About the Book

Manufacture of Electrical Cables, Wire and Wire Products Handbook

(Copper Wire, Barbed Wire, Spring, Wire Nail, Wire Mesh, Fiber-Optic Cable, PVC Wire and Cable, Aluminum Wire, Steel Wire Rope, Galvanised Wire, Coaxial Cable, Litang Cable LAN/Ethernet Cable, Power Cord Cable, Submersible Cable, XLPE Cable with Machinery Equipment Details & Factory Layout)

The Electrical Cables, Wire and Wire Products Handbook has been written with a dual purpose in mind: the first is to provide information on the actual assembly of cables, wire, and wire products; the second is to serve as an initial reference handbook for electrical cable, wire, and wire products designers.

A successful business needs a good foundation. This handbook will provide you with the basics on electrical cables, wire and wire products. You'll learn about the different types of cables, how they're made and what goes into making a quality product. Plus, you'll get an overview of the factory layout and machinery involved in the manufacturing process. With this knowledge in hand, you'll be well on your way to starting a successful business. Explore the possibilities! Learn about production of different types of wires

The global wires and cables market size was estimated at growth rate (CAGR) of 4.4%.The global copper wire market reached a CAGR of 5.70%. The global spring market size at a CAGR of 4.5%. Global Wire Mesh Market size valued at a CAGR of 3.5%. The global fiber optic cable market a CAGR of 14.5%.? The CAGR for the plastic coated steel wires market is 6.28%. The global Aluminum Wire market is forecasted to grow at a rate of 3.3%. The global steel wire rope & plastic rope market size at a CAGR of 8.0%. The global hot-dip galvanized steel wire market is expected to grow at a CAGR of 4.5%. The global coaxial cables market size is expected growth rate (CAGR) of 9%. The global ethernet cable market size a CAGR of 11.3%. The global power cables market size a CAGR of 6.8%. The global market for Electric Submersible Cables growing at a CAGR of 3.5%. The global XLPE Cables market size is estimated a CAGR of 5.0%.

The market demand for wire and wire products is constantly growing. This is due to the increasing need for electrical power and the ever-growing telecommunications industry. The manufacture of electrical cables, wire and wire products is a highly specialized process that requires the use of sophisticated machinery and

equipment. Examples of this are extruders, crimpers, cutters, heat treaters and insulation converters. These are all machines used in the production of specific types of wire and cable such as copper wire, aluminum wire or fiber optic cable, Barbed Wire, Wire Nail, PVC Wire, Steel Wire. There are also many other types including galvanized steel wire rope, steel springs and metal mesh screens.

The Manufacture of Electrical Cables, Wire and Wire Products Handbook is a comprehensive guide everything from the conception of your business to the execution of your product. This book provides detailed instructions on how to start a business, including how to write a business plan, and how to manufacture your product.

The book covers the manufacture of electrical cables, wire and wire products. It includes production of copper wire, barbed wire, spring wire nail, wire mesh, fiber-optic cable, PVC wire and cable, aluminum wire, steel wire rope, galvanized wire, coaxial cable, litang cable LAN/ethernet cable, power cord cable, submersible cable, XLPE cable with machinery equipment details & factory layout.

Contents

Contents

1. Introduction

1.1 Introduction

1.2 Wire

1.3 Cable

1.4 Different Uses of Wire and Cable

1.4.1 Use of Wire

1.4.2 Use of Cable

1.5 Understanding Electrical Wire

1.6 Size of the Wires

1.7 Wire Lettering

1.8 Types

1.9 Types of Electrical Cables

1.10 Color-Coded Cable

1.11 Cable Length

1.12 Different Advantages of Using Wire and Cable

1.12.1 Advantages of Wire

1.12.2 Advantages of Cable

2. How are Electrical Wires Manufactured?

2.1 Wire Drawing

2.2 Annealing

2.3 Wiring

2.4 Hot Extrusion

2.5 Voltage Checks

2.6 Wiring Phases

2.7 Additional Defense

3. Copper Wire

3.1 Types

3.1.1 Solid and Stranded

3.1.2 Cable

3.2 Applications

3.3 Interactive Graphic of Ions and Electrons

3.3.1 Electrical Wiring

3.3.2 Communications Wiring

3.3.3 Coaxial Cables

3.3.4 Structured Wiring

3.3.5 Power Distribution

3.3.6 Appliance Conductors

3.4 Automotive Conductors

3.5 Magnet Wire

3.6 Uses

3.6.1 Telecommunication

3.6.2 Electricity Supply

3.6.3 Automobile Industry

3.6.4 Jewelry

3.7 Copper's Properties

3.8 How Copper Conducts

3.9 Interactive Graphic of Electrical Conduction

3.9.1 Conducting Electricity

3.10 Properties of Copper Useful for the Copper Wire

3.11 Properties of Copper Wire

3.11.1 Electrical Conductivity

3.11.2 Tensile Strength

3.11.3 Ductility

3.12 Strength and Ductility Combination

3.12.1 Resilience to Creep

3.12.2 Corrosion Resistance

3.12.3 Coefficient of Thermal Expansion

3.12.4 Thermal Conductivity

3.12.5 Solderability

3.12.6 Ease of installation

3.13 Splice Closures for Copper Cables

3.14 Types of Closures

3.15 Future Trends

3.16 Pure Copper & Its Importance

3.17 Certification

3.18 Magnetometer Test

3.19 Conductivity and Resistance

3.20 Density

4. Copper Wire Manufacturing Process

4.1 Drawing Process

4.2 Annealing Process

4.3 Bunching / Stranding Process

4.4 Tinning Process

4.5 Hot Dip Process

4.6 Electroplating Process

4.7 Braiding

4.8 Process for Tinsel Wire

4.9 Process of Glass Wire

4.10 Copper Wire Recycling Process

4.11 Negative Impacts of Using Low-Temperature Burning Process

4.12 Benefits of Recycling Copper Wire

5. Copper Wires and Upcoming Trends

5.1 Prominent Use of Copper Wires

5.2 Copper: A Preferred Metal for Electric Wiring Purpose

6. How to Start a Spring Manufacturing Plant

6.1 Understand the Type of Device Spring Manufacturing Facility will Provide

6.2 Locate Suppliers for Spring Manufacturing Facility

6.3 Promote the Spring Manufacturing Industry

7. Springs

7.1 Classification

7.2 Many Kinds

7.3 Many Kinds of Springs

7.4 Different Types of Springs: Compression, Extension, Torsion, & Constant Force Springs

7.5 Torsion Spring

7.6 Constant Force Spring

7.7 High-Carbon Spring Steels in Wire Form

7.8 High-Carbon Spring Steels in Flat Strip Form

7.9 Alloy Spring Steels

7.10 Stainless Spring Steels

7.11 Copper-Base Spring Alloys

7.12 Nickel-Base Spring Alloys

7.13 Nickel-Base Spring Alloys with Constant Moduli of Elasticity

7.14 Metal Springs

7.15 Springs Types and Common Spring Materials

7.15.1 Compression Springs

7.15.2 Springs Hooke‘s Law

7.15.3 Helical Compression Springs

7.15.4 Helical Tension Springs

7.15.5 Helical Torsion Springs

7.15.6 Special Springs

7.16 Spring End Types

7.17 Chapter Four – Common Spring Materials

7.18 Carbon Steel Springs

7.19 Alloy Steel

7.20 Stainless Steels

7.21 Non-Ferrous Alloys

8. Spring Manufacturing Process

8.1 Spring Design

8.2 Spring Manufacturing

8.3 According to Design & Row Material Standard

8.3.1 Cold Coiling

8.3.2 Hot Winding

8.3.3 Heat Treatment

8.3.4 Grinding

8.3.5 Shot Peening (Shot Blasting)

8.3.6 Coating

8.4 Compression Springs

8.5 Selection a Compression Spring

9. Wire Nail Manufacturing Business Idea

9.1 Legal Process Pertaining to the Production of Iron Wire Nails

9.2 A Wire Nail or the Equipment Needed to make Nails out of Iron Wire

10. Wire Nails

10.1 Cut and Wire Nails Differently

10.2 Uses

10.3 Specification

10.4 Market Potential

10.5 Types

10.6 Nail Materials

10.7 Sized

10.7.1 Common Nails

10.7.2 Box Nails

10.7.3 Duplex Head Nails

10.7.4 Annular Ring or Ring Shank Nails

10.7.5 Masonry/ Concrete Nails

10.7.6 Casing/ Finish Nails

10.7.7 Brad Nails

10.7.8 Roofing Nails or Clout Nails

10.8 Applications

10.9 Classification

11. Wire Nail Manufacturing Process

11.1 Manufacturing Process

11.2 Design

11.3 Raw Materials

11.4 Manufacturing Process

11.5 Nail-Making Machines in Series

11.6 Machine for Combining and Continuous Wire Drawing

11.7 Forming

11.8 Further Forming

11.9 Finishing

11.10 Packaging

11.11 Quality Assurance

11.12 The Upcoming

11.13 Technical Data of Wire Nail Making Machine

12. Wire Mesh

12.1 A Great Variety of Shapes and Applications

12.2 Characteristics

12.2.1 Welded Wire Mesh

12.2.2 Wire Fabrics

12.2.3 Wire Nettings

12.3 Basics of Wire Mesh

12.4 How Wire Mesh is Made

12.4.1 Wire Weaving

12.4.2 Welded Wire Mesh

12.5 Types of Wire Mesh

12.6 What is Welded Wire Mesh?

12.6.1 Galvanized Wire Mesh

12.6.2 Vinyl-Coated Wire Mesh

12.6.3 Welded Steel Bar Gratings

12.6.4 Stainless Steel Wire Mesh

12.6.5 Wire Mesh Patterns

12.6.6 Crimped Wire Mesh

12.6.7 Non-Crimped Wire

12.6.8 Double Weave Wire Mesh

12.6.9 Flat Top Weave Wire Mesh

12.6.10 Twill Weave Wire Mesh

12.6.11 Dutch Weave Wire Mesh

12.6.12 Off Count Wire Mesh

12.6.13 Stranded Weave Wire Mesh

12.6.14 Mesh Count

12.6.15 Wire Mesh Edges

12.7 Wire Used to Make Wire Mesh

12.7.1 Carbon Steel in Wire Mesh

12.7.2 Stainless Steel in Wire Mesh

12.7.3 Aluminum Wire in Wire Mesh

12.7.4 Copper in Wire Mesh

12.7.5 Brass in Wire Mesh

12.7.6 Bronze in Wire Mesh

12.8 Uses for Wire Mesh

12.9 Benefits

12.10 Market Potential

12.11 Basis and Presumptions

13. Welded Wire Mesh Manufacturing Process

13.1 Wire Rod

13.2 Cold Rolling

13.3 Straightening & Cutting

13.4 Welding

13.5 Bending & Cutting

13.6 Finished Mesh

14. Motions in Wire Mesh Weaving Process

14.1 Steps Involved in Weaving

15. Fiber Optic Manufacturing Process

15.1 Step 1: Prepare and Purify the Raw Materials for Fibre Optics

15.2 Step 2: Surface Treatment and Melting of the Fibre Optic Core-Rod

15.3 Step 3: Primary Coating Process and Wire Drawing

15.3.1 Process of Primary Coating

15.4 Step 4: Sorting and Colouring of Fibre Optic Cable Tension

15.4.1 Tension Sorting

15.4.2 Fiber Optic Coloring Process

15.5 Step 5: Fiber Optic Secondary Coating or Plastic Coating

15.6 Step 6: Fiber Optic Cable Core Manufacturing Process (Cable Forming Process)

15.6.1 Cable Forming Technology of Layer Stranded Optical Cable

15.6.2 SZ Stranding Process

15.7 Step7: Extrusion Technology of Optical Cable Integrated Jactketing

15.7.1 Optical Cable Water Blocking Technology

15.7.2 Process of Longitudinal Jacketing

15.7.3 Extrusion of Plastic

15.7.4 Protective Technology

15.7.5 Integrated Jacketing Production Line

16. Fiber Optic Patch Cord and Pigtail Production Process

16.1 Step.1 Fiber Optic Patch Cord Cable Cutting

16.2 Step.2: Cleaning and Proper Handling of Fibre Optic Patch Cables

16.3 Step.3 Stripping and Labeling Fiber Patch Jumper Cable

16.4 Step.4 Fiber Insertion and Fiber Injection into Fiber Optic Ferrule

16.5 Step.5 Solidifying Fiber Patch Cord

16.6 Step.6 Ultrasonic Cleaning & Polishing of Fiber Patch Cable

16.7 Step.7 Fiber Jumper Microscope Inspection

16.8 Step. 8 FQC, for a Fibre Patch Cord

16.9 Step. 9: Fiber Patch Cord Packaging

17. Fiber-Optic Cable

17.1 Design

17.2 Capacity and Market

17.3 Reliability and Quality

17.4 Cable Types

17.5 Jacket Material

17.6 Fiber Material

17.7 Color Coding

17.7.1 Patch Cords

17.7.2 Multi-Fiber Cables

17.8 Safety

17.9 Hybrid Cables

17.10 Types

17.11 Placement

17.12 How Fiber Optics Works

17.13 Types of Fiber Optic Cables

17.14 Single-Mode Fiber

17.15 Multimode Fiber

17.16 Fiber Optics vs. Copper Cables

17.17 Advantages and Disadvantages of Fiber Optics

17.18 Fiber Optics Uses

17.18.1 Networking and Streaming on Computers

17.18.2 Internet Access and Cable TV

17.18.3 Habitats Under the Sea

17.18.4 Armed Forces and Space

17.18.5 Medical

17.19 What Kinds of Fibre Optic Cables Are There?

17.20 What is the Purpose of Optical Fibre Cable?

17.20.1 Rapid Internet Access

17.20.2 Networking

17.20.3 Centres for Data

17.20.4 Military Application

17.20.5 Fiber vs Cable: Structure

17.20.6 Fiber vs Cable: Availability

17.20.7 Fiber vs Cable: Reliability

17.20.8 Fiber vs Cable: Speed

17.20.9 Fiber vs Cable: Cost

17.20.10 Other Deployments, Fiber Networks, and Fiber to the Home

18. PVC Wire and Cable

18.1 Introduction

18.2 Market Potential

18.3 Basis and Presumptions

18.4 Technical Aspects

18.4.1 Process of Manufacture

18.5 Advantages

18.6 Tests

18.7 Types

18.7.1 Cables and Wires in PVC Specialty

18.7.2 PVC that Resists Cold

18.7.3 PVC that Resists Heat

18.7.4 PVC that Resists Oil

18.8 Uses

18.9 Customizable

18.10 Utilizable

18.11 Process for Manufacturing PVC Cable and Wire

19. How to Start PVC Cables Manufacturing Business

19.1 PVC Cables Manufacturing – Market Potential

19.2 Registration & License for PVC Cables Manufacturing

19.3 PVC Cables Manufacturing Machine & Testing Equipment

19.4 Double Bridge Tensile Testing Device by Kalvin

19.5 Materials Needed to Make PVC Cables

19.6 Manufacturing of PVC Cables

20. Wire PVC Coating Line

20.1 Wire Payoffs & Wire Decoilers

20.1.1 Features of the Novo Precision FWPO

20.1.2 Medium & Heavy Wire

20.2 Wire Rolling Wheel

20.3 PVC Wire Extruder Machine

20.4 Barrel Charger Machine

20.5 Cooling Flume

20.6 Traction Engine

20.7 Recoiling Machine

21. Roll Mesh PVC Coating Line

21.1 Equipment List

21.1.1 Auto Eletrical Pre-Heating & Curing Furnace

21.1.2 Fluidized Bed, Vibration Generator

21.1.3 Roll Mesh Delivery System

21.1.4 Mesh De-Coiler

22. Fence PVC Coating Line

22.1 Fence PVC Coating Equipment

22.2 Process Flow

22.2.1 Pre-Heating

22.2.2 Auto Powder Immersion

22.2.3 Curing

22.2.4 Coated Work Piece Cooling

22.2.5 Packing Machine

23. Wire Drawing Process

24. Aluminum Wire

- 24.1 Aluminum Wiring
- 24.2 Aluminum Conductors
- 24.3 Aluminium Cable
- 24.4 Aluminium Wire/Rod
- 24.5 Application of the Technique
- 24.6 Aluminium Alloy Wire
- 24.7 Technique Execution
- 24.8 Aluminium Alloy Wire
- 24.9 Aluminium Alloy Rod
- 24.10 Executing a Technique
- 24.11 Materials
- 24.12 Modern Building Construction
- 24.13 Electrical Device Ratings
- 24.14 Oxidation
- 24.15 Joining Aluminum and Copper Wires
- 24.16 Upgrades and Repairs
- 24.17 Aluminum Oxidation

25. Aluminium Wire Process

- 25.1 Description
- 25.2 Application
  - 25.2.1 Aluminum Billet Pre-Heat Furnace
  - 25.2.2 Extrusion Machine
  - 25.2.3 Breakdown Rolling Machine
  - 25.2.4 Aluminum Wire Annealing Furnace

25.2.5 Contour Rolling Machine

25.2.6 Contour Drawing Machine

25.2.7 Bright Annealing Wire Line

25.2.8 Wire Winding Machine

26. Steel Wire Rope

26.1 Components of a Steel Wire Rope

26.2 Rope Constructions and Types

26.2.1 Single Strand Ropes

26.2.2 Single Layer Stranded Rope

26.2.3 Multi-Strand Non-Spin Ropes

26.3 Types of Strand Construction

26.3.1 Unequal Lay Strands

26.3.2 Triangular Strands

26.3.3 Ribbon and Flattened Strands

26.3.4 Fibre Cored Strands

26.3.5 Fibre Covered Strands (Marline Clad)

26.3.6 Compact Strand

26.4 Lay Configuration

26.4.1 Type of Lay

26.4.2 Hand of Lay

26.5 Tensile Strength of Steel

26.5.1 Finish of Steel

26.6 Preformation

26.7 Lubrication

26.8 Wire Rope Composition

26.8.1 Steel Wire

26.8.2 Cord Core

26.8.3 Grease

26.9 Classification

26.9.1 Classified by Material

26.9.2 Classified by Surface State

26.9.3 Classified According to the Method of Tanning

26.10 Only One Strand

26.11 Two Strands

26.12 Three Strands

26.12.1 State Classification

26.13 Construction

26.13.1 Wires

26.13.2 Strands

26.13.3 Spiral Ropes

26.13.4 Stranded Ropes

26.14 Classification According to Usage

26.15 Rope Drive

26.16 Safety

26.17 Terminations

26.18 Thimbles

26.19 Wire Rope Clips

26.20 Eye Splice or Flemish Eye

26.21 Swaged Terminations

26.22 Wedge Sockets

26.23 Potted Ends or Poured Sockets

27. Steel Wire Ropes Production Process

27.1 Wire Rod

27.2 Surface Treatment

27.3 First Drawing

27.4 Patenting

27.5 Intermediate Drawing

27.6 Stranding

28. Galvanised Wire

28.1 Advantages

28.2 Uses

28.2.1 Binding Materials

28.2.2 Protective Fencing

28.2.3 Making Handicrafts

28.2.4 Agricultural Uses

28.2.5 Other Daily Uses

29. Wire Galvanising Plant

29.1 Clientele

29.2 Quality Assurance

29.3 Methods

29.3.1 Hot-Dip Galvanizing

29.3.2 Galvannealing

29.3.3 Pre-Galvanizing

29.3.4 Electro Galvanizing

30. Coaxial Cable

30.1 Applications

30.2 Description

30.3 How Coaxial Cables Work

30.4 Construction

30.5 Signal Propagation

30.6 Connectors

30.7 Types of Connectors

30.8 Types

30.8.1 Hard Line

30.8.2 Radiating

30.8.3 RG-6

30.8.4 Triaxial Cable

30.8.5 Twin-Axial Cable

30.8.6 Semi-Rigid

30.8.7 Rigid Line

30.9 Uses of Coaxial Cables

30.10 Coaxial Cable Sizes

30.11 Coaxial Cable Connector Types

30.12 Advantages

31. Coaxial Cable Manufacturing Process

31.1 Cutting

31.1.1 Cutting Semi-Rigid Coax with a Saw

31.2 Cutting Flexible Coax with a Saw System

31.3 Stripping

31.4 Bending

32. Ethernet Cable

32.1 Types

32.1.1 Types of Coaxial Cables

32.1.2 Connector Types Used in Coaxial Cable

32.1.3 Twisted Pair Cable Varieties

32.1.4 Types of Fiber Optics

33. Litang Cable LAN/Ethernet Cable Manufacturing Process

33.1 Step 1: Wire Diagram

33.2 Step 2: Copper Wire is Annealed to Increase Ductility and Soften the Wire

33.3 Step 3: Copper Wire Extrusion and Insulation (Extruder, Sheath Machine)

33.4 Step 4: Wire Insulation Diameter Testing (Calipers and Performance Testers)

33.5 Step 5: Twisting and Stranding Wire (Twisting Machine)

33.6 Step 6: Cabling (Cabling Machine)

33.7 Step 7: Jacketing (Jacketing Machine)

33.7.1 Cross Filling (Separator Filling)

33.7.2 Metal Sheath Filling

33.7.3 Braided Wire Filling

33.7.4 Drain Wire Filling

33.7.5 Rid Cord Filling

33.7.6 Outer Cable Jacketing

33.7.7 Cooling and Printing

33.8 Step 8: Pre-Shipment Testing

33.9 Step 9: Packing

34. Power Cord Cable

34.1 Construction

34.2 Higher Voltages

34.3 Flexibility of Cables

34.4 Features

34.5 Terminologies

34.5.1 Electric Cords

34.6 Interconnection Cord Set

34.7 AC Power Cords

34.8 Custom Power Cords

34.9 Extension Cords

34.10 Generator Power Cords

34.11 NEMA Power Cords

34.12 NEMA 5-15P Power Cords

34.13 Electrical Plug

34.14 Sockets or Electrical Receptacles

34.15 Plug Adapters

34.15.1 Connector

34.16 Appliance Inlet

34.16.1 Flexible Cord

34.17 Pin

34.18 Pin Live

34.19 Unbiased Pin

34.20 Ground Pin

34.20.1 Thermal Sleeves

34.21 Polarized Relationship

34.22 Shutters

34.23 Outlet Covers

34.24 Retainers

34.25 Rating for Current and Voltage

34.26 Wire-Sharing Connector

34.27 Divider for Power Cords

34.28 Fuse

35. Power Cord Cable Manufacturing Process and Equipment

35.1 Step1: Cutting and Stripping the Cable to the Length and Outer Jacket

35.2 Step 2: Stripping and Twisting the Cable Inner Wire

35.3 Step3: Crimping the Plug to Cable for Making the Cable Head Plug

35.4 Step 4: Crimping the AC Terminal to Cable for making the Cable Tail Plug

35.5 Step5: After Crimped the Tail Plug then Manual Insert the Plastic Cover

35.6 Step6: Injection and Molding

35.7 Step 7: Cable Performance Testing

35.8 Step 8: Packing the Power Cord

36. Submersible Cable

36.1 Features

36.2 Applications

36.3 Type

36.4 Construction

36.5 Standards

36.6 Color Code

36.7 Benefits

36.8 Reasons to get Submersible Cable

36.9 Manufacturing Process

36.9.1 Taping Machine

36.9.2 Slitting and Rewinding Machine

36.10 Electrical Industrial Ovens

36.10.1 Industrial Oven Heat Sources

36.10.2 Industrial Oven Air Flow

36.11 High Voltage Tester
36.11.1 Horizontal Wire Wrapping Machine
36.11.2 Wire Vertical Wrapping
36.12 Packing Steps
37. Submersible Winding Wire Plant
37.1 Taping Machine
37.2 Slitting and Rewinding Machine
37.3 Electrical Industrial Ovens
37.3.1 Industrial Oven Heat Sources
37.3.2 Industrial Oven Air Flow
37.4 High Voltage Tester
37.5 Horizontal Wire Wrapping Machine
37.6 Wire Vertical Wrapping
37.7 Packing Steps
38. How to Start Barbed Wire Production Business
38.1 Barbed Wire Production Market Potential
38.2 Barbed Wire Production Business Registration
38.3 Investment & Costs for a Manufacturing Company of Barbed Wire
38.4 Production of Barbed Wire
38.5 Process Flow Chart
39. Barbed Wire
39.1 Design
39.1.1 Materials
39.1.2 Strand Structure
39.1.3 Barb Structure
39.1.4 Twist Type

39.2 Installation

39.3 Gates

39.4 Uses

39.4.1 Agriculture

39.5 Different Varieties of Barbed Wire

39.6 Benefits of the Zinc Coating

39.7 Benefits of Barbed Wire

39.8 Primary Uses for Barbed Wire Fencing

40. Barbed Wire Manufacturing Process

40.1 Raw Materials

40.2 Manufacturing Process

40.2.1 Making Steel Ingots

40.2.2 Making Billets

40.2.3 Making Wire

40.2.4 Making Barbed Wire

40.3 Quality Control

40.4 The Future

41. XLPE Cable

41.1 Introduction

41.2 Types

41.2.1 Cross-Linked Polyethylene (XLPE)

41.3 Uses & Application

41.4 Advantages

41.5 Properties

41.5.1 Thermal Properties

41.5.2 Electrical Properties

41.5.3 Mechanical Properties

41.5.4 Chemical Properties

42. Manufacturing Process of XLPE Cable

42.1 Conductor

42.2 Dielectric Insulation

42.3 Screening

42.3.1 Conductor Detector

42.3.2 Insulation Detector

42.4 Laying Up

42.5 Innersheath

42.6 Armouring

42.7 Final Testing

43. Electrical Cable Coating

43.1 Types of Cable Coating

43.1.1 Insulation

43.1.2 Semiconductor

43.1.3 Metal Screen
