The Complete Book on Production of Automobile Components & Allied Products

The rapid urbanization, coupled with an overwhelming growth in the middle class population, has created a market that is extremely conducive for the automobile industry to flourish. It is inferred from the demand, the investment in the automobile industry is estimated at over hundredths of billions in the vehicles and auto components segment. The auto market is thought to be made primarily of automakers, but auto parts makes up another lucrative sector of the market. The major areas of auto parts manufacturing are: Original Equipment Manufacturers (OEMs) - The big auto manufacturers do produce some of their own parts, but they can't produce every part and component that goes into a new vehicle; Replacement Parts Production and Distribution - These are the parts that are replaced after the purchase of a vehicle.

The book provides a characterization of vehicles, including structure, load, fuel used, requirement of various components, fabrication and so on. It will prove to be a layman's guide and is highly recommended to entrepreneurs, existing units who wants to diversify in production of automobile and allied products, research centers, professionals and libraries, as it contains information related to manufacturing of integral parts of an automobile and practices followed in the finishing of the products.

The topics covered in the book are: Classification of vehicles on the basis of load, fuel used and their parts; Material used in the manufacturing of automobile (Metals, Alloys, Polymers etc.); Technology used; Use of Aluminium in Automobiles; Use of Plastics in Automobiles; Manufacturing practices for Engine Parts(Auto Piston, Pins, Piston ring, Lead Storage Battery, Valve & Valve Seat, Automobile Silencer, Automobile Chain, Cylinder Block, Automobile Control Cable, Engine Mounting PAD, Auto Locks etc.); Manufacturing of Automobile Chassis, Disc Brake, Brake Drum, Gear, Gear Blank, Leaf Spring, Shock Absorbers, Automobile Tyres; Heat Treatment System for Automobile Parts; Forging Technology (Open Die Forging Process, Close Die Forging Process, Designing of forged parts) and Painting Technology (Conversion Coating, NAD Finishes, Aluminium Flake Orientation, Opacity, Gloss, Electro Powder Coating, Spot Repair, Electrostatic Spray etc.) for automobile parts; Scab Corrosion Test, Peel Resistance.
Contents

1. INTRODUCTION
   Classification of Vehicles
   On the Basis of Load
   Wheels
   Fuel Used
   Body
   Transmission
   Position of Engine
   Engine in Front
   Engine in the Rear Side
   Layout of an Automobile Chasis
   Components of the Automobile
   Functions of Major Components of an Automobile
   Chasis and Frame
   Engine or Power Plant
   Transmission System (Clutch and Gear Box)
   Clutch
   Final Drive
   Braking System
   Gear Box
   Steering System
   Front Axle
   Suspension System

2. MATERIALS USED IN AUTOMOBILES
   Introduction
   Requirements of the Materials in Automotive
   Lightweight
   Cost
   Safety, Crashworthiness
   Crashworthiness Tests
   Frontal Offset Crash Test Details
   Side Impact Crash Testing/Ratings Criteria
   Rollover Evaluations
   Recycling and Life Cycle Considerations
   Current Materials in Use and Their Future
   Metals
   Steel
   New Grades of Steel and Alloys
   a. Duplex Austenitic-ferritic Stainless Steel
   b. Austenitic Stainless Steel
   Advances in Manufacturing and Joining Technique
   Aluminium
   Aluminium Alloys for Body-in-white Applications
   Aluminium Alloys for Brazing Sheet Applications
   Magnesium
   Mechanical Properties of Mg Alloys
   Technical Problems and Solutions for Use of Magnesium Alloys in Automotive Industry
   Plastics and Composites
   Fabrication
   Cost
3. MATERIALS AND TECHNOLOGY FOR AUTOMOBILES

Introduction

Steel Sheets

High Strength Steel Sheets
New Precipitation-hardened High Strength Hot Rolled Steel Sheet “NANO-Hiten”
New High Strength Hot Rolled Steel Sheet for Strain Aging Use “BHT”

High Strength Galvannealed Steel Sheets
(1) SFG Hiten
(2) Low Carbon Equivalent Type Hiten

High Formability Ultra-high Strength Cold Rolled steel Sheets

High Carbon Steel Sheets with High Formability

Coated Steel Sheets
Coated Steel Sheets with High Lubrication for Automotive Use
(1) Development of Inorganic Type High Lubrication Galvannealed Steel Sheets
(2) Organic Solid Lubricant Technology
(3) Summary

Hot Dip Galvanized Steel Sheet with Excellent Surface Appearance
(1) Improvement of Surface Appearance
(2) Surface Roughness Transfer Technologies and Frictional Properties
(3) Summary

Evaluation and Application Technologies for Automotive Steel Materials
Tailor Welded Blanks

Application Technologies of Hydroforming

Application Technologies for High Strength Steel Sheets in Press Forming

Application of CAD-CAE Systems

High Frequency Electrical Materials for Cars of the Future “Super-Core”

Features of JFE Steel’s Super-Core

JNEX

JNHF

Automotive Applications
Stationary Equipment
Rotating Machinery
Other Electrical Applications

Summary

Ferritic Stainless Steels for Automobile Exhaust System Parts

Steels for Mufflers
Steels for Exhaust Manifolds
Steels for Catalytic Converter Substrate

Steel Tubes

HISTORY Tube

High Formability ERW Tubes for Automotive Use

Stainless Steel Tubes for High Temperature Service in Automotive Exhaust Systems

Bar Products for Automotive Use

Bearing Steels “NKJ”, “KUJ7”

Graphite Steel “HFC1 Steel”

BN Free Cutting Steel “CCBN Steel”
High Surface Durable Carburized Dual-phase Steel
High Toughness Microalloyed Steel for Hot Forging
Warm Compaction Method with Die Wall Lubrication for Iron Powder Metallurgy
Lightweight Composite Material for Automotive Headliner “KP Sheet”

4. USE OF ALUMINIUM IN AUTOMOBILES

Introduction
Aluminium in Automobile
Advantages
Disadvantages
Space Frame Technology
Sand Casting
Al-Si Alloys
Grain Refinement
Modification
Extrusion
Al-Si-Mg Alloys
Moment of Inertia
Heat Treatment
Solutionizing
Aging
Annealing
Exposed Loads on Chassis
Static Loads
Dynamic Loads
Fatigue
Welding
Stress Corrosion Cracking
Sand Casting
Spiral Fluidity Test
Mechanical Properties of A356.0 and Silafont - 36
Mechanical Properties Change with Heat Treatment

5. USE OF PLASTICS IN AUTOMOBILES

Technology Activities and Priorities

6. MANUFACTURING OF ENGINE PARTS

1. Manufacturing of Auto Piston

Introduction
Market Potential
Basis and Presumptions
Implementation Schedule
Preparation of Project Report
Technical Aspects
Process of Manufacture
Quality Control and Standards
Production Capacity
Pollution Control

2. Manufacturing of Pins for Automobiles

Introduction
Market Potential
Production Target (per Annum)
Basic & Presumptions
Implementation Schedule
Technical Aspects

3. Manufacturing of Piston Ring
Introduction
Market Potential
Basis and Presumptions
Implementation Schedule
Technical Aspects
Material
Manufacturing Process
Piston Ring Coatings
Quality Control
Pollution Control
Power Consumption
4. Manufacturing of Lead Storage Battery
   Introduction
   Market Potential
   Basis & Presumptions
   Implementation Schedule
   Technical Aspects
   I. Process of Manufacture
   Process Flow Chart
   II. Quality Control & Standard
   III. Production Capacity (Per Annum)
   IV. Motive Power Required
   V. Pollution Control Requirements
   VI. Energy Conservation
   Lighting
   Additional Information
5. Manufacturing of Valve and Valve Seat
   Introduction
   Methodology
   Material Selection
   Exhaust Valve
   Criteria of Exhaust Valve
   Chemical Analysis
   Mechanical Properties
   Physical Properties
   Exhaust Valve Seat Insert
   Criteria for Material Selection of Engine Valve Seat Insert
   Extrusion
   Process Selection
   Exhaust Valve
   Flow Processes
   Friction Welding
   Upsetting
   Steps
   Forging
   Heat Treatment
   Advantages
   Steps
   Stellite Deposition
   Advantages
   Head Diameter Facing
   Groove CNC Turning
   Tip Hardening
Advantages
Neck Profile Turning
Seat Grinding
Surface Finishing
Advantages
Alternative Process
Alternative Process
Exhaust Valve Seat Insert
Flow Processes
Investment Casting
Steps
Surface Finishing
Steps
Wear Resistance Treatment
Ferritic Nitrocarborizing
Advantage
Steps
6. Manufacturing of Automobile Silencer
Introduction
Market Potential
Basis and Presumptions
Implementation Schedule
Technical Aspects
Process of Manufacture
Quality Control and Standards
Pollution Control
Energy Conservation
7. Manufacturing of Automobile Chain
Introduction
Market Potential
Basis and Presumptions
Implementation Schedule
Technical Aspects
Process of Manufacture
Quality Control and Standards
Production Capacity (per annum)
Pollution Control
Energy Conservation
8. Manufacturing of Cylinder Block
Introduction
Description of the Product
What is an Engine Block?
Functional Requirements of a Cylinder Block
Required Material Properties
Metals Used in the Manufacture of the Cylinder Blocks
Manufacturing the Cylinder Block
Mechanical Properties of the Alloys
Gray Cast Iron Alloys
Compacted Graphite Cast Iron
Aluminium Alloys
Magnesium Alloys
Casting Processes
Green Sand Molding

NIIR Project Consultancy Services (NPCS) 6/18
Lost Foam Casting
Market Potential
Basis and Presumption
Implementation Schedule
Technical Aspect
Manufacturing Process
Alternate Technology
Production Targets
Quality Control and Standards
Utilities
Energy Conservation
Pollution Control
9. Manufacturing of Cylinder Linear
Introduction
Production Capacity: 45000 Per Annum
Market & Demand Aspects
Manufacturing Process & Source of Technology
Basis of Project Preparation and Technical Aspects
Presumption
Implementation Schedule
Quality Control & Standards
Pollution Control
10. Manufacturing of Automobile Control Cable
Introduction
Market Potential
Basis and Presumptions
Technical Aspects
Process of Manufacture
Implementation Schedule
Process Flow Chart
Quality Control and Standards
Motive Power
Pollution Control
11. Manufacturing of Engine Mounting PAD
Introduction
Market Potential
Basis and Presumptions
Implementation Schedule
Technical Aspects
Process of Manufacture
12. Manufacturing of Auto Locks
Project Profile on Casting for Auto Locks
Part - II
Introduction
Market Potential
Basis & Presumptions
Implementation Schedule
Technical Aspects
Process of Manufacture
Quality Control and Standards
Pollution Control
Energy Conservation
7. MANUFACTURING OF AUTOMOBILE CHASSIS
1. Manufacturing of automobile Body
   Automobile Body Manufacturing Processes
   BIW Manufacturing Processes
   Blanking and Stamping Processes
   Subassembly Processes and Major subassemblies of a BIW
   Body Framing Process
   Door Manufacturing Processes
   Rolling and Blanking Processes
   Stamping Process
   Door Hanging and Fitting Process
   Door Hanging Process
   Door Fitting
   Market Potential
   Basis and Presumptions
   Implementation Schedule
   Technical Aspects
   Process of Manufacture
   Pollution Control
   Energy Conservation

2. Manufacturing of Disc Brake
   Introduction
   Grey Cast Iron as Material for Production of Disc Brake
   Aluminium as the Material for the Holder
   Manufacturing Process of DISC Brake and Holder
   Cold Chamber
   Hot Chamber
   Heat Treatment for Holder
   i. Cooling Rate
   ii. Shrinkage
   a. Volumetric Shrinkage
   b. Linear Shrinkage
   Finishing Process
   Driving the Lathe
   Holding and Rotating the Work
   Holding, Moving and Guiding the Cutting Tool
   For Disc Brake
   For the Holder
   Methodology
   Summary

3. Manufacturing of Brake Drum
   Introduction
   Market Potential
   Basis and Presumptions
   Implementation Schedule
   Technical Aspects
   Process of Manufacture
   Quality Control and Standards
   Production Capacity (per annum)
   Pollution Control

4. Manufacturing of Gear Blank
   Introduction
   Market and Demand Aspects
   Raw Materials
Manufacturing Process
The Process of Flow Chart
5. Manufacturing of Gear
Introduction
Materials Used in Gear Manufacturing Process
Classification of Gears
1. Milling Process
2. Gear Planning Process
3. Gear Shapers
4. Gear Hobbing
5. Bevel Gear Generating
Gear Manufacture by Casting Method
Methods of Forming Gears
Roll Forming
Stamping
Powder Metallurgy
Extrusion
Gear Generating Process
Gear Hobbing
Type of Hobbing
Arial Hobbing
Radial Hobbing
Tangential Hobbing
Gear Shaping (The Fellows Process)
Rack - Type Cutter Generating Process
Pinion Type Cutter Generating Process
Advantages
Disadvantages
Gear Cutting by Milling
Disc Type Cutter
End Mill Cutter
Advantage
Used
Bevel Gear Generating
Straight Bevel - Gear Generator
Spiral Bevel - Gear Generator
Gleason Method
Templet Gear Cutting Process
Gear Finishing Process
Gear Shaving
Gear Grindings
Disadvantage
Gear Lopping
Shot Blasting
Phosphate Coating
Gear Planning
The Sunderland Process
The Maag Process
Principal of Gear Planning
6. Manufacturing of Gear Box Housing
Introduction
Market Potential
Basis & Presumptions
Implementation Schedule

Technical Aspects
a. Production Details and Process of Manufacturing
b. Quality Control & Standards

Process Flow Graphic Representation

Pollution Control

Energy Conservation

7. Manufacturing Process of Leaf Spring

Introduction

History of Leaf Spring

Construction of Leaf Spring

Standard Size of Automobile Suspension Spring

Material Used in Leaf Spring

Basic Characteristics of Spring Materials

Mechanical Properties of Leaf Spring

Manufacturing of Leaf Spring

Shearing

Main Eye Rolling

Tapering

Drilling

Hardening

Tempering

Hardness Test

Shot Peening

Market Potential

Implementation Schedule

Technical Aspects

A. Production Details and Process of Manufacture

B. Quality Specification

Process Flow Chart

Pollution Control Measures

Energy Conservation

8. Manufacturing Process of Shock Absorbers

Historical Development of Shock Absorbers

Adoption of Hydraulic Telescopic Dampers

Non-pressurised Twin Tube Telescopic Hydraulic Dampers

Gas Charged Shock Absorbers

i. Mono-tube Shock Absorbers

ii. Twin Tube Pressurised Shock Absorbers

Spring Assisted Dampers

Structure of Industry, Ownership Pattern & Installed Capacity

Geographical Distribution of Shock Absorber Manufacturers

Raw Materials, Semi-finished Components Used & Their Sources of Supply

Major Imports of Raw-materials to Sustain Indigenous Production

Manufacturing Processes & Machines Generally Used

9. Manufacturing Process of Automobiles Tyres

Tyre - Modern Vehicle Design Elements

Front-wheel Drive

Powerful Brakes

Power Steering

‘Hot Hatches’

Diesel Engines

How to Make a Tyre

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes various process technology, technical, reference, self-employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the inputs in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
