

# Handbook on Natural and Flavoured Ice Cream Manufacturing

**Author:-** P. K. Tripathi Associate Editor  
Entrepreneur India with NPCS Board of  
Consultants & Engineers

**Format:** paperback

**Code:** NI372

**Pages:** 480

**Price:** Rs.1575US\$ 150

**Publisher:** NIIR PROJECT CONSULTANCY  
SERVICES

Usually ships within 5 days

Ice cream has long been a favorite treat, capturing the hearts and taste buds of many. Its rich, creamy texture paired with sweet flavors brings comfort and delight in every bite. Recently, there's been a noticeable shift toward appreciating both natural and flavored ice cream, offering choices for those who enjoy pure, straightforward tastes and those who prefer more adventurous, complex blends. Whether you're someone who loves the simplicity of natural ingredients or you seek out new and exciting flavor experiences, ice cream presents an endless array of possibilities to explore.

Natural ice cream celebrates the purity and simplicity of its ingredients. Often crafted from milk, cream, sugar, and natural flavorings, these ice creams emphasize the true essence of each component. This style is perfect for those who wish to indulge in a dessert without added preservatives or artificial flavors. The focus is on high-quality, natural ingredients that bring out the best in each scoop. You might find classic flavors like vanilla, chocolate, and strawberry in their most genuine forms, tasting exactly as nature intended.

On the other hand, flavored ice cream is all about creativity and bold flavor combinations. By incorporating unique ingredients into traditional ice cream bases, these varieties offer something new and exciting with every bite. The innovation in flavored ice cream allows for a broader spectrum of taste experiences from comforting classics with a twist to daring and exotic flavors. This type of ice cream can include a range of elements from spices and herbs to fruits and other gourmet ingredients, transforming the ordinary into the extraordinary.

The global ice cream market size was estimated at USD 113.40 billion and is expected to grow at a CAGR of 3.9%. Factors such as the rising demand for innovative flavors, types, and impulse ice creams such as cones, sandwiches and pops in developing countries are expected to drive market growth. The increasing health consciousness among consumers is also expected to fuel the demand for premium ice creams in the upcoming years.

Moreover, health-conscious consumers are driving the demand for healthier alternatives in the ice cream industry. This has prompted manufacturers to innovate and introduce products with reduced sugar, fat and calorie content as well as options that cater to specific dietary preferences such as dairy-free, gluten-free and vegan ice creams. With an increasing emphasis on wellness and mindful eating, consumers are seeking guilt-free treats that align with their

health goals without compromising on taste.

The book serves as a roadmap for setting up an ice cream manufacturing unit. It's a guide to transforming a passion for frozen desserts into a profitable venture. By combining technical expertise, creative inspiration and business strategies, it empowers readers to excel in the competitive world of ice cream manufacturing.

The "**Handbook on Natural and Flavoured Ice Cream Manufacturing** (Flavours, Formulae, and Machinery Details)" is a comprehensive guide designed for entrepreneurs, manufacturers and enthusiasts looking to venture into the ice cream industry. This book is an indispensable resource that covers aspect of ice cream production. With its easy-to-understand language and practical approach, this book is a valuable tool for mastering the art and science of natural and flavored ice cream manufacturing. It inspires readers to create premium products that cater to the evolving tastes and preferences of modern consumers. Start your journey to crafting exceptional ice creams with this essential guide!

## Table of Content:

### 1. Ice Cream-History and Development

#### 1.1 Historical Background

### 2. Composition of Ice Cream Mixes

#### 2.1 Composition

#### 2.2 The Role of the Constituents

##### 2.2.1 Milk Fat

##### 2.2.2 Milk Solid Not Fat (MSNF)

##### 2.2.3 Sweetener Solids

##### 2.2.4 Egg Yolk Solids

##### 2.2.5 Stabilizers

##### 2.2.6 Emulsifiers

##### 2.2.7 Total Solids

##### 2.2.8 Water and Air

##### 2.2.9 Flavour

#### 2.3 Importance of Flavour

#### 2.4 Colour

#### 2.5 Optional Ingredients

## 2.6 The Balanced Mix

### 2.6.1 Conditions that Limit the Balancing of a Mix

### 2.6.2 Mix Properties

### 2.6.3 Mix Stability

## 3. Diet-Science and Classification of Ice Cream

### 3.1 Nutritional Value

#### 3.1.1 Energy Value and Nutrients

#### 3.1.2 Energy Content of Food

### 3.2 Caloric Content of Ice Cream and Related Products

#### 3.2.1 Energy Content of Ice Cream and Related Products

### 3.3 Protein Content of Ice Cream

#### 3.3.1 Milk Fat Content of Ice Cream

### 3.4 Milk Fat Content

### 3.5 Carbohydrates

#### 3.5.1 Carbohydrates in Ice Cream

#### 3.5.2 Minerals

### 3.6 Minerals in Ice Cream

### 3.7 Vitamins

#### 3.7.1 Vitamins in Ice Cream

### 3.8 Palatability and Digestibility of Ice Cream

### 3.9 Classification of Ice Cream and Related Products

### 3.10 Commercial Grouping of Ice Cream and Related Products

#### 3.10.1 Plain Ice Cream

#### 3.10.2 Chocolate

#### 3.10.3 Fruit

#### 3.10.4 Nut

#### 3.10.5 Frozen Custard

- 3.10.6 Confection
- 3.10.7 Bisque
- 3.10.8 Puddings
- 3.10.9 Mousse
- 3.10.10 Variegated Ice Cream
- 3.10.11 Neapolitan
- 3.10.12 Ice Milk
- 3.10.13 Fruit Sherbet
- 3.10.14 Ice
- 3.10.15 Novelties
- 3.10.16 Frappe
- 3.10.17 Granite
- 3.10.18 Souffle
- 3.10.19 Frozen Yoghurt
- 3.10.20 Lacto
- 3.10.21 Fruit Salad
- 3.10.22 Fancy Moulded Ice Cream
- 3.10.23 Mellorine-type Products
- 3.10.24 Artificially Sweetened Frozen Dairy Foods
- 3.10.25 Non Dairy Frozen Dessert
- 3.10.26 Labelling Requirement Grouping
- 3.10.27 Regulatory Type Classification

#### **4. Ingredients of Ice Cream–Roles and Properties**

- 4.1 Sources of Milk Solids Not Fat
  - 4.1.1 Milk
  - 4.1.2 Milk Products Used in Ice Cream Sources of Fat
  - 4.1.3 Skim Milk

- 4.1.4 Butter Milk
- 4.1.5 Concentrated Skim Milk
- 4.1.6 Sweetened Condensed Milk
- 4.1.7 Skimmed Milk Powder
- 4.1.8 Special Commercial Products
- 4.1.9 Whey Protein Concentrate
- 4.1.10 Mineral Salts
- 4.1.11 Unsalted Butter
- 4.1.12 Sweeteners

## 4.2 Sources of Sugars

- 4.2.1 Effect of Sweetener on Freezing Point
- 4.2.2 Sucrose
- 4.2.3 Corn Sweeteners and Related Ingredients
- 4.2.4 Dextrose
- 4.2.5 Corn Syrup
- 4.2.6 Dried Corn Syrup
- 4.2.7 Invert Sugar
- 4.2.8 Honey
- 4.2.9 Other Sweeteners
- 4.2.10 Nonnutritive Sweeteners

## 4.3 Egg and Egg Products

- 4.3.1 Fat Replacers
- 4.3.2 Sugar Alcohols
- 4.3.3 Syrups

## 4.4 Stabilizers and Emulsifiers

- 4.4.1 Function of Stabilizers
- 4.4.2 Influence on Ice Crystal Size and Texture

4.4.3 Shape and Body Characteristics

4.4.4 Retention of Air

4.4.5 Role in Fat Destabilization

4.4.6 Control of Sandiness

#### 4.5 Stabilizers

4.5.1 Casein

4.5.2 Sodium Alginate

4.5.3 Carrageenan

4.5.4 Guar Gum

4.5.5 Locust Bean Gum

4.5.6 Sodium Carboxy Methyl Cellulose (CMC)

4.5.7 Pectin

4.5.8 Agar-Agar

4.5.9 Xanthan Gum

4.5.10 Hydroxypropyl Methyl Cellulose

4.5.11 Other Gums

4.5.12 Starch

4.5.13 Stabilizer Blends

#### 4.6 Emulsifiers

##### 4.7 Type of Emulsifiers

4.7.1 Glycerides

4.7.2 Distilled Monoglyceride

4.7.3 Polysorbates

4.7.4 Polyglycerol Esters

4.7.5 Fruit Acid Esters

4.7.6 Ethoxylated Mono and Diglycerides

4.7.7 Egg Yolk Solids

- 4.7.8 Function of Emulsifiers
- 4.7.9 Whipping Ability and Overrun Control
- 4.7.10 Stiffness and Dryness
- 4.7.11 Secondary Effect of Emulsifiers
- 4.7.12 Selection of Stabilizer and Emulsifier
- 4.7.13 Processing the Cocoa Beans

## **5. Flavours and Colours–Materials and Preparation**

- 5.1 Flavours for Frozen Desserts
- 5.2 Vanilla
  - 5.2.1 Imitation Vanilla Flavourings
  - 5.2.2 Consistency in Vanilla Quality
  - 5.2.3 Vanilla Ice Cream
- 5.3 Chocolate and Cocoa
  - 5.3.1 Chocolate Ice Cream
  - 5.3.2 Freezing Characteristics
  - 5.3.3 Chocolate Confections
- 5.4 Fruits in Frozen Desserts
  - 5.4.1 Fresh Fruit
  - 5.4.2 Candied and Glaced Fruits
  - 5.4.3 Dried Fruits
- 5.5 Procedures and Recipes
  - 5.5.1 Strawberry Ice Cream
  - 5.5.2 Raspberry Ice Cream
  - 5.5.3 Peach Ice Cream
  - 5.5.4 Cherry Ice Cream
  - 5.5.5 Ice Cream with Complex Flavours
  - 5.5.6 Sugar Free

- 5.6 Nuts
- 5.7 Spices and Salt
- 5.8 Colour in Frozen Desserts
- 5.9 Flavouring Lowfat and Nonfat Ice Cream

## **6. Ice Cream Mixer–Preparation Processing and Mix Calculations**

- 6.1 Preparation of the Mix
  - 6.1.1 Combining the Ingredients
- 6.2 Pasteurization of the Mix
  - 6.2.1 Pasteurization Renders the Mix
  - 6.2.2 Homogenizing the Mix
  - 6.2.3 Physical Effect of Homogenization
  - 6.2.4 Homogenizing Temperature
  - 6.2.5 Location of Homogenizer
  - 6.2.6 Pressure for Homogenization
  - 6.2.7 Care of the Homogenizer
  - 6.2.8 Cooling the Mix
  - 6.2.9 Ageing the Mix
  - 6.2.10 Making the Mix in a Vaccum Pan
  - 6.2.11 Forewarming
  - 6.2.12 Concentrating the Dairy Products
  - 6.2.13 Weighing the Concentrated Dairy Products
  - 6.2.14 Adding Sugar and Stabilizer and Pasteurizing
- 6.3 Flavouring Mixes
  - 6.3.1 Cooling, Standardizing and Ageing
- 6.4 Packaging Mixes for Sale
- 6.5 Calculation of Ice Cream Mixes
  - 6.5.1 The Importance of Calculations

- 6.6 Mathematical Processes Most Frequently Used
- 6.7 Methods of Calculating Mixes
  - 6.7.1 Pearson Square Method
  - 6.7.2 Arithmetical Method
- 6.8 Calculating Mixes with the Serum Point Method
- 6.9 Mix Decisions
- 6.10 Simple Mixes
- 6.11 Complex Mixes

## **7. The Freezing Process**

- 7.1 The Freezing Point of Solutions
- 7.2 The Freezing Point of Ice Cream Mixes
- 7.3 Prefreezing Tests
- 7.4 Freezing Operations
- 7.5 Changes that take Place during the Freezing Process
- 7.6 Refrigeration Needed to Freeze Ice Cream
- 7.7 Types of Freezers
  - 7.7.1 The Continuous Freezer
  - 7.7.2 The Refrigeration System
  - 7.7.3 Operating the Continuous Freezer
  - 7.7.4 Batch Freezer
  - 7.7.5 Freezing Procedure for Batch Freezers

## **8. Ice Cream Handling (Packaging, Labelling, Hardening and Shipping)**

- 8.1 Considering the Package
- 8.2 Requirements for Packaging
  - 8.2.1 Paper
  - 8.2.2 Substance of Paper
  - 8.2.3 Stiffness

- 8.2.4 Ink
- 8.2.5 Wax
- 8.2.6 Adhesive
- 8.2.7 Wax Content
- 8.2.8 Odour and Taint
- 8.2.9 Toxicity
- 8.2.10 Resistance to Deep Freezing
- 8.2.11 Leak Proofness
- 8.2.12 Paper Board
- 8.2.13 Thickness
- 8.2.14 Wax Content
- 8.2.15 Stiffness
- 8.2.16 Ink
- 8.2.17 Wax Quality
- 8.2.18 Varnish and Lacquer
- 8.2.19 Adhesive
- 8.2.20 Odour and Taint
- 8.2.21 Manufacturer's Joint

### 8.3 The Packaging Operation

- 8.3.1 Bulk Packaging
- 8.3.2 Packaging for Direct Sale to Consumers
- 8.3.3 Economy in Packaging Operations

### 8.4 The Hardening Process

- 8.4.1 Factors Affecting Hardening Time
- 8.4.2 Types of Hardening Facilities
- 8.4.3 Rapid Hardening Systems
- 8.4.4 Precautions to Observe in the Operation of Hardening and Storage

## Rooms

### 8.5 Handling, Storing and Shipping

#### 8.5.1 Shipping with Dry Ice

### 8.6 Quality is the Goal

## 9. Cleaning and Sanitation

### 9.1 Principles of Cleaning

### 9.2 Cleaning

#### 9.2.1 Rinsing

#### 9.2.2 Removal of Sediment

#### 9.2.3 Removal of Fat

#### 9.2.4 Removal of Proteins

#### 9.2.5 Removal of Mineral Deposits

#### 9.2.6 After Rinsing with Clean Water

#### 9.2.7 Cleaning Agents

#### 9.2.8 Alkalis

#### 9.2.9 Acids

#### 9.2.10 Water Chelating Agent

#### 9.2.11 Emulsifiers and Wetting Agents

#### 9.2.12 Protective Substances

#### 9.2.13 Composite Cleaning Agents

#### 9.2.14 Alkaline Composites

### 9.3 Sanitization of Equipment

### 9.4 Sanitary Environment

### 9.5 Hygienic Personnel

### 9.6 Test of the Finished Product

#### 9.6.1 Hazard Analysis and Critical Control Points (HACCP)

#### 9.6.2 HACCP Principles

## **10. Defects and Grading of Ice Cream**

### 10.1 Flavour Defects

#### 10.1.1 Flavouring System

### 10.2 Sweetener System

### 10.3 Body and Texture Defects

#### 10.3.1 Defects of Body

#### 10.3.2 Defects of Texture

### 10.4 Colour

### 10.5 Package

### 10.6 Melting Quality

#### 10.6.1 Defects of Melting Quality

#### 10.6.2 Defects in Ice Cream, their Causes and Prevention

### 10.7 Evaluating Frozen Desserts

### 10.8 Scoring Methods

### 10.9 Ice Cream Clinics

## **11. How to Start Flavoured Ice Cream Manufacturing Business**

### 11.1 Business Planning and Setup

### 11.2 Equipment and Facility Setup

### 11.3 Ingredient Sourcing and Recipe Development

### 11.4 Production Process

### 11.5 Quality Control and Food Safety

### 11.6 Marketing and Distribution

## **12. Varieties, Novelties and Specials**

### 12.1 Plain Ice Cream

#### 12.1.1 Formula

#### 12.1.2 Variations

## 12.2 Candy Ice Cream

### 12.2.1 Variations

## 12.3 Chocolate Ice Cream

### 12.3.1 Chocolate Malt

### 12.3.2 Chocolate Malt and Nuts

### 12.3.3 Chocolate Toffee

### 12.3.4 Chocolate Cool

## 12.4 Fruit Ice Cream

### 12.4.1 Variations

## 12.5 Nut Ice Cream

### 12.5.1 Variations

## 12.6 Variegated or Rippled Ice Cream

### 12.6.1 Probiotic Ice-Cream

### 12.6.2 Manufacture of Probiotic Ice-Cream

## 12.7 Labelling of Probiotic Foods

## 12.8 Diet Science for Ice Cream

## 12.9 Sorbet and Ice Cream

### 12.10.1 Manufacturing Procedure

## 12.10 Kulfi

### 12.10.1 Product Description

### 12.10.2 Technology

### 12.10.3 Innovations

### 12.10.4 Formulation of Kulfi

### 12.10.5 Sweet Fresh Cream and Fresh Milk

### 12.10.6 Frozen Cream

### 12.10.7 Fluid Whole and Skim Milk

### 12.10.8 Plain Condensed Skim Milk

12.10.9 Plain Condensed Whole Milk

12.10.10 Sweetened Condensed Whole or Skim Milk

12.10.11 Packaging

12.10.12 Physico-Chemical Aspects

12.10.13 Shelf Life

12.11 Decoration

### **13. Ice Cream Microbiology**

13.1 Ice Cream as a Carrier Disease

13.2 The Bacterial Count of Ice Cream

13.2.1 Mix Ingredients as a Source of Bacteria

13.2.2 Dairy Products as a Source of Bacteria

13.2.3 Sugar as a Source of Bacteria

13.2.4 Stabilizers as a Source of Bacteria

13.2.5 Flavouring Materials as a Source of Bacteria

13.2.6 Strawberries, Raspberries or Black Berries

13.2.7 Peaches

13.2.8 Oranges and Lemons

13.2.9 Bananas and Mangoes

13.2.10 Dried Fruits

13.2.11 Fruit Juices

13.2.12 Nuts

13.2.13 Colours as a Source of Bacteria

13.2.14 Eggs as a Source of Bacteria

13.2.15 Destruction of Bacteria by Pasteurization

13.2.16 Recontamination of the Mix after Pasteurization

13.2.17 The Effect of Ageing on the Bacterial Count

13.3 Bacteriological Standards for Ice Cream

## 13.4 Milk and Milk Products

### 13.4.1 Ice Cream Defined

### 13.4.2 Classification of Ice Creams and Related Frozen Foods

### 13.4.3 Composition of Commercial Ice Cream

### 13.4.4 The Ingredients used in the Manufacture of Ice Cream

### 13.4.5 Quality of Dairy Products for Ice Cream

### 13.4.6 Sweeteners for Ice Cream

### 13.4.7 Ice-Cream Stabilizers

### 13.4.8 Flavouring Materials

### 13.4.9 Preparation of the Ice-Cream Mix

### 13.4.10 Technical Skill Necessary

### 13.4.11 Procedure in Calculating a Mix

### 13.4.12 Homogenizing the Mix

### 13.4.13 Ageing the Mix

### 13.4.14 Quality of Ice Cream

### 13.4.15 Ice-Cream Defects

### 13.4.16 Body and Texture Defects

### 13.4.17 Colour Defects

### 13.4.18 Distribution of Ice Cream

### 13.4.19 Ice-Cream Making in the Home

## 14. Methods of Laboratory Tests

### 14.1 Judging Flavour and Aroma

### 14.2 Gerber Test for Fat in Milk and Cream

### 14.3 SNF and Total Solids in Milk by Lactometer

### 14.4 Analysis of Fat in Ice Cream

### 14.5 Ether Extraction Test

### 14.6 Preparation of Sample

## 14.7 Procedure

### 14.7.1 Using the Fat Extraction Tube or the Rose Gottlieb Method

### 14.7.2 Using the Mojonnier Fat Extraction Flask

## 14.8 Gerber Test

## 14.9 Apparatus and Reagents

## 14.10 Preparation of Sample

### 14.10.1 Procedure

### 14.10.2 Determination of Total Solids

### 14.10.3 Determination of Acidity in Plain Ice Cream Mix

### 14.10.4 Determination of Protein in Ice Cream

### 14.10.5 Assessing Protein Stability in Ice Cream Mix

### 14.10.6 Specific Gravity of Ice Cream Mix

### 14.10.7 Determination of Free Fat in Ice Cream (Free Fat Estimate or FFE Value)

### 14.10.8 Apparatus and Reagents

### 14.10.9 Procedure

### 14.10.10 Chromatographic Analysis

### 14.10.11 Stability to Heat Shock

### 14.10.12 Meltdown Test and Shape Retention

### 14.10.13 Farrall Homogenization Index

## 14.11 Measurement of Viscosity

### 14.11.1 Pipette Method

### 14.11.2 Borden Flow Meter Method

### 14.11.3 Brookfield Viscometer

### 14.11.4 Microscopic Examination of Ice Cream Texture

### 14.11.5 Test for Ammonia Leaks

### 14.11.6 Surface Tension

## 15. Ice Cream Novelty/Impulse Products

15.1 Molded Novelties

15.2 Extruded Novelties

## **16. Ice Cream Shelf-Life**

16.1 Temperature Fluctuations and Ice Recrystallization

16.2 The Role of Stabilizers

16.3 Maintaining Shelf-Life

## **17. Ice Cream Ingredients**

17.1 Milkfat (or “Butterfat”) / Fat

17.2 Milk Solids-Not-Fat

17.3 Lactose Crystallization

17.4 Sweeteners

17.5 Stabilizers

17.6 The Stabilizers in use Today Include

17.6.1 Locust Bean Gum

17.6.2 Guar Gum

17.6.3 Carboxymethyl Cellulose (CMC)

17.6.4 Xanthan Gum

17.6.5 Sodium Alginate

17.6.6 Carrageenan

17.7 Emulsifiers

17.7.1 Mono- and Di-Glycerides

17.7.2 Polysorbate 80

## **18. Mix Calculations for Ice Cream and Frozen Dairy Desserts**

18.1 Problem 1

18.2 Solution

18.3 Problem 2

18.4 Solution

- 18.5 Problem 3
- 18.6 Problem 4
- 18.7 Problem 5
- 18.8 Problem 6
- 18.9 Problem 7 (Using Liquid Sweeteners)

## **19. Structure of Ice Cream**

- 19.1 Colloidal Aspects of Structure
- 19.2 Ice Cream Meltdown
- 19.3 Structure from the Ice Crystals

## **20. Theoretical Aspects of the Freezing Process**

- 20.1 The Process of Crystallization
- 20.2 Importance of Crystallization Rate
- 20.3 Importance of Temperature Fluctuations and Re-Crystallization
  - 20.3.1 Mechanisms of Ice Recrystallization
- 20.4 Formation of the Glassy Phase in Frozen Foods
- 20.5 Formation of a Dilute Glass

## **21. Ice Cream Manufacture**

- 21.1 Blending
- 21.2 Pasteurization
- 21.3 Homogenization
- 21.4 Ageing
- 21.5 Freezing and Hardening
- 21.6 Hardening

## **22. Ice Cream Flavours**

- 22.1 Introduction
- 22.2 Vanilla
  - 22.2.1 Concentrated Extract

## 22.3 Chocolate and Cocoa

### 22.3.1 Imitation Chocolate

### 22.3.2 White Chocolate

## 22.4 Fruit Ice Cream

## 22.5 Nuts in Ice Cream

### 22.5.1 Quality Control of Nutmeats for Ice Cream

## 22.6 Colour in Ice Cream

# **23. Homemade Ice Cream**

## 23.1 Ingredients Used

## 23.2 Preparation of the Ice Cream Mix

## 23.3 Aging the Mix

## 23.4 Freezing the Mix

## 23.5 Regular Vanilla Ice Cream

## 23.6 Low Calorie Vanilla Ice Cream

## 23.7 Milk Substitute Vanilla Ice Cream

## 23.8 Hints for Making Good Ice Cream

# **24. Ice Cream Formulations**

## 24.1 Ice Cream Mix General Composition

## 24.2 Formulation Considerations

### 24.2.1 Economy Brands

### 24.2.2 Standard Brands

### 24.2.3 Premium Brands

### 24.2.4 Super-Premium Brands

## 24.3 Suggested Mixes

# **25. Automatic Ice Cream Baking Machine Agc-Series**

## 25.1 Features

## 25.2 ACG Series

- 25.2.1 Workers
  - 25.2.2 Area
- 25.3 Features
  - 25.3.1 Gas Burners
  - 25.3.2 Scraping Device
  - 25.3.3 Cone Ejector
  - 25.3.4 Stacking Device
- 25.4 Technical Data
- 25.5 Output Details
- 25.6 Baking Process
- 25.7 Exchange Moulds For Cones & Cups

## **26. New Processing Technology of Flavored Ice Cream**

- 26.1 Advanced Flavor Infusion Techniques
- 26.2 Enhanced Texture with Cryogenic Freezing
- 26.3 Dairy and Non-Dairy Innovations
- 26.4 Automation and Smart Production
- 26.5 Eco-Friendly Packaging and Production
- 26.6 Customizable Ice Cream Bases
- 26.7 Market Benefits
- 26.8 Incorporating Functional Ingredients
- 26.9 Unique Flavor Profiles
- 26.10 Improved Freezing and Storage
- 26.11 Allergen-Free Processing
- 26.12 Faster Production with Modular Systems
- 26.13 Enhanced Consumer Experience
- 26.14 Targeting Niche Markets
- 26.15 Future Trends in Ice Cream Technology

26.16 Conclusion

## **27. Sample Ice Cream Cone Drawing**

27.1 Design for Cone Diameter 30-40mm

27.2 Design for Cone Diameter 40-50mm

27.3 Design for Cone Diameter 50-56mm

27.4 Design for Sugar Cones

27.5 Design for Cups

## **28. Molded Cones & Cups**

28.1 Process & Machines

## **29. Ice Cream Cone Making**

29.1 Product & Its Application

29.2 Market

29.3 Raw Material Requirements

29.4 Manufacturing Process

29.5 Wafer Cone Machine

29.5.1 Technical Parameter

29.5.2 Spare Parts

29.6 Wafer Cone/Cup Pictures for Reference, Other Size & Shape can be Customized

## **30. Success Story of Natural Ice Cream**

30.1 About Natural Ice Cream

30.2 Four PS of Natural Ice Cream

30.2.1 Product

30.2.2 Price

30.2.3 Place

30.2.4 Promotion

30.2.5 Success and the Future

## **31. Specifications of Ice Cream Plant**

- 31.1 Equipments and Machinery for Ice Cream Plant (200 LPH)
- 31.2 Technical Specification
- 31.3 Output
- 31.4 Machine Having Following Operations
- 31.5 Advantage of Plc
- 31.6 Technical Data
- 31.7 Refrigeration System
- 31.8 Electrical Specification

## **32. Ice Cream Production using Natural Ingredients (Manufacturing, Formulation, Process)**

- 32.1 Ingredient Sourcing and Preparation
  - 32.1.1 Ingredient Sourcing
  - 32.1.2 Ingredient Preparation
- 32.2 Ice Cream Preparation Process
  - 32.2.1 Ingredient Preparation
  - 32.2.2 Mixing
  - 32.2.3 Pasteurization
  - 32.2.4 Homogenization
  - 32.2.5 Cooling and Aging
  - 32.2.6 Flavoring (if not added earlier)
  - 32.2.7 Freezing
  - 32.2.8 Packaging
  - 32.2.9 Hardening
- 32.3 Basic Formula for Ice Cream using Natural Ingredients
- 32.4 Machinery and Equipment used in Manufacturing of Ice Cream using Natural Ingredients
  - 32.4.1 Mixing Equipment
  - 32.4.2 Freezing Equipment

- 32.4.3 Mixing and Flavoring Equipment
- 32.4.4 Packaging Equipment
- 32.4.5 Storage and Hardening Equipment
- 32.4.6 Cleaning and Maintenance Equipment
- 32.4.7 Quality Control Equipment
- 32.4.8 Refrigeration Systems
- 32.4.9 Other Equipment

### **33. BIS Standards**

### **34. ISO Standard**

### **35. Plant Layout Description of Flavoured Ice Cream**

- 35.1 Main Production Areas
  - 35.1.1 Receiving and Storage Area
  - 35.1.2 Processing Area
