

# **The Complete Technology Book on Pesticides, Insecticides, Fungicides and Herbicides (Agrochemicals) with Formulae, Manufacturing Process, Machinery & Equipment Details 4th Revised Edition**

**Author:-** Dr. Himadri Panda

**Format:** paperback

**Code:** NI79

**Pages:** 536

**Price:** Rs.1975US\$ 150

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Agrochemicals are chemical agents that are applied to fields to boost the nutrient content of the soil or crops. Herbicides, fungicides, and insecticides are among them, as are synthetic fertilizers, hormones, and soil conditioners. They boost agricultural growth by eradicating pests that wreak havoc. They are used in horticulture, dairy farming, poultry farming, crop shifting, commercial planting, and other farming industries.

? A pesticide is any substance that is used to kill, repel, or control pests in plants or animals.

? Insecticides are chemicals that are used to keep insects under control by killing them or stopping them from engaging in undesired or damaging behaviour. Their structure and mode of action are used to classify them.

? Fungicides are pesticides that kill or prevent fungus and their spores from growing. They can be used to manage plant-damaging fungi such as rusts, mildews, and blights. They could also be used to keep moulds and mildew at bay in other places.

? Herbicides are chemicals that are used to control or manage unwanted vegetation. Herbicides are most commonly used in row-crop farming, where they are treated before or during planting to increase crop productivity while reducing other vegetation.

The global agrochemicals market estimated size is CAGR of 3.4%. Increasing demand for food supply due to the rapid growth in the human population has triggered agricultural intensification. Agrochemicals are widely employed in agriculture to meet rising food demands, bridging the gap between food supply and consumption. Concurrently imbalanced use of agrochemicals, on the other hand, degrades the environment and poses serious threats to aquatic and terrestrial ecosystems. Chemical agents used in agricultural lands to increase nutrient shortage in the field or crop are known as agrochemicals. They also help to boost crop development by destroying hazardous insects. Agrochemicals increase the quantity and quality of agricultural goods. These are utilized in horticulture, dairy farming, cattle, grain farming, shifting cultivation, commercial plantation, and many other agricultural fields.

The book covers a wide range of topics connected to Pesticides, Insecticides, Fungicides and Herbicides, as well as their manufacturing processes. It also includes contact information for machinery suppliers, as well as images of equipments.

A complete guide on Agrochemical Products manufacture and entrepreneurship. This book serves as a one-stop shop for everything you need to know about the Pesticides, Insecticides, Fungicides and Herbicides manufacturing industry, which is ripe with opportunity for manufacturers, merchants, and entrepreneurs. This is the only book that covers Agrochemical

in depth. From concept through equipment procurement, it is a veritable feast of how-to information.

## 1. AGROCHEMICALS

1.1 Introduction

1.2 Classifications

1.3 Benefits

1.4 Effects

1.5 Needs and Precautions

## 2. MANAGEMENT OF AGRO-CHEMICALS FOR IMPROVED PUBLIC AND ENVIRONMENTAL HEALTH

2.1 Introduction

2.2 A Strategy for Better Agrochemical Management and Use Implementing the Strategy as a Whole

2.2.1 Multilevel Response

2.2.2 Nine Regional Projects for Implementation

2.3 Using Agro-Chemical Management in a Coordinated Way

2.4 Implementing GAP and Other Good Practice Codes of Conduct

2.5 Informing Management Decisions

2.5.1 Public Health Monitoring

2.5.2 Environmental Monitoring

2.5.3 Further Research

2.6 Supporting Improved Agro-Chemical Use and Management

2.6.1 Sustainable Financing

2.6.2 Communication and Education

2.6.3 Capacity Building

2.7 Strategy Implementation

## 3. AGROCHEMICAL INDUSTRY OUTLOOK

3.1 Diverse Changes Indicate a Continuously Evolving Industry

3.1.1 Longer Product Development Cycles and Escalating Costs

3.1.2 Increasing Stringency of Regulatory Requirements

3.1.3 Government Farm Subsidy Reduction

3.1.4 The Accelerated Pace of Change within and in Adjacent Markets

3.2 Current Performance and Strategy of Nurturing the Growth Momentum

3.2.1 Leveraging M&A to Optimize Portfolio and Extend Geographical Presence

3.2.2 Focusing on Innovation and R&D to Develop and Commercialize New Products

3.2.3 Bolstering Product Offerings with Digital Technologies to Enhance the Firm-Farmer Engagement

3.3 Opportunities and Challenges in Agrochemicals Today

3.4 Strategic Positioning Uncertainty and Opportunity

3.4.1 Business Strategy & Growth

3.4.2 Digital Transformation

3.4.3 Governance and Board

3.4.4 Innovation

3.4.5 Marketing & Sales

3.4.6 Private Enterprise

3.5 Strategic Positioning Required in a Future That is Uncertain but Full of Opportunities

3.5.1 Capturing Value from Increasing Interest in Sustainable Agricultural Practices and

## Precision Farming

### 3.5.2 Taking Advantage of Asset-Light Business Model and Achieving Innovation Success

### 3.5.3 Recognizing Long-Term Opportunities that Masquerade as Challenges

## 3.6 The Future of Agrochemicals: Capturing Value

# 4. AGROCHEMICALS MANUFACTURING

## 4.1 Dispersing and Deagglomeration

### 4.1.1 Dispersion into Liquids

## 4.2 Dispersion of Nanomaterials (Nanoparticles)

### 4.2.1 Dispersion of Nanoparticles

### 4.2.2 Dispersing and Size Reduction of Nanomaterials

## 4.3 Emulsifying

### 4.3.1 Stabilizing Emulsifiers

### 4.3.2 Devices for Efficient Emulsification

## 4.4 Ultrasonic Dissolving of Solids in Liquids

## 4.5 Sonochemical Reaction and Synthesis

## 4.6 Phase Transfer Catalysis

## 4.7 Agrochemical Formulations

## 4.8 Processing

### 4.8.1 Drying

### 4.8.2 Milling

### 4.8.3 Blending

### 4.8.4 Agglomeration

# 5. AGROCHEMICAL TESTING

## 5.1 Testing Technology

## 5.2 Methods of Analysis for Pesticide Residues

## 5.3 Methods for Testing Agricultural Chemical Residues in Food

### 5.3.1 Validation Procedure

#### (1) Selectivity

#### (2) Trueness

#### (3) Precision

#### (4) Limit of Quantification

## 5.4 Method Validation and Quality Control Procedures for Pesticide Residues Analysis in Food and Feed

## 5.5 Sampling, Transport, Processing and Storage of Samples

### 5.5.1 Sampling

### 5.5.2 Laboratory Sample Transportation

### 5.5.3 Sample Preparation and Processing Prior to Analysis

### 5.5.4 Identity, Purity, and Storage of Standards

### 5.5.5 Preparation and Storage of Stock Standards

### 5.5.6 Preparation, Use and Storage of Working Standards

## 5.6 Testing and Replacement of Standards

### 5.6.1 Extraction and Concentration

### 5.6.2 Extraction Conditions and Efficiency

### 5.6.3 Extract Concentration and Dilution to Volume

## 5.7 Contamination and Interference

### 5.7.1 Contamination

### 5.7.2 Interference

## 5.8 Analytical Calibration, Representative Analytes, Matrix Effects and Chromatographic Integration

### 5.8.1 General Requirements

### 5.8.2 Calibration

## 5.9 Representative Analytes

- 5.10 Matrix Effects and Matrix-Matched Calibration
- 5.11 Standard Addition
- 5.12 Effects of Pesticide Mixtures on Calibration
  - 5.12.1 Calibration for Pesticides that are Mixtures of Isomers
  - 5.12.2 Calibration using Derivatives or Degradation Products
  - 5.12.3 Chromatographic Integration
- 5.13 Analytical Method Validation and Performance Criteria
  - 5.13.1 Qualitative Screening Methods
    - On-going Performance Verification during Routine Analysis
  - 5.13.2 Quantitative Methods
  - 5.13.3 Initial Method Validation
    - On-going Performance Verification (Routine Recovery Determination)
  - 5.13.4 Methods for Determination of Fat or Dry Weight Content
  - 5.13.5 Proficiency Testing and Analysis of Reference Materials
- 5.14 Agrochemicals Solutions Technology
  - 5.14.1 Spectrum 3 MIR/NIR/FIR Spectrometer
  - 5.14.2 Max ICP-OES Scott/Cross-Flow Configuration
  - 5.14.3 Gas Chromatography (GC)
- 5.15 Agrochemicals Testing Solutions
  - 5.15.1 Atomic Spectroscopy
    - Atomic Absorption (AA)
    - Inductively Coupled Plasma (ICP-OES & ICP-AES) Instruments
    - Inductively Coupled Plasma Mass Spectrometry (ICP-MS) Instruments
    - Mercury Analysis Systems
    - Microwave Systems
  - 5.15.2 Chromatography
    - Gas Chromatography Mass Spectrometry (GC/MS)
    - Liquid Chromatography Mass Spectrometry (LC/MS & LC/MS/MS)
    - Liquid Chromatography
    - Discover the LC 300 HPLC and UHPLC Systems
  - 5.15.3 Molecular Spectroscopy
    - Infrared Spectroscopy
    - Fluorescence Spectroscopy
    - Ultraviolet-Visible (UV-Vis) Spectroscopy
    - FT-IR Microscopy & Imaging Systems
  - 5.15.4 Thermal Analysis
    - Thermogravimetry (TGA)
    - Differential Scanning Calorimetry (DSC)
    - Mechanical Analysis (DMA & TMA)
    - Simultaneous Thermal Analysis (STA)
- 6. PACKAGING OF AGROCHEMICALS
  - 6.1 Selection of Packaging Types
    - 6.1.1 Selection of Packaging Materials for Solid Formulations
    - 6.1.2 Selection of Packaging Materials for Liquid Formulations
    - 6.1.3 Plastics
    - 6.1.4 Metal
    - 6.1.5 Glass

## 6.2 Specifications

## 6.3 Packaging Instructions

## 6.4 Closures

### 6.4.1 Prevention of Leakage

### 6.4.2 Tamper Evidence

### 6.4.3 Closure Diameter - Liquid Products

### 6.4.4 Dispensing Liquid Products from Packs Designed for Pouring

## 6.5 Labelling

## 6.6 Shelf Life

## 6.7 Pack Design With Regard to Easy Rinsing and Disposal

## 6.8 Types of Secondary Packaging

### 6.8.1 Unit Cartons

### 6.8.2 Combination with Primary Pack

### 6.8.3 Methods for Protection of Unit Loads

## 7. REGISTER A PESTICIDE BUSINESS (PESTICIDE LICENSE)

### 7.1 Procedure

### 7.2 Required Documents

### 7.3 Eligibility

### 7.4 Validity

## 8. PESTICIDE REGISTRATION PROCESS-EPA (UNITED STATES ENVIRONMENTAL PROTECTION AGENCY)

### 8.1 Risk Assessments to Analyses the Potential for Harm

### 8.2 The Evaluation Process

### 8.3 Federal Pesticide Laws

### 8.4 The Pesticide Label

### 8.5 Compliance and Enforcement

## 9. PESTICIDES

### 9.1 How do Pesticides "Work"?

#### 9.1.1 Organophosphates

#### 9.1.2 Organochlorines (Chlorinated Hydrocarbons)

#### 9.1.3 Carbamates and Thiocarbamates

#### 9.1.4 Pyrethroids (Synthetic)

### 9.2 Types of Pesticides

### 9.3 Chemical Pesticides

### 9.4 Biopesticides

### 9.5 Benefits of Pesticides

### 9.6 Classification of Pesticides

### 9.7 Pesticide Formulations

### 9.8 Pesticides Modes of Action

#### 9.8.1 Insecticides

#### 9.8.2 Fungicides

#### 9.8.3 Herbicides

### 9.9 Pesticide Behavior in the Environment

#### 9.9.1 Pesticide Degradation

#### 9.9.2 Pesticide Migration

- Sorption
- Leaching
- Spray Drift
- Volatilization
- Surface Runoff

## 10. APPLICATION OF PESTICIDES

- 10.1 Choice of Chemicals (Insecticides)
- 10.2 Timing of Pesticide Application
  - 10.2.1 Stage of Development of Pests
  - 10.2.2 The Growth Stage of the Crop
  - 10.2.3 The Development Stage of Natural Enemies and Activity of Honey Bees
  - 10.2.4 The Severity of Damage or Infestation
  - 10.2.5 The Type of Weather and the Time of Day
  - 10.2.6 Pre-Harvest Interval

## 11. PRODUCTION OF PESTICIDES

- 11.1 Raw Materials
- 11.2 The Manufacturing Process
  - 11.2.1 Synthesizing the Pesticide
  - 11.2.2 Formulating the Pesticide
  - 11.2.3 Diluting the Pesticide
  - 11.2.4 Applying the Pesticide

## 12. PESTICIDE APPLICATION EQUIPMENT

- 12.1 Dusters
  - 12.1.1 Hand Operated Dusters
  - 12.1.2 Plunger Tube Dusters
  - 12.1.3 Hand Crank Dusters
  - 12.1.4 Foot Pump Dusters
  - 12.1.5 Power Dusters
  - 12.1.6 Electric Motor Powered Dusters
  - 12.1.7 Gasoline Motor Powered Dusters
  - 12.1.8 Air Pressure Dusters
- 12.2 Sprayers
  - 12.2.1 Hand Operated Sprayers Flit Gun
  - 12.2.2 Small Hydraulic Sprayer
  - 12.2.3 Compressed Air Sprayers
  - 12.2.4 Electric or Gasoline-Operated Sprayers (Powered Spraying)
    - Tanks
    - Pumps
      - a) Piston Pump
      - b) Centrifugal Pumps
      - c) Roller Pumps
      - d) Internal and External Gear Pumps
      - e) Diaphragm Pump
      - f) Flexible Impeder Pump
      - g) Vane Pump
    - Hoses
    - Nozzles
    - Strainers
    - Valves
    - Pressure Regulators
    - Agitators
  - 12.2.5 Gas Generating Sprayers
  - 12.2.6 Granular Applicators
  - 12.2.7 Brush Application
  - 12.2.8 Fumigant Injection
  - 12.2.9 Spot Treatment
  - 12.2.10 Crack and Crevice Treatment
  - 12.2.11 U.L.V

12.2.12 Soil Injection

12.2.13 Sub-Slab Injection

### 13. ROLES AND RESPONSIBILITIES

13.1 Role of Manufacturers

13.1.1 Development and Packaging

13.1.2 Advertising and Marketing of Agrochemicals

13.2 Role of Government Agencies

13.2.1 Product Registration

13.2.2 Promulgating Regulations

13.2.3 Provisions for Enforcement and Advisory Services

13.2.4 International Exchange of Information

13.3 Role of Retailers

13.4 Role of Employers and Their Organizations

13.5 Role of Workers and Their Organizations

13.6 Role of the Public

### 14. PESTICIDE MIXTURES

14.1 Introduction

14.2 Benefits Associated with Pesticide Mixtures

14.3 Concerns Associated with Pesticide Mixtures

14.4 Pesticide Mixtures and Resistance Mitigation

14.5 Pesticide Mixtures and Natural Enemies

### 15. PESTICIDE FORMULATIONS

15.1 Type

15.2 Formulation Process

15.2.1 Sorption

15.2.2 Solution

15.2.3 Suspension

15.2.4 Emulsion

15.3 Formulation Selection Considerations

15.3.1 Applicator Safety

15.3.2 Environmental Concerns

15.3.3 Pest Biology

15.3.4 Available Equipment

15.3.5 Surfaces to be Protected

15.3.6 Cost

15.4 Common Pesticide Formulations

15.4.1 Solid Formulations

15.4.2 Dusts

15.4.3. Granules

15.4.4 Pellets

- Wettable Powders

- Dry Flowables

- Soluble Powders

15.5 Liquid Formulations

### 16. VARIOUS METHODS IN PESTICIDE FORMULATION ANALYSIS

16.1 Titrimetry

16.2 Types of Titrations

16.2.1 Some Redox Titrations are Named after the Reagent

- Permanganate Titrations

- Dichromate Titrations

16.2.2 Iodimetric Titrations also are Redox

## Titration

### 16.3 Preparation of Standard Solutions

#### 16.3.1 Preparation of 0.1N Silver Nitrate

#### 16.3.2 Preparation of 0.1N Potassium Thiocyanate

#### 16.3.3 Preparation of 0.1N Sodium Thiosulphate Solution

#### 16.3.4 Preparation of 0.1N Iodine

#### 16.3.5 Preparation of 0.1N Sodium Hydroxide

#### 16.3.6 Preparation of 0.1N Hydrochloric Acid

### 16.4 Carbofuran

### 16.5 Captan

### 16.6 Dicofof

### 16.7 Copper Compounds

### 16.8 Dithiocarbamates

### 16.9 Tridemorph

### 16.10 Phorate

### 16.11 Sulphur

### 16.12 Aluminium Phosphide

### 16.13 Zinc Phosphide

## 17. PESTICIDES DILUTED

### 17.1 Mixing Soluble and Wettable Powders

### 17.2 Mixing Liquid Formulations

### 17.3 Mixing Concentrates for Air Blast Sprayers or Mist Blowers 218

## 18. DISPERSION AND GRINDING OF PESTICIDES

## 19. PESTICIDES AND ENVIRONMENTAL PROTECTION

### 19.1 Pesticides in the Environment

#### 19.1.1 Sources of Contamination

#### 19.1.2 Sensitive Areas

#### 19.1.3 Pesticide Movement

##### a) Air

##### b) Particles and Droplets

##### c) Vapors

##### d) Water

##### e) On or in Objects, Plants, or Animals

#### 19.1.4 Harmful Effects on Non Target Plants and Animals

##### 1) Harmful Effects from Direct Contact

##### 2) Harmful Effects from Residues

##### 3) Harmful Effects on Surfaces

### 19.2 Protecting the Environment

#### 19.2.1 Protecting Groundwater

##### 1. Sources of Groundwater

##### 2. Pesticide Contamination of Groundwater

##### A. Practices for Pesticide Users

##### • Water on the Treated Surface

##### • Rain

##### • Irrigation

##### • Pesticide Factors

##### • Soil Factors

##### • Geology

##### B. Protection of Endangered Species

##### • Limitations on Pesticide Use

##### • Habitats of Endangered Species

##### • Importance of Protecting Endangered Species

- a. Agriculture
- b. Medicine
- c. Preserving Choices
- d. Interdependence
- e. Natural Balance
- f. Stability

## 20. DISTRIBUTION ORGANOCHLORINE PESTICIDES IN SOIL AND GROUNDWATER

### 20.1 Materials and Methods

#### 20.1.1 Research Area Description

#### 20.1.2 Sample Collection

#### 20.1.3 Sample Preparation

#### 20.1.4 Analysis Methods

### 20.2 Physical-Chemical Properties of Soil Profile in Farmlands

#### 20.2.1 Physical-Chemical Indexes

#### 20.2.2 Profile Textures

## 21. PESTICIDES IN EXPORT AND DOMESTIC AGRICULTURE

### 21.1 Conceptual Revisions for More Controlled Comparisons

#### 21.1.1 Comparing Different Crop Types to Explain the Effects of Markets

#### 21.1.2 Assuming Low and Homogenous Pesticide use on National Market Crops

#### 21.1.3 Assuming Ever-Increasing Pesticide use in Export Production

### 21.2 Methods

#### 21.2.1 Study Site

#### 21.2.2 Farmer Survey

#### 21.2.3 Complementary Methods

## 22. BOTANICAL PESTICIDES: A POTENTIAL PLANT PROTECTION TOOL

### 22.1 Introduction

### 22.2 Chemical Composition

#### 22.2.1 Essential Oil Components

#### 22.2.2 Isothiocyanates and Glucosinolates Glucosinolates (GLSs)

#### 22.2.3 Cyanogenic Glycosides

#### 22.2.4 Alkaloids

#### 22.2.5 Phenolics – Flavonoids

#### 22.2.6 Polyacetylenes & Polythienyls

#### 22.2.7 Pyrethrum

#### 22.2.8 Organic Acids

#### 22.2.9 Others

### 22.3 Greek Plants as a Source of Botanical Pesticides

#### 22.3.1 Bacteria, Fungi & Terpenes

#### 22.3.2 Insects & Terpens

#### 22.3.3 Nematodes & Terpenes

#### 22.3.4 Nematodes & Limonoids

### 22.4 Current Trend and Future Prospective

## 23. DIFFUSION CONTROLLED PESTICIDE RELEASE FORMULATIONS: EFFECTIVE CONSIDERATIONS

### 23.1 Introduction

### 23.2 Diffusion Model Development

### 23.3 Polydisperse Capsule Size Distribution

- 23.4 Microcapsule Clustering
- 23.5 Experimental
  - 23.5.1 Microcapsule Construction
  - 23.5.2 Visualization System for Microcapsule Clustering
- 23.6 Theoretical
  - 23.6.1 Microcapsules Transport via Convective Patterns from Sessile Drop Evaporation
- 23.7 Coupling Capsule Clustering with Pesticide Release Rate
- 24. FORMULA OPTIMIZATION DESIGN OF PESTICIDE MICRO EMULSION
  - 24.1 Introduction
  - 24.2 Experimental Section
    - 24.2.1 Materials
    - 24.2.2 Construction of Pseudo-Ternary Phase Diagram
    - 24.2.3 Arrangement of Orthogonal Experiment
  - 24.3 Results and Discussion
    - 24.3.1 Selection of Formula Components
    - 24.3.2 Choice of the Best Phase Diagram
    - 24.3.3 The Research of Physical Stability
- 25. PROCESSING OF MICROBIAL PESTICIDES
  - 25.1 The Importance of Microbial Pesticides
  - 25.2 Production and Commercialization of Pathogens
    - 25.2.1 Steps Leading to Commercialization
    - 25.2.2 Process Development and Production
    - 25.2.3 Organism Storage
    - 25.2.4 Fermentation Method
  - 25.3 Theoretical Background of Industrial Processing in Biotechnology
    - 25.3.1 Laboratory Processing
    - 25.3.2 Cleanliness and Safety
    - 25.3.3 Preparation of Dilution
  - 25.4 Dilution Plate Counting and Distribution of Bacteria
    - 25.4.1 Pure Culture Techniques Tube transfers
    - 25.4.2 Pure Culture
    - 25.4.3 Preparation and Testing of Culture Media
    - 25.4.4 Sterilization
    - 25.4.5 Steam Sterilization
    - 25.4.6 Flaming
    - 25.4.7 Hot Air
    - 25.4.8 Preservation of Strains
    - 25.4.9 Elaboration of a Processing
    - 25.4.10 Laboratory Scale
    - 25.4.11 Small Scale Production
    - 25.4.12 Problems of Contamination of Microbial Processes
    - 25.4.13 Sterility of Microbial Process
    - 25.4.14 Sensitivity of Microbial Processes to and Protection against Contamination
    - 25.4.15 Pilot-Plant-Fermenters
- 26. SPRAYING PESTICIDES SAFELY IN GREENHOUSES: A NEW TECHNIQUE
  - 26.1 Introduction
  - 26.2 Greenhouse Spraying Requirements
  - 26.3 Design of the New System
  - 26.4 Fog Generation

- 26.4.1 Atomizer Nozzles
  - a. Internal Mix Model
  - b. External Mix Model
  - c. Jet Impact Model
- 26.4.2 Experimental Tests on Nozzles
- 26.4.3 Numerical Simulation of Leaf Spraying
- 26.4.4 Experimental Tests with Various Crops
- 26.4.5 Test Parameters and Results
- 26.5 Defined Volume
- 26.6 Fixed Covering Prototypes
  - 26.6.1 First Fixed-Covering Prototype
  - 26.6.2 Second Prototype with a Fixed Covering
- 26.7 Prototype with Retractable Covering (DeVoPeS)
- 26.8 DeVoPeS Work Cycle
- 26.9 Greenhouse Testing
- 27. GREEN PESTICIDES FOR ORGANIC FARMING: OCCURRENCE AND PROPERTIES OF ESSENTIAL OILS FOR USE IN PEST CONTROL
  - 27.1 Plants and Essential Oils
    - 27.1.1 Technology of Using Eucalyptus Oil
    - 27.1.2 Aromatherapy
  - 27.2 Essential Oil Pharmacological Properties
    - 27.2.1 Antiseptic
    - 27.2.2 Expectorant and Diuretic
    - 27.2.3 Spasmolytic and Sedative
    - 27.2.4 Other Related Properties
  - 27.3 Pesticidal Properties
- 28. REGULATED SOCS: PESTICIDES, COMMON TRADE NAMES, AND RELATED CHEMICALS
- 29. HOW TO START AN INSECTICIDE INDUSTRY
  - 29.1 Steps
    - 29.1.1 Understand the Industry
  - 29.2 Conduct Market Research and Feasibility Studies
    - 29.2.1 Demographics and Psychographics
  - 29.3 Decide Which Niche to Concentrate on
  - 29.4 Economic Analysis
  - 29.5 Decide Whether to Buy a Franchise or Start from Scratch
  - 29.6 Know the Possible Threats and Challenges Will Face
  - 29.7 Choose the Most Suitable Legal Entity (LLC, C Corp, S Corp)
  - 29.8 Choose a Catchy Business Name
  - 29.9 Discuss with an Agent to Know the Best Insurance Policies
  - 29.10 Protect Intellectual Property with Trademark, Copyrights, and Patents
  - 29.11 Get the Necessary Professional Certification
  - 29.12 Get the Necessary Legal Documents Need to Operate
  - 29.13 Raise the Needed Startup Capital
  - 29.14 Choose a Suitable Location for Business
  - 29.15 Hire Employees for Technical and Manpower Needs
  - 29.16 Write a Marketing Plan Packed with Ideas & Strategies
  - 29.17 Develop Strategies to Boost Brand Awareness and

Create a Corporate Identity

## 30. INSECTICIDES

### 30.1 Type of Activity

#### 30.1.1 Systemic Insecticides

#### 30.1.2 Contact Insecticides

#### 30.1.3 Ingested

## 31. REGULATIONS

## 32. INSECTICIDE FORMULATIONS

### 32.1 Types

#### 32.1.1 Dusts

#### 32.1.2 Wettable Powders (WPs) or Water Dispersible Powders (WDP)

#### 32.1.3 Emulsifiable Concentrates (ECs) or( E)

#### 32.1.4 Suspension Concentrates (SCs) or Flowables

#### 32.1.5 Water Soluble Powder (SPs)

#### 32.1.6 Solutions(S)

#### 32.1.7 Granules (G)

#### 32.1.8 Water Dispersible Granules (WGs)

#### 32.1.9 Ultra-low-Volume (ULV) Formulations

#### 32.1.10 Aerosols

#### 32.1.11 Controlled Release (CR) Formulations

#### 32.1.12 Baits

### 32.2 The Non-Insecticidal Ingredients of Formulations

#### 32.2.1 Solvents

#### 32.2.2 Diluents

#### 32.2.3 Surfactants

### 32.3 Insecticide Application Equipment

#### a. Sprayers

#### b. Dusters

#### c. Granular Applicator

## 33. LIST OF INSECTICIDE

## 34. PRODUCT HARVESTING AND FORMULATION OF MICROBIAL INSECTICIDES

### 34.1 Product Harvesting

### 34.2 Formulation

#### 34.2.1 Oil Suspension Formulation

#### 34.2.2 Dusts or Wettable Powder

#### 34.2.3 Suspension Concentrates (SC)

### 34.3 Processing

#### 34.3.1 Function of the Surfactants

#### 34.3.2 Wetting

#### 34.3.3 Milling Aid

#### 34.3.4 Stabilization

#### 34.3.5 Milling Conditions

### 34.4 Suggested Evaluation Technique of Flowables

- Test of Mechanical Stability
- Suspensibility
- Storage Stability
- Viscosity
- Bloom
- Biological Activity

### 34.5 Evaluation of Separation Process "Recovery"

## 35. FUNGICIDE

### 35.1 Types

### 35.2 Mode of Action

- 35.3 Type of Chemical
- 35.4 Resistance
- 35.5 Fungicide Resistance Management
- 36. HERBICIDE
  - 36.1 Application
  - 36.2 Selectivity
  - 36.3 Translocation
  - 36.4 Mode-of-Action
  - 36.5 Growth Regulator Herbicides
  - 36.6 Photosynthesis Inhibitors
  - 36.7 Pigment Inhibitors
  - 36.8 Seedling Growth Inhibitors
  - 36.9 Cell Membrane Disruptors and Organic Arsenicals
  - 36.10 Lipid Synthesis Inhibitors
  - 36.11 Amino Acid Synthesis Inhibitors
  - 36.12 Other Herbicides that Inhibit Amino Acid Synthesis
- 37. FORMULATIONS OF HERBICIDE
  - 37.1 The Foundation of Formulations
  - 37.2 Types
    - 37.2.1 Solutions (Water Soluble Concentrate and Soluble Powder)
    - 37.2.2 Emulsions (Emulsifiable Concentrate)
    - 37.2.3 Dry Material Suspensions (Wettable Powders, Dry Flowables, Water Dispersible Granules/Powders)
    - 37.2.4 Granules
- 38. PESTS OF THE GREENHOUSE
  - 38.1 Insect Anatomy
  - 38.2 Insect Damage
  - 38.3 Sucking Insects and Their Damage
