"Europe cancer screening market

Europe after North America is the second largest market leading the cancer screening market. The market is forecasted to grow at a compound annual growth rate of (CAGR) of 8.1% resulting in an annual revenue of USD 22.43 Bn during the forecast period (2018-2023). Increase in the aging population along with the rise in the number of cancer incidences is a key driving factor for the market. Western Europe is moving fast towards the adoption of performance-based remuneration systems.

By end users, the market is segmented into hospitals, laboratories and independent physicians and clinics. The Laboratory segment will witness a progressive growth during the forecast period 2018-2023 while the hospital segment will account for the maximum revenue of USD 11.18 billion during the forecast period. By screening type, the market is segmented into laboratory, genetic, imaging, biopsy and endoscopy tests. Genetic, biopsy and endoscopy will be the leading segments during the forecast period 2018-2023. By application type, the market can be segmented into lung, breast, melanoma, kidney and colorectal cancer types. Colorectal, kidney, melanoma and breast cancer will occupy a larger share of the market during the forecast period 2018-2023.

By countries, the market is divided into the United Kingdom (U.K.), France and Germany.

Key growth factors

Rise in the aging population, changing environmental conditions along with the adoption of a sedentary lifestyle is contributing to more cancer-related cases.
