

The Complete Technology Book on Detergents (2nd Revised Edition)

AN ISO 9001 : 2015 CERTIFIED COMPANY

Author: NIIR Board of Consultants Engineers**Format:** paperback**Code:** NI92**Pages:** 542**Price:** Rs 1100 | US\$ 125**Publisher:** NIIR PROJECT CONSULTANCY SERVICES**Shipping:** 5 days

About the Book

The Indian detergent industry is about three decades old. An interesting and unique feature of detergent industry in India is the existence of non power operated units which do not use any electrical power for the production of detergent powder. But the production technology of detergents have been changed involving high technique in process control, more skilled personnel and requiring large input. There are various forms of detergents; liquid detergents, paste detergents, solid detergents etc. Whether in liquid or in powdered forms, present detergent products are complex mixtures of several ingredients including performance additives such as bleaches, bleach activators etc. The scope and spectrum of methods and techniques applied in detergent analysis have changed significantly during the last decade..

The book outlines features and experimental parameters for many essential procedures, and emphasizes the latest techniques and methods. This book emphasizes practical aspects of detergent production with latest development and other special products based on synthetic surfactants. This book basically deals with the builders, additives and components of

detergents, recent developments in surfactant, manufacture of active Ingredients for

detergents, manufacture of finished detergents, application and formulation of

detergents, packaging of detergents, analysis of detergents, machinery photographs with their suppliers,

directory of raw material suppliers etc.. This is an attempt to fill the need of those desirous of starting detergent industry in small scale sector and necessarily contains analytical methods for testing and evaluation of raw as well as final products.

Contents

1. Introduction

Definition

Biodegradability

Synthetic Detergents

Introduction

Surfactant Hydrophile-Hydrophobe Balance

Anionic Surfactants

Alkylaryl Sulfonates

Sulfonation

Sulfation

Neutralization
Nonionic Surfactants
Ethoxylation
Amphoteric Surfactants
Alkylolamides
Cationic Surfactants

2. Builders, Additives and components of detergents

Phosphates
Silicates
Soluble glass
Water glass
Soluble powders
Contribution by the alkaline radical
(Na₂O or K₂O)
Contribution by the SiO₂ radical
Zeolites
Carbonates
Sodium Carbonate or Soda Ash-Na₂CO₃
Sodium Bicarbonate-NaHCO₃
Sodium Sesquicarbonate, or Modified Soda
Potassium Carbonate
Oxygen-releasing Compounds
Sundry Inorganic Builders
Borax
Sodium Chloride
Magnesium Sulphate
Insoluble Inorganic Fillers
Caustic Alkalis
Ammonia
Colloidal Silica
Sodium Hypochlorite

3. Recent Developments in Surfactant

Synthesis
Sulphation of glycerine
Nonionic surfactants
Amphoteric surfactants
Anionic surfactants
Nonionic surfactants
Cationic surfactants
Amphoteric surfactants
Miscellaneous surfactants
Surfactant synthesis
Toxicological studies
Effluent decolorisation
Synthesis of Surfactants and their Toxicity-IV
Diastereoisomers
Fructose C₆H₁₂O₆
Saccharose or sucrose or table sugar

C12H22O11

D-Mannose

D-Galactose

b-Glucosamine

Anionic surfactants

Cationic surfactants

Nonionic surfactants

Sugar-based surfactants

Toxicity of surfactants

4. Manufacture of Active Ingredients for

Detergents

Sulphonation Process

Manufacture of Alkyl benzene sulphonic acid
(Acid Slurry)

Alkyl benzene

Process to obtain straight chain normal
paraffins of desired chain length

Major technologies using molecular sieves
for separation of n-paraffins

Process for alkylation of benzene by narrow
cut (C10-C14) n-paraffin

Review of technologies for production of LAB
from n-paraffins

UOP technology to manufacture lab from
kerosene

Prefractionation unit

Feed preparation (hydrotreater) unit-hydrobon
n-Paraffin Extraction Unit (MOLEX)

Catalytic partial dehydrogenation unit-PACOL
HF alkylation unit

Advance in technology in production of LAB
Improvements in dehydrogenation catalysts
and process

Introduction of additional step to achieve
reduction of by-product diolefins-Define
process

Introduction of a solid catalyst in place of
liquid HF catalyst-UPO-Detal Process

Other raw materials for sulphonation

Sulphuric acid and oleum (fuming sulphuric
acid)

Liquid SO₃

Sulphur

Sulphonation with sulphuric acid and oleum

Batch sulphonation

Manufacturing process

Sulphonation with 98% sulphuric acid

Sulphonation with oleum

Continuous sulphonation with oleum

Chemithon Process

Bellestra sulfan process
Proctor & Gamble Process
Rifenberick process
Sulphonation with SO₃
Production of sulphur trioxide
Sulphur burning SO₃ plant
Oleum stripping
Stabilised liquid sulphur trioxide
vapourisation
Batch sulphonation
Continuous sulphonation with sulphur
trioxide
Cascade sulphonation
SO₃ withdrawal
Sulphonation plant
Exhaust gas scrubbing
Ballestra Sulphurex Process
Air drying
SO₂/SO₃ production
Film sulphonation & sulphation
(Sulphurex F)
Double-step Neutralisation
Alpha olefins hydrolysis
Gas scrubbing
SO₃ absorption in H₂SO₄ column
Heat recovery
Mazzoni SOCS Process
Chemithon SO₃ Sulphonation
SO₃ generation
Sulphonation
Annular falling film reactor
Neutraliser system
Exhaust gas cleaning up system
Allied chemical thin film sulphonation
Stepan chemical process
Manufacture of fatty alcohol sulphonates
Sulphonation with chloro sulphonic acid
Manufacture of alpha olefin sulphonate
Wax cracking
Ethylene polymerisation
The natural route
Comparison of AOS and methyl ester
sulphonate
Comparison of AOS and LABs in various
products
Dish-washing liquids
Fine cloths washing liquids
Laundry soaps
Toilet soaps
Personal care products
Detergent cakes

Comparison of AOS with alcohol based surfactants

Alfodet

Product usage

Ethoxylation Process

Ethylene oxide

Fatty acid

Fatty alcohol

Natural process

Synthetic process

Sodium reduction process

High pressure hydrogenation

OXO Process

ALFOL Process

Alkyl phenols

Manufacture of lauric d-ethanol amide (Ninol AA 62)

Method of manufacture

Manufacture of super amide (2:1 type)

Manufacture of methyl ester

Manufacture of super-amide

Manufacture of sulphate alkanolamides

IGEPON B

Manufacture of Igepon B conc. paste

Recent Developments in Sulphonation Technology

Direct Production of Extremely Viscous Sulphonic Acids Without the Use of Solvents

Developments in Detergent Manufacture for Consumer Products

Minimization of 1, 4-Dioxane

Sodium Alpha Sulpho Methyl Ester (SASMA) Production

Dry Active Detergent Manufacturing

5. Manufacture of Finished Detergents

Powders

Simple Absorption

Combined Absorption and Neutralization

Dry Mixing of Powders

Spray-drying of Powders

Colour

Particle Size and Spread

Bulk Density

Residual Moisture

Stickiness

Product Uniformity

Separation of Powder

Wet Scrubbing

Use of Fines

Combination of Spray-dried and Dry-mixed

Powders

Ballestra 'Complex' System

Patterson-Kelley Systems

Anhydro System

Drum-Drying of Powders

Liquid Detergents

Toilet Preparations

Paste Detergents

Calcium Sulphonates

Solid Detergents

Detergent Toilet Bars

Household Scrub Bars

Fabric Softeners

Abrasive Cleaners

6. Application and Formulation of Detergents

Foam

Household Cleaning

Heavy-Duty Laundering

Foam Control

Light-Duty Household Products

General-Purpose Detergents

Choice of Non-ionic

Concentrated Powders

Cold Water Washing

Hard-Surface Cleaners

Machine Dishwashing

Abrasive-Type Cleaners

Miscellaneous Household Cleaners

Commercial Laundering

Solvent Detergents

Carpet and Upholstery Cleaners

Textile Dressing

Mercerizing

Food and Dairy Industries

Advantage of sulphamic acid

Detergent Sanitizers

Metal Cleaners

Miscellaneous Cleaners

Lavatory Cleaner

Hand Cleansers

Waterless Hand Cleansers

7. Important Formulations of Synthetic

Detergent

Detergent Powder

Market Potential & Scope

Synthetic Detergent Powder

Manufacture of Household Detergent Powders

Process

Formulations for Detergent Powders
General Purpose Powder
Raw Material Requirements (per month)
Process of Manufacture and Formulations
Heavy Duty Liquid Detergents
Opaque Lotion-Type Heavy Duty Liquid
Detergent
Process of Manufacture of Liquid Detergent
Dish Washing Liquid Detergents
Process of Manufacture
Liquid and Cream Soap Products
Liquids for the Washing of Fabrics
Thick Liquids and Creams
Machine Dishwashing Products
The Composition of Powder
Liquid Cleansers for Hard Surface
Window Panes Cleaning Liquid
Dry Cleaning Detergent
Process of Manufacture
List of Plant & Machineries
Raw Material Requirements (per month)
Soap Powders
Introduction
Spray-Chilled Powders
Formulation for Spray Chilled Soap Powders
Spray Dried Powders
Spray Drying Practice
Cleansing Powder (Vim Type)
Manufacturing Process
Formulation for Cheap Cleansing Powder
List of Plant and Machinery
Raw Material Requirements
Market Potential
Liquid Detergents
Requisites of Surfactants for Formulating
Liquid Detergents
Surfactants most Commonly Used
Builders
Viscosity Controllers
Other Ingredients
Household Liquid Detergents for Laundering
Heavy Duty
Procedure
Light Duty: (for silk, wool etc.)
Procedure

8. Packaging of Detergents
Packaging of Detergent Powder
Types of Packaging
Packaging of Detergent Bars
Packaging Material Specifications

Package Testing Methods

Introduction

Physical Tests

Substance

Dimensions

Bursting strength

Compression resistance

Tensile strength

Scuff resistance

Moisture content

Other Tests

Wax/polythene substance in coated wrappers

Stability to alkali

Stability to soap

Water absorption

Type of fluting

Machine direction of paper and board

Stiffness of board

Miscellaneous Tests

Packaged Commodities Rules

Introduction

Declarations to be Made on Every Package

Permissible Errors of Quantity

Commodities to be Packed in Specified

Quantities

Management of Detergent Factories

Technical Efficiency

Introduction

Yield

Fatty acid yield

Glycerol yield

Active detergent yield

Over/under usage of materials

Packing loss/gain

Oil usage pattern

Scrap and downgrading losses

Productivity

Steam, water, electricity

Financial Summary

Pollution Control

Introduction

Sources of Pollution

Oil spills

Chemical spills

Bleaching

Chemical treatment

Glycerine Recovery

Synthetic Detergents

Sulphonation

Detergent powder manufacture

Handling of Raw Materials

Slurry Making, Wash Water
Tower and Air Lift Exhausts
Powder Spillages
Fluidiser Exhaust Air
Boiler House
Coal spillages
Water treatment section
Boiler Blow Down
Chimney exhaust
Boiler ash
Space and location
Effluent characteristics
The requirements of treated effluent
Effluent treatment methodology
Treatment of Gaseous Effluents
Chemical bleaching
Saponification of oils
Toilet soap mixer
Refrigeration system
Oleum handling in the sulphonation plant
Oleum still furnace
NSD bar mixer exhaust
Boiler exhaust
Analytical Support
Introduction
Oils
Chemicals
Packaging Materials
In-process Materials
Finished Products
Microbiological Controls
Analytical Equipments
General Comments
Quality Control
Introduction
Organisation
Facilities
Specifications
Chemicals
Packaging materials
Finished product
Sampling
Sampling of Raw Materials
Packing materials
Finished products
Vendor education and rating
Process audit
Reporting
Microbiological Controls
Bureau of Indian Standards Specifications
Quality Assurance

Introduction

Conventional Approach to Quality

Recommended Approach to Quality

Company Quality Policy

Brand Quality Objectives

Implementation of Quality Assurance

Quality Control

Quality Audit

Summary

Total Quality Management (TQM)

ISO 9000 Series Standards

Common Quality Problems of Detergents

Detergent powder

Detergent Cake

Stain Removal

Introduction

Type of Stains

Removal of Stains

Lime soap

Protein stains

Iron compounds

Stains due to dyes

Mildew stains

Physical methods of stain removal

Assessment of stain removal

9. Analysis of Detergents

Introduction

Synthetic Detergents

Active Matter

Principle

Standard sodium lauryl sulphate

solution-0.004M

Determination of the purity of sodium lauryl sulphate

Molarity of sodium lauryl sulphate

Standard benzethonium chloride

(hyamine 1622) soln. 0.004M

Determination of anionic active matter

Moisture of Detergent Powders and Cakes

Principle

Process

pH of 1% solution

Principle

Procedure

TFM and Combined Glycerol in Oils

Combined glycerol in oils

Principle

Procedure

Estimation of TFA

10. Enzymatic Detergents Empower, Metrizyme Detergezime

The importance of cleaning instruments
prior to disinfection

The definition and properties of enzymes

The benefits associated with incorporation
of enzymes into detergents

The properties and benefits of surfactants
in enzymatic detergents

Practical usage of enzymatic detergents

Comparative assessment of Metrex and
competitor enzyme products

Plant and Machinery Suppliers

Photographs of Machinery and Equipment

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.

NIIR PROJECT CONSULTANCY SERVICES
