## The Complete Technology Book on Asbestos, Cement, Ceramics and Limestone

Author:- Dr. H. Panda Format: paperback Code: NI297 Pages: 592 Price: Rs.1875US\$ 150 Publisher: NIIR PROJECT CONSULTANCY SERVICES Usually ships within 5 days

Asbestos is the generic term for a group of naturally occurring fibrous minerals with high tensile strength, flexibility, and resistance to thermal, chemical and electrical conditions. Asbestos fibers are of high-tensile strength, flexible, heat and chemical resistance, and good frictional properties. Cement is the most essential raw material in any kind of construction activity. Ceramics also known as fire clay is an inorganic, non-metallic solid article, which is produced by the art or technique of heat and subsequent cooling. Limestone is a sedimentary rock, mainly composed of calcium carbonate (CaCO3). It is the principal source of crushed stone for construction, transportation, agriculture, and industrial uses.

Emerging applications in commercial sectors such as asbestos, cement and ceramic are poised to fuel demand in the coming years. Growing demand for limestone in the production of cement as well as in several other chemicals that are used in the production of high-value every-day products offers significant opportunities for growth. Global Limestone consumption is projected to reach 5.7 billion tons and expected to grow at an average annual rate of 4–5% in coming years. Presently, cement production is 330 million tonnes and expected to double to reach almost 550 million tonnes in future.

The major contents of the book are asbestos, monitoring and identification of air-borne asbestos, asbestos in industrial applications, asbestos – cement products, non – occupational asbestos emissions and exposures, cements, mortars and concrete, raw materials, additives and fuels for cement, processes of manufacturing of cement, cement based on natural and artificial pozzolanas, fast-setting cements, special portland cements, packing of cement, storages of cement, ceramics, lime & limestone, glass & glass ceramics etc. It describes the manufacturing processes and photographs of plant & machinery with supplier's contact details.

It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of these industries.

Chapter I Asbestos Commercial Uses Properties and Composition Method of Analysis Chrysotile Procedure

Crocidolite and Amosite Procedure Chapter II Monitoring and Identification of Air-borne Asbestos **Synposis** Introduction Membrane Filter Method I. Outline Technique II. Definitions of Fibre which are evaluated III. Membrane Filter IV. Sampling V. Transportation of Filters VI. Mounting of the Filters VII. Microscopical Evolution VIII. Accuracy of the Membrane Filter Method **Recent Developments in Fibre Evalution** IX. **Determination of Very Low Asbestos Concentrations Direct - Reading Dust Monitoring Equipment Miscellanous Instruments** I. Introduction II. The Thermal Precipitation **III.** The Konimeter IV. Owens Jet Counter V. The Impinger Identification of Air-borne Asbestos Fibres I. Itroduction **II.** Optical Techniques **III. Electron Microscopical Techniques** IV. Physical and Chemical Analysis Summary Chapter III Alternatives to Asbestos in Industrial Applications I. Thermal Properties **II. Mechanical Properties III.** Other Properties IV. Price and Availability V. Applications Industrial Applications of Asbestos Products I. Asbestos Textiles 1. Fire and Heat Protection Clothes 2. Fire Blankets, Curtains and Aprons 3. Electrical Insulators 4. Filters 5. Ropes, Yarns, Tapes etc 6. Other Applications II. Thermal Insulations and High Temperature Applications 1. Dry Asbestos Packings 2. Asebstos Jointings 3. Gaskets 4. Lining and Insulating Blocks 5. Ceramic and Mineral Fibres

6 Vermculite and Perlite

- 7 Solid Ceramics
- 8 Further information
- III. Asbestos millboard
- 1. Substitutes
- IV. Industrial applications of asbestos-cement
- 1. Substitutes
- VI. Friction materials
- 1. Substitutes for asbestos in friction materials
- V. Dry-rubbing bearings
- 1 Substitutes for asbestos-reinforced thermosets in bearing applications
- 2 Conclusion
- 3 Acknowledgments
- VI Electrical insulation
- 1 Substitutes for asbestos products in
- electrical insulation
- 2 Substitute electrical insulants at high temperatures
- VII Asbestos composites (not including frictional,
- bearing, and electrical applications)
- 1 Alternatives to asbestos composites
- VIII Miscellaneous applications
- 1 Substitutes
- Health hazards of substitute materials
- Conclusions
- Chapter IV
- Asbestos-Cement Products Methods of Manufacture Methods of Analysis Procedure Procedure
- Chapter V
- Non-Occupational Asbestos Emissions and Exposures Asbestos emissions from natural sources Asbestos emissions from human-created sources Redistribution and fate of asbestos in the environment (i) Redistribution by air
- (ii) Redistribution by water
- (iii) Ultimate fate of asbestos fibres
- Exposure to airborne asbestos
- (i) Exposure from ambient air
- (ii) Exposure from air near asbestos industrial facilities
- 1 Asbestos mining, milling, and product manufacture
- 2 Transportation of materials containing asbestos
- 3 Estimated atmospheric concentration and exposures
- (iii) Exposure from asbestos manufactured products
- 1 Automotive friction materials
- 2 Spray asbestos
- (iv) Exposures from disposal of asbestos products and wastes
- (v) Exposures of asbestos workers' families
- Exposure to asbestos in drinking water
- (i) Asbestos content of drinking water supplies

(ii) Elevated asbestos levels
(iii) Estimated asbestos consumption from water
Exposure to asbestos in foods and drugs
Appendix, calculation of atmospheric asbestos
concentrations in the vicinity of major U.S. Asbestos
industrial facilities

Chapter VI Cements, Mortars and Concrete Hydraulic Cements Cement Specifications Methods of Analysis Determination of Compound Composition Determination of major components Rapid Procedures for Major Components

## Chapter VII

Raw Materials, Additives and Fuels for Cement

- 1. Raw Materials for Making Cement
- 2. Constituents of Raw Mix and their proportioning
- 2.1 Limestone
- 2.2 Silica and Alumina
- 2.3 Iron Oxide
- 3. Proportioning Constituents
- 3.1 Correcting Materials
- 4. Composition of Clinker
- 5. Quality Control
- 5.1 Commonly Found Proportions
- 6. Blended Cements
- 7. Fuels
- 8. Fuel in Shaft Kilns
- 9. Fuels for Rotary Kilns
- 10. Coals as Fuel
- 10.1 Preparation of Coal for Firing
- 10.2 Preparation of Oil for Firing
- 11. Costs of Fuels
- 12. Coals
- 12.1 Typical Compositions of Coal and Coke are
- 12.2 Typical Composition of Coal Ash is
- 12.3 Volatiles
- 13. Calorific Value of Fuels
- 14. Oils
- 15. Gas as Fuel
- 16. Specific Fuel Consumption Obtainable using Different Fuels
- 17. Requirements of Raw Materials and Fuel
- Chapter VIII

Processes of Manufacturing of Cement

- 1. Process of Making Cement
- 2. Predominance of Wet Process
- 3. Marginal grade Limestone and Froth Flotation
- 3. Dry and Semi Dry Processes
- 3.1 Semi Dry Process

- 5. Dry Grinding and Blending
- 6. Semi Wet Process
- 7. Preheaters
- 7.1 Lepol Grate Preheater
- 7.2 Suspension Preheater
- 8. Clinker Coolers
- 8.1 Rotary and Planetary Coolers
- 8.2 Grate Coolers
- 9. Increase in Size of the Cement Plant Large Kilns
- 10. Calciners
- 11. Technical Collaborations
- 12. Various Processes, Machinery and Size of Cement Plant
- Chapter IX

Cements based on Natural and Artificial Pozzolanas

- 1 Fly Ash based Cements
- 1.1 Composition and properties of fly ashes
- 1.2 Lime-activated fly ash binder
- 1.3 Portland-fly ash cement and fly ash concrete
- 1.4 High-volume fly ash concrete
- 1.5 Alkali-activated fly binder
- 2. Cements made with fluidized bed ashes
- 3. Binders containing natural pozzolanas and related products
- 4. Microsilica-modified Portland cement
- 5. Rice Husk ash based cement

Chapter X

Fast-Setting Cements

1. Control of Portland Cement setting by

the use of chemical admixtures

- 2. Fast-setting gypsum-free portland cement
- 3. Fast-setting cements containing the phases

C11A7.CAF2 or C12A7

4. Fast-setting cements containing the phase tetracalcium trialuminate sulfate.

5. Fast-setting blends of portland cement and calcium aluminate cement

- 6. Fast-setting magnesium phosphate cement
- 7 Fast-setting glass cement
- 8 Miscellaneous fast-setting cements

## Chapter XI

**Special Portland Cements** 

- 1. Constituents and Composition of Portland Cements
- 1.1 Tricalcium silicate (3CaO.SiO2, abbreviation C3S)
- 1.2 Dicalcium silicate (2CaO.SiO2. abbreviating C2S)
- 1.3 Tricalcium Aluminate (3CaO.Al2O3, abbreviation C3A)
- 1.4 The ferrite phase [calcium alumiate ferrite,
- 2CaO(Al2O3, Fe2O3)[ abbreviation C2(A,F)]
- 1.5 Calcium sulfate
- 1.6 Free Calcium oxide (free lime, Cao)
- 1.7 Free Mangness oxide (periclase, MgO)
- 1.8 Alkali sufates

- 1.9 Composition of Portland clinker and Portland cement
- 2. The Hydration of Portland Cement
- 3. High-C3S Portland Cement
- 4. Portland Cement with Elevated C2S content
- 5. High-C3A Portland Cement
- 6. C3A Portland Cement
- 7. Low-Iron (White) Portland Cement
- 8. High-Iron Portland Cement
- 9. High-Mgo Portland Cement
- 10. Low-Alkali Portland Cement
- 11. Mineralized Portland Cement
- 12. High Specific Surface Area Portland Cement
- 13. Low Specific Surface Area Portland Cement
- 13. Limestone-Modified Portland Cement
- 15. Portland Cement Modified with Chemical Agents
- 16. Gypsum-Free Portland Cements
- 16.1 Low-porosity cement
- 17. Special Approaches in Portland Cement Manucacture
- 18. Special Approaches in Cement Processing

Chapter XII

Packing of Cement

- 1. Packing Cement for Despatches
- 2. Packing Machines
- 2.1 Rotary Packing Machines
- 3. Paper and HDPE/Jute Bags

Chapter XIII

Storages of Cement

- 1. Storages
- 2. Daily requirements of Various Materials
- 3. Conventions in Storing various materials
- 4. Factors Governing Storages
- 5. Storages of Semi Finished and Finished products
- 6.1 Quarry
- 6.2 Crusher
- 6.3 Stack Reclaimer
- 6.4 Raw Mill and Blending
- Kiln feed
- 6.5 Preheater Calciner Kiln and cooler

6.6 Cement

- 7. Storage After Expansion
- 8. Storage of Coal
- 10. Space for storages

Chapter XIV Ceramics Clay Products, Whitewares, and Porcelains Enamels and Glazes Glass and Glass Ceramics Refractories Newer Ceramics Methods of Analysis Determination of the Chemical Composition Sampling Anaysis Emission Spectrometry X-Ray Diffraction

Chapter XV Lime and Limestone Properties Uses Methods of Analysis Sampling and Handling Precautions Composition Analysis Basicity Tests Physical Tests

Chapter XVI Glass and Glass Ceramics Constitution of Glasses Method of Analysis Composition Analysis Chemical Methods for Individual Constiluents Redox State Determinations Chelomelry Flame Spectroscopy Emission Spectroscopy Emission Spectroscopy Spectrophotometry X-Ray Diffraction Microscopy Electron Microprobe Analysis

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Startup Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report,

market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
