

The Complete Technology Book on Chemical Industries

Author: NIIR Board

Format: paperback

Code: NI89

Pages: 443

Price: Rs 975 | US\$ 100

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Shipping: 5 days

About the Book

In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical Industry in India is one of the fastest growing industries under the Indian economy. The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials into more than 70,000 different products. Chemicals have contributed in various sectors like food industry, fertilizers, perfumery, fragrance and flavour etc. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to agriculture, manufacturing, construction, and service industries. There are numerous chemicals produced in chemical industry for example chloroform, caffeine, fertilizers, dyes, drug intermediates, herbicide, inorganic salts, copper sulphate, acetaldehyde etc. The chemical industry itself consumes 26 percent of its own output. The Chemical Industry in India is based on the idea of diversification. For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis, fertilizers, etc. Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals, fertilizers, fine chemicals like dyes and paints etc. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%.

This book majorly deals with the molecular formula, raw materials, properties, laboratory testing, manufacturing process explained with flow diagrams and uses of the chemicals. The major contents of the book are inorganic salts, inorganic chemicals, industrial gas, fertilizers, alum, caffeine, ceramic chemicals etc. This book covers the production of more than 100 chemicals for example acetanilide, methylamine, butylamine, linalol, phosphorous, salicylic acid etc.

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems.

Contents

1. 2-Chloro-6(Trichloromethyl)-Pyridine

Introduction

Classification

Uses and Applications

Industrial Prospect

Formulations

Process of Manufacture
Laboratory Testing
Determination of Pyridine Content
Apparatus
Test Substances
Procedure
Chart Speed
Calculation

2. Alkylamines

Methylamine
Ethylamine
Propylamine
Isopropylamine
Butylamine
Isobutylamine
Amylamine
Monoethanolamine
Diethanolamines
Triethanolamine
Manufacturing Process
Reaction
Uses
Grades
Toxicity
Polypropylene
Manufacturing Process
Hercules Polypropylene Process
Uses
Grades
Polyethylene
Manufacturing Process
From Ethylene by Low-Pressure Polymerization
(Phillips Process)
Uses
Grades
Toxicity
Vinyl Acetate
Manufacturing Process

3. Alum

Introduction
Raw Material Requirements
Reactions
Process of Manufacture
Uses
Plant & Machinery
Market Potential
Plant Economics
Analytical Testing of Ammonium Alum
EDTA Method

Reagents
Procedure
Calculation
Gravimetric Method
Laboratory Testing of Aluminium Sulphate
Introduction
Procedure

4. Bleaching Powder
Introduction
Properties
Properties
Uses
Process of Manufacture
Laboratory Testing
Glacial Acetic Acid
Calculation

5. Caffeine (C₈H₁₀N₄O₂.H₂O)
From Tea Waste
Raw Material Requirements
Process
Properties
Purity
Reagents and Apparatus
Standardization
Procedure A : (Potentiometric)

6. Ceramic Chemicals
Boric Acid
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity

7. Chemical and Additive for Food Industry
Citric Acid
Properties
Lactic Acid
Molecular Formula
Manufacturing Process
Sodium Bicarbonate
Manufacturing Process

8. Chloroform (Trichloromethane) CHCl₃
Chloroform
Molecular Formula
Properties

From Methane by Chlorination
Material Requirements (Theoretical)
Process
From Acetone and Bleaching Powder
Reaction
Material Requirements
Process
Grades
Purity
Determination of Relative Density
Apparatus
Procedure
Calculation
Determination of Distillation Yield
Apparatus
Assembly of the Apparatus
Procedure

9. Chloram Phenicol (p)(-)-Threo-1-(Para-nitrophenyl)-
2-dichloroacetamide-1, 3-propanediol
Reaction
Raw Material Requirements
Manufacturing Process
Properties
Grades
Purity

10. Coumarin (C₉H₆O₂)
From Salicylaldehyde
Reaction
Properties
Grades
Use & Application
Process of Manufacture
Laboratory Testing
Apparatus
Coumarin
Procedure
Reaction with Iodine Solution

11. Construction Material
Lime (Calcium Oxide)
Properties
Manufacturing Process
Hydrated Lime
Chemical Lime
Reaction
Flow Diagram
Uses
Grades
Toxicity

12. Corrosion Inhibitor

Sodium Dichromate

Manufacturing Process

From Chromite Ore

Reaction

Flow Diagram

Uses

Grades

Toxicity

13. Drug Intermediates & Pharmaceuticals

Acetanilide

Molecular Formula

Properties

Manufacturing Process

Reaction

Uses

Specification of Commercial Graders

Toxicity

14. Dry Cleaning Solvent

Perchloroethylene

Molecular Formula

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

Grades

Toxicity

15. Dyes and Intermediates

Aceto-Acetanilide

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

Grades

Toxicity

Anthraquinone

Properties

Manufacturing Process

From Phthalic Anhydride and Benzene

Raw Material requirements

b-Naphthol

Properties

Manufacturing Process

From Naphthalene

Raw material requirements

Bon Acid (3-Hydroxy-2 Naphthoic Acid)

Properties

Manufacturing Process

Raw material requirements

Reaction

Flow Diagram

Uses

Grade

G-Acid (2-Naphthol-6, 8 Disulphonic Acid)

Properties (Sodium Salt)

Manufacturing Process

Reaction

Uses

H-Acid

Properties

Manufacturing Process

Reaction

Flow Diagram

Uses

Naphthalene

Manufacturing Process

Process

Naphthol Asg

Manufacturing Process

Raw material requirements

Reaction

Flow Diagram

Uses

Grades

Rhodamine B (Basic Dye)

Properties

Manufacturing Process

From Phthalic Anhydride

Raw material requirements

Reaction

Flow Diagram

Uses

Grades

Toxicity

16. Ester Gum

Field of Applications

Classification

Manufacture

Laboratory Testing

Reagents

Driers

Procedure

Determination of Gel Time

General

Reagents

Procedure

17. Fatty Acids

Properties

Manufacturing Process

Raw Material Requirement

Reaction

Flow Diagram

Uses

Grades

Toxicity

18. Fertilizers

Introduction

Nutrition requirements of crops

Overview of the fertilizer industry

Nitrogen Fertilizers

Miscellaneous low-volume nitrogen fertilizers

Nitrogen fertilizers from synthetic ammonia

Phosphate Fertilizers

Natural Organic Phosphate Fertilizers

Fertilizers from Mineral Phosphates

Potassium Salts

Potassium Minerals

Potassium-Magnesium Minerals

Potassium Sulfate

Potassium Nitrate

Potassium Phosphates

Mixed Fertilizers

Nongranular Mixtures

Compound Granulars

Bulk Blends

Fluid Mixtures

19. Gaur Gum (Galactomannan Gum)

From Guar Seeds (Dry Process)

Raw Material Requirements

Process

Other Processes

Properties

Grades

Containers

Purity

Procedure

Calculation

Determination of Ash

Procedure

Calculation

Determination of Protein

Apparatus

Reagents

Calculation

Determination of Residue Insoluble in Acid

Reagents

Procedure

Calculation

Determination of Gum Content

Procedure

Economic Aspects

20. Herbicide

2, 4-Dichloro Phenoxy Acetic Acid (2, 4-D Acid)

Manufacturing Process

Raw Material requirements

Reaction

Flow Diagram

Uses

Grades

Toxicity

21. Industrial Gases

Overview

Nitrogen

Oxygen

Argon

Hydrogen

Helium

Carbon Dioxide - CO₂

Liquefied Natural Gas

Acetylene

Nitrous Oxide

22. Industrial Halogens

Bromine

Manufacturing Process

Bromine from Sea Water

Reaction

Raw material requirements

Reaction

Uses

Grades

Toxicity

Chlorine

Properties

Manufacturing Process

From Salt by Electrolysis

Raw material requirements (Diaphragm cell)

Reaction

Uses

Grades

Toxicity

Iodine

Manufacturing Process
From Oil-well Brines (Silver iodide process)
Raw material requirements
Reaction
Uses
Grades
Toxicity

23. Inorganic Chemicals - With Multipurpose
end use

Activated Alumina
Manufacturing Process
From Alum and Caustic Soda
Raw material requirement
Reaction
Uses
Grades
Toxicity

Activated Carbon
Properties
Manufacturing Process
From Charcoal
Raw Material Requirements
Uses
Grades
Toxicity

Phosphorus Oxychloride
Properties
Manufacturing Process
From Phosphorus Trichloride and Phosphorus
Pentoxide
Raw material requirements
Reaction
Uses
Grades
Toxicity

Sodium Acetate
Properties
Manufacturing Process
From Acetic Acid and Soda Ash
Raw material requirements
Reaction
Uses
Grades
Toxicity

Sodium Chloride
Properties
Manufacturing Process
By Solar Evaporation
Raw material requirements
Major Engineering Problems

AN ISO 9001 : 2015 CERTIFIED COMPANY

Uses
 Grades
 Toxicity

24. Inorganic Salts

Aluminium Chloride

Properties

Manufacturing Process

From Aluminium Metal and Chlorine

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Chloride

Properties

Manufacturing Process

From ammonium sulphate and sodium chloride

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Nitrate

Properties

Manufacturing Process

From Ammonia and Nitric Acid

Raw Material Requirements

Barium Carbonate

Properties

Manufacturing Process

From Barium Sulphide and Carbon Dioxide

Raw material requirements

Reaction

From Barium Sulphide and soda Ash

Raw material requirements

Reaction

Uses

Grades

Toxicity

Copper Sulphate

Properties

Manufacturing Process

From Cupric Oxide and Sulphuric Acid

Raw material requirements

Reaction

Uses

Grades

Toxicity

Uses

Grades

Toxicity
Ferrous Sulphate Heptahydrate
Properties
Manufacturing Process
From Steel Pickling Liquor
Raw material requirements
Reaction
Uses
Grades
Toxicity
Potassium Silicate
Properties
Manufacturing Process
From Sodium Silicate
Raw material requirements
Uses
Grades

25. Linalol
Introduction
Raw Materials Required
Process
Miscellaneous
Properties
Containers
Grades
Uses
Plant & Machinery
Plant Economics
Market Potential

26. Litharge (Lead Monoxide, Yellow Lead Oxide) pbo
By Air Oxidation of Lead Metal (4 Alternate Processes)
Reaction
Material Requirements
Process
Properties
Grades
Containers
Purity
Determination of Litharge Content
General
Volumetric Method
Reagents
Procedure
EDTA Method
Reagents
Procedure
Economic Aspects

27. Metallic Stearates

- Aluminium Stearate
- Calcium Stearate
- Magnesium Stearate
- Lead Stearate
- Zinc Stearate
- Metallic Stearates
- Manufacturing Process
- Raw material requirements
- Aluminium Stearate
- Test
- Reaction
- Uses
- Aluminium Stearate
- Calcium Stearate
- Lead Stearate
- Magnesium Stearate
- Zinc Stearate
- Grades
- Toxicity

28. Metal Treatment and Degreasing chemicals

- Chromic Acid
- Properties
- Manufacturing Process
- From Sodium Dichromate
- Raw material requirements
- Reaction
- Uses
- Grades
- Trichloroethylene
- Properties
- Manufacturing Process
- From Acetylene and Chlorine
- Raw material requirements
- Reaction
- Uses
- Grades
- Toxicity

29. Natural Gas

- Characteristics
- Occurrence of Natural Gas
- Preparing Natural Gas for Transmission and Sale
- Processing for Liquids Recovery

30. Acetaldehyde

- Properties
- Aceto Acetic Ester
- Properties

Manufacturing Process
 Raw Material Requirement
 Reaction
 Uses
 Grades
 Toxicity
 Fire Fighting
 Aniline
 Properties
 Manufacturing Process
 From Nitrobenzene by reduction
 Raw Material requirements
 Benzaldehyde
 Properties
 Manufacturing Process
 Oxidation of Toluene
 Raw material requirements
 Reaction
 Uses
 Grades
 Specifications for Benzaldehyde
 Toxicity
 Carboxy methyl cellulose (sodium Salt)
 Properties
 Manufacturing Process
 From Waste Cotton (or cellulose)
 Raw material requirements
 Reaction
 Uses
 Grades
 Ethylene Dichloride
 Properties
 Manufacturing Process
 From Ethylene and Chlorine
 Raw material requirements
 Glycerine
 Properties
 Manufacturing Process
 Raw material requirements
 8-Hydroxy Quinoline
 Properties
 Manufacturing Process
 Raw material requirements
 Uses
 Grades
 Toxicity

31. Perfumery, FragNance and Flavour
 Chemicals
 Benzyl Acetate
 Properties

Manufacturing Process

Raw material requirements

Reaction

Coumarin

Properties

Manufacturing Process

Raw material requirements

Reaction

Uses

Grades

Toxicity

Phenylacetic Acid

Properties

Manufacturing Process

From Benzyl Chloride

Raw material requirement

Reaction

Uses

Grades

Toxicity

Vanillin

Properties

Manufacturing Process

From Waste Sulphite Pulp Liquor

Raw material requirements

Reaction

Uses

Grades

Toxicity

32. Phosphorus and Phosphates

Introduction

Phosphate Rock

Resources

Phosphate Ores

Mining

Beneficiation

Elemental Phosphorus and Phosphoric Acid

Furnace Phosphoric Acid

Industrial Phosphates

Wet Process Phosphoric Acid

Dihydrate Process

Major Dihydrate Processes

Hemihydrate Processes for Phosphoric Acid

Unit Operations

Superphosphoric Acid

Wet Process Acid by-Products

Phosphogypsum

Fluorine Recovery

Uranium Recovery

Purified Phosphoric Acid

Environmental Aspects

33. Plasticiser

Chlorinated Paraffin Wax

Molecular Formula

Properties

Dialkyl Phthalates

Dimethyl Phthalates

Properties

Diethyl Phthalate

Properties

Dibutyl Phthalates

Properties

Dioctyl Phthalates

Properties

Diamyl Phthalates

Properties

Manufacturing Process

From Phthalic Anhydride and Alcohol by
Esterification

Raw material requirements

Dibutyl phthalate

Reaction

Uses

Grades

Toxicity

Tricresyl Phosphate

Properties

Manufacturing Process

From Cresol and Phosphorus Oxychloride

Reaction

Uses

Grades

Toxicity

34. Potassium Permanganate (KMnO₄)

Properties

From Manganese Ore

Reaction

Material Requirements

Process

From Potassium Manganate by Electrochemical

Oxidation

Reaction

Material Requirements

Process

Grades

Containers

Purity

Determination of Potassium Permanganate Content

Reagents

Procedure
Calculation
Economic Aspects

35. Red Iron Oxide

Introduction
Raw Material Requirements
Process
Plant and Machinery
Uses
Market Potential
Plant Economics
Properties
Grades
Containers
Determination of Ferric Oxide (Red)
Reagents
Procedure
Calculation

36. Red Lead (Pb_3O_4)

Introduction
Raw Material Requirements
Process of Manufacture
Plant and Machinery
Plant Economics
Economic Aspects/Market Potential
Miscellaneous
Properties
Grades
Containers
Hazard
Uses
Analytical Testing
Determination of Lead
Procedure
Calculation

37. Resorcinol (3-Hydroxy Phenol)

From Benzene
Reaction
Raw Material Requirements
Process
Properties
Grades
Containers
Purity
Economic Aspects

38. Rubber & Rubber Chemicals

Butadiene

Properties
Manufacturing Process
From Butane by Dehydrogenation (Hydro
Catadiene process)
Raw material requirements
Reaction
Uses
Grades
Toxicity
Chlorinated Rubber
Properties
Manufacturing Process
Raw material requirements
From Rubber Solution
Test
Uses
Grades
Diphenylamine
Properties
Manufacturing Process
From Aniline
Raw material requirement
Reaction
Uses
Grades
Toxicity

39. Saccharin
Alkali Oxidation Process
Raw Material Requirements
Process
Sodium Dichromate Process
Chromic Acid Process
Sodium Saccharin
Liquid Saccharin
Properties
Grades
Purity
Economic Aspects

40. Salicylic Acid
From Phenol
Reaction
Material Requirements
Process
Properties
Grades
Containers
Purity
Reagents
Procedure

Economic Aspects

41. Silica Gel $\text{SiO}_2 \cdot n\text{H}_2\text{O}$

From Sodium Silicate and Sulphuric Acid

Raw Material Requirements

Process

Properties

Grades

Containers

Purity

Procedure

Water Soluble Chlorides

Reagents

Procedure

Calculation

Cobalt Assessment

Reagents

42. Salt, Chlor-Alkali, and Related Heavy

Chemicals

Sodium Chloride

Soda Ash

Sodium Bicarbonate

Sodium Sulfate

Sodium Sulfides

Sodium Thiosulfate

Sodium Sulfite

Sodium Bisulfite

Sodium Hyposulfite

Sodium Phosphates

Sodium Silicate

Chlor-Alkali (Chlorine and Caustic Soda)

Hydrochloric Acid

Bromine and Brine Chemicals

Bleaches

Sodium Chlorate

43. Silicone Resin

Manufacturing Process

Laboratory Testing

Silicone Resin

Rapid Method for Determination of Silicone
Laboratory Testing
Silica Resin
Determination of Silica by the Gravimetric Method
Reagents
Procedure
Properties
Calculation

44. Solvents

Acetone
Properties
Carbon Tetrachloride
Properties
Manufacturing Process
From Carbon Disulphide and Chlorine
Raw material requirements
Chlorobenzene And Dichlorobenzene
Chlorobenzene
p-Dichlorobenzene
Properties
Ethyl Acetate
Properties
Manufacturing Process
From Ethyl Alcohol and Acetic Acid by
Esterification
Raw material requirements
Isopropyl Alcohol
Properties
Manufacturing Process
From Propylene
Raw material requirements
Methyl Alcohol (Methanol)
Properties
Manufacturing Process
From Carbon Monoxide and Hydrogen
Raw material requirements
Methyl Ethyl Ketone
Properties
Manufacturing Process
From Secondary Butyl Alcohol by Dehydrogenation
Raw material requirements
Reaction
Uses
Grades
Toxicity
Nitrobenzene
Properties
Manufacturing Process
From Benzene and Nitric Acid
Raw material requirements

Nitroparaffins
Nitromethane
Properties

45. Sulfur and Sulfuric Acid

Sulfur
Development of the Sulfur Industry
Sulfur Production Processes
Recovered Sulfur
Sulfuric Acid
Uses of Sulfuric Acid
Manufacture of Sulfuric Acid by the Contact
Process
Sulfur Dioxide production
Conversion of SO₂ to H₂SO₄
Absorption of SO₃
Other Sources of Sulfuric Acid

46. Ultramarine Blue

47. Raw Material Requirements

Process

Procedure

Calculation

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.

NIIR PROJECT CONSULTANCY SERVICES

106-E, Kamla Nagar, New Delhi-110007, India
