Epoxy is a term used to denote both the basic components and the cured end products of epoxy resins, as well as a colloquial name for the epoxide functional group. Epoxy resin are a class of thermoset materials used extensively in structural and specialty composite applications because they offer a unique combination of properties that are unattainable with other thermoset resins.

Epoxies are monomers or prepolymer that further reacts with curing agents to yield high performance thermosetting plastics. They have gained wide acceptance in protecting coatings, electrical and structural applications because of their exceptional combination of properties such as toughness, adhesion, chemical resistance and superior electrical properties. Epoxy resins are characterized by the presence of a three membered cycle ether group commonly referred to as an epoxy group 1,2-epoxide, or oxirane. The most widely used epoxy resins are diglycidyl ethers of bisphenol-A derived from bisphenol-A and epichlorohydrin.

The market of epoxy resins are growing day by day. Today the total business of this product is more than 100 crores. Epoxy resins are used for about 75% of wind blades currently produced worldwide, while polyester resins account for the remaining 25%. A standard 1.5-MW (megawatt) wind turbine has approximately 10 tonnes of epoxy in its blades. Traditionally, the markets for epoxy resins have been driven by demand generated primarily in areas of adhesives, building and civil construction, electrical insulation, printed circuit boards, and protective coatings for consumer durables, amongst others.

The major contents of the book are synthesis and characteristics of epoxy resin, manufacture of epoxy resins, epoxide curing reactions, the dynamic mechanical properties of epoxy resins, physical and chemical properties of epoxy resins, epoxy resin adhesives, epoxy resin coatings, epoxy coating give into water, electrical and electronic applications, analysis of epoxides and epoxy resins and the toxicology of epoxy resins.

It will be a standard reference book for professionals and entrepreneurs. Those who are interested in this field can find the complete information from manufacture to final uses of epoxy resin. This presentation will be very helpful to new entrepreneurs, technocrats, research scholars, libraries and existing units.

Contents
1. Synthesis and Characteristics of Epoxy Resin

   Introduction

   Structure of Epoxides

   Epoxipation of Unsaturated Hydrocarbons

   Catalytic Oxidation of Ethylene and Higher Olefins

   Epoxidation by Peroxy Acids and Their Esters

   Preparation of Peroxy Acids

   In Situ Epoxidation

   The Epoxidation Mechanism

   Unsaturated Materials

   Epoxidation by Inorganic Peroxy Acids

   Epoxidation with Aliphatic and Aromatic Hydrocarbon Hydroperoxides

   Epoxidation with Chromic Acid and Chromyl Compounds

   Biological Epoxidation

   Dehydrohalogenation of Substituted Hydroxyl Compounds

   The Epoxidation Mechanism

   Halohydrin Formation

   Epoxides from Epichlorohydrin

   Glycidyl Ethers

   Glycidyl Esters

   Nitrogen-Containing Epoxides

   Thioglycidyl Epoxides

   Silicon-Containing Epoxides

   Organophosphorus Epoxides

   Halogen-Containing Epoxides

   Epoxides from Hydroxy Sulfonates or Halogenated Acetates

   Epoxides from Glycols
Epoxidation by Condensation

Darzens Glycidic Ester Condensations

Epoxides from Ylids

Epoxides from Halogenated Ketones and Nickel Carbonyl

Epoxides from the Reaction of Diazomethane with Aldehydes or Ketones

Epoxides Containing Unsaturation

Conclusions

2. Manufacture of Epoxy Resins

Raw Materials

Manufacture

Plant Location

Machinery Needed

Profit

3. Epoxide-Curing Reactions

The Effect of Epoxide Structure on Reactivity with Curing Agents

The Mechanism of the Curing Reaction

Polyaddition Reactions

Polyamines

Polyamides

Polyureas

Polyurethanes

Polyisocyanates

Polymercaptans

Polyhydric Alcohols
Polyphenols
Polycarboxylic Acids
Polybasic Acid Anhydrides
Silanes and Silanols
Others
Polymerization
Anionic Catalysts
Cationic Catalysts

4. The Dynamic Mechanical Properties of Epoxy Resins
   Basic Parameters
   The Glassy Transition and Dynamic Mechanical Dispersion
   Temperature and Frequency Interdependence
   Experimental
   Results and Discussion
   Standard Measurements
   Dynamic Measurements
   Comparison of Results
   Treatment by Reduced Variables
   Conclusions

5. Physical and Chemical Properties of Epoxy Resins
   Solubility and Surface Properties
   Network Structure and Physical Properties
   Aging and Chemorheology
   Bisphenol a Epoxy Homopolymers and Copolymers
   Thermal Transition Effects
Dynamic Mechanical Response
Relaxation and Fracture Properties
Properties Compared with Elastomers and Thermoplastics

6. Epoxy Resin Adhesives

Introduction

Theories of Adhesion and Adhesive-joint Strength

Wetting and Spreading Phenomena

Boundary-Layer Theory

Surface-Attachment Theory of Adhesive-Joint Strengths

Stress Distribution in Adhesive Joints

Rheological Aspects of Adhesives

Unified Interpretation of Adhesive-Joint Strengths

Physical and Mechanical Aspects of Epoxy-Resin Adhesives

Dynamic Mechanical Techniques

Mechanical Behavior of Epoxy Adhesives During Joint Formation

Strength of Adhesive Materials

Chemical Aspects of Epoxy-based Adhesives

Curing Agents for Bisphenol A Epoxy Adhesives

Modifiers for Bisphenol A Epoxy Adhesives

Adhesives Based on Other Epoxy Materials

Technological Properties of Epoxy-adhesive Systems

Cure and Thermal Softening Behavior of Epoxy Adhesives

Stress and Environmental Durability of Adhesive Joints

Applications of Epoxy Adhesives

Future Prospects
7. Epoxy Resin Coatings

Classification of Epoxy-Resin Coatings

Epoxy Resins Commonly Used in Coatings

Epoxy-Resin Esters

Esters Produced from Solid Epoxy Resins

General Remarks

Formulation Latitude

Esters Produced from Liquid Epoxy Resins

Precatalyzed Liquid Epoxy Resin for the Production of Solid Epoxy Resins and Epoxy-Resin Esters

Cooking Procedure

“Two-Step” Liquid-Epoxy-Resin Route to Epoxy-Resin Esters

Cooking Procedure

Solid-Epoxy-Resin Solution Coatings

Cold-Cured Epoxy-Resin Systems

Polyamine Curing Agents

Polyamine-Adduct Curing Agents

Polyamide-Resin Curing Agents

Polyamide-Adduct Curing Agents

Tertiary Amine Curing Agents

Industrial Maintenance Coatings Based on Cold-Cured Epoxy-Resin Systems

High-Film-Build Cold-Cured Epoxy-Resin Coatings

Application Instructions

Manufacturing Instructions

Epoxy Baking Finishes

Epoxy-Phenolic Coating Systems

Epoxy-Urea-Formaldehyde Resin Coating Systems
Epoxy-Thermosetting Acrylic Coating Systems

Liquid Epoxy Resins in Solventless and Super-High-Solids Systems

Special Application Equipment and Formulation for Solventless Systems

Manufacturing Instructions

Application

Ketimine Curing Agents

Manufacturing Instructions

Application

Curing Characteristics

Powder Coatings

Application Equipment

Epoxy-Resin Powder-Coating Formulations

Fusion-Produced Epoxy-Resin Powders

Manufacturing Instructions

Applications Instructions

Dry-blended Epoxy-Resin Powders

Manufacturing Instructions

Application Instructions

Properties and Applications

Thermoplastic Epoxy Resins

Zinc-Rich and General Purpose Shop Primers

Manufacturing Instructions

Application Instructions

Manufacturing Instructions

Application Instructions

Thermoplastic-Epoxy-Resin Crosslinked Systems
8. Epoxy Coating Give into Water

9. Electrical and Electronic Applications : Sealants and Foams

   Electronic and Electrical Applications
   Introduction
   Casting
   Potting
   Encapsulation
   Coatings
   Sealing
   Molding
   Formulation of the Resin System
   Internal Stresses
   Rapid Cures
10. Analysis of Epoxides and Epoxy Resins

Uncured Epoxy Resins

Qualitative Tests

Detection of Free Epoxy Groups
Determination of Epoxy Group—Lithium-Chloride Test

Reagents

Procedure

Determination of Epoxy Group—Periodic Acid Test

Reagents

Procedure

Determination of Epoxy Group—Pyrolysis Test

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
