Acetylation Adhesive Application **Board Manufacture** Testina **Results and Discussion Static Bending Properties**

Tensile Strength Properties Water Absorption and Thickness Swell Linear Expansion **Concluding Remarks** 44. RESTORING BONDING STRENGTH TO RECYCLED FIBERS **Dry-Fiberized Fiber Characteristics** Mechanical Treatment Fractionation Strength Additives **Chemical Treatments** Blending with Virgin Fiber Papermaking Variables Wet-Formed Papers Pressing **Air-Formed Papers** Conclusions Methods and Materials 45. CHEMICAL MODIFICATION OF AGRO-FIBER FOR THERMOPLASTICIZATION **Experimental Procedures Esterification Procedure Thermal Analysis** Pressing of Esterified Fiber Electron Microscopy of Pressed Fiber Swelling of Pressed Fiber in Water **Results and Discussion** Esterification of Lignocellulosics **Thermal Analysis** Swelling of Pressed Fiber Pellets in Water Conclusions **46. POTENTIALS FOR COMPOSITES FROM JUTE AND** ALLIED FIBERS Plant Utilization for Composites Potential Composites for Agro-Resources Geotextiles Filters Sorbents Structural Composites Non-structural Composites Molded Products Packaging Combinations with Other Resources **Chemical Modification for Property Improvement** Conclusions 47. AN APPROACH TO â€~INPLANT COLOUR REDUCTION' OF BLEACH PLANT EFFLUENT USING CALCIUM **HYPOCHLORITE** Experimental Discussion **48. DESILICATION OF SULPHATE WEAK BLACK** LIQUOR BY THE ADDITION OF LIME Experimental Procedure of Desilication **Results & Discussion**

49. TREATMENT OF PULP & PAPER MILL WASTES Pulp and Paper Industry Water Consumption Nature and Effect of Impurities **Primary Treatment Sedimentation Units** Sludge Handling & Disposal Secondary Treatment **50. DECOLOURIZATION OF WASTE WATER** FROM BLEACHED-KRAFT PULP & PAPER MILL USING ALUM AND CLAY Materials and Methods **Results and Discussion** Sludge Blanket Effluent Quality Colour Removal Removal of Suspended Solids **COD** Reduction Conclusion ¬51. REMOVAL OF SOLUBLE SILICA FROM SULPHATE GREEN LIQUOR Experimental Carbonation Green Liquor Analysis **Results & Discussion** 52. TRENDS IN ASH CONTENT OF STRAW PULPS-AN EXPLANATION Experimental 53. MINI LIME TREATMENT OF DISSOLVING PULP MILL COLOURED EFFLUENT Sources of Colour in the Pulp Mill Effluent Present Work Chlorination of Lime Treated Effluent Calcining of Effluent Sludge Causticization Using Lime Obtained from Effluent Sludge Conclusion 54. COLOUR AND COD REDUCTION OF **BLEACH EFFLUENTS** Experimental **Results and Discussions** Colour of the Effluents Phenolic Compounds Rate of Colour Reduction Chemical Oxygen Demand Conclusions 55. EFFECT OF pH ON SULPHITE PULPING OF HOLOCELLULOSE OF E. TERETICORNIS Experimental Preparation of Cooking Liquor **Titration of Cooking Liquor** Sulphite Pulping Neutral Sulphite Pulping

Preparation of Cooking Liquor Chemical Analysis of Sulphite and Neutral Sulphite Cooked Holocellulose Results and Discussion Effect of pH and Cooking Time on Yield Effect of pH and Cooking Time on Klason Lignin Effect of pH and Cooking Time on Alpha-Cellulose Effect of pH and Cooking Time on Pentosans Effect of pH and Cooking Time on Acidic Sugar Effect of pH and Cooking Time On Methoxyl and Acetyl Groups 56. UTILIZATION OF AGRICULTURAL RESIDUES FOR PULP, PAPER AND BOARD **Rice Straw** Writing and Prints Paper **Grease Proof Paper** Wrapping Paper Straw Board Fibre Boards Wheat Straw Writing & Printing Paper **Greaseproof Paper** Straw Board Jute Sticks Writing and Printing Paper Wrapping Paper Pulp Yield and Sheet Characteristics Straw Board Newsprint Grade Refiner Groundwood Pulp Constitution of Hemicellulose Greaseproof Paper, Strength Properties of Standard Sheet **Building Board** Bagasse Writing and Printing Paper Wrapping Papers Rayon Grade Pulps Greaseproof paper Straw Board Fiber Board Newsprint Cotton Stem Writing and Printing Paper **Miscellaneous Raw Materials** Arecanut Husk **Ground Nut Shells** Tea Stem Caster Stems (Ricinus Communis, linn) Sun Flower Stalk Arhar Sticks (Cajanus SP) and Jawar Stalk (Sorghum SP) Sugar Cane Leaves Paddy Husk 57. PROVISION OF CAPTIVE POWER GENERATION IN

A 30 TPD AGRO-BASED PAPER PLANT AS A MEANS OF IMPROVING CAPACITY UTILIZATION **Capacity Utilization Power Availability Captive Power Plant Recommended Scheme** Features of the Scheme Fixed Costs Variable Costs Average Cost of Power Generation Economics and Discussion Conclusion 58. ENERGY CONSERVATION IN PULP AND PAPER INDUSTRYâ€"SOME THOUGHTS Paper Industry **Deliberations Total Energy Concept In-Plant Power Generation Energy Distribution and Utilization** Overdesign and Capacity Utilization of the Equipment **Energy Aduit** Short Term-Long Term Action Programme Short Term Schemes Long Term Schemes Generation Short Term Long Term Transmission Short Term Long Term Utilization Short Term Long Term Waste Streams **Energy Conservation Approaches** Factor Affecting Energy Efficiency **Research and Development** National Energy Programme Summary and Conclusions

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Startup Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
