No doubt flavour is one of the most important attributes of the food products we eat in our daily life. Man does not eat simply to live but even more so lives to eat. Flavourings are focused on altering or enhancing the flavours of natural food product or creating flavour for food products that do not have the desired flavours for example bakery goods and other snacks. Flavour is generally defined in terms of three components; odour, taste and texture. Its characterization is concern with the similarities in human flavour perception using methods that designed to average out the differences. The flavour of foods may be classified as natural flavour (pre existing in diet particularly in fruits, vegetables and spices), process flavour (arising in end products as a result of conventional processes), compounded flavour (intentionally added flavouring), taste modifiers and abnormal taste and taints. Some of the flavouring materials produced by processing are chocolate, cheese, blue cheese, yogurt, wine, aroma chemicals etc. The flavour industry has become a vital element in the growth and success of food and beverage industries worldwide. The flavours industry remains very country specific and complex, with product formulations and flavours varying from country to country, as well as from region to region within countries. Processed foods, their flavours and textures, are adapted to local consumer preferences. Local or traditional foods have unique flavours evolving from the indigenous climate, land, etc. Generally speaking, trends in flavours closely mirror those in the packaged food and drink market. This includes the trends toward premium quality, savoury, natural and authentic, and health and wellness. The global flavour industry can be characterized as highly technical, specialized, and innovative. This industry is highly competitive and concentrated, compared to other product categories within the food and beverage market. The global flavours market is predicted to grow at a Compound Annual Growth Rate (CAGR) of 2% per annum.

This book majorly deals with flavour in fruits and vegetables, additional pathways for vegetable flavour, change in food flavour after processing, flavours formed via fermentation, odd flavours in foods, odd flavours due to chemical changes in the food, relationships between the food and flavour manufacturers, flavour characters of herbs preparation of herbs for marketing, flavour constituents of grapes and wine, dried inactive yeast powder, synthetic flavouring materials, flavour potentiators, baked goods and bakery products, sugar and chocolate confectionery, techniques of sensory testing, fruit based products, gas chromatography, microbiological analysis

The present book contains formulae, processes of various flavours applied in food and beverage industries. This book is intended to be a practical companion to the flavourist, technologists, entrepreneurs, libraries or for those who are already in the field of manufacturing.

## Contents

1. Flavour Characterization  
Psychophysics

Flavour Chemistry  
2. Flavour in Fruits and Vegetables  
Fruit Aroma  
Flavours from Fatty Acid Metabolism  
Flavours from Amino Acid Metabolism  
Flavours Formed from Carbohydrate Metabolism  
Flavour Formation from Cysteine Sulfoxide  
Derivatives  
Flavour Formation from Glucosinolates  
Additional Pathways for Vegetable Flavour  
Formation  
Location of Flavour in Plant  
Plant Foods  
Genetics  
Environmental Effects on Flavour Development  
Influence of Maturity on Flavour Development  
Effects of Postharvest Storage Conditions on  
Flavour Development  
Animal Products  
3. Change in Food Flavour after processing  
Non-enzymatic Browning  
General Overview of Non-enzymatic Browning  
Factors Influencing Browning Rate  
Formation of Flavour Compounds  
Carbonyls  
Pyrazines  
Pyrroles  
Pyrroles  
Pyridines  
Miscellaneous Nitrogen Heterocyclics  
Furanones and Pyranones  
Sulfur Heterocyclics  
Oxazones and Oxazolines  
Flavours from Lipids  
Deep Fat Fried Flavour  
Lactones  
Secondary Reactions  
Flavours Formed via Fermentation  
Esters  
Acids  
Carbonyls  
Alcohols  
Terpenes  
Lactones  
Pyrazines  
Conclusion  
4. Odd Flavours in Foods  
Environmental Contamination  
Airborne Sources  
Waterborne Sources  
Disinfectants, Pesticides, and Detergents  
Packaging Sources  
Odd-Flavours Due to Genetics or Diet

Genetics  
Diet  
Odd Flavours Due to Chemical Changes in the Food  
Lipid Oxidation  
Nonenzymatic Browning  
Photo-Induced Odd-Flavours  
Microbial Odd-Flavours  
5. Flavours and Flavouring Materials  
Food Acceptance  
Taste  
Odour  
Flavour materials  
Natural Flavourings  
Artificial Flavourings  
Progressive Use of Synthetics  
Typical Synthetics

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
