India is an agro based country. So organic farming plays an important role in agro field. The popularity of organic farming is gradually increasing and now organic agriculture is practiced in almost all countries of the world, and its share of agricultural land and farms is growing. As the organic food market continues to expand, so do the opportunities for small farmers.

Organic farming has emerged as the only answer to bring sustainability to agriculture and environment. This handbook is a comprehensive guide to growing, certifying, and marketing organic produce. Organic farming is not only a philosophy, but also a well-researched science that combines soil fertility, plant pathology and other biological and environmental sciences.

The major contents of this book are Sustainable Agriculture, National Programme on organic farming, Integration with organics and biofertilizers, Bulky organic manures and crop residues, Manuring on sight, Manuring potentials, Green Manuring, Production and promotion of organic fertilizers, Vermi composting, Response of crops to organic fertilizers, Phosphate solubilizing, Bacillus thuringiensis, Crop residue management, Integrated nutrient management towards sustainable agriculture, Integrated farming system, Mechanism of nitrogen fixation, Economics and marketing of organic farming.

As we have seen, the booming development taking place in organic farming and marketing offers many opportunities. We will be able to go on contributing to the establishment of organic production systems and this could lead to changes in life style and consumption patterns that will reach far beyond food and nutrition. This book will be very helpful to soil scientists, microbiologists, biologists, students, new entrepreneurs, fertilizer industries, training centers and to all those interested in efficient use and sustainable farming.

Contents

1. SUSTAINABLE AGRICULTURE
   Evolution of Sustainable Agriculture
   Sustainable Livelihood

2. NATIONAL PROGRAMME ON ORGANIC FARMING
   National Programme for Organic Production
   Operational Structure of NPOP
   Accreditation Agencies
   Evaluating Agency
   Accredited Inspection and Certification Agencies
   Inspectors
3. INTEGRATION WITH ORGANICS AND BIOFERTILIZERS
Fertilizers
Nutrient Uptake and Removal by Crops
Fertility Status of Soils
Crop Responses to Fertilizer Application
Optimum Application Rates
Integration of Diverse Sources of Plant Nutrients
Some Basic Issues
Farmyard Manure
Green Manures
Rhizobium
Blue Green Algae
Azolla
Conclusions

4. BULKY ORGANIC MANURES AND CROP RESIDUES
Organic Manures and Their Composition
Potential and Available Supplies
Technologies for Quicker and Better Compost Production
Competing Uses of Resources
Fate of Organic Materials in Soil
Effect on Soil Properties
Effect on Crop Yields
Long-term Effects of Organic Manures
Management Aspects
Constraints in Adoption
Future Research Needs

5. MANURING ON SIGHT
In-situ Manuring by Animal
The System
Advantages
Limitations
Verification of Farmers Experiences
Sustainability
Prospects
In-situ Manuring with Plants (Green Manures)
Benefits of Using Green Manures
Enhance Soil Fertility
Supplement for Nutrients
Improved Soil Structure
Prevention of Soil Erosion
Weed Control
Method of Use
Green Manuring in Situ
Green Leaf Manuring
Place in Farming System
Green Manures in Rotation
Green Manures and Undersowing
Long Term Green Manures
Green Manures as Mulch
Green Manures in Agroforestry
Management of Green Manuring
Time of Sowing and Seed Rate
Seed Treatment
Stem Cuttings
Mixed Cropping
Inter Cropping
Border Planting
Phosphorus Response
Digging in Green Manures
The Choice of Green Manure
Other Important Considerations
Achieving Sustainability in the Use of Green Manures
Sustainability
Experiences Worldwide
Conclusions

6. MANURING POTENTIALS
Available Potential of Organic Materials for Ex-Stu Manuring
Organic Resources and Potential
Livestock and Human Wastes
Crop Residues, Tree Wastes and Aquatic Weeds
Urban and Rural Wastes
Agro-Industries Byproducts
Marine Wastes
Agricultural Waste
Crop Residues
Agro-industrial Wastes
Rice Husk
Bagasse
Pressmud
Tea Wastes
Coir Waste
Characteristics of Agricultural Wastes
Nitrogen
Phosphorus
pH
Bio Plant Growth Promoters
Livestock Wastes
Type of Production Unit
Species and Age of Animal
Other Factors

NIIR Project Consultancy Services (NPCS) 3/11
Beef Cattle
Slotted Floors
Dairy Cattle
Utilization of Agricultural Organic Waste
Recycling of Organic Materials for Fertilization
Organic Mulch
Concentrated Organic Manures
Aquatic Weeds
Aquatic Weeds as Source of Energy
Aquatic Weeds as Organic Manures
Oilcakes
How to Use Oilcakes
Cattle, Pig, and Poultry Manures
Poultry
Litter Grown
Cage Grown
Meat-meal
Bloodmeal
Fishmeal
Horn-and-hoofmeal
Collection and Storage of Organic Waste
Economic Value of Organic Waste
Availability of Organic Waste in India
Processing of Agriculture Waste
Conclusion
Economic Considerations
Public Policy

7. GREEN MANURING : NUTRIENT POTENTIALS AND MANAGEMENT
Green Manures
Role of Green Manuring in Cropping Systems
Fate of Green Manures on Application to Soils
Availability of Essential Nutrients
Crop Responses and Residual Effects
Green Manure Management
Residual and Long-term Effects
Economics of Green Manuring
Constraints of Green Manuring
Future Research Needs
Conclusions

8. PRODUCTION, DISTRIBUTION AND PROMOTION OF ORGANIC FERTILIZERS
Definition and Classification
Practical Significance of Biofertilizers
Requirement of Biofertilizers
Production Technology of Biofertilizers
Production of Biofertilizers
Standards and Quality Control
Government Support and Programmes
Constraints
Areas for Future Development
Conclusions
9. VERMI COMPOSTING
Earthworms as Indicators of Soil Fertility
Earthworms and Plant Growth
Interaction of Vermicompost-Earthworm-Mulch-Plantroot (Vemp)
Vermicompost
Recycling of Wastes Through Verm-composting
Minimizing Pollution Hazard
Advantages of Vermi-Compost
Adverse Effects on Crops
Economic Viability
Vermiculture Process
Selection of Suitable Species
Epiges
Endoges
Aneciques
Basic Characteristics of Suitable Species
Fixing Earthworms for Identification
Transport of Fixed Worms to Laboratory
Description of Suitable Species
Family: Lumbricidae
Eisenia fetida (Sav.)
Family: Eudrilidae
Eudrilus eugeniae (Kinb.)
Family: Megascolecidae
Lampito mauritii (Kinb.)
Metaphire anomala Mich. (= Pheretima anomala)
Metaphire posthuma (= Pheretima posthuma)
Perionyx excavatus E. Perr.
Perionyx Sansbaricus Michaelson
Maintenance of Base Culture
Vermicomposting Materials
Animal Dung
Agricultural Waste
Forestry Wastes
City Leaf Litter
Waste Paper and Cotton Cloth etc.
City Refuge
Biogas Slurry
Industrial Wastes
Preliminary Treatment of Composting Material
Pre-Treatment of Leaf Litter and Agricultural Waste
Small Scale or Indoor Vermicomposting
Large Scale or Outdoor Vermicomposting
Requirements for Vermicomposting
Container
Bedding Material
Moisture Content
Temperature
Initiation of Vermiculture in India

10. RESPONSE OF CROPS TO ORGANIC FERTILIZERS IN SALT AFFECTED SOILS
Response of Crops in Salt-Affected Soils of Punjab and Haryana
11. PHOSPHATE SOLUBILIZING SOIL ACTINOMYCETES AS BIOFERTILIZERS
   Material and Methods
   Results and Discussion
   Summary

12. VERMICOMPOSTING OF KITCHEN WASTE
   Material and Methods
   Results and Discussion
   Conclusion

13. BACILLUS THURINGIENSIS : AN EFFECTIVE BIOINSECTICIDE
   Criteria for Microbial Insecticide
   Material and Methods
   Results
   Discussion
   Summary

14. COMPOSTING OF AGRICULTURAL AND INDUSTRIAL WASTES
   Definition
   Principles of Composting
   Agricultural Wastes
   Methods for Composting of Agricultural Wastes
   Indore Method
   Activated Compost
   Bangalore Method
   NADEP Compost
   Coimbatore Method
   Synthetic Compost
   Windrow Composting (Leaf Compost)
   Accelerated Composting and Enrichment
   Vermi-composting
   Animal Waste Composting
   Oil Palm Waste Composting
   Phospho-Compost
   Reinforced Compost from Sugarcane Trash and Pressmud
   Enriched FYM (EFYM)
   Weed Composting
   Composting of Parthenium
   Hints for Composting Agricultural Wastes
   Industrial Wastes
   Composting of Coir Pith
   Composting of Pressmud
   Using Distillery Effluent
   Using Microbial Inoculum
   Using Pressmud and Distillery Effluent
   Conclusion
   Future Needs

15. CROP RESIDUE MANAGEMENT
   Residue Management
   Crop Residue Potential
16. INTEGRATED NUTRIENT MANAGEMENT TOWARDS SUSTAINABLE AGRICULTURE

Need for INM
Concepts and Approaches
Components of Integrated Nutrient Management Strategies
Reduction of Losses from Applied Inorganic Fertilizers
Application to synchronize with the demands of Crops
Timing, Placement and Choice of Fertilizers
Controlled Release of Nutrients
Crop Choice
Retention of Native Soil Nutrients
Alternate or Supplementary Sources of Nutrients
Biofertilizers in INM
Blue Green Algae
Azolla
Azospirillum spp. (A. Lipoferum and A. brasilense)
Rhizobium
Phospobacteria
VAM
Organic Manures
Municipal and Sewage Wastes
Composting of Organic Wastes
Crop Residue Management
Green Manuring
Non-conventional Green Manures
Oil Cakes
Legumes in INM
Legumes Grown in System
Legumes as Intercrops
INM Cropping System
Rice-based Cropping System
Cotton-based Cropping System
Wheat-based Cropping Systems
Sugarcane-based Cropping System
INM and Long Term Studies
Future Strategies

17. MECHANISM OF NITROGEN FIXATION

18. INTEGRATED FARMING SYSTEM

Definitions
Advantages of IFS
1. Productivity
2. Profitability
3. Potentiality/Sustainability
4. Balanced Food
5. Environmental Safety
6. Recycling
7. Income Round the Year
8. Adoption of New Technology
9. Saving Energy
10. Meeting Fodder Crisis
11. Solving Fuel and Timber Crisis
12. Employment Generation
13. Agro-industries
14. Increasing Input Efficiency
15. Increasing the Standard of Living of the Farmer

Integration of Subsystem in Farming System

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database,
bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
