About the Book

"The Complete Book on Printing Technology" is a comprehensive guide designed to serve as an invaluable resource for individuals and enterprises interested in the printing industry. This book covers a wide array of printing methods including offset, gravure, flexographic, security, web offset, and pad printing. Each chapter is meticulously crafted to provide readers with detailed insights into the processes, machinery, and technological advancements in the field of printing.

Overview of the Book

This book provides a historical overview of the printing industry, tracing its evolution from traditional techniques to modern digital methods. It covers the inception of movable type, lithography and various printing forms like Offset, Gravure and Screen Printing, setting the stage for deeper exploration into each method.

The book also covers modern methods like 3D and Digital Printing, highlighting their applications across various industries. It also explores UV Printing and its components, providing a futuristic outlook on printing technologies.

The global commercial printing market size was valued at USD 494.53 billion and is anticipated to grow at compound annual growth rate (CAGR) of 3.0%. The increasing need of businesses and enterprises for advertising materials such as brochures and pamphlets is driving the demand for commercial printing services. Advertising is one of the excellent marketing tools. Increasing technological proliferation, such as faster presses and new color & toner technology, allows better production capabilities and superior quality. Additionally, technical development of printing techniques proves to provide cost-effectiveness and efficiency for bulk printing. The cost-effectiveness can prevent the restraining impacts of digital media on printing services to a certain extent.

This book serves as an invaluable resource for entrepreneurs, startups, business owners, and technical

personnel in the printing industry. It offers a blend of historical context, technical detail, and practical guidance, making it a comprehensive manual for both novices and experienced professionals in the field. Additionally, the detailed process flow diagrams, plant layouts, and contact details for machinery suppliers make it a practical guide for setting up or upgrading printing facilities.

"The Complete Book on Printing Technology" is an essential read for anyone involved in or entering the printing industry, providing the knowledge and tools needed to navigate the complexities of various printing methods and their applications in today's market.

Contents

1. Introduction 1.1 History of Printing 1.1.1 Invention of Movable Type 1.1.2 Lithography 1.1.3 Offset Printing 1.1.4 Intaglio 1.1.5 Gravure 1.1.6 Flexography 1.1.7 Screen Printing 1.1.8 Digital Printing 1.1.9 Hybrid Printing 1.2 Uses and Applications of Printing 1.3 Types of Printing 1.3.1 Offset Lithography 1.3.2 Digital Printing 1.3.3 Flexography 1.3.4 Gravure Printing 1.3.5 Screen Printing 1.3.6 Letterpress Printing 1.3.7 Thermal Printing 1.3.8 3D Printing 1.4 Structure of the Printing Industry 1.4.1 Pre-Media 1.4.2 Prepress 1.4.3 Press (Printing) 1.4.4 Postpress/Finishing 2. How to Start Printing Business 3. Plant Layout Description of Printing Business 4. Gravure Printing 4.1 History of Gravure Printing 4.2 Principles of Gravure Printing Process 4.2.1 Intaglio/Gravure Method 4.3 Advantages of Gravure 4.4 Limitations of Gravure 4.5 Characteristics 4.6 Main Sections of Gravure Printing Machine 4.6.1 Unwind Section 4.6.2 Printing Section 4.6.3 Drying Section 4.6.4 Rewind Section 4.7 Gravure Image Carrier Preparation 4.7.1 Hand Engraving and Printing 4.7.2 Gravure Image Carriers 4.7.3 Manufacturer of Gravure Cylinders 4.7.4 Gravure Cylinder Imaging 4.7.5 Gravure Engraving 4.8 Gravure Cylinder Preparation Methods 4.8.1 Preparing of Gravure Cylinder by Conventional Method or Carbon Tissue Method 4.8.2 Electronic/Electromechanical Engraving of Gravure Cylinders 4.8.3 Laser Engraving/Laser Cutting Process 4.9 Structure of Gravure Cylinder 4.9.1 Gravure Cylinder 4.9.2 Gravure Cylinder Components 4.9.3 Copper Plating and Polishing 4.9.4 Reusing the Cylinders 4.9.5 Ballard Shell Cylinders 4.10 Gravure Drying System 4.10.1 Gravure Drying Chamber 4.10.2 Gravure Solvent Recovery System 4.10.3 Higher LELs due to Solvent Recovery 4.10.4 Other Environmental-Friendly Solvent Removal/Reduction Systems Incineration (Thermal Oxidation) 4.11 Doctor Blade – Structure, Types, Mechanism 4.11.1 Doctor Blade 4.11.2 Structure and Mechanism of Gravure Doctor Blade 4.11.3 Types of Doctor Blade 4.12 Impression Roller - Structure, Types, Mechanisms 4.12.1 Structure and Mechanism of Gravure Impression Roller 4.12.2 Types of Gravure Impression Roller 4.13 Gravure Presses 4.13.1 Press Configurations for Packaging 4.13.2 Gravure Label Presses 4.13.3 Gravure Publication Presses 4.14 Solvent Based Inks, Water Based Inks, Uv and Eb Inks 4.14.1 Gravure Solvent Based Inks 4.14.2 Gravure Water-Based Inks 4.14.3 Gravure Uv Curing Inks 4.14.4 Eb-Curing Inks and Coatings 5. Screen Printing 5.1 History of Screen-Printing 5.2 Principles of Screen Printing Process 5.3 Procedure for Screen Printing 5.4 The Screen Printing Process Offers Several Advantages 5.5 Applications of Screen Printing 5.5.1 Screen Printing on Flat Surfaces 5.5.2 Screen Printing on Curved Surfaces 5.6 Main Sections of a Flatbed Screen Printing Machine 5.6.1 Frame 5.6.2 Base 5.6.3 Screen Fabric 5.6.4 Squeegee 5.7 Image Carriers Used for Screen Printing 5.7.1 Negative and Constructive Creation 5.7.2 Making a Screen Frame 5.8 Various Methods of Preparing Image Carriers for Screen Printing 5.8.1 Preparing the Screen by Knife-Cut Stencil Method 5.9 Photographic Methods of Making Screen Image Carriers 5.9.1 Preparing the Screen by Gelatine Process (“Direct” Method) 5.9.2 Screen Making By Photo Sensitive Films (5-Star Film) Method (Indirect or Transfer Method) 5.9.3 Chromaline Film Method of Screen Making (Direct/Indirect Method) 5.10 Mesh Selection 5.10.1 Mesh (Woven Screen Printing Fabric) 5.10.2 Materials Used for Screen Printing Fabrics 5.11 The Squeegee 5.12 Squeegee Selection 5.12.1 Shapes of Squeegee Blades 5.12.2 Squeegee Hardness 5.12.3 Squeegee Materials 5.13 Screen Pretreatment 5.14 Screen Stretching/Tensioning 5.14.1 Basic Steps in Screen Stretching/Tensioning 5.15 Stretching the Screen Printing Fabric 5.15.1 Manual Stretching 5.15.2 Machine Stretching 5.16 Types of Screen Printing Machines 5.16.1 Container Printing Machines 5.16.2 The Flatbed Hinged Frame Press 5.16.3 Automatic Flatbed Hinged Frame Screen Presses 5.16.4 The Rotary Screen Press 5.16.5 Carousel Machines 5.17 Screen Printing Inks 5.17.1 Components of Inks and Ink Systems 5.18 Screen Printing Ink Types 5.18.1

Planning a unit? NPCS project reports:

- Flexographic Inks project report
- Printing Ink project report
- Type 4 Cylinders project report

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Market Research, Manufacturing Process, Machinery, Raw Materials, Project Feasibility, Investment Opportunities, Technical Consultancy and Startup Help.

NPCS also publishes process technology books, technical books, startup books, directory, business database, detailed project reports and market research reports.

Our Detailed Project Report aims at providing all the critical data required by entrepreneurs for starting new business ventures.

NIIR PROJECT CONSULTANCY SERVICES
106-E, Kamla Nagar, New Delhi-110007, India
