Screen printing is a printing technique that uses a woven mesh to support an ink blocking stencil. The attached stencil forms open areas of mesh that transfer ink or other printable materials which can be pressed through the mesh as a sharp edged image onto a substrate. A roller or squeegee is moved across the screen stencil, forcing or pumping ink past the threads of the woven mesh in the open areas. Screen printing proves to be a good printing process for multi colour printing. Half tone printing is related to screen printing of photographs. Printings of photographs was at one time considered to be very difficult in screen printing, but now screen printed halftone photographs are also effective and economical in certain types of reproduction. Over the time stickers (transfer) have become an important medium of advertising. Now millions of stickers are printed every year through this method. Transfer stickers are of three types; instant transfer, heat transfer and water lade transfer. Gumming is an integral part of sticker production. Screen printing technique make use of and is compatible with a variety of materials, including textiles, ceramics, metal, wood, paper, glass, and plastic. It is this quality that allows this printing technique to be used in different industries, from clothing to product labels, fabric labels to circuit board printing etc. Screen printing industry experiences growth in the 10 to 15% per year rate.

Some fundamentals of this book are basic concept and classification of stencils, basic screen printing process, basic registration techniques, screen printing frames, pre treatment of screen printing fabrics, screen printing press, principal of screen process printing, printing on paper and card, printing on vertical surfaces, printing on shaped objects, cylindrical object printing, printing on uneven surfaces, ceramic and glass printing, printing on plastics etc.

This method of Printing has achieved wide spread popularity since the Second World War, although the basic ideas in this process were used by the Chinese centuries ago. The present book contains latest technologies of screen printing along with machinery photographs, addresses of suppliers of machinery and raw materials. This book will be very helpful to new entrepreneurs, existing units and for those who want to diversify in to this field.

## Contents

### 1. Introduction

What is Screen Printing?

Seeking a challenging and creative career?

Screen printing is ancient, yet a highly revolutionary industry

Print on virtually anything

Screen printing is universal - you see it everywhere

Screen printing is simple  
Screen Print Materials  
Frames  
Screen Mesh  
Screen Prep Tape  
Stencil Systems  
Capillex Film (Pre-Sensitized Photo Stencils  
G&S Pigment System  
Essential Components  
Base  
Pigment  
Resfix  
Anti-bleedScreen  
Softener  
Ink Retarder  
Creating Artwork  
Other basic Tools and Supplies  
Creating a Positive by Hand  
Rubbing Dry Transfer Lettering onto  
Clear Acetate (Transtay)  
For Straight Type  
For Arched Type  
Tracing an Image onto Matte Acetate  
Assembling Base Art  
Putting together all parts of your artwork -  
images and message  
Cutting the Image out of Masking Film  
Instant Positives with Velum (Drafting Paper)  
For All Multi-Colour Artwork  
Labeling Artwork  
Mesh Preparation  
Roughening the Mesh  
Procedure  
Degreasing the Mesh  
Procedure  
Preparing the Stencil  
Using Capillary Film  
Using Direct Emulsions  
Mixing the Emulsion  
Coating the Emulsion onto A Screen  
Storage and Handling of Stencil Materials  
Capillary Films  
Direct Emulsions  
Exposing the Stencil  
Positioning the Artwork: Size and Placement  
of Image on Substrate  
Positioning the Artwork on the Screen  
Exposing Units  
Table Top Exposing Unit

Stencil Removal/Screen Reclaiming  
Reclaiming A Screen  
Removing Tape And Ink  
Removing Stencil Material  
Procedure  
Removing Stains Or Ghost Images with  
Autohaze  
Procedure  
Roughening the Mesh with Autoprep  
Degreasing the Mesh with Universal  
Mesh Prep  
Review - Screen Reclaiming  
Fault Finding Guide  
Capillex Films  
Stencil film washes off mesh  
Ragged edges  
Fine detail filling  
Pinholes  
Poor adhesion  
Patchy stencil  
Difficult washout  
Direct Emulsions  
Sawtoothing  
Exposed emulsion washes off mesh  
Fine detail filling in  
Premature stencil breakdown  
Pinholes  
Scumming  
Image does not wash out at all

2. Screen Printing  
Historical Background  
Introduction  
Section 1  
Basic Concept and Classification of Stencils  
The Stencil  
Types of Stencils  
Fabric and Frame Preparation

Screen Fabrics  
Screen Frames  
Fabric Stretching Techniques  
Mechanical Stretching  
Hand Stretching  
Fabric Treatment  
Photographic Stencil Methods  
Direct Process  
Direct/Indirect Process  
Determining Photographic Stencil Exposures  
Indirect Photographic Stencil Process  
Exposure  
Development and Washing  
Application of the Stencil  
Drying

Squeegee Preparation  
Selecting the Proper Ink  
Product Characteristics  
Production Limitations  
Ink Preparation  
Basic Screen Printing Process  
Basic Registration Techniques  
On-Contact and Off-contact Printing  
Printing the Stencil  
Multicolor Printing  
Drying the Image  
Cleaning the Screen  
Removing the Stencil  
Troubleshooting Clogged Screens  
Halftone Reproduction in Screen Printing  
Methods of Halftone preparation for Screen  
Printing  
Fabric Selection  
Moire Patterns  
Printing Considerations  
High-Speed Production Presses  
Semiautomatic Presses

Fully Automatic Presses  
Special Machine Configurations  
Screening Cylindrical surfaces  
Carousel Units

3 Screen printing frames  
Pre-treatment of Frames  
Stretching equipment  
Pneumatic stretching clamps  
Advantages  
Mounting  
Components of the SST system  
Correct stretching  
Optimum tensioning force for different fabrics  
Stability  
Control of tension in measuring fabric stretch  
Stretching at a fabric angle  
Stretching methods  
Angled stretching with a prop profile  
Adhesive  
Adhering screen printing fabrics onto  
the frame  
Screen Storage  
The manufacture of diapositives  
Manual diapositives  
Photographically prepared diapositives  
Important  
Stencils  
Pre-treatment of Screen Printing Fabrics  
Stencil making  
Manual stencils  
Photo-mechanical stencils  
Manual stencil making  
The hand-cut stencil  
Water soluble hand-cut film  
Cellulose hand-cut film  
Causes of errors  
Bad adherence  
Turned-up film edges  
The direct stencil with emulsion  
General procedure  
Sources of errors with direct stencils  
Made only with emulsion  
Formation of fish-eyes after coating  
Air inclusions during coating  
Poor adherence of the photo emulsion after  
exposure  
Light scatter when copying (loss of detail)  
Saw-tooth effect  
Half-tone printing  
Difficulties in decoating  
Stencils for water-based inks  
Emulsions (photo emulsions)

Sensitizers  
CHROMATE photo emulsion  
DIAZO photo emulsions  
Printing requirements  
Lines  
Half-tones  
UV-inks  
Fineness of fabrics  
Examples for coating  
The direct stencil with film and emulsion  
General procedure  
Sources of errors with direct stencils  
made with film and emulsion  
Bad adherence of the film on the fabric  
Use of too fine a fabric  
Too hard or too sharp a squeegee  
Dust inclusions  
Too short an exposure time  
Error in exposure  
General procedure  
Source of errors with direct stencil  
made with film and water  
Bad adherence of the film on the fabric  
Insufficient treatment of the fabric  
Error in exposure  
Indirect stencil  
General procedure  
Sources of errors with indirect stencils  
Bad adherence of the film on the fabric  
Insufficient treatment of the fabric  
Insufficient degreasing of the fabric  
Too long an exposure time  
Inactive developer  
Drying the stencil with warm air  
Exposure  
Hardening of stencils for printing of water  
based colours in textile printing  
General procedure  
The hardening procedure  
Attention  
Suggestion  
The diapositive  
The stencil  
Steel and light-alloy frames  
The linear co-efficient of thermal expansion  
Frame distortion by fabric pull  
Warping of the frames under various  
mechanical stresses  
Steel versus Aluminium  
Recommendations for frame size and  
profile  
Screen printing fabrics  
Optimum tightness of the fabric stretch

Degree of Stretch  
Gluing the fabrics to the printing frames  
The printing substrate  
Stencils for half-tone printing  
Types of screen rullings

The squeegee  
Squeegee System  
Flood coat squeegee (Doctor blade)  
Printing speed  
Printing shaped objects  
Single operation multiple colour printing

4. The difference between multi-filament  
& mono-filament screen printing  
fabrics  
UV-Goldorange

5. Screen Printing Press  
The Screen-Printing Press  
Types of Fabrics  
Construction of Fabrics  
Mesh Count, Mesh Strength, and Mesh  
Opening  
Stretching The Screen Fabric  
How to Build A Screen-Process Press?  
Step 1 :Assemble Needed Materials  
Bill of Materials  
Step 2 : Construct the Frame  
Step 3: Attach the Screen Fabric  
Step 4: Tape and Seal the Screen  
Step 5: Prepare the Base  
Step 6: Hinge the Frame to the Base  
Step 7: Add a Frame Support  
Print drying equipment  
Constructing Specialty Equipment  
Screen Printing On: Papers, Textiles and  
Other Printing Substrates  
Type of Paper  
Principal of Screen Process Printing  
Common Types of Paper  
Color of Stock  
Textiles  
Type of Fabric  
Common Types of Fabrics  
Printing on T-shirts  
Plastics  
Types of Plastics  
Metals  
Woods  
Ceramics

Screen-Process Stencils

Hand-cut Paper Stencil

To Prepare a Paper Stencil

Step1: Image the Paper

Step 2: Cut the Stencil

Step 3: Adhere the Stencil

Hand-cut film stencil

To prepare a Film Stencil

Step 1: Prepare for Cutting

Step : Cut the Stencil

Step : Adhere the Stencil

Step 4: Remove the Backing Sheet

Photographic stencils

To Prepare an Indirect Photographic Stencil

Step 1: Prepare for Exposure

Step 2: Load the Frame

Step 3: Expose the Stencil

Step 4: Develop the stencil

Step 5: Wash Out the Stencil

Step 6: Adhere the Stencil

To Prepare a Direct Photographic Stencil

Step 1: Mix the Emulsion

Step 2: Coat the Screen

Step 3: Expose the Screen

Step 4: Process the Stencil

To prepare a Direct/Indirect Photographic Stencil

Step 1: Sensitize the Coating Solution

Step 2: Adhere the Film to the Fabric

Step 3: Expose the Stencil

Step 4: Wash out the Stencil

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
