The beginning of ink making is something of a mystery. It is certain however, that the development of the art of writing preceded the invention of ink by almost a thousand years. Today inks are divided into two classes: printing inks and writing inks. Printing is a process for reproducing text and images, typically with ink on paper using a printing press. It is often carried out as a large scale industrial process, and is an essential part of publishing and transaction printing. Different techniques and printing equipments are employed for each printing practices. The demand for innovative printing practices has been on a high in recent times. There are various kinds of printing processes; lithographic process, the gravure process, offset printing process etc. different types of inks derived from different processes are ball pen inks, bleachable inks, fluorescent inks, fast drying ink, automatic press inks, rotary press inks, coated paper inks, planographic inks, lithographic inks, offset tin printing inks etc. The Printing Ink industries have grown significantly during the last decade and this industry is characterized by exceeding high margin profit. As we read newspapers, magazines, and books on a daily basis therefore inks are found in almost every aspect of human activity. The worldwide printing inks market is projected to register a CAGR of about 2.8%. Printing inks market embodies the strength of the global as well as regional economies. With its high correlation to a national GDP, the printing inks market is cyclical in nature, with economic ups and downs amplifying the demand patterns. The world printing inks market is projected to grow moderately over the next couple of years.

The major contents of the book are pigment in the printing inks, manufacturing of printing inks, storage and testing of raw materials, planographic inks, lithographic inks, factors effecting visual appearance of ink film, factors effecting visual appearance of ink film, method of mixing metallic powder and varnish, the principle of reproducing photographs by printing methods, etc.

In this book an attempt has been made to bring together the useful manner as possible the fundamental Principles of ink making. The book contains formulae processes and other relevant information of the manufacturing of different types of printing inks.

Contents

1. Introduction
2. Printing Inks
3. Printing Ink Vehicles
   Vegetable Drying Oils
   Linseed Oil and Linseed Oil Varnishes
4. Lithographic Varnish
5. China Wood Oil or Tung Oil
6. Soya Bean Oil
7. Perilla Oil
Other Vegetable Drying Oils
The Vegetable Semi-Drying Oils
Cottonseed Oil
Rapeseed Oil
The Vegetable Non-Drying Oils
Mineral Oils
Animal Oils
Terrestrial Animal Oils
Marine Animal Oils
Rosin Oils
Pitch Varnishes
4. Pigment in the Printing Inks
Pigments
Nature
Minerals
Carbonic sources
Botanical
From animals
Black Pigments
Lamp black
Russian black
Coal or gas
Wooden coal
Ivory coal
Bones
Parish black
Lead and graphite
Composition black
White Pigment
White lead
Antimony
Chinese white
Transparent white
Blainfix white
Yellow Pigments
Chrome yellow
Cadmium yellow
Ochres yellow
Gummy material
Minerals
Red Pigment
Vermillion
Carmine
Lac
Lake pigment
Kothenial lake
Madar
Blue Pigment
Prusian blue
Ultramarine blue
Reflex blue
Oriental blue
Cobalt blue
Indigo blue
Green Pigment
Emerald green
Chrome green

5. Manufacturing of Printing Inks
Storage and Testing of Raw Materials
Mixing operation
Mixing machines
Milling process
Delivery part of the machine
Quality control
Packing and selling

6. Typographic Printing Inks
Job Press Inks
Job Black
Job Press Bright Red
Job Press Green
Automatic Press Inks
Automatic Press Black
Automatic Press Red
Flatbed Cylinder Press Inks
Cylinder Press Black
Cylinder Press Peacock Blue
Rotary Press Inks
Rotary Press Red
Rotary Press Black
Web Press Inks
Web Press News Black
Perfecting Press Red

The Relation of Ink to Stock
Bond and Ledger Paper Inks
Bond Bronze Blue
Bond Black
Coated Paper Inks
Coated Paper Red
Coated Paper Yellow Lake
Super-calendered Paper Inks
Super Paper Red

Inks for Machine Finished Paper
Machine Finished Red
Machine Finished Blue
Glassine and Cellophane Inks
Glassine Violet
Glassine Green
Halftone Black Inks
High Grade Halftone Black
Publication Halftone Black  
Process Inks  
Process Transparent Yellow  
Process Blue  
Process Red  
7. Planographic Inks  
Lithographic Inks  
High Grade Lithographic Black  
Lithographic Peacock Blue Ink  
Lithographic True Blue  
Offset Printing Inks  
Offset Red for Lake C  
Offset Milori Blue  
Offset Tin Printing Inks  
Tin Printing Reddish Blue  
Tin Printing Medium Yellow  
Dry Offset Printing Inks  
Dry Offset Red for Lake C  
Dry Offset Bronze Blue  
Photogelatin Inks  
Photogelatin Blue  
Photogelatin Black  
8. Intaglio Printing Inks  
Copper Plate Engraving Inks  
Copper Plate Black  
Copper Plate Blue  
Steel Plate Engraving Inks  
Steel Plate Black  
Toner Blue Ink for Plate Black  
Steel Plate Orange  
Stamping Inks  
Gloss Stamping Red  
Dull Stamping Black  
Photogravure Inks  
Photogravure Picture Black  
Photogravure Brown  
Rotary Photogravure Inks  
Plateless Engraving or Thermographic Inks  
Dense Black for Plateless Engraving  
True Blue for Plateless Engraving  
9. Printing Inks and Colour  
Subtractive Theory of Colours  
Additive Theory of Colours  
Reproduction of Colour By Printing Ink  
Classification of Colours  
Primary colours  
Secondary colours  
Tertiary colours  
Examples of tertiary colours  
Factors effecting visual appearance of ink film  
Influence of colours  
Cold colours  
Warm colours
Terminology Related to Colour
Contrast
Harmony

Analogous colours
Complementary colours
Density in colour
Transparent and opaque colours
10. Qualities of Offset Inks
Working Qualities
Optical Qualities
Effects After Printing
11. Gravure Printing Inks
Characteristics of Gravure Inks
Vehicles in the Gravure Inks
Considerations for Purchasing Inks
12. Printing Inks for Letterpress
News ink
Inks for platen and cylinder machines
Moisture-set inks
Important Points
Quick-set inks
Cheque inks
Heat-set inks
Important Points
Metallic inks
Method of mixing metallic powder and varnish
Precautions
Aniline inks
Neo-set Inks
13. The Nature of Printing Ink
The Three Main Printing Systems
Typographic Method
Lithographic Method
Intaglio Method
General Properties of Letterpress Inks
The Silk Screen Method
The Principle of Offset Printing
Methods of Ink Drying
Relation between the Printing Process, Ink, And Paper
The Principle of Reproducing Photographs by Printing Methods
The Actinic Tanning of Gelatine
Letterpress Half-tone Plate Reproduction
The Principle of Photogravure
Half-tone Printing Using Dots Letter Press (or Litho)
Photogravure Printing Using Square Cells
Print Recognition
Differences in Litho and Offset-Litho Printing
Differences in Typographic Printing
14. The Colloidal Nature and Rheology of
Printing Inks
Ink Compared to Colloidal Dispersions
Flocculation
Types of Flow
Fluidity
Newtonian Flow
Plasticity
Plastic Flow
Consistency
Thixotropy
Measurement of Thixotropy
Pseudo-plastic Flow
Dilatant Flow
The Empirical Flow Test
Rheological Specifications of An Ink
Flow Requirements of Letterpress Inks
Supply of Ink from the Duct
Behaviour of Ink in the Duct
Distribution of Ink on the Press

19. Natural Resins, Modified Natural Resins, and Bituminous Materials
Nature of Resins
Classification of Resins
Congo Copal
Manila Copal
Sierra Leone Copal
Zanzibar Copal
Amber
Damar
Rosin or Colophony
Rosin Oil
Polymerized Rosin
Hydrogenated and Oxidized Rosins
Tall Oil
Shellac
Sandarac
Mastic
Zein
Modified Natural Resins
Ester Gum
Lime-hardened Rosin
Bituminous Materials Nature
Asphalts
Bitumens
Pitches
Firnigrals and Iranolins
Uses in Printing Inks
20. Aniline, Dye-spirit, or Flexographic Inks
Transparent Aniline Inks
Uses And Advantages
Basic Dyes Suitable for Transparent Aniline Inks
Media
Pigmented Flexographic Inks
Synthetic Resins For Spirit Inks
Maleics
Pure Phenolics
Unesterified Rosin Modified Cresol-formaldehyde Resins
Unesterified Rosin Modified Phenol-formaldehyde Resins
Miscellaneous Phenolics
Ketone-aldehyde Base Synthetic Resins
Spirit Type, Flexographic Ink Formulations
Flexouraphic Inks Not Based On Alcohol
Aniline Machines
21. Drying Oils,
   The Nature of Drying Oils
   The Acids Present In Drying Oils
   Properties of Semi-drying Oils
   Linseed Oil
   Production of Raw Linseed Oil
   The Refining of Linseed Oil
   Bleaching of Refined Linseed Oils
   Comparison of the Properties of Acid
   Boiled Linseed Oil
   Blown Linseed Oil
   Heat-bodied Linseed Oil Or Stand Oil
   Plant For Making Stand Oils
   Catalysts For Bodying Linseed Oil
   Improved Stand Oils
   The Chemical Changes in the Heat Bodying
   of Linseed Oil
   Tung Oil
   Properties of Tung Oil
   Dehydrated Castor Oil (D.C.O.)
   Castor Oil
   Following The Dehydration
   D.C.O. Stand Oils
   Blown Dehydrated Castor Oil
   Perilla Oil
   Oiticica Oil
   Stillingia Oil
   Soya Bean Oil
   Sunflower Oil
   Tobaccoseed Oil
   The Drying Oil Fatty Acids
   Linseed Oil Fatty Acids (L.O.F.A.)
   Dehydrated Castor Oil Fatty Acids (D.C.O.F.A.)
   Semi-drying Oil Fatty Acids
   Further Drying Oils
   Improved Drying Oils By Processing
   Fundamentally Modified Drying Oils
Vulcanized or Sulphurized Oils
Styrenated Oils
Maleinized Oils
Epoxidation And Hydroxylation Of Drying Oils
The Use Of Drying Oils In Printing Inks
22. Printing Ink Driers or Siccatives
Nature of Ink Driers
General Use of Driers
Paste And Liquid Driers
Theory of the Promotion of Drying
Methods of Preparation of Liquid Driers
Properties of Liquid Driers
Appearance of The Driers
Standard Specifications
The Use of Driers In Printing Inks
23. Ink on Surfaces other than Paper
General Principles
Cellophane Printing
Moisture-proof Viscous Film Printing
Polyethylene or Polythene Film Printing
Printing on Lacquers and Varnished Surfaces
Printing on Rubber
Printing on P.V.C.
Printing on Metal and Metal Foil
Printersâ€™ Use For Roller Coating
Roller Coatings
Cold-set Inks
24. Solvents, Diluents, and Plasticizers
General Properties of Solvents
Boiling Range
Flash Point
Evaporation Rate
Solvent Retention
Solvent Balance
Viscosity Changes During Drying
Solvent Power
Undesirable Solvent Properties Instability
Bad Odour
Bad Colour
Impurities
Toxicity
Petroleum Alkanes
Natural Petroleum
Petroleum Ether
S.B.P. Spirit
Petroleum Spirit, Ligroin Or Gasoline
White Spirit (W/S)
Mineral Oils
Coal-tar Hydrocarbons
Benzene C6h6
Toluene, C6H5CH3, Methyl Benzene
Solvent Naphthas
Light Naphtha
Heavy Naphtha or Aromatic White Spirit (A.W.S.)
Terpene Solvents
Turpentine
Oxidized Turpentine
Dipentene, C10H16
Pine Oils
Hydrogenated Naphthalene Solvents
Decalin, C10H18
Tetralin C10H12
Alcohol Solvents
Ethanol, Ethyl Alcohol, CH3CH2OH
Isopropanol
Butanol CH3CH2CH2CH2OH
Methyl Isobutyl Carbinol (M.I.B.C.)
Diacetone Alcohol Or Dical
Benzyl Alcohol C6H5CH2OH
Glycol Solvents
Ethylene Glycol HO.CH2CH2OH (E.g.)
Diethylene Glycol HO.CH2CH2O.CH2CH2OH. (D.E.G.)
Propylene Glycol Ch3.CH2OH. CH2OH (P.G.)
Dipropylene Glycol HO. (CH2)3.O. (CH2)3OH (D.P.G.)
Hexylene Glycol, 2 Methyl, (2, 4) Pentanediol (H.G.)
Ethers
Di-ethyl Ether, C2H5.O. C2H5
The Ether Alcohols or Cellosolves
Methyl Cellosolve / CH3.O.(CH2)2.OH
Cellosolve, Ethylene Glycol Monoethyl Ether
Butyl Cellosolve CH3.(CR2)3.O.(CHZ)2OH
The Carbitols
Carbitol
Methyl Carbitol
Ketones
Acetone
Methyl Ethyl Ketone (M.E.K.) CH3.CO. C2H5
Methyl Isobutyl Ketone (M.i.b.k.)
Isophorone, C9H14O
Sextone B, Methyl Cyclohexanone
Acetonyl Acetone, 2.5 Hexanediol
Furfural
Ester Solvents
Butyl Acetate. C4h9.coo.ch3
Butyl Lactate C4H9COO.CH2OH.CH3
Plasticizers
Di-butyl Phthalate (D.B.P.)
Tri-phenyl Phosphate (T.P.P.)
Tri-cresyl Phosphate (T.C.P.)
Triacetin
Ethyl Abietate
Solvents From Petroleum
25. Printing Ink Carbon Blacks
Carbon Black
Manufacture of Impingement Channel Blacks
Furnace Combustion Blacks
Furnace Thermal Decomposition Blacks
Lamp Black
Charcoal Black
Bone Black
Mineral Black
Graphite
Cabot Nigrometer Scale

26. Waxes
Nature of Waxes
Mineral Waxes
Paraffin Wax
Microcrystalline Wax
Petroleum Jelly
Ozokerite
Montan Wax
Vegetable Waxes
Carnauba Wax
Candelilla Wax
Animal Waxes
Beeswax
Wool Wax or Lanolin
Tallow
Synthetic Waxes
Carbowaxes
Condensation Waxes or Glycol Ester Waxes
Acrawax
Chlorinated Naphthalenes
Polyethylene Waxes
Polyamide Waxes
Other Waxes

Uses of Waxes in Printing Inks

27. Selection of Media and Pigments for Printing
Suitability of a Resin for Letterpress and Planographic Inks
Suitability of a Resin for Gravure Inks
Common Film Defects
Blooming or Blushing
Bubbling
Chalking
Checking
Cissing
Cracking or Flaking
Orange Peel
Pin-holding or Pitting
Wrinkling or Shrivelling
Webbing
Selection of Pigments
Comparison of Bronze, Ultramarine, and Monastral Blues
Nature of the Pigments
Masstone
Reduced Tones
Density and Oil Adsorption
Ease of Grinding
Resistance to Soap, Fats, Solvents, Water and Oils
Stability to Chemicals
Stability to Heat
Stability to Light
Pigmentation Limit
Length and Rheological Properties
Expense
Special Faults
Recommendations
Comparison of Chrome, Hansa, and Benzidine Yellows
Nature of Pigments
Specific Gravity, Opacity, Oil Adsorption and Brilliance
Grinding and Rheological Properties
Stability to Heat and Light
Stability to Acids and Alkalis
Resistance to Fat, Soap, Wax, Oil, Alcohol, and Water
Special Advantages and Defects
Four-colour Process Pigments
Madder Lake Scale Test
28. Surface-Active Agents, Anti-oxidants, And Adhesives
Surface-active Agents
Properties
Mode of Action
Evidence of Action
Types of Surface-active Agents
Lecithin
Uses in Printing Inks
Anti-oxidants
Gualacol
Methyl Ethyl Ketoxime
Adhesives
Gum Arabic
Starch
Dextrin
29. Analysis and Calculation
Detection of Driers in Varnishes
Identification of White Pigments
Examination of Ash for Inorganic Pigments
Ink Analysis
Method
Ink Technology Calculations
30. Principles of Ink Formulation
Colour Matching
Grinding
Consistency
Drying Times
Length of Ink
Printed Appearance
Machine Performance
Fading
Special Requirements
31. The Intaglio Process
Copper Plate Engraving
Mezzotinting
Principles of Photogravure
Preparing the Photogravure Copper Sleeve
Rotogravure Machines
Offset Gravure
Die Stamping
Hand Die-stamping Machines
Counter-sunk Dies
Power Press Die Stamping
Intaglio Inks
Types of Media for Copper-plate Inks
Principles and Characteristics of Steel-plate
Photogravure Inks
Rotary Photogravure (Rotogravure)

NIIR Project Consultancy Services (NPCS) 15/16
About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
