

Industrial Chemicals Technology Hand Book

Author: NIIR Board

Format: paperback

Code: NI85

Pages: 556

Price: Rs 1100 | US\$ 125

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

Growth in demand for chemicals in developing countries is high leading to substantial cross border investment in the chemical sector. The chemical industry comprises the companies that produce industrial chemicals. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to manufacturing, construction, and service industries. The applications of industrial chemical are in various fields like in organic chemicals, paint, varnishes, resins, petroleum, pigments, printing inks, acrylics polyesters engineering thermoplastics. The chemical industry itself consumes 26 percent of its own output. In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical industry is one of the oldest industries in India. It not only plays a crucial role in meeting the daily needs of the common man, but also contributes significantly towards industrial and economic growth of the nation. The chemical industry forms the backbone of the industrial and agricultural development and provides building blocks for downstream industries; it is an important constituent of the Indian economy. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%. Global chemical production is growing and the growth is contributed by the chemical industry of developing countries.

The book contains manufacturing processes, reactions, equipments details, process flow diagram of number of chemicals, which have huge industrial uses. The major contents of the book are iodine from oil well brines, lactic acid from corn sugar, modern production of chlorine and caustic soda, organic chemicals, chemicals derived from methane and so on.

This book is very useful for new entrepreneurs, industrialists, consultants, research scholars, technical institutions, chemists and libraries. This book is recommended to all related to field of chemical process technology.

Contents

1. Iodine From Oil Well Brines

Brine Collection

Brine Cleanup

Blowing-Out And Recovery

Iodine Finishing

Process Control

2. Lactic Acid From Corn Sugar

Dextrose, Whey, Or Molasses May Be Used For Lactic Acid Fermentations

Four Different Grades

In Commercial Practice Yields Of 85% Of Fermentable Hexose Are Normal

L. Delbruckii Is Culture Used; Corn Sugar Is Principal Fermentation Medium

Calcium Lactate Is Produced During 4- To 6-Day Fermentation Period
Recycled Calcium Sulfate Added To Aid Filtration
Calcium Lactate And Sulfuric Acid React To Form Lactic Acid
Stainless Steel Is Used For Acid Evaporators
Calcium Lactate Is Also Processed As An End Product
Fermentation Processes Operate Around The Clock
Corrosion Is A Major Problem In Production Of Lactic Acid
Foods And Tanning Industries Use Large Quantities Of Lactic Acid
Salts And Other Derivatives Are Used In Diversified Industries
Future Expansions In Lactic Acid Production Must Supply A Quality Product At A Lower Price

3. Modern Production Of Chlorine And Caustic Soda

Raw Materials
Storage And Preparation
Chlorine Production
Caustic Preparation
Hydrogen Chloride
Filling And Storage Systems
Instrumentation And Safety

4. Nitrofurans

Uses For Nitrofurans Extend Into Fields Of Both Human And Veterinary Medicine
Synthesis Of 5-Nitro-2-Furaldehyde Diacetate Is Initial Phase Of Batchwise Procedure
5-Nitro-2-Furaldehyde Diacetate Is Reacted With Semicarbazide To Form Nitrofurazone
Synthesis Of Furazolidone Is Based On Reaction Of 3-Amino-2-Oxazolidone With 5-Nitro-2-Furaldehyde Diacetate
Analytical Tests Are Run On All Raw Materials And Final Products

5. Organic Chemicals

Chemicals Derived From Methane
Synthesis Gas
Chloromethanes
Acetylene
Hydrogen Cyanide
Carbon Disulfide
Chemicals Derived From Ethylene
Polyethylene
Ethylene Oxide
Chlorinated Ethanes And Ethylenes
Ethanol
Ethylbenzene
Acetaldehyde, Acetic Acid, Acetic Anhydride, Vinyl Acetate
Ethylene Oligomers (Alpha Olefins) And Linear Primary Alcohols
Ethylene-Propylene Elastomers
Propionaldehyde
Other Ethylene Uses
Chemicals Derived From Propylene
Polypropylene
Acrylonitrile
Propylene Oxide
Isopropyl Alcohol

Cumene
Oxo Chemicals
Propylene Oligomers, Dodecene, And Nonene 91
Acrylic Acid And Esters
Glycerin
Chemicals Derived From Butanes And Butylenes
N-Butane Derivatives
Isobutanes
Butylenes
Isobutylene
Butadiene
Higher Aliphatic Hydrocarbons
Cyclopentadiene
Isoprene
N-Paraffins
Linear Olefins
Primary And Secondary Higher Alcohols
Chemicals Derived From Benzene, Toluene, And Xylene
Chemicals From Benzene
Styrene
Cumene (Phenol)
Cyclohexane
Maleic Anhydride
Detergent Alkylate
Nitrobenzene (Aniline)
Chlorobenzenes
Derivatives Of Toluene
Toluene Diisocyanate (Tdi)
Benzoic Acid
Benzyl Chloride
Chemicals From Xylene
Terephthalic Acid (Dimethyl Terephthalate)
Phthalic Anhydride
Isophthalic Acid
Naphtalene Derivatives

6. Paint, Varnishes, Resins

Butyl Acetate
N-Butyl Acetate
Iso-Butyl Acetate
Sec. Butyl Acetate
Tert-Butyl Acetate
Manufacturing Process
Note
Reaction
Flow Diagram
Uses
Grades
Toxicity
Epoxy Resins
Properties

Properties Of Typical Commercial Bisphenol A Epoxy Resins.

Manufacturing Process

Formaldehyde

Manufacturing Process

From Methanol

Hexamethylene Tetramine

Manufacturing Process

From Formaldehyde And Ammonia

Reaction

Flow Diagram

Uses

Grades

Toxicity

Solubility Of Pentaerythritol

Manufacturing Process

From Formaldehyde And Acetaldehyde

Reaction

Flow Diagram

Note

Uses

Grades

Specifications Of Pentaerythritol

Toxicity

7. Petroleum And Its Products

The Nature Of Petroleum

Largest Energy Supplier

Product Names

Refined Product

Product Specifications

Product Yields

Petrochemicals

Refining Schemes

Feedstock Identification

Crude Oil Pretreatment

Crude Oil Fractions

Gasoline

Volatility

Sulfur Content

Octane Number

Distillates

Residuals

Producing More Light Products

Cracking

Vacuum Distillation

Reconstituting Gases

A Modern Refinery

Petrochemicals

Process Details

Crude Desalting

Crude Distillation

Hydrotreating
Catalytic Reforming
Catalytic Cracking
Coking
Hydrocracking
Polymerization
Alkylation
Ether Processes
Future Processing

8. Pigments

Carbon Black
From Oil Or Natural Gas (Furnace Process)
Reaction
Flow Diagram
Note
From Natural Gas (Channel Process)
Reaction
Note
Uses
Grades
Titanium Dioxide
Typical Pigment Properties Of Anatase And Rutile Tio₂
Typical Crystal Properties Of Rutile And Anatase Tio₂
Manufacturing Process
Sulphate Process
Note
Reaction
Chloride Process
Note
Grades
Toxicity
Manufacturing Process
From Zinc Metal
(French Or Indirect Process)
Note
Reaction
Flow Diagram
From Zinc Sulphide Ores
Reaction
Flow Diagram
Note
Uses
Grades
Toxicity

9. Pigments, Paints, Polymer Coatings Lacquers, And Printing Inks

Powder Coatings
Electron Beam (Eb) And Ultraviolet (Uv) Curable Coatings
Current Automotive Coating Trends
Coatings For Plastics

New Cross-Linking Technologies

Printing Inks

Pigments

Inorganic Pigments

Organic Pigments

Pearlescent Pigments

Aluminum Pigments

Lacquers

10. Potassium Borohydride Manufacture

Like Sodium Borohydride

Metal Hydride's Process

Potassium Borohydride's Properties

First Make Sodium Hydride Dispersion

Next Major Step-Make Sodium Borohydride

Mineral Oil Dispersion

Splitting Comes Next

Analytical Program

11. P-Xylene From Petroleum

Low Temperature Crystallization Is The Standard Recovery Method

Eutectic Point Limits P-Xylene Yield To 10% Of The Xylene

First Crystallization Stage Produces 80% Purity P-Xylene

Secondary Crystallization Increases Product Purity To Better Than 95%

Product Quality Depends Largely On Crystallization Techniques

12. Reagent Grade Chemicals

Standardization

Barium Chloride

Sulfanilic Acid

Magnesium Sulfate

Ferrous Ammonium Sulfate

Potassium Metaperiodate

Cuprous Thiocyanate

Analysis And Packaging

Future Prospects

13. Salt Manufacture

The Brine Must Be Purified Before Use

Multiple Effect Evaporators Are Used For Vacuum Pan Salt

Salt Evaporation Has Many Special Problems

Dewatered Salt Must Be Dried, Screened, And Packaged

Grainer Salt Is Made By Evaporation In Open Pans

14. Sulfuric Acid From Anhydrite

Theoretical Studies And Chemistry Of Anhydrite Process

Contact Process

15. Synthetic Methanol Production

History Of Synthetic Methanol

Foreign Development

Operating Data For Methanol Process

Gas Stream

Steam Systems

Water Systems

Synthesis Gas Preparation

Addition Of Carbon Dioxide

Compressor Cycle

Converter System

Converter Auxiliaries

Refining By Distillation

Loading And Shipping

Instrumentation

Chemical Control

Maintenance Procedure

16. Synthetic Nitrogen Products

Nitrogen Fixation

Nitrogen Oxides

Ammonia

Other Processes

Calcium Cyanide

Ammonia

Manufacturing Processes

Carbon Monoxide Shift

Carbon Dioxide Removal

Water

Hot Potassium Carbonate

Monoethanolamine (Mea)

Sulfinol

Propylene Carbonate

Rectisol-Refrigerated Methanol

Giammarco-Vetrocoke

Final Purification

Methanation

Nitrogen Wash Operation

Copper Ammonium Carbonate Scrubbing

Selective Oxidation Of Carbon Monoxide

Cryogenic Purifier

Compression

Ammonia Synthesis

Modern Single-Train Ammonia Plants

Uses Of Ammonia

Nitric Acid

Chemistry Of Ammonia Oxidation

Processes

Uses Of Nitric Acid

Ammonium Nitrate

Urea

Uses Of Urea

Melamine

Aliphatic Amines

Methylamines
 Hexamine
 Hydrazine
 Manufacture
 Hydrazine Handling
 Hydrogen Cyanide
 Manufacture
 Other Compounds
 17. Synthetic Resins & Plastics
 Introduction
 Polymer Structure And Nomenclature
 Properties Of Resins And Plastics
 Important Classes Of Plastics And Ins: Thermoplastics Polyolefins
 Vinyl Resins
 Polystyrene And Styrene Copolymers

 Acrylics
 Polyesters
 Engineering Thermoplastics
 Important Classes Of Plastics And Resins: Tosets 433
 Polyurethanes
 Phenolic Resins
 Unsaturated Polyester Resins
 Epoxies
 Silicone Resins
 Polymer Synthesis
 Free Radical Addition Polymerization
 Ionic Chain Addition Polymerization
 Ring Opening Addition Polymerization
 Polymer Modification
 Polymerization Methods
 Polymer Rheology
 Fabrication Of Plastics
 Extrusion
 Injection Molding
 Reaction Injection Molding (Rim)
 Compression And Transfer Molding
 Pultrusion
 Blow Molding
 Thermoforming
 Rotational Molding
 Foamed Plastics
 Plastics And Environmental Issues

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project

report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
