

Handbook on Steel Bars, Wires, Tubes, Pipes, S.S. Sheets Production with Ferrous Metal Casting & Processing

Author: B.P. Bhardwaj

Format: Paperback

ISBN: 9789381039311

Code: NI260

Pages: 408

Price: Rs. 1,775.00 **US\$** 150.00

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Ferrous materials have made a major contribution to the development of modern technology; they span a tremendous range of properties and applications. Reflecting the industrial practices, the information provided here offers easy access to reliable processes involved in the manufacturing of Steel products like Steel Bars, Wires, Tubes, Pipes, Sheets etc that proves to be the backbone of construction and automobile industries booming worldwide.

The work closes the gap in the treatment of steel and cast iron. Each chapter takes into account the gradual transitions between the two types of ferrous materials. It demonstrates that ferrous metal and steel are versatile and customizable materials which will continue to play a key role in the future and also covers the operations performed on ferrous metals for converting them into a commodity.

The book provides a full characterization of steel, including structure, chemical composition, classifications, physical properties, production practices of different steel products, processing of ferrous metals and so on. It will prove to be a layman's guide for the entrepreneurs who are willing to invest in the ventures related to Iron and Steel Industries, as it contains information related to processing of ferrous metals and production practices followed in Steel products manufacturing units. The text discusses the importance and objectives of processes and material used for the production of disposable products. Many examples have been provided to illustrate the concepts discussed.

The topics covered in the book are: Casting of Ferrous Metals, Heat Treatment of Ferrous Metals, Stamping Process of Ferrous Metals, Forming Process of Ferrous Metals, Machining Process of Ferrous Metals, Joining Process of Ferrous Metals, Production of Stainless Steel Wire, Production and Fabrication of Steel Bars, Steel Tube & Pipe, Stainless Steel Sheet and Different Grades of Stainless Steel.

Contents

1. CASTING OF FERROUS METALS

Casting Methods
Sand Casting
Shell-mold Casting
Expendable-Pattern Casting (Lost foam Process)
Plaster-Mold Casting
Ceramic Mold Casting
Investment Casting (Lost Wax Process)
Vacuum Casting
Permanent Mold Casting
Die Casting
Centrifugal Casting
Casting Design and Quality
Corners, Angles and Section Thickness
Drafts and Tapers
Shrinkage
Parting Line

2. HEAT TREATMENT OF FERROUS METALS

Heat Treating Theory
Stages of Heat Treatment
Heating Stage
Soaking Stage
Cooling Stage
Heat Colors for Steel
Types of Heat Treatment
Annealing
Ferrous Metal
Nonferrous Metal
Normalizing
Hardening
Case Hardening
Carburizing
Cyaniding
Nitriding
Flame Hardening
Stationary Method
Circular Band Progressive Method
Straight Line Progressive Method
Spiral Band Progressive Method
Circular Band Spinning Method
Tempering
Quenching Media
Liquid Quenching
Water
Brine
Oil
Caustic Soda
Warning
Dry Quenching
Air
Solids

3. STAMPING PROCESS OF FERROUS METALS

Compound Die
Progressive Die

Stripper Designs
Fixed Stripper
Urethane Stripper
Spring Stripper
Stamping Terminology - Punch Operation
Perforating
Punch Stagger
Blanking
Piercing
Perforate and Shave
Piloting
Perforate and Extrude
Notching
Lancing
Coining
Embossing
Projection
Shear Angles
For More Information...

4. FORMING PROCESS OF FERROUS METALS

Rolling
Hot and Cold Rolling
Cold Rolling
Processes
Roll bending
Roll forming
Flat Rolling
Foil Rolling
Ring Rolling
Controlled Rolling
Mills
Rolling Mills
Tandem Mill
Defects
Shape
Profile
Roll Deflection
Draft
Surface Defects
Lap
Mill-shearing
Rolled-in scale
Scabs
Seams
Extrusion Process
Process
Hot Extrusion
Hot extrusion temperature for various metals
Cold Extrusion
Warm Extrusion
Equipment
Forming Internal Cavities
Indirect Extrusion

Hydrostatic Extrusion
Drives
Extrusion Defects
Materials
Metal
Advantages and disadvantages
Processes
Temperature
Hot Working and Cold Working
Drop Forging
Open-die Drop Forging
Impression-die Drop Forging
Design of impression-die forgings and tooling
Press Forging
Upset Forging
Automatic Hot Forging
Roll Forging
Net-shape and Near-net-shape Forging
Cost Implications
Induction Forging
Equipment
Hydraulic Drop-hammer
Bending Process
Process
Bending Process
Types
Air Bending
Bottoming
Coining
Three-Point Bending
Folding
Wiping
Rotary Bending
Roll Bending
Elastomer Bending
Joggling
Calculations
Bend Allowance
Bend Deduction
K-factor
Material Considerations
Advantages
Shearing Process
Nature of Cut Edges
Equipment Characteristics
Operation
Maintaining Quality
Design Considerations
5. MACHINING PROCESS OF FERROUS METALS
Turning Operations
Chucking the Workpiece
Adjusting the Tool Bit
Cutting Speeds

Setting Speed and Feed
Turning with Hand Feed
Turning with Power Feed
Measuring the Diameter
Turning a Shoulder
Grinding
Processes
Surface Grinding
Cylindrical Grinding
Creep-Feed Grinding
Centerless Grinding
A Schematic of ELID Grinding
Grinding Wheel
Lubrication
The Workpiece
Workholding Methods
Workpiece Materials
Workpiece Geometry
Effects on Workpiece Materials
Threading
Subtractive Methods
Thread Cutting
Taps and Dies
Single-Point Threading
Thread Milling
Thrilling
Thread Grinding
Thread Lapping
Thread Casting and Molding
Additive Methods
Combinations of subtractive, additive, deformative, or transformative methods
Drilling Operations
Purpose
Uses
Characteristics
Care of Drilling Machines
Lubrication
Special Care
Types of Drilling Machines
Hand-Feed
Power-Feed
Safety Precautions
Drilling Machine Safety
Tools and Equipment
Twist Drills
Special Drills
Sharpening Twist Drills
Precheck
Drill Point
Clearance Angle
Rake Angle
Drill Grinding Machines
Single Wheel Fixture

Double Wheel Swing Arm
Other Types of Cutters
Countersinks
Counterbores
Combined Countersink and Center Drill
Reamers
Boring Tools
Field Expedient Cutters
Tap and Die Work
Drill Holding Devices
Geared Drill Chucks
Drill Sockets and Drill Sleeves
Drill Drifts
Work Holding and Drilling Devices
Machine Table Vises
Step Blocks
Clamps
V-Blocks
Angle Plates
T-Slot Bolts
Jigs
Drilling Support Device
Cutting Fluids
Laying Out and Mounting Work
Laying Out Work
Laying Out Hole Centers
Center-Punching the Layout
Layout of Multiple Holes
Mounting Workpieces
Vise Mounting
Table or Base Mounting
General Drilling Operations
The Drilling Process
Selecting the Drill
Installing the Drill
Selecting Drill Speed
Selecting Drill Feed
Aligning and Starting Holes
Starting Holes with Center Drill
Drawing a Drill Back on Center
Drilling
Drilling Deep Holes
Drilling a Pilot Hole
Drilling Thin Material
Using a Depth Stop
Checking the Depth of Drilled Holes
Drilling Round Stock
Operational Checks
Special Operations on Drilling Machines
Countersinking
Types of Countersinks
Countersink Alignment
Procedures for Countersinking

Counterboring and Spot Facing

Counterboring

Spot Facing

Tapping

Tapping Large Holes

Tapping Small Holes

Reaming

Hand Reamers

Machine Reamer

Reaming Operations

Boring

6. JOINING PROCESS OF FERROUS METALS

Riveting

Solid Rivets

Types

Semi-Tubular Rivets

Drive Rivet

Flush Rivet

Friction-Lock Rivet

Self-Pierce Rivets

Sizes

Installing rivets on M3 tank hull

Detail of a 1941 riveted ship hull, with the rivets clearly visible

Joint Analysis

Solid & Semi Tubular Rivets

Welding

Introduction to Welding Processes

Details of Welding Processes

Gas Welding

Flame Characteristics

Fusion arc Welding

Shielded Metal arc Welding

Submerged arc welding (SAW)

Flux cored arc welding (FCAW)

Gas shielded arc Welding

MIG and TIG

MIG welding (gas metal arc welding)

Pulsed MIG welding

Hot Wire MIG

Plasma MIG

TIG welding

Pulsed TIG Welding

Hot Wire TIG

Spot TIG

Electrical Method

Electric Resistance Welding

Electro-Slag Welding (ESW)

Induction Pressure Welding

Energy Method

Electron Beam Welding (EBW)

Laser Beam Welding

Plasma Welding

Special methods

Explosive Welding (EW)
Friction Welding
Radial Friction Welding of Pipes
Diffusion Bonding
Selection of Welding Process
Classification of Electrodes
Electrode Coating
Classification of Electrodes
Selection of Electrodes
Weld Joint Considerations
General Procedure
Type of Welded Joints
General
Groove-welds
Various types of groove welds
Fillet Welded Joint
Comparison of Joints
Welding Symbols
7. PRODUCTION OF STAINLESS STEEL WIRE

Melting Process
Billet Production
Production of Spring Wire
Conclusion
Wire Drawing
Process
Mechanical Properties
8. PRODUCTION OF STEEL BARS
Hot Rolled Bars
Cold Twisted Deformed Bars
Tmt Bars
Mild Steel Bars (as per IS: 432, part-I -1982)
Deformed Steel Bars (as per IS: 1786-1985)
Various Grades of Mild Steel Bars
Physical Requirement
Steel Bars for RCC Work
General Precautions for Steel Bars in Reinforcement
Weight of Different Steel Bars
Stainless Steel Bar-Round
Product Stocking and Processing Service Program
Bar Grade Datasheets
Bright Mild Steel Bar
Types of Cold Finished Bars
Grade Datasheets
Stainless and Engineering Steel Bar and Wire Product Specifications
Stainless Steel Bar
Stainless Steel Hollow Bar
Stainless Steel Wire
Welding wire
Carbon Bar Steel Products
Carbon and Alloy Steel Hollow Bar
Low Alloy Steel Bar
Production Flow
Pickling

Continuous Pickling Line

Cold Rolling

Annealing

Skin Pass

Warehousing

9. PRODUCTION OF STEEL TUBE AND PIPE

Introduction

Seamless Tube and Pipe

Pierce and Pilger Rolling Process

Plug Rolling Process

Continuous Mandrel Rolling Process

Push Bench Process

Pierce and Draw Process

Tube Extrusion Process

Cross Rolling Processes

Assel Rolling Process

Diescher Rolling Process

Downstream Tube Cold Forming

Cold Drawing

Cold Pilgering

Welded Tube and Pipe

Pressure Welding Processes

Fretz-Moon Process

Electric Resistance Welding

DC Processes

Low-Frequency Process

High-Frequency Processes

High-Frequency Induction Welding Process

High-Frequency Conduction Welding Process

Fusion Welding Processes

Submerged-Arc Welding Process

Gas-Shielded Arc Welding Processes

The Production of Longitudinally Welded Pipe (U-ing/O-ing process)

Spiral Pipe Production

Spiral Pipe Production in Integrated Forming and SAW Welding Lines

Spiral Pipe Production with Separate Forming and SAW Welding Lines

10. MANUFACTURING OF STAINLESS STEEL SHEET

Raw Material

Manufacturing Process

Heat Treatment

Descaling

Cutting

Finishing

Manufacturing at the Fabricator or End User

Bending Process of Steel Sheet

The Air Bending Process

Recommended Inside Bend Radius

Flange Dimensions

Channels

Distortion Near Bends

Flat Layouts

Theoretical Sheet Metal Thickness Gauges

11. GRADES OF STAINLESS STEEL

A Brief Overview of Stainless Steel

Austenitic Grades

Straight Grades

“L” Grades

“H” Grades

Type 304

Type 316

Type 317

Type 317L

Type 317LM

Type 317LMN

Type 321, Type 347

Martensitic Grades

Type 410

Type 410S

Type 414

Type 416

Type 420

Type 431

Type 440

Type 442

Type 446

Duplex Grades

Precipitation Hardening Grades

Superalloy Grades

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by

manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
