

Handbook on Recycling and Disposal of Hospital Waste Municipal Solid Waste Biomedical Waste Plastic Waste

Author:- NIIR Board of Consultants & Engineers

Format: paperback

Code: NI313

Pages: 544

Price: Rs.1275US\$ 125

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Handbook on Recycling and Disposal of

- Hospital Waste
- Municipal Solid Waste
- Biomedical Waste
- Plastic Waste

(Also Known as Medical, Municipal and Plastic Waste Management Handbook)

Waste can be almost anything, including food, leaves, newspapers, bottles, construction debris, and chemicals from a factory, candy wrappers, disposable diapers, old cars, or radioactive materials. People have always produced waste, but as industry and technology have evolved and the human population has grown, waste management has become increasingly complex. Waste recycling involves the collection of waste materials and the separation and clean-up of those materials. Recycling waste means that fewer new products and consumables need to be produced, saving raw materials and reducing energy consumption.

Waste reduction and recycling are very important elements of the local waste management framework. They help both to conserve natural resources and to reduce demand for valuable landfill space. The waste recycling services has become the one of the fastest growing industry. The growth of the waste recycling services is driven by the technology development for waste recycling.

The waste management market is expected to be worth US\$ 13.62 billion by 2025. Indian municipal solid waste (MSW) management market is expected to grow at a CAGR of 7.14% by 2025. India has planned to achieve a capacity of 2.9 million hospital beds by 2025 which will help bio medical waste management market to grow at a CAGR of 8.41%.

The concern for bio medical waste management has been felt globally with the rise in infectious diseases and indiscriminate disposal of waste. It is to be understood that management of bio medical waste is an integral part of health care. There is a clear need for the current approach of waste disposal in India that is focussed on municipalities and uses high energy/high technology, to move more towards waste processing and waste recycling (that involves public

private partnerships, aiming for eventual waste minimization driven at the community level, and using low energy/low technology resources.

This book basically deals with characterization of Medical Waste, Medical Waste Data Collection Activities, Medical Waste Treatment Effectiveness, Gas Sterilization, Municipal Solid Waste, Bio-Medical Waste, Hospital Waste Incineration, Production, Use, and Disposal of Plastics and Plastic Products, Medical Waste Reuse, Recycling and Reduction, Disposal on Land, municipal and plastic waste management, Plastic Waste, incineration and number of recycling methods.

The book is highly recommended to new entrepreneurs, existing units who wants to get more information of Waste Disposal & Recycling.

1. Characterization of Medical Waste	
1. INTRODUCTION AND OVERVIEW	
2. MEDICAL WASTE GENERATION	
Methodology	
Summary of Preliminary Results	
3. MEDICAL WASTE DATA COLLECTION ACTIVITIES	
Transporter Notification	
Results	
Transporter Periodic Reports	
On-Site Incinerators	
2. Medical Waste Treatment Effectiveness	
1. INCINERATION	
Factors Affecting Effectiveness	
Medical Waste Treatment Effectiveness	
Quality Assurance and Quality Control Procedures	
Maintenance and Operator Training	
2. STEAM STERILIZATION	
Factors Affecting Effectiveness	
Quality Assurance and Quality Control Procedures	
Maintenance and Operator Training	
3. GAS STERILIZATION	
Factors Affecting Effectiveness	
Quality Assurance and Quality Control Procedures	
Maintenance and Operator Training	
4. CHEMICAL DISINFECTION	
Factors Affecting Effectiveness	
Quality assurance and Quality Control Procedures	
Maintenance and Operator Training	
5. THERMAL INACTIVATION	
Factors Affecting Effectiveness	
Quality Assurance and Quality Control Procedures	
6. IRRADIATION	
Factors Affecting Effectiveness	
Quality Assurance and Quality Control Procedures	
Maintenance and Operator Training	
7. MICROWAVE TREATMENT	
Factors Impacting Effectiveness	

Quality Assurance and Quality Control Procedures

Maintenance and Operator Training

8. GRINDING AND SHREDDING

Factors Affecting Effectiveness

Quality Assurance and Quality Control Procedures

Maintenance and Operator Training

9. COMPACTION

Factors Affecting Effectiveness

Quality Assurance and Quality Control Procedures

Maintenance and Operator Training

3. Medical Waste Handling Methods

1. INTRODUCTION

2. CURRENT PRACTICES

Handling and packaging practices

For Off-Site Incineration

Medical Waste Handling Materials

For Landfill Disposal

For On-site Treatment or Disposal

For Sewer and Ocean Disposal

3. STANDARDS IMPLEMENTED BY THE RULE

Segregation

Packaging

Labeling

Marking

Storage

Transport

4. EVOLVING HANDLING AND MANAGEMENT TECHNIQUES 19

Handling

Compaction

5. METHODS TO EVALUATE MEDICAL WASTE HANDLING

4. Medical Waste Reuse, Recycling and Reduction

1. RECYCLING AND REUSE

2. SOURCE REDUCTION

3. GENERATION RATES

4. AGENCY ACTION

5. Infectious Waste Characterization

1. DEFINITION OF INFECTIOUS WASTE

2. TYPES OF INFECTIOUS WASTE

1. Isolation Wastes

2. Cultures and Stocks of Infectious Agents and Associated Biologicals

3. Human Blood and Blood Products

4. Pathological Wastes

5. Contaminated Sharps

6. Contaminated Animal Carcasses, Body Parts, and Bedding

3. MISCELLANEOUS CONTAMINATED WASTES - (OPTIONAL CATEGORY)

6. Infectious Waste Management

1. INTRODUCTION

2. SELECTION OF WASTE MANAGEMENT OPTIONS

3. INFECTIOUS WASTE MANAGEMENT PLAN

1. Designation of Infectious Waste

2. Segregation of Infectious Waste

3. Packaging of Infectious Waste

4. Storage of Infectious Waste

5. Transport of Infectious Waste (on- and off-site)

6. Treatment of Infectious Waste

7. Disposal of Treated Wastes

8. Contingency Planning

9. Staff Training

7. Treatment of Infectious Waste

1. INTRODUCTION

1. Monitoring

2. Steam Sterilization

3. Incineration

4. Thermal inactivation

5. Gas/Vapour Sterilization

6. Chemical Disinfection

7. Sterilization by Irradiation

8. Other Treatment Methods

8. Medical Waste

1. CYTOTOXIC CHEMICALS

2. HAZARDOUS CHEMICALS

3. PATHOGENS

4. TOXIC METALS

5. RADIOACTIVE MATERIALS

9. Hospital Incineration Systems

1. INTRODUCTION

2. FUNDAMENTAL CONCEPTS RELATED TO HOSPITAL WASTE INCINERATION

1. Chemical Reactions

2. Stoichiometric Combustion Air

3. Thermochemical Relations

4. Volumetric Gas Flows

5. The Combustion Process

3. HOSPITAL WASTE CHARACTERISTICS

4. TYPES OF HOSPITAL WASTE INCINERATOR SYSTEMS

1. Introduction

2. Multiple-chamber incinerators

1. Principle of Combustion and Air Distribution

2. Mode of Operation

3. Waste Feed Charging Systems

4. Ash Removal Systems

5. Use of Multiple-Chamber Incinerators for Incinerating Hospital Wastes

3. Controlled-Air Incinerators

1. Principle of Controlled Air Incineration

2. Batch/Controlled-Air incinerators

3. Intermittent-Duty, Controlled Air Incinerators

4. Continuous-Duty, Controlled Air incinerators

4. Rotary Kilns

1. Principle of Operation

2. Mode of Operation

3. Charging System

4. Ash Removal

5. Auxiliary Equipment

1. Waste Heat Boilers

2. Auxiliary Waste Liquid Incineration

10. Bio-Medical Waste

1. INTRODUCTION

1. Linkage of Bio-medical Waste Management with Municipal Waste Management

2. ASSESSMENT OF CURRENT SITUATION

1. Waste Generation

(i) Health Care Establishments

(ii). Whole Town/City

2. Current Practices

3. Allocation of Responsibilities

3. BASIC ISSUES

1. Management Issues of Bio-medical Waste Management

2. Current Issues in Management of Health Care Waste

4. LEGAL ASPECTS AND ENVIRONMENTAL CONCERN

1. Bio-medical Waste (Management and Handling) Rules, 1998

Scope and application of the Rules

Environmental Concern

5. WASTE IDENTIFICATION AND WASTE CONTROL PROGRAM FOR THE HEALTH CARE ESTABLISHMENTS

1. Identification of Various Components of the Waste Generated

2. An Exercise in Waste Control Programme

6. WASTE STORAGE

1. Recommended Labelling and Colour Coding

2. Segregated Storage in Separate Containers (at the Point of Generation)

3. Certification

4. COMMON/INTERMEDIATE STORAGE AREA

5. Parking Lot for Collection Vehicles

7. HANDLING AND TRANSPORTATION

1. Collection of Waste Inside the Hospital/Health Care Establishment

2. Transportation of Segregated Waste Inside the Premises

3. Collection and Transportation of Waste for Small Units

4. Transportation of Waste Outside

8. WASTE TREATMENT AND DISPOSAL : THE RULES AND THE AVAILABLE OPTIONS

Transportation of Waste Outside

1. Incineration

2. Autoclave Treatment

3. Hydroclave Treatment

4. Microwave Treatment

5. Chemical Disinfection

6. Sanitary and Secured Landfilling

7. General Waste

9. COMMON TREATMENT/DISPOSAL FACILITY

1. Establishment of the Facility

2. Tie Up of Health Care Set Ups

3. Private Sector Participation

10. OPERATION AND MAINTENANCE

11. OCCUPATIONAL HAZARDS AND SAFETY MEASURES

1. Occupational Hazards

2. Safety Measures for the Medical and Para-medical Staff

3. Safety Measures for Cleaning and Transportation Staff

12. FINANCIAL ASPECTS

13. TRAINING AND MOTIVATION

1. Training Modules for Different Levels of Staff

(i) Medical and laboratory personnel:

(ii) Para-medical personnel:

(iii) Sweepers, cleaning staff, guards etc.:

(iv) Administrative and management staff:

2. Incentives and Motivation

3. Awareness Generation

14. PLANNING ELEMENTS

1. Planning Inside the Health Care Establishment Premises

2. Planning Outside the Health Care Establishment

3. Relation to Overall Town Planning

4. Examples

15. MANAGEMENT ASPECTS

1. Organisational Set Up 104

2. Administration and Managerial Aspects 105

16. ANIMAL WASTE 105

11. Air Pollution Control

1. INTRODUCTION 108

2. POLLUTANT FORMATION AND GENERATION 108

3. CONTROL STRATEGIES 109

1. Controlling Feed Material

2. Combustion Control 111

3. Add-On Air Pollution Control Systems

1. Wet Scrubbers

2. Fabric Filters

3. Dry Scrubbers

12. Waste Minimization Options

Description of Techniques

Better Operating Practices

Chemotherapy and Antineoplastic Wastes

Formaldehyde Wastes

Instal Reverse Osmosis (RO) Water Supply Equipment

Determine Minimum Effective Cleaning Procedures

Reuse/Recycle Waste Solutions

Proper Waste Management

Photographic Chemical Waste

Store Materials Properly

Recycle Spoiled Photographic Film and Paper

Test Expired Material for Usefulness

Extend Processing Bath Life

Use Squeegees

Use Countercurrent Washing

Recover Silver and Recycle Spent Chemicals

Radionuclides

Solvents

Material Substitution

Improved Laboratory Techniques

Recycle Solvents

Mercury

Electronic Sensing Devices

Proper Spill Clean Up

Recycle/Reuse

Waste Anesthetic Gases

Toxics, Corrosives, and Miscellaneous Chemicals

Ethylene Oxide

Use of Recyclable Drums

Proper Material Handling

Material Substitution

13. Vermiculturing

1. INTRODUCTION

2. INTRODUCTION TO VERMICOMPOSTING

Reduction of particle size

Vermicomposting

Different stages and methods

3. THE INORA PROCESS

The biological means

Selection of biological methods

Bisanitization or accelerated aerobiosis

The biogas plants

The earthworm

4. ASSESSMENT

Environmental assessment

Water

Gases

Pollutants

Aesthetics

Financial assessment

5. QUALITY AND STABILITY FACTORS IN COMPOSTING

Introduction

Appropriate standards

Raw versus composted waste

Identification

5. CONCLUSION

14. Municipal waste water treatment and energy recovery

1. INTRODUCTION

2. THE GANGA ACTION PLAN

3. INDO-DUTCH ENVIRONMENTAL PROJECT

INTEGRATED APPROACH

UASB SYSTEM -A CLEAN TECHNOLOGY

Advantages of UASB over traditional aerobic processes

Technical aspects

Energy recovery from municipal sewage

Technology options for municipal waste water treatment

Case-studies

3. Scenario 3

4. Scenario 4

5. Scenario 5

3. SUMMARY

28. Objectives and Action Items

OBJECTIVES FOR IMPROVING MUNICIPAL SOLID WASTE MANAGEMENT

Source Reduction

ACTION ITEMS:

ACTION ITEMS:

OBJECTIVE 1: EVALUATE POTENTIAL FOR MINIMIZING PACKAGING

ACTION ITEMS:

OBJECTIVE 2: EDUCATION AND OUTREACH ON SOURCE REDUCTION

ACTION ITEMS:

RECYCLING

ACTION ITEMS:

Improving Recyclability of the Waste Stream

Collection/Separation

Processing

Marketing

Public Education

Landfilling and Incineration

OBJECTIVE 1: FURTHER EVALUATE ADDITIVES

ACTION ITEM:

OBJECTIVE 2: MONITOR PVC USE

ACTION ITEMS:

OBJECTIVE 3: IMPROVE DISPOSAL OPTIONS

ACTION ITEMS:

OBJECTIVES FOR HANDLING PROBLEMS OUTSIDE THE MSW MANAGEMENT SYSTEM

Wastewater Treatment Systems/Combined Sewer overflows/Stormwater Drainage Systems

Wastewater Treatment Systems

ACTION ITEM:

Combined Sewer Overflows

ACTION ITEMS:

Storm water Discharges

ACTION ITEMS:

Other Sources of Marine Debris

Vessels

OBJECTIVE 1: IMPLEMENT ANNEX V OF MARPOL

ACTION ITEMS:

OBJECTIVE 2: REDUCE IMPACT OF FISHING GEAR

ACTION ITEM:

Plastic Manufacturers, Processors, and Transporters

ACTION ITEMS:

Garbage Barges

ACTION ITEM:

Land- and Sea-Originated Litter

OBJECTIVE 1: SUPPORT LITTER RETRIEVAL AND CHARACTERIZATION

ACTION ITEMS:

OBJECTIVE 2: SUPPORT LITTER PREVENTION

ACTION ITEMS:

Degradable Plastics

ACTION ITEMS:

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India.
