Natural products have played an important role throughout the world in treating and preventing human diseases. Natural product medicines have come from various materials including terrestrial plants, terrestrial microorganisms, organisms etc. Historical experiences with plants as therapeutic tools have helped to introduce single chemical entries in modern medicine. About 40% of the drugs used are derived from natural sources. Most are pure substances which are isolated from various organisms & used directly or after chemical modification. Natural products will continue to be important in three areas of drug discovery: as targets for production by biotechnology as a source of new lead compounds of novel chemical structure and as the active ingredients of useful treatments derived from traditional systems. Biotechnology will contribute more new natural products for medicinal use. Plants provide a fertile source of natural products many of which are clinically important medicinal agents. Natural products have traditionally provided most of the drugs in use. Despite the achievements of synthetic chemistry and the advances towards rational drug design, natural products continue to be essential in providing medicinal compounds and as starting points for the development of synthetic analogues. With the increasing power of screening programs and the increasing interest in the reservoir of untested natural products, many future drug developments will be based, at least in part, on natural products.

The major contents of the book are plant products produced in cell culture , application of genetic engineering to the production of pharmaceuticals , anti transpirants and plant growth regulators based , the potential and the problems of marine natural products, marine sterols, plants as a source of anti-inflammatory substances, anti hepatotoxic principles in oriental medicinal plants, immune stimulants of fungi and higher plants, amanita muscaria in medicinal chemistry, ergot alkaloids and their derivatives in medicinal chemistry and therapy, development of drugs from cannabinoids, etc.

This book contains development of new drugs from plants, work on some Thai medicinal plants, plant growth based on Jasmonates, marine sterols, bleomycin and its derivatives, drugs from cannabinoids, bioactive compounds from nature, fungi and higher plants, biological active compounds from British Marine, microbial phytotoxins as herbicides and many more. This book will be very helpful to its readers, upcoming entrepreneurs, scientists, existing industries, technical institutions, druggist etc.

1. An Introduction to Drugs From Natural Products
2. Plant Products Produced In Cell Culture
3. From Toxins to Drugs -venom Proteins as a Guide to the Future Design of Protein Drugs

4. Integrated Approach to Development of New Drugs From Plants and Indigenous Remedies
5. Application of Genetic Engineering to the Production of Pharmaceuticals
6. Target Site Delivery of Herbicidal Compounds
7. Microbes And Microbial Phytotoxins As Herbicides
8. Drug Research Based upon the Leads of the Chinese Traditional Medicine
9. Recent Work on Some Thai Medicinal Plants
10. Antitranspirants and Plant Growth Regulators Based on Jasmonates
11. Immunoregulatory Compounds Derived from Hormones
12. Constituents of Indigenous Medicinal Plants
13. The Potential and the Problems of Marine Natural Products
14. Marine Sterols
15. Biologically-active Compounds from British Marine Algae
16. A New Look At Muscle Relaxants Alternatives To Curare
17. The Search for New Antimicrobial Agents: Unusual Sources
18. Plants as a Source of Anti-inflammatory Substances
19. Bioactive Compounds From Nature
20. Chemistry of Danomycin, An Iron Containing Antibiotic
21. Antineoplastic Agents from Higher Plants: Novel Xanthones from *Psorospermum febrifugum*
22. Bleomycin And Its Derivatives
23. Antineoplastic Structure-activity
24. Structure-activity Studies in Cardiac Glycosides
25. Current Status of Gossypol, Zoapatanol and Other Plant -derived Fertility Regulating Agents
26. Antihepatotoxic Principles in Oriental Medicinal Plants
27. Immunostimulants of Fungi and Higher Plants
28. Histamine Secretagogue Thapsigargin and Related Compounds
29. Non-equilibrium Opioid Receptor Antagonists
30. Morphine and Related Opioid Analgesics
31. Ergot Alkaloids and their Derivatives in Medicinal Chemistry and Therapy
32. Development of Drugs from Cannabinoids
33. *Amanita muscaria* in Medicinal Chemistry.
34. *Amanita muscaria* in Medicinal Chemistry.
35. Bot. : *Acacia arabica* Hindi : Babul, Sanskrit : Babbula

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
